Calistoga boasts of but one wine cellar. It is owned by Louis Kortum, and produces as yet but little. It is reported that Lang & Co., wine merchants, of San Francisco, will shortly commence the erection of a fine wine cellar at Calistoga to meet the needs of the growing vines. Hundreds of acres in this vicinity will come into bearing next year. The crop of the past season in this locality was almost a total failure, owing to the hot winds.

On the western outskirts of St. Helena, under the shade of protecting hills, lie many pleasant places. Mr. E. P. Palmer has here a large tract of timbered land, which he is busily clearing and putting in vines, expecting to make the roughest of country produce fine grapes. He has now only about 50 acres in vines, but is rapidly increasing his acreage.

Adjoining him, Louis Sander cultivates 51 acres of the old standbys, Riesling, Zinfandel and Chasselas, and makes about 25,000 gallons of wine a year.

Towards the south, at a short distance, lies the fine property of W. Schiffler, "Edgehill," who has now 180 acres in vines, chiefly of the finest foreign varieties. He is planting largely and has plenty of land for vineyard purposes. His wine yield this year was 100,000 gallons and the brandy product will exceed 8,000 gallons. Mr. Schiffler has recently added to his very complete establishment a large cooper shop, an action which attests hope for the future.

South of the city, away up in the hills, ex-Railroad Commissioner Beerstecher is at present devoting his talents to the raising of grapes. He has now about 50 acres in fine varieties and is planting to fill up an even hundred.

On the road leading from St. Helena to Napa lie several extensive vineyards, that of Capt. Niebaum being perhaps the most important. Capt. Niebaum is at present on an extended European trip, but his vineyard and wines are under the charge of a most competent manager, H. W. McIntyre. A fine rock cellar is under course of construction, and many other improvements are being made upon the place. In the vineyard are nearly 200 acres, in which the vines, though mostly young, are nearly all bearing. The product this year was 75,000 gallons of wine and 2,000 gallons of brandy.

At Rutherford Station, J. B. Atkinson has had a vineyard of 105 acres planted. These are all young vines and of the best varieties only.

A little further south is located the fine property of H. W. Crabb, whose vineyard consists of about 500 acres, largely bearing or beginning to bear. His wine yield this year reached 150,000 gallons.

In this vicinity, also, Messrs. Davis and Hastings have large vineyards.

Your correspondent's round of the St. Helena district concluded at Yountville, where is located the extensive winery and vineyard of G. Groezinger, having a record for the past season of 180,000 gallons of wine.

Fruit-Growing in Central America and Mexico.

No. 2.

[Written specially for THE MERCHANT.]

Outside of citrus fruit or other varieties of purely tropical origin, we met in the highlands of Central America with many fruit varieties of a northern origin, many which do well or grow to perfection in California. Among such we count apples, pears, peaches, figs and cherries. The similarity between our fruit and theirs is more a scientific one than one of outward appearance. It is somewhat astonishing that the varieties growing wild in northern latitudes, should be so similar to those growing wild or insufficiently cultivated fifteen degrees from the Equator. The climate and fertile soil of the southern countries seems not to have changed these fruits in the least for the better, and the latter gain nothing by being compared with their relations grown or originated under much less favorable circumstances. The apples of Central America are astonishingly similar to the smallest Russian crab apples, both in size and taste. Their size is that of a large cherry, the color yellow, taste tart and flavor quite agreeable. These apples grow wild on the highlands of Mexico, Guatemala and Salvador, and seem especially at home on the slopes of the many volcanoes, up to a varying hight of 5,000 to 7,000 feet, according to the latitude. A considerable trade is done in these small apples; the Indians collect them in great quantities and sell them in the markets at quite remunerative prices. When boiled these apples are excellent, but raw they are only palatable when there is nothing else to eat. I never heard of any one having endeavored to raise any seedlings with the object of creating new varieties with larger and better fruit. In fact, none of the natives know anything about horticulture, and the few foreigners who might know something, have most likely never expected to remain long enough in the country, to profit from any experimental horticulture. It may, however, be asked why, if wild apples grow there, could not our fine cultivated varieties be introduced? No doubt there are many places both in Northern Mexico and Central America where our apples would grow and grow fruit, but such places are very few. The greatest obstacle to growing northern fruit is the absence of frost, and some other peculiarities in the seasons.

I saw several apple trees in Guatemala; they grew well enough—in fact, never ceased to grow, never set fruit; in fact, never blossomed, and I never saw any fruit buds form. In places where frost and snow divide the seasons, no doubt both apples and pears could be grown; but then, such places are necessarily situated at a great altitude, and the question would arise, if any valuable varieties could be brought to maturity there. Around Quezaltenango, in the northern part of Guatemala, I heard that apples were cultivated, but I do not know if they were any better than the common wild ones. Perhaps they were. In Quezaltenango they have both snow and frost, the two requisites for growing the fruits of the temperate zones. Sufficient experiments have, however, not been conducted to decide the question whether apples and similar fruit could or could not be grown even in the lower regions, where the climate is nearly the same all the year round, except in regard to rain. Grafted on the wild apples of the country, no doubt, fruits might be produced of improved varieties of greater value. A foreign farmer had on one place grafted some pears on the wild Manzana or apple stock growing on his hill side; and he related to me that the tree thus produced had borne a quantity of large, fine fruit. But he was now leaving the country, and his experiment will most likely be forgotten. From this little experiment, however, it was plainly demonstrated that foreign grafts on native stock adapted themselves to the seasons and rested sufficiently to produce fruit buds.

GUSTAV EISEN.

A flutter has been caused in scientific circles by the announcement, in the *Union Medicale* of June 2nd, of the discovery, on piercing a new gallery in a coal mine at Bully-Grenay (Pas-de-Calais), of a series of very remarkable caverns. In the first were the intact fossil bodies of a man, two women and three children. Beside them were petrified pieces of wooden utensils and remains of mammals and fish, as well as stone weapons. A second subterranean cavern revealed eleven bodies of gigantic size, the fossils of several animals, and a great number of various objects, including precious stones. Into a third and larger chamber the miners could not enter, on account of the carbonic acid it contained. If all this turns out to be as true as it appears to be, the existence of prehistoric man is a stern fact, even to the most sceptical.—*Boston Globe.*

TOBACCO MARKETS.

SAN FRANCISCO—There have been a few sales of Sumatra and good Havana during the past week, but business closes dull with no prospect of further purchases of importance until the holidays are over.

The large dealers in manufactured tobaccos report a very light business this week and expect no improvement for at least a fortnight.

Our local cigar manufacturers are fairly busy and in spite of the loss of time by the holidays will probably show when the revenue returns for the month are known, a very good December business.

Some weeks ago we announced in the MERCHANT that a demand for an advance had been made and obtained by cigar makers, ranging from 50 cents to $1 00 per thousand, according to quality.

These Chinamen are now asking a further advance of $1.50 per thousand. If they obtain it, it will open the business to a large number of white cigar makers, who have hitherto been prevented by the low price of Chinese labor from earning a living on this coast. It will also destroy our Eastern export of low priced cigars by increasing the cost. Moreover, the gradual reduction of the number of Chinese on this coast by the usual departures and the restriction of immigration, will lead to the larger factories making medium and high priced goods, drawing from the other factories all the hands engaged in making cheaper cigars.

The Seal Rock injunction suit and petition for a receiver which has hung fire so long, again went over last Friday because a jury case was on trial On Tuesday the plantiff, Whitcher Jones, by his junior counsel, asked for a further postponement because one of the counsel was engaged in another court. The judge finally fixed the hearing for this morning at nine o'clock, limiting each counsel to two hours argument. There are other defendants besides Mr. Brandenstein who have little or nothing really to do with the affairs of the Seal Rock Co., but have had, with the main defendant, Mr. Brandenstein, to dance attendance on the court for week after week while the petitioner was seeking evidence in hopes of strengthening his case. We have some doubt whether an injunction ought to have been granted and more certainly we have doubts whether it ought to have been maintained when the plaintiff confessed he was not ready to prove his allegations.

[U. S. Tobacco Journal.]

NEW YORK, Dec. 8th—It is binders the people want. In all the dreary stillness of the market the cry for binders, at least, is breaking the monotony! While there is an abundance of cheap wrappers there is a striking dearth of binders. They are scarce in low as well as in fine goods. The unfortunate '82 Connecticut seconds made a gap in the usual yearly supply of binders. Those of other crops have been up to now heavily drawn on, and the void is severely felt. If the low-priced wrappers in the market possessed but one half less hide, elasticity and weight in body the demand could easily be filled. There is a peculiarity in the seed leaf in the market not exhibited in former years. With the exception of a little thin leafy stock, everything else is exceedingly thick. Outside of this unusual inquiry for binders there is a fine craving for so-called Little Dutch fillers. They sell at 18 to 24 cents, and appeal strongly to the nostrils, their flavor comparing with that emanating from a cup of camomile tea. As there seems to exist a decided preference on the part of the average smoker for something that smells "high," by which he inveigles himself into believing that he is using up a clear Havana cigar, manufacturers, especially the middle class, have settled upon Little Dutch fillers to suit the occasion. The whole crop of Little Dutch, whose birthplace is Ohio, only consists of a few thousand cases. As this amount, with the past and prevailing demand, has probably been almost exhausted, a suspicion lurks in our mind that Pennsylvania fillers and others are finding their way into the hands of unsophisticated manufacturers as being the only true and original Little Dutch. We repeat this is merely a suspicion, of which we cannot help feeling considerably ashamed, especially as a recent law suit in this city demonstrated the fact that the dealers and packers in the New York and market exclusively consider the sale of Massachusetts tobacco as Connecticut a practice which under no circumstances would they countenance. Outside of this unusually heavy demand for binders and Little Dutch fillers it was very dull in the market. Nearly all the manufacturers in this city, excepting those making very cheap grades, are working half time only. None of them express any regret at this. They see in the conservative demeanor of the jobbing trade a financially healthy condition of trade, and as there exists no reason whatever for a depressed or disorganized business in the near future, a strong and active trade is expected for the new year. The leaf trade need not harbor any extraordinary anxiety about the present dullness.

[New York Tobacco Leaf.]

NEW YORK, Dec. 8th.—*Virginia Leaf*—Nothing of any consequence was done this week. A few bhds of wrappers and cutters comprised the sales. Not much business will be done until after January 1, as manufacturers are pretty well supplied and will hold off until they take stock and balance their books for the year

Western Leaf—But little has been done this week, so far as reported Prices ranged from 7 to 10½ cents.

[Western Tobacco Journal.]

CINCINNATI, Dec. 10th.—There was a much better offering Saturday than has been made for some weeks past, but yet it was comparatively small, and consisted in most part of the commoner sorts. This was especially true of the Wisconsin, which constituted the majority of the offerings. Buyers were in attendance in full numbers, but, as may be expected, they were not moved to enthusiasm by an examination of the samples, and prices were low, but yet it seems full values were generally obtained, rejections not being very great. $6 50 was the highest price paid for Wisconsin. The sales were divided as follows: Morris House 50, Ohio 20, and Miami 19 cases

PRODUCE MARKET.

The Imports and Exports given below are up to Wednesday evening.

So far during the current month, the rainfall has amounted to only 0.11 of an inch, a much less amount than for any December, with one exception, since 1849. The fall during the past four years to date, compares as follows.

	Dec. 1st to 20th.	July 1st to Dec. 20th.
1883	11	3.61
1882	94	8.01
1881	2.76	5.70
1880	5.35	9.79

A comparison of the rainfall in this city from July 1st to December 31st, during the past ten years is as follows.

1882	9.11	1877	4.33
1881	6.58	1876	3.21
1880	12.73	1875	10.03
1879	9.29	1874	9.01
1878	2.97	1873	12.29

As usual at this season of the year croakers are numerous, and the predictions of a dry Winter are largely in the majority. If they are truly sincere in their belief, they have every opportunity to guard against paying high prices for grain and breadstuffs in the future, by making investments to any desired amount, on the "long" side of the market, for on Call sellers of futures are numerous and prices are now on the downward scale, and parties so investing can, if they do not receive the actual grain, reap a rich reward—providing their forecast proves correct.

It is true that owing to the lack of recent rains, plowing has been stopped in many places, but the ground in most cases is in such condition, that only comparatively slight moisture is needed to resume operations. We miss our guess if prior to the turn of the year we are not favored with liberal showers throughout the State.

FLOUR—
Imports, 1351 bbls. Exports 2245 bbls.
Receipts, of week, 60909 qr sks.

Extra, $5 75@6 00; Superfine, $4 00@4 75; Country ditto, $3 65@4 50. Interior Extra $5 00@5 50 per bbl for jobbing parcels to local consumers, but round lots for export can be obtained for some what less figures.

WHEAT—
Imports, 4 sks. Exports, 284980 ctls.
Receipts for the week, 249,674 ctls.

During the week the English and Continental markets have shown little change, but the general tendency at the close is towards lower figures. The fluctuations in the Chicago market have resulted in an advance of about 2c for all futures. The local market has been very weak and sellers being anxious to dispose of their Grain, while buyers hold off, prices are at a decline. In the Sample market Extra Choice can be had for $1 85, and No. 1 White is offered at $1 82½ with no takers at the latter figure. On Call yesterday, bids were as follows

For No. 1 White, regular, Buyer Season, $1 91; Seller Season, $1 79; Buyer 1883, $1 79; Seller 1883, $1 78, Buyer January, $1 78, Seller February, $1 84½ per ctl.

BARLEY—
Exports, 3485 ctls.
Receipts of week, 20850 ctls.
Though the weather continues dry, the market does not boom worth a cent. A bright sunshine and northerly wind for a few hour gives encouragement to the longs, but a few hours of overcast sky and southerly winds takes the starch out of them, and an immediate move is made to dispose of a part of their holdings, and in so doing the market shades off, only to regain its lost strength on the succeeding day, provided light airs from the North and sunshine are the rule. The shipments overland during November aggregate 11,756 ctls, of which 2918 went by the Southern Pacific, and 8838 by the Central Pacific.

By sample No 1 Feed, is obtainable at $1 05. Brewing ranges from $1 07½ to $1 17½ for Fair No. 2 to strictly Choice No. 1. Bay Chevalier, $1 30@1 40; Coast, do, $1 10@1 17½. On Call yesterday, No. 1 Feed sold as follows: Spot, $1 02; Buyer Season, $1 14@1 14¼; Seller Season, $1 02@1 02¼ per ctl.

OATS—
Exports, 672 ctls.
Receipts of week, 7760 ctls.
Nebraska forwards occasional car-loads. Arrivals from coast ports are light, and no recent important consignment has been received from Puget Sound.

We quote: Surprise and Milling, $1 75@1 80, No. 1, $1 65@1 70; No. 2, $1 50@1 60; Black, $1 50@1 55 per ctl.

CORN—
Exports, 93 ctls.
Receipts of week, 1049 sks.
California Yellow is quotable at $1 40@1 15; do White, $1 45.

BUCKWHEAT—
Receipts of the week, 39 sks.
Supplies are exceedingly light and it is probable that a fancy price could be obtained for a choice parcel.
We quote the market nominally $3 00@3 25 per ctl.

RYE—
Receipts of the week, ——— ctls.
We quote: No, 2, $1 15@1 20; No. 1, $1,30@1 35 per ct.

MILLSTUFFS—
Exports, 1677 ctls bran, 674 ctls millstuffs.
Receipts of week, 12,245 sks Bran, 2463 ctls Ground Barley, 2821 ctls ground feed.
We quote: Ground Barley, $23 50@24 per ton. Middlings are selling at $21@$22 00 per ton, Wheat Bran, $15 50@16 50 per ton; Oil Cake Meal $30, Feed Corn Meal, $35@36, Cracked Corn, $36 per ton.

HAY—
Exports, 106 tons.
Receipts of the week, 1077 tons.
We quote, Alfalfa, $7@$10; Wheat, $13@$15, Stable, $12 00@14 00, Wild Oat, $13@$15, Cow, $9@11, Barley, $10@12 50 per ton.

STRAW—
Receipts of week, 55 tons
Quotable at 55@65c ₱ bale, as to condition.

SEEDS—
Imports, 3222 sks.
Receipts of week, 55 sks alfalfa, 2052 sks flax
Flax quotable at $2 50@2 75 ₱ ctl, Canary, 5@5¼c; Alfalfa, 9½@10c ₱ lb, Timothy, 7½@8c for native and 8@9c for imported, Mustard, choice Brown; $3 00@3 25 ₱ ctl; White, $2 75@3 00, Hemp, 4c, Rape, 2½@3c.

BEANS—
Imports, 229 bgs. Exports, 300 ctls.
Receipts of the week, 1079 bags.

For a stranger to drop in on our Produce Exchange now a days, he would be apt to be reminded of a set of men who had gathered together for the purpose of paying their last respects to the memory of one of their number whom they would have no "chances at" hereafter. And it would fill the heart of one of "Our Eastern Friends" with joy to see "the street" any day for the past three weeks; it would give them so much food for exercising their "cuchaw" on the iniquity of the Chinese Restriction Act and of everything Californian—damn 'em.' However, the boys don't squirm much, they take their medicine kindly, assured that "it will be all right after the holidays." It is some years now since we have had such a long continued dull spell as we have had for the past month, and that we do not see any anxious faces or hear any mournful ma is a good criterion that "rainy days" have been provided for in more prosperous times by the average Produce Dealer. And speaking of them as a whole, if they do accumulate a few dollars, they invariably earn them by sheer hard work, close attention to business, early and late—many of them working nights and Sundays from year's end to year's end—never or but seldom straying from a true and earnest life, for if they do, they are lost. Every day and every transaction being different from any other, they are compelled, if they would be prosperous, to be forever on the alert, as everything they do on the wharf, on 'Change, in their stores or in their offices, c , a for their best judgment. There is nothing stereotyped, no precedent in Produce. And taking the men who are doing this business for the State of California to-day, we look upon them as as shrewd, hard-working, reliable, honorable, and true-hearted a class of men as can be well found in any community. And we mean what we say, and claim to have a little better right to say it than one who has not called them to account so frequently and in such vigorous terms as we have for the past year. And in making these remarks we do not do it to make amends or with any regret, for anything we may have said to the contrary, neither do we intend that it shall prevent us from bringing (as far as in our power lies) any crooked transaction that may take place in the future to public attention. And we buy our own whiskey!

But it is Christmas time. And at the season of the birth of the Great Exemplar who proclaimed "Peace on Earth and Good Will to Men" it is good for us that we have put forward all the milk of human kindness that we are capable of

Small Whites are not so strong. Pinks are doing better, Bayos also and so are Butters. Limas swell the head and feet better

Our quotations are, for round lots from the wharf. Small White and Pea, $3 12½; Bayos, $3 40, Pinks, $3 15, Reds 3½, Butters, $8¾, Limas, $3¾

VEGETABLES—
Prices are generally higher than last week under a poorly furnished market

We quote: Carrots, 30@35c, Turnips, 75c@$1 00; Cauliflower, $1@1 50 ₱ doz; Cabbage, 60@75c ₱ ctl; Garlic, 2½@3c ₱ lb, Celery, 50c ₱ doz; Dried Okra, 30c ₱ lb; Dried Peppers, 12c ₱ lb; Tomatoes, 50@75c ₱ box, Artichokes, 40@60c ₱ doz; Beets, 75c ₱ ctl, Parsnips, $1@1 25 ₱ ctl, Marrow Fat Squash, $20 ₱ ton; Mushrooms, 10@12c ₱ lb.

FRUITS—
Imports, 30 bxs apples. Exports 31 bxs fruits, 3100 bxs apples.
There is quite a boom in California new crop Oranges. A syndicate of San Francisco produce dealers are buying up all the Riverside Oranges at from $2@5 per box. It is a risky business, but if carefully conducted may be made to pay big money, as the Florida crop is reported a failure.

We quote: Domestic—Strawberries, 30c@—₱ chest; Apples, 50c@$2 00 ₱ box; Pears, 75c@$2 00 per box; Cape Cod Cranberries, $18 00 ₱ bbl; Western do, $17 00@17 75 ₱ bbl.
Tropical—Lemons, 86 50@7 per box for Sicily. Limes, $12 00@13 00 per box for Mexican; Tamarinds, 12@13c per lb; Bananas, $1 75@4 00 per bunch; California Oranges, $2@3 for old and $5@7 for new; Loretto Oranges, $20 50@22 50 per M.

NUTS—
Imports, 3345 bgs nuts. Exports, 27 sks.
We quote: Cocoanuts, $6@6 50 ₱ 100; California Walnuts, 9@9½c ₱ lb; Chili do, 8½@9c, California Almonds, hard shell, 7@8c; soft shell, 13@14c, Filberts, 15@16c; Pecan, 13@14c; Peanuts, 5@5½c, Brazil Nuts, 15@16c; Hickory Nuts, 7@8c.

The crop of Almonds this year is very large, and were it not for the small crop in France and Germany almonds would be "given away." As it is, large quantities are going East at low rates. The general demand for Nuts is large in a jobbing way for the hoi' day trade

HONEY—
Exports, 1 cs.
We quote: Extracted, 5½@7c; Ex White Comb 18@20c; White, 13@16c, Dark, 8@10c.

The demand at present is entirely retail. A better inquiry is looked for after the first of the year.

BEESWAX—
We quote 26@30 c per lb.

DAIRY PRODUCE—
Imports, 2 cs 100 lbs butter, 14790 lbs cheese.
Exports, 2293 lbs butter, 2504 lbs cheese

Quotations are unchanged, but the market has a very weak tone. This is due to full arrivals, as business is brisk.

We quote: Point Reyes, 37½c; Choice, 32½@c 35; Fair to Good, 22½@30, inferior lots from country stores, 16@17c, firkin, 20@21c for old and 24@ 25½ for new, Eastern, 15@17c; Pickled Roll, 25@ 27½c; Cheese, California, 10@13c for choice; 11@ 12c for Fair to Good; Gilroy, in drums, 16@18c, Eastern, 17@18c; Western, 10@15c.

OLEOMARGARINE—
We quote the range from 20 to 22c, according to package

HOPS—
Imports, 80 bls. Exports, 575 lbs 1 bl.
Receipts of the week, 163 bls.

There is no change in the condition of trade, unless we may say that it is even duller than last week This condition of affairs may be expected to last till after the month of January.

ONIONS
Exports, 210 ctls
Receipts of week, 2235 sks

We note a more liberal arrival of good quality and a slight depreciation in prices; choice sell at 85c readily

GAME—
We quote: Quail, 1@1 25 ₱ dozen; Hare, $2 00@2 25; Rabbits, small, $1@1 25, cotton tail $1 25@1 50 ₱ doz; Teal, 75@87½c; Sprigs, $1 50@1 75; Widgeon, $1 25@1 37½; Mallards, $2 25@2 50 ₱ doz; canvas-backs, $3 50@4 00 per doz; common snipe, 50c@75c ₱ doz; do, English, $1 25@1 50 ₱ doz; Grey Geese, $2 25@2 50 per doz; White Geese, $1 25@1 50; Honkers, $1 50@ $5 00 per doz.

POTATOES—
Imports, 413 sks Exports, 1735 ctls.
Receipts of week, 39375 sks.

The Rivers tread so closely on to the heels of the Petalumas and Tomales in quality, that it is hard to find customers for the latter when the former are being sold at such ruinous rates.

We quote: Early Rose 50@65c; River Reds, 40@ 45c; Tomales and Petaluma, 85c, Cuffy's Cove, 90c; Humboldts, 90c, Sweets, $2@2 25.

WOOL—
Imports, 5 bls. Exports, 3 bls
Receipts of week, 105 bls
For Wool market see Wool Department.

HIDES, SKINS, ETC
Imports, 859 bdls hides, 20 bls 18 bdls 90 tons tallow.
Heavy Salted Steers, over 55 lbs, 10c@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½c Light Salted Cows and Steers, 40@50 lbs, 8c per lb. Salted Kips, 10c per lb Salted Veal, 12½ per lb. Salted Calf, 15c per lb.
Dry Hides, usual selections, 17——c per lb Dry Kips, do, 17g—c per lb. Dry Calf, do, 17@21c per lb.

POULTRY—
There is a great competition among our commission men to obtain Turkeys for Christmas, some going so far as to buy them outright from the farmers. Turkeys have never been so scarce as they are now, and we may expect to see even higher prices at Christmas than were ruling during Thanksgiving season

We quote Turkeys, live Gobblers, 22@23c per lb; Turkey Hens, 22@23c; Dressed, 24c. Young Roosters, 86 00@7 50, Old Roosters, 86 00@7 00; Hens, 86 00@7 50; Broilers, 85 00@6 00, according to size; Ducks, $11@12 50 ₱ doz; Geese, $2 25@ $3 00 per pair

EGGS—
Imports, 15 cs. Exports, 633 sks
Eggs coming in very slowly and prices have advanced. There are very few Eastern Eggs on hand and no large consignments are expected for some time,

We quote: California Eggs, Choice Ranch, 40@ 42½c per doz; California limed, 32½@36c, Eastern, 35@37½c for fresh; limed, 22@25c.

Customs Duties.

Duties paid at Custom House for week ending Dec 20, 1883. Duties payable in United States gold coin, standard dollars or greenbacks.

Meat Market.

Beef is firm with an advancing tendency, there being an impression that highest prices have not yet been reached Mutton is in fair supply and rather easy at quotations. Hogs are firm and in quick demand for packing Following are rates for whole carcasses from slaughterers to dealers:

BEEF—First quality, 5½@6c; second quality, 6½ to 7½c; third quality, 5½@6c ₱ lb.
VEAL—Large Calves, 8½@9c, small ones, 9@10½c ₱ lb.
MUTTON—Wethers are quotable at 5½@6c and Ewes at 5@5½c ₱ lb, according to quality.
LAMB—Spring is quotable at 7@8c ₱ lb.
PORK—Live Hogs, 5½@5¾c for hard grain hogs on foot; dressed do 7¾c.

THE WHEAT FLEET.

During July, 9 grain vessels cleared of 12,622 register tonnage carrying (including 1602 ctls, valued at $2671, shippe to miscellaneous ports) 385,680 ctls of Wheat valued at $509,231 besides 31,018 bbls of Flour valued at $177,533, which includes 30,100 bbls valued at $121,513 shipped to China and elsewhere.

During August, 24 vessels cleared of 32,830 register tonnage carrying (including 1922 ctls, valued at $8,390, shipped to miscellaneous ports) 956,699 ctls of Wheat valued at $1,061,039, besides 80,614 bbls of Flour valued at $422,558, which includes 45,503 bbls valued at $221,-043 shipped to China and elsewhere

During September, 36 vessels cleared of 53,106 register tonnage carrying (including 1842 ctls, valued at $3,187 shipped to miscellaneous ports) 1,752,317 ctls of wheat valued at $2,700,055, besides 78,650 bbls flour valued at $391,174 which includes 57,455 bbls valued at $275,121 shipped to China and elsewhere.

During October 36 grain vessels cleared of 49,829 register tonnage, carrying (including 2,255 ctls, valued at $3,899, shipped to miscellaneous ports) 1,905,057 ctls of wheat, valued at $2,519,-158, besides 103,941 bbls of flour, valued at $505,882, which includes 78,479 bbls, valued at $161,541 shipped to China and elsewhere.

During November, 39 grain vessels cleared of 52,932 register tonnage, carrying (including 2395 ctls, valued at $4272, shipped to miscellaneous ports) 1,522,204 ctls of Wheat, valued at $2,-613,886, besides 172,972 bbls of Flour valued at $731,738, which includes 13,965 bbls valued at $209,065 shipped to China and elsewhere.

VESSELS CLEARED SINCE DECEMBER 1st.

JAPAN—Per same—1 cs eggs, 1 cs fish, 421 cs oil, 1 bag seeds, 3014 pkgs tea, 175 cs miscellaneous.

Freights and Charters.

There has been very little done in charters since our last review of the market, but on the whole there is a better feeling. There is nothing in England or in the Wheat market here to indicate any improvement in freights, but the vessels chartered to arrive are now almost exhausted, and free ships will not touch the prices that have been ruling during the pressure of rechirters A British iron ship, the Moralta, 1,267 tons, was closed yesterday at 30s. Cork, U K., an apparent advance of 3s. 6d., but probably this could not have been duplicated All free ships in port are looking for outside business in any quarter, to furnish a few months' employment however meagre in profit, but with poor success Wood ships are out of the market entirely.

The engagements of the week have been British ship Lochspynie, 1274 tons, wheat to Cork, U K., private; French bark Jean Pierre, 455 tons, lumber to Panama Norwegian ship Herman Leinkuhl, 1309 tons, wheat to Cork, U K., or continent; 2500 tons limit Lumber to arrival. French bark Petit Bourgeois, 511 tons, goes North for coals. Norwegian bark Dr Mezger, 726 tons, redwood lumber to Scotland; private. British ship Glenamoy, 1498 tons, wheat to Falmouth for orders. Norwegian schooner Thlok, 148 tons, returns to Mexico Brig Consuelo, 279 tons, returns to Honolulu. Ship Annie H Smith, 1503 tons, coal from Seattle this port, 22-25. The British ship Respigadera has lost her charter, through inability to get her ready for stiffening before her cancelling date. She proceeds in ballast to Australia to load for this port. Ship Richard III, 585 tons, coal from Departure Bay to Wilmington British ship Morialtar, 1267 tons, wheat to Cork, U. K., 30s.

Finance and Trade.

There appears to be a good demand for money in this market. The limit of time for the payment of taxes without incurring the fine is fast drawing to a close, and the large tax-payers generally wait until the last week before meeting these obligations. This is taking considerable spare coin from the market. Then there is an active demand for coin for remittances to New York, and the rates for drafts are above the shipping point by mail, so that possibly some may be going that way. Commercial paper is discounted at 7@8 per cent., and there is more at the latter figure than formerly. The Savings Banks are taking mortgages on city property at 6@7 Domestic exchange is quoted at 20@25c premium for sight drafts on New York and 30@35c for telegrams. Bank bills on London are drawn at 489¾ for 60 days; commercial bills on London, 50d; Refined Silver, 13¾@14¼ per cent. discount; Mexican Dollars, 88½@89c.

Trade Failures.

There were 246 failures in the United States reported to *Bradstreet's* during the week ending Dec. 8th, 14 more than the preceding week, 1 less than the corresponding week of 1882 and 77 more than the same week of 1881. About 70 per cent. of the failures were those of small traders, whose capital was under $5,000. The important firms reported embarrassed were John Paret & Co., wholesale clothing, E. Langsdorf & Co., clothing, S. M. Meyenberg & Co., silk manufacturers, and John H. Morrell, storage, New York city; The Dover Silk Manufacturing Company of Paterson; George D. Emery, mahogany, Chelsea, Mass.; Coates & Brother, rolling mill, Baltimore, and the Bank of Pike County, Pittsfield, Ill. Compared with the preceding week the increase included 58, an increase of 14; New England states 23, a decrease of 6; southern states 58, an increase of 16; western states 91, an increase of 1; Pacific states and territories 15, a decrease of 11; Canada and the Provinces 33, a decrease of 1. In the principal trades they were as follows: General stores 52; grocers 34; clothing 20, manufacturers 20; dry goods 15; liquors 11; shoes 10; fancy goods 7; drugs 7; hotels and restaurants 6; hardware 5; hats 5; jewelry 5; bakers and confectioners 4; furniture 4; grain, flour, etc., 4, millinery 4, produce and provisions 3, lumber 3; books and stationery 3; harness 3, silk 3; leather 2; men's furnishing goods 2; tobacco and cigars 2; banks 1.

Spirit of the New York Markets.

NEW YORK, Dec 12th.—The merchandise markets remain quiet, the demand being strictly in accordance with the well ascertained requirements of distributors. Speculation is as dead as Julius Cæsar, and trade may be said to be upon a pre-eminently healthy basis, unless exception be taken to forced sales to realize money which cannot be obtained on mercantile paper at the banks and discount houses. In this connection, it may be added that the banks come in for no little advance criticism for their refusal to be their execs of caution after having helped by their excess of credulity in the past to bring about the existing stagnation and depression. This line of criticism is not without force, but the banks and their individuals evidently have a just appreciation of the axiom that self-preservation is the first law of nature, and if reckless paper is manufactured that they will deem the bolstering up of weak firms to be a part of their duty to their stockholders. In the produce markets, there has been a revival of speculation in Wheat, Corn and Hog products, and prices are sharply advanced. The export trade, in consequence, is slow, but the people having learned the wisdom of economy in the use of foreign productions, the import trade has also suffered a diminution in volume. While the conditions of trade are not favorable for merchants and business men, it would seem that the country is in a healthy condition, when weighed in the scales of the balance of these years' trade, in the excess of the country's exports over imports being well on to one hundred millions. Spot Cotton is dull and weak and Futures lower, as are also most kinds of Cotton goods, which were never before so low Wool and Woolens are dull and depressed. Refined Petroleum has advanced a quarter of a cent per gallon, but Crude certificates have declined. Naval Stores, Hops, Hides, Leather, and India Rubber are quiet and steady Drugs and Dyes are generally steady with a good jobbing trade. Foreign Dried Fruits are active and generally steady. Green Freights are exceedingly dull, and for the most part depressed. Raw Sugar is quiet and about steady; Refined is easier with only a partial demand. Molasses is quiet. Coffee is dull and nominal. Tea is firmly held, with a fair inquiry. Rice is unchanged. Spices are quiet and easier. Pig Iron is slow of sale, but steady. Pig Tin is lower. Lead and Copper are without quotable change, and quiet.—*Shipping List.*

W. W. Montagne & Co. have removed their immense stock of stoves, ranges, pumps, kitchen and tinware, pipes, metals, mantels, grates, tiles, etc., to their magnificent new premises in O'Brien Block, 309, 311, 313, 315 and 317 Market street. In the several lines in which this old-established firm do business, they carry the heaviest stock on this side of the mountains, and have now on Market street the largest premises devoted to the business, besides their storage warehouse in another part of the city. On Monday next, December 23d, the office business, as well as that of sales, will be transacted in the new quarters.

San Francisco takes the Lead.

The oil refinery for handling whale oil is approaching completion in San Francisco. The greater part of this season's catch will be refined at these works. Heretofore the oil was shipped to the east in an impure state, after being refined was distributed throughout the country, the Pacific coast buying back what it required. Henceforward San Francisco will be the point of distribution. This is an important industrial change. The whaling center of the world, by all appearances, will be transferred from New Bedford to San Francisco. This change of base is being rapidly made owing to the employment of steam in whaling and to the proximity of San Francisco to the whaling grounds.—*Bradstreets.*

A Franklin County (Tenn.) farmer realized the past season $8,000 from eighty acres of strawberries.

The manufacture of paper in the United States has during the last thirty years increased from 11,650 to 726,000 tons.

RETAILER'S CORNER.

The principal business of our jobbing houses at present is settling accounts both credit and debit's so as to have the books as clear as possible on the first of January. Stock taking has also commenced in some cases, while others are killing time by perusing the Christmas periodicals. The trade of the year may generally be placed as good, but that bugbear of our wholesale houses, excessive competition has cut down profits to a very low point. This year we have not had the benefits of the Grocers' Exchange which whatever else it might not have done, at least kept up contract prices on open sales. But now there are no contract prices except on sugar on this coast, and jobbers cut on one article as much as on another. Many of our wholesale houses will find that though the aggregate of business done has been large, yet the profits have been very small.

SUGAR.

The local demand has been very good during the week, considering the season of the year, but the demand for grocery sugar is very light. In New York the Sugar market has been very dull for some time, and in the early part of the week there was a decline in prices, even now at the reduced prices there is a strong tendency to further reduction. Both in New York and Chicago stocks of Yellow are larger than those of White, and New York refiners are curtailing their output.

COFFEE.

The local market continues very dull and stocks are being very slowly reduced. Jobbers are not disposed to buy one pound more Coffee than they can possibly help till the new crop arrives, as the local market is above the parity of New York since the recent declines. But importers will not reduce their asking rates, as they know they can obtain present prices for actual wants and the stock is so small that what they may carry over in consequence will amount to nothing. The New York market has been very quiet on the basis of 11 c. for fair. This quotation is entirely nominal, as no transactions are reported. Buyers will not give that figure and sellers will not make any reductions till there is some disposition shown to purchase. Stocks there are accumulating and recent cables from Rio gave the previous day's receipts at 27,500 bags, and the market left off so demoralized that there was no basis for quotations and literally no market. The important features of the cable advices at hand from Rio have been full receipts, the average last week being about 15,000 bags, and for the first two days this week 25,000 do. With only moderate purchases, both for this country and Europe, stocks have increased to 407,000 bags, and prices have declined one-quarter of a cent, with the market weak at the decline.

RICE.

There is no change in quotations, except in Good No. 1 China, which is not so scarce, and therefore a shade lower. Hawaiian is very dull at unchanged figures. The stock of low grade Carolina Rice at the Eastern centres is quite small and prices are very firm, and with any increase the demand will advance. The best grades are rather neglected but as stocks are small, prices are well maintained.

CANNED GOODS.

There is absolutely nothing doing in this line. Stocks are small and we will have no activity till the opening of the Spring trade. From Chicago we hear the same reports of dull trade and waiting marks its without any subject.

DRIED FRUITS.

The holiday trade in these goods and nuts is now very active, especially in peels, etc. The Almond crop is very large and a great deal has been forwarded East; if it were not for the shortness of the French and Spanish crops, we should see very low prices.

MERCHANDISE MARKETS

The prices given below are for car load lots and wholesale consignments

BAGS AND BAGGING—
Imports, 10 bls bags. Exports, 16 bls bags.
Standard Calcutta Wheat bags, steel, sell for 7½c. June and July 7½@7¾. Potato Gunnies 5¼ and 11c.

Cocoa, 45c ₩ lb; Colman's Mustard, 60c ₩ lb.

COAL—
Imports, 14705 tons Pac Coast, 2141 tons Foreign and Eastern. Exports, 15 tons.
There has been a marked abatement in the arrivals of Coal this week, which happens very opportunely, and wharf room has been in demand, and coal teams for hauling are difficult to procure, the drawbacks will be remedied this month.
No special changes to note since our last week's report, holders are firm at dull figures, and make no concessions, and consumers are becoming generally satisfied of the likelihood of a decline for several months to come cannot be expected, and that any probable change in price will be against them

In fact our only hope for any abatement in price is Rain, an I the actual effect from that would not be before June or July

The asking rates of freight on Foreign Coals at all points of supply have been advanced this week.

Importers prices of coal, Foreign and American, to arrive: Australian, $8 50@8 75, Liverpool Steam, $8 50@8 75, West Hartley, $8 75@9 00, good to prime, $9 50, Lambton Steam, $8 75@9 00, Lump Lehigh, $13 75@14, Egg Hards, $13 75@14, Cumberland, bulk, $10@10 50. Spot prices are as follows: Australian, $8 75@9 00, Liverpool Steam, $9 00, West Hartley, $9@9 50, Scotch Steam, $9 50, Lambton, $8 00, Lehigh Lump, $13, Cumberland, bulk, $11 50, Egg Hard, $11 50.

A. D. HILL, Editor.

FRIDAY DECEMBER 21, 1883.

It does not look, judging from the reports from Europe, as if there would be any scarcity of wheat on that continent next Summer and Autumn. The European markets do not corroborate the predictions of some of the wheat statisticians.

The Christmas Number of the *News Letter* in elegance will compare with any Christmas number published in the United States. Besides three large colored lithographs of well known buildings, for which, possibly, advertisers pay, it contains nine well executed wood engravings from modern paintings. The chief advertisements are printed in two colors. The cover is a beautiful work of art and, if a California design, speaks well for our artists. Altogether, we congratulate Messrs. Marriott on having produced something worthy of being called a Christmas Number.

The *Chronicle* published an extraordinary story the other day about a well known prostitute being released as she was leaving the Court in which she had appeared on habeas corpus and ordered remanded to jail, on a pardon by Governor Stoneman; and moreover asserts that this pardon, granted apparently in advance of the judgment of the Court, was obtained through the influence of Boss Buckley, who received $600 for his services. We do not believe it, or rather we believe that Governor Stoneman was grossly imposed on. He would not knowingly have granted a pardon to such a person, and certainly not before final judgment had been rendered.

The whale-oil men of California are wiser in their generation than the wood growers. The former have got tired of shipping whale oil East in an impure state and have combined to erect a special refinery. The wood growers continue to ship their fences East largely in the grease, and buy them back in the form of clothing. Why not, at least, spin the wood into yarn before shipping? If all numbers in yarn could be bought in this State, there would be a dozen looms in the State where there is now one.

EAST SIDERS.

The Supreme Court of Ohio has for seventeen years decided in favor of the annexation of the State of Kentucky, with the exception of one or two brief intervals, but on each of its decisions dispensing justice between litigants and confirming rightful judgment on convicted criminals, but to the searching for unimportant technicalities on which by the aid of ingenious but sophistical arguments, they could reverse the judgments of the Courts below. The Supreme Court in acting thus ignores law and justice, screens criminals from just punishment, oppresses poor litigants, plays into the hands of unprincipled rich men and tarnishes the fame not only of our Courts but of the whole State. We do not believe that these men are openly corrupt, but its members certainly expose themselves to the suspicion of wrong, and give hasty persons some ground for charging them with the vilest crime known among civilized people. The resignation of the whole crowd and the refilling of their seats with men who are not only learned in the practice of law, but under and in open ægis and give effect to them in a common sense manner, would be hailed with delight by the great majority of Californians. The law as announced from the Supreme Bench should be the highest expression of human justice. As it has been administered for years by this Supreme Court and its predecessors, it has been made an instrument for preventing the punishment of convicted criminals and the collection of debts from rich men by honest but poor suitors. With educated and high principled lawyers on the Bench, "Murderers' Row" in our County Jail would not be crowded by men whose crimes should have been expiated on the gallows months and years ago; plaintiffs would not have been kept for nearly a score of years out of their rights (Cox vs. McLaughlin is only one case out of many) and the judicial business of the State could be easily transacted by one-half the number of Superior Judges. How long will Californians stand the outrage of denial of justice? Just now a tragedy has aroused their attention to the delinquencies of our Supreme Judges; will they by moral pressure compel the Supreme Court to reform its methods of dealing out law or will the people forget this grievance until other tragedies and more glaring failures in justice re-arouse their indignation?

HOW THE LAW READS.

The Supreme Court Judges ought to know the law, but whether or no they had ever by their own reading found the law which rules their proceedings, we know that on several occasions counsel have called their special attention to the following Section, 175, of the Code of Civil Procedure of this State.

"THE COURT MUST IN EVERY STAGE OF AN ACTION DISREGARD ANY ERROR OR DEFECT IN THE PLEADINGS OR PROCEEDINGS WHICH DOES NOT AFFECT THE SUBSTANTIAL RIGHTS OF THE PARTIES, AND NO JUDGMENT SHALL BE REVERSED OR AFFECTED BY REASON OF SUCH ERROR OR DEFECT."

Therefore, it is clear that in every decision the Supreme Court of this State has made on technical grounds, when the judgment or verdict of the Court below was consistent with substantial justice, the Supreme Court has wilfully and designedly ignored the law, and itself become a law breaker. We do not care whether these decisions have been ordered from men more subservient or corruption. The Court is unworthy of the confidence of the people and from shame and cannot be held to it.

THE CHRONICLE'S VOMIT.

The *Chronicle* is now emitting every absurd and false accusation against the Hawaiian Government, the sugar planters, and the refiners of this city. All are reiterated except that foreign raws and rice were smuggled into the Islands and then reshipped to this country as Island produce, and that the Hawaiian-grown sugars now coming into this country are of higher grade than what were commonly known in this State as Sandwich Islands sugars in ante-treaty days. These two charges were so overwhelmingly refuted by the report of the Commissioners, that, much to the chagrin of the *Chronicle*, it has had to drop them but the slavery bosh is repeated nearly every week, and even the absurd story that the refiners of this city are subsidizing the railroads to keep Eastern refined sugar out of this market. This latter story has been denied again and again by the Messrs. Spreckels, and in the expressive language of Col. Spreckels, "It is a lie made out of whole cloth, that either he or any one connected with him, directly or indirectly, has paid any railroad company or railroad officer a dollar in consideration of their fixing freights westward." This story never had a foundation to stand on, and no one ever fathered it. It first appeared in a San Francisco trade weekly as a rumor, and passed, as many other such items do, into some local general paper as a fact. Next a well known anti-railroad gentleman, without further authority, incorporated it in a letter on supposed corporate misdeeds written to the New York *Nation*. It has been contradicted again and again, but men who have selfish ends to gain are not ashamed to use a known falsehood if it may perchance help them to gain their ends.

The railroads' action is a simple business proposition; the refiners here can and will supply this market, however the railroads might cut rates, and therefore such cutting of rates would only injure themselves by lessening their receipts from the transportation of a few thousand pounds of sugar every month en route from Canada to British Columbia. The spirit which actuates the *Chronicle* may be guessed from the fact that its reporters criticize adversely the panorama of the Hawaiian Islands, because it gives, among many other views, one of the famous sugar works of the Hawaiian Commercial Company on Maui, one of the main streets in Honolulu, showing among other buildings that in which Mr. Spreckels' Island partner carries on his business, and one of the Oceanic Company's steamers entering the harbor of San Francisco. The *Chronicle*, in its eagerness to win its contingent fee from New York refiners, has sadly overdone the case and furnished evidence in its own columns of its venality.

Elwood E. Thorne on Hawaiian Affairs.

In the October number of the Consular Reports are found the questions submitted to the Sandwich Island sugar planters last June by Elwood E. Thorne, of New York city, together with the answers thereto. In view of the interest which has been excited on the subject of the alleged fraudulent importation of Hawaiian sugars on the Pacific coast, either as to color of sugars or sugars not Hawaiian imported as such, the replies made at a full meeting of the Hawaiian Planters' Labor and Supply Company July 19, will warrant consideration. It appears to all, or almost all, that Hawaiian sugars are of a uniform standard coloring, and that the general custom as to their color is from No. 6 to 16, Dutch standard. Previous to 1876 (the passage of the treaty) the grades were 6 to 20, which were known in the San Francisco market at that time, when they were sold as grocery grades and so polarized. No muscovado or brown sugar (made in pan and dried by gravity) had been made in the Islands for twenty-five years, drying by centrifugals having been introduced in 1852. Vacuum pans were first used in 1863, and double and triple effects were introduced in 1879. Before 1879 the grades turned out by open pans and centrifugal drying were from 14 to 20, Dutch standard; since they have been 12 to 15, and previously the grade was explained to have been as much above No. 10 as it was possible for the grocers' trade. No new article of sugar has been produced by the changed process, but the cost of making has been reduced. There are more fining processes used in the Islands. Lime is used in making the sugar, which it discolors. The average yield per acre of plant cane is $3^1/_4$ tons; of first ratoons, estimated, 2 tons; of second ratoons, $1^1/_2$ tons—very little cultivated. An extraordinary yield is 6 tons to the acre. The company said it was impossible to give the cost of production of sugar per pound. The rates of interest there are 7 to 10 per cent, and the wages of laborers $17 to $30 per month, labor always being scarce.

It was furthermore explained that the present inducement for extensions or improvement of plantations is very poor. No survey has been made of the area of cane growing, although one has been proposed. The limit of production was said to be about 80,000 tons per annum. The Islands exported about 13,000 tons before the treaty. The stimulus since was, of course, the treaty provisions, and the influx of capital, mostly from the United States. The sugar was sold in San Francisco on the basis of Manila and in New York on that of Cuban centrifugal.—*Bradstreets*.

Deep Water for Portland.

The *Oregonian* says:

Mr. John Gates, the well known engineer and river man, has made a propostion to the Board of Trade to deepen the ship channels of the Columbia and Willamette rivers, and to maintain them at stated minimum depths for ten years for five hundred thousand dollars, one-fifth of the sum to be paid when a depth of twenty feet above zero is attained, and the rest in annual installments as it shall be earned. He proposes to deepen the channels to twenty feet above zero the first year; to twenty-one feet the second year; to twenty-three feet the third year, and to maintain the last stage on throughout the contract term. A minimum width of two hundred feet is, according to the plan, to be maintained at all times. Mr. Gates offers to give bonds for the performance of the work, and adds the provison that if the accomplishment is not complete in all particulars, the compensation shall be forfeited. The whole expense of the undertaking is to be borne by himself and his associates, so that, in the event of failure, the loss will fall upon the contractors alone. The plan is, "No cure, no pay." If the offer is accepted, either by the citizens of Portland or the Government, Mr. Gates will form a stock company to carry on the work. He proposes to build a boat specially adapted to sluicing and dragging the harrow, and is confident that by her efforts the channels can be dug out and kept deep at all times. The proposition has been made formally to a committee, and it will be reported upon favorably at the next Board meeting.

The probability is that the War Department will oppose any expenditure of public money, such as the above, which they do not control.

The well known fruit grower, J. F. Ellington, of Palmetto, Georgia, has a novel way of keeping the worms away from his fruit trees. He has 1,000 fruit trees in his orchard, and throughout the tract has placed box's, baskets, old gourds and cans, provided with material for making birds' nests. In these various places are the nests of 500 blue birds, that keep the orchard free from worms, without eating the fruit themselves.

Austrian grain merchants and mill owners are striving earnestly to make Vienna the grain metropolis of Western Europe.

There are about 700,000 kernels of wheat in a bushel, and about 700,000 bushels of Colonels (late of the Confederacy) in California.

That Mexico promises to be a great oil producing and exporting country.

That Villard in the zenith of his greatness has been forced to step down and out.

That nine large deep-sea ships, besides some of the codfishing fleet, give Sausalito bay a lively appearance.

That great is the slaughter nowadays of the innocent turkey, and the noisy gobbler gobbles no more.

That few ever think of Illinois as a great coal producing State, yet it ranks second in the Union.

That Rixford's Wine Press and Cellar continues to sell with unexampled rapidity, for a book of that class.

That fraudulent labelling of wines ought to be stopped, but so ought fraudulent labelling of all canned goods and especially of salmon.

That the year just closing has been more than fairly prosperous, and most Californians can eat their Christmas dinner in cheerfulness.

That the Colton vs. Stanford and others law suit is a bonanza to the Santa Rosa hotel keepers and saloons and is likely to last as long as a session of the Legislature.

That in the years 1882-3 the United States imported $55,221,000 of wood and wooden manufactures. We ought to have grown, spun and woven all this wood and cloth at home.

That the broad and narrow-gauge Marin County railroad extensions are each crowding the work of building and tunnelling night and day in friendly rivalry for earliest completion.

That our public schools are very, very good, and our School Board is a very bad one. The majority of the latter are selfish, unprincipled politicians who are using their offices for their personal aggrandizement.

That the consumption of raisins in the United States is a hundred times the production of California, and would increase largely if clean, well cured fruity raisins were to be had at a little less cost.

That trade dollars being all in the hands of speculators who have bought them up at their value as silver bullion or less, ought not to be redeemed by the Government under any circumstance s at more than ten per cent over their bullion value.

That we judge from the number of advertisers of ottimes and mooted wines who are paying for space in our columns, that there is an expectation that next year will be planted out as many as that we both have wine and raisin grapes.

That the most unpopular body in California last week was the Supreme Court; no one had a word of defense, for its members. No one spared them from condemnation. A grievous crime was committed, the moral responsibility of which rested on them.

That our commercial men sometimes complain that business does not move fast enough in California. Perhaps not fast enough to satisfy our most ambitious merchants, but it is a generation since any of their lives were ended by a financial epidemic.

That whether the Coroner's Jury in the Cox case were right in framing the verdict on the conclusion that McLaughlin made the first threat, or whether it would have been more consonant with the facts to justify McLaughlin's slaying on the ground that Cox had been wronged beyond human endurance, is a secondary matter. The public almost unanimously agrees with the spirit of the verdict.

That the Washington correspondent of the *Herald* is for S. J. Field for the Presidency, is natural enough; but Justice Field cannot get a delegation in his favor from California except from a packed convention, though he may get a delegation by giving solid reasons, though they have been each individually pledged against him, as three years ago he overcame the honor of five or six. But if he should become the Democratic candidate for President, that party will poll a smaller vote in this State at that election than it has done since Grant was first chosen.

That the Industrial School with hardly an interval has for fifteen years been a school for training hoodlums and criminals and a disgrace to the city. While the duty of controlling and guarding this city's wildest boys is intrusted to ward strikers and drunkards, this state of things will continue. It would be better to abolish the school if the Supervisors have not honesty or humanity enough to place the management in the hands of a competent and suitable person and give him full power to appoint or remove all his assistants according to his unfettered judgement of what is best for the school.

Storing Butter.

T. G. Clancy gives an account of the way in which butter is stored and cared for under the best management in Great Britain. He says that "the butter cellar should be cool, and in point the butter must be taken not to get in at a window through which, at any time during the day, a direct ray of the sun can play on the firkins. If a firkin of butter is placed in such a position that even for an hour each day one side of it is exposed to the direct rays of the sun, and that it remains so for a considerable time, it will be seriously injured. Do not put the butter against a damp wall or in a very damp spot. See that the drainage of your butter cellar is perfect, and that no bad odors come into it from the sewers, which should be trapped. The cellar should be well ventilated, but without a great through draught, which would tend to dry up the butter and firkins, causing the staves to open and admit the air. Always place the firkins standing on end, with the heads up. If the butter has to be kept for a long time it should occasionally be brined. Make a strong brine of clear water and the cleanest and best salt, not sea salt, that you can procure. Let it rest for a day, so that the water may take up as much of the salt as it will hold in solution, stirring it now and then. Pour this brine over the timber heads of the firkins without opening them, filling up to the top of the chime, and it runs very quickly through, it will fill it. This has a double effect. The brine tends to further preserve it, and the loosing rate down the staves of the firkins swells the wood, and so tightens it every day, so that it is will be best not to open it for a month. Do not be afraid to pour brine over the heads of the firkins, but you should be particular in places exposed which should be kept scrupulously clean. Brine is cheap. It is good keeping butter it will do well without, and it is not, should it be weak, over handled, milky or too rich, brining will not cure it."—*New England Grocer.*

* Another female Nihilist has been hanged at St. Petersburg.

Cash or Credit.

Periodically this subject comes up in the commercial journals of the country, and just at this time it is again the theme of discussion among our exchanges, the most of which take strong ground in favor of the strictly cash system. The argument takes about this shape: The merchant must meet his obligations promptly with the jobber, must pay promptly on maturity of his paper. Besides these are his freight bills, rent, clerk hire, etc., all to be met. If he sells strictly for cash, he can rely upon always being able to meet promptly all claims when due. He could also sell cheaper, if certain that there would be no loss from bad debts. If he trusts out his goods, he does not know whether the pay for them will come at the end of a week, month, quarter or not at all. There is a large element of risk and a certainty of more or less loss. If a prudent man, he must sell at such profit as to cover this risk and loss. The theory of cash on delivery is all right. The difficulty is in carrying it out in practice. In a city or town trade, much of the custom of the grocer comes from the wage classes, people who receive their pay weekly, semi-monthly or monthly. One would naturally say that, having a fixed income, received at stated intervals, there should be no occasion for credit; each payment of wages should suffice for all expenses until next pay day. Theoretically, it should; but, unfortunately, all people are not endowed with the quality of prudence or economy. Money is paid out for something that might have been dispensed with, and the supply runs out before pay-day comes round again. Sickness may bring unforseen expenses, or loss of employment may for a time cut off the income. Under such circumstances there may be grocers whose check is flinty enough to refuse credit. They might resolve in their mind that they would do so, but, when it came to the test, would, to their credit, weaken. Then, again, there is a class of customers, honest and reliable, who are always a week or month behind their income—must have the supplies they need on credit while they are earning the money to pay for the same, but who pay their bills promptly when a pay-day comes around. If refused credit, it would be a serious problem to them how to live till they had the means to pay cash for their purchases. If the month could be made shorter, they being unwilling debtors, Lilith was by the ravens, they would be all right, but without some such providential interposition in their favor, can never get out of the rut into which they have got. The country trader has quite a different class of credit customers—the farmers. As a rule they are perfectly reliable and are good for any amount of credit they may ask for. If prices for grain and other farm products are not satisfactory, they will not sell, and will run their account at the store, knowing that they are good for it, and thinking that, in view of the value of their trade to the merchant, he can well afford to wait till it suits their convenience to pay. If credit was refused or hesitatingly given, they would very quickly transfer their patronage to some other store. All these things stand in the way of any sudden or abrupt change from credit to cash trade. That the latter is the true system, there is not the shadow of a doubt. The how to bring it about is the difficult problem. So long as the customer can buy on credit as cheaply as for ready cash, he will make no great effort to pay cash on delivery—make it an object for him to do so, and he might and probably would. With a percentage in favor of cash purchases, an inducement would be held out to the customer to buy for cash. There is no injustice in the many customers, but it is impossible to the regular cash customer's pocket, him pay the same price as the credit customer. For the latter's accommodation he has assumed a risk, and he should be compensated for it. The credit customer should pay a higher price than the cash customer. This would be no more than fair, and would be recognized as such by all. The credit customer would then have the option of paying cash or running a credit at the higher price. Many would pay cash, and the number would increase as the system became established. We have known of individuals doing a credit business who made a practice of making a rebate of five per cent on all cash payments of goods. It was, of course, satisfactory to the cash customer, and furnished no grounds of complaint by the credit customer. Both felt that it was right, and the knowledge of the facts acted as a stimulus to the latter to bring his trade too up to the cash plan.

Theorize as we may, it will unquestionably remain true that the credit system, like the "poor," we shall have "always with us," and really we can see no good reason why the evils of the system, as between the retailer and customer, should be so much dwelt upon, and so little said of the same system as between the retailer and jobber, or between the jobber and manufacturer or importer. It is true in these cases the length of the credit is definitely fixed at the time of sale. But there is not a single argument in favor of the cash system, as between the retailer and consumer, that will not apply with equal force all through the trade. It will be said that the jobber and manufacturer scrutinize the character of the customer applying for credits. But he sells him goods beyond the amount of his cash capital, if such examination proves satisfactory, his character and reputation standing for him in the place of capital. Right here is where the retail trade is weak. There is not enough of scrutiny of the character, employment and habits of the credit customer. Too much is taken for granted in the desire to make sales, and goods go out to those who buy with the definite purpose of never paying for them. It is doubtful if the ideal conditions of trade will ever be reached in an imperfect world; but it, like the world at large, is capable of improvement. It can be brought nearer to the ideal (cash) system. Credits can be shortened, and utterly refused to the worthless and unreliable.—*Chicago Grocer.*

Selling Foreign Dried Fruit.

It is singular and inconsistent that a number of grocers when they go into the market to buy foreign dried fruit, usually base their purchases entirely on price. This peculiarity is not confined to grocers who, from the very nature of their trade, feel they are compelled to purchase inferior goods in order to meet the pockets of their patrons. The above fact was brought more directly home by recent observations in the market. A grocer from the country desired to make a purchase of Valencia raisins, but did not succeed, because the dealer he sought had no inferior goods. We inquired as to the character of the business the grocer did, and, to our surprise, found that he was one of the leading grocers in his district. The sad sum remarked "that the general run of buyers was about the same, they looking after poor quality." "Not long ago," said another sad sum, "a lady friend asked: Why can I buy some really good currants and raisins?' I confessed I did not know a half dozen retailers who bought those articles on quality alone."

This, to a certain extent, may account for the small demand for foreign dried fruit. People desire to purchase really choice currants and Valencia raisins, but when they ask for the best and obtain goods of a third and fourth-rate quality they, after a time, become disgusted, and the result is they cease consuming. Selling the best quality of currants and Valencia raisins is really the only way to increase the demand, and the grocer who adopts this policy will at once reap a profitable reward. We know of a grocer in a large and prosperous manufacturing city who has made a special feature of cultivating the dried fruit trade by selling the choicest goods the market furnished. He assured us that his success had been considerably enhanced by this policy. He said, "Why it is nothing unusual for a new customer to come into our store and say, 'I am told that you have some good currants and raisins,' and in this way we have made many substantial and profitable customers." Let our readers take a lesson from the above experience and pay more attention to the quality not only of the fancy dried fruit but of open stock lots throughout the entire category.—*Grocer.*

It must be a very difficult task to learn to read Chinese in three lessons, as a correspondent claims to have done.

Engineers are excavating a second underground railway beneath Broadway, New York.

Valuable coal beds are being found in Arkansas, and the outcroppings show four to seven feet.

Egyptian peasants owe $50,000,000 to usurers, with interest running from 39 to 65 per cent.

FOUR YEARS FOREIGN TRADE.

The following table shows the detailed export and import movements of the United States for the fiscal year ended June 30th last, and for the three preceding years, and is compiled only to compare it with the calendar years of the three preceding years, and to enable the distribution in our foreign trade during the period covering the late expansion and contraction of domestic commerce. The following tables show values of exports and imports of merchandise annually, from 1879–80 to 1882–83, compiled from the Bureau of Statistics' exhibits, by omitting three figures in instance, the first column, first line should read $4,-883,000

EXPORTS OF MERCHANDISE, FOUR YEARS (000's OMITTED)

The exports of domestic commodities are naturally of most first. Even a casual glance at the figures given reveals that our sales to foreigners, while about $71,000,000 larger in 1882–83 than in the year before, are but $18,000,000 in excess of the average of the four years. The gain in domestic exports in the past fiscal year may be chiefly accounted for by the increased exports of breadstuffs and unmanufactured cotton, which amounted together to about $73,000,000. The increase in domestic exports of about $80,000,000 from 1879–80 to 1880–81 may be accounted for by the gains in shipments of unmanufactured cotton and of provisions. In the latter the highest point in foreign shipments was reached. The drop in the fiscal year 1881–82 amounted to about $150,000,000. The leading decreases in exports were (as compared with 1880–81 in round numbers): Breadstuffs, $88,000,000, unmanufactured cotton $18,-000,000; provisions $34,000,000, and living animals $7,000,000 loss, an aggregate of $147,000,000 decreased sales. The noteworthy increase of values in exports as compared with 1880–81 (the preceding year) were: Oils, $10,000,000; wood and manufactures, $6,000,000, and iron and steel and manufactures $8,000,000, in all $24,000,000 increased values, thus accounting for $150,-000,000 net loss. The gains on minor exports reduce the last total given. On the basis of the value of exports, cotton still appears to be "king." The order of the ten leading shipments of domestic products during the fiscal year 1882–83 was:

Cotton and Manufactures	$260,279,000
Breadstuffs	208,010,000
Provisions	107,388,000
Oils	46,111,000
Wood and Manufactures	26,793,000
Tobacco and Manufactures	22,695,000
Iron and Steel Manufactures	19,161,000
Animals, live	10,789,000
Leather and Manufactures	7,023,000
Oil Cake	6,001,000

The value of the above aggregates about $571,673,000, over seven-eighths of the total value domestic shipments. The order was the same in 1881–82. In 1880–81 exports of breadstuffs ranked ahead of those of cotton and manufactures in point of value, exceeding them some $10,000,000. Tobacco took fifth place and wood sixth. The shipments of live animals in that year exceeded in value those of iron and steel by over $2,500,000. In 1879–80 cotton stood first in the order of value of shipments, tobacco and wood as last noted, as also live animals and iron and steel. The variation in values of leading exports has not been uniform. That of breadstuffs was greatest in 1879–80. It declined for two successive years, and then advanced again. The value of shipments of raw cotton was greatest in 1880–81, although almost exactly as much as in the past fiscal year. The decline in the export of provisions is well known to be due to foreign prohibition of importation, and duties, as shown, from the spring of 1881. The steady increase in the value of exports of "oils," nearly all of petroleum and its products, from 1879–80 to 1881–82 was to be expected. The decline since was due in part to a falling off in the shipments in the fall and winter of 1882, and to the depression in prices at the opening of the past fiscal year. Our shipments of wood and manufactures thereof has grown steadily from $16,014,000, in 1879–80, to $26,-793,000 in 1882–83. Those of tobacco and manufactures have preserved a like course, though less rapid. The value of our shipments of iron has nearly doubled in four years, advancing from $8,963,000 in 1879–80 to $16,092,000 in 1882–83. Those of steel show a net decline, though larger in 1882–83 than in either of the two previous years. The value of steel shipments four years ago was $3,042,000, and in 1882–83 it was $3,072,000. The value of exports of live animals has dropped off 50 per cent in four years, or from $15,882,000 to $10,-789,000. Exports of leather and manufactures have averaged in value about $8,000,-000 annually, and those of oil cake a little over $6,000,000 a year.

The increase in value of our re-export of foreign merchandise has been from $11,692,000 to $19,615,000 in four years, a gain of about two-thirds of the total in 1879–80. This is accounted for by a gain of about $3,000,000 in our shipments of coffee, about $1,000,000 each on india rubber and tea, $1,500,000 on foreign iron and steel exported from the United States and $500,-000 on foreign breadstuffs received here and sold again abroad.

The table of imports shows no material variation in the total value of imports of articles entered free of duty within the past four years. We are buying $18,000,000 less of coffee than in 1879–80, $3,000,000 less of hides and $2,000,000 less of tea. The gain on purchases of India rubber as compared with 1879–80 is $6,000,000; raw silk $2,000,000; wood $2,000,000; sugar, rice, molasses, &c. (from Hawaii) $4,000,000, and on minor articles enough to offset the remainder of the loss shown. It is noteworthy that the Hawaiian Islands have doubled their exports to this country under the treaty in four years. The importations of dutiable merchandise declined from $459,652,600 in 1879–80 to $440,173,000 in the following twelve months, a loss of $19,-479,000. The gain in the succeeding year was $74,887,000, and in 1882–83 it was about $1,500,000 greater than in the year before. The leading dutiable importations, as compared with the same, four years ago, rank.

	1882–83	1879–80.
Sugar and Molasses	$91,948,000	$84,015,000
Wool and Manufactures	55,224,000	57,638,000
Iron and Steel and Manufactures	10,706,000	53,711,000
Cotton Manufactures	36,853,000	29,929,000
Silk and Manufactures	36,761,000	32,186,000
Flax and Manufactures	19,737,000	19,908,000
Fruits	19,275,000	13,270,000
Tin and Manufactures	17,811,000	17,256,000
Breadstuffs	15,220,000	8,162,000
Leather and Manufactures	13,101,000	12,205,000
Jute and Manufactures	12,936,000	7,931,000
Wine and Spirits	12,308,000	6,726,000
Tobacco and Manufactures	11,771,000	5,102,000
Wood and Manufactures	10,295,000	6,650,000

In the fiscal year 1882–83 we sent abroad in value nearly one-half as much iron and steel and manufactures as we received from other countries, about one-third as much manufactured cotton, less than one-sixth as much fruit or of all kinds, about fifteen times as much bread and breadstuffs, about one-half as much leather and manufactures, less than one-sixth as much wine and spirits as we imported, about twice as much tobacco and manufactures thereof, and about two and one-half times as much wood and manufactures of the same.

A variety of cotton known as the Senegambia is attracting attention in some portions of Alabama. It is said to turn out a pound to fifty bolls.

The Western Union Telegraph Company now has three parties at work in Oregon putting up new lines between Portland and Wallula Junction.

Professor Newton says that the earth receives about 3,000,000,000 meteors every year, but they only increase the size of the earth one inch in 100,000,000 years.

At New York City the daily receipts of breadstuffs average about 28,000 barrels of flour, 330,000 bushels of wheat, 230,000 bushels of corn and 110,000 bushels of oats.

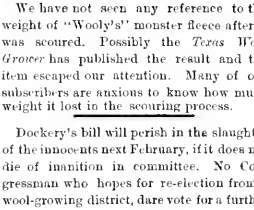
The Use of Tinned Goods.

As might have been expected in the "silly season," the alleged death through eating tinned salmon, reported in our last, has formed a capital topic for writers in the daily press, whose quickened imagination has not failed to invent all manner of sensational hypotheses. Amid this ridiculous chorus, it is, however, pleasing to note that one paper of influence treats the question practically, fairly, and judicially. The opinions of a totally disinterested journa have naturally particular weight, and the following paragraph, reprinted from the *Echo*, will secure the assent not only of the trade, but of all thinking people:

"The importers of what are generally known as tinned provisions should object to the verdict of a coroner's jury, which, based on medical evidence that attributed a death to "nitrate of tin," practically condemns the use of tinned meats, fish, and fruits. So far as the latter are concerned, the cry has not unfrequently been raised in the United States; but both there and in this country not a tittle of proof has been afforded as to the truth of the allegations. So far as is known to chemists, the cans made of tin-plate are harmless; and certainly, long before the trade in tinned provisions reached its present dimensions, soups, meat and fish were preserved in the same manner, and went a voyage round the world, to return in a perfectly wholesome condition. If it is said that the articles act on the tin and produce a poisonous substance, it may be pointed out that most of the salts of tin are so astringent that the food would be rendered unpalatable; and if the solder is suggested as the cause, it may be urged with equal strength that poisoning by salts of lead would indicate their presence unmistakably long before producing death."

Regarding the forty to fifty million inhabitants of the United States, it is estimated that canned foods in some form or another are eaten daily by half the population. Also in that country the consumption of canned tomatoes is larger than anywhere else, amounting to many millions of tins annually. Now, tomatoes when canned would be more likely to act chemically on the tins than salmon, and yet who has ever heard of death caused by eating canned tomatoes? Moreover, it should be remembered that in this country almost all the culinary utensils in daily household use are made of tin, but no one thinks of attributing injurious results to this fact.

It is, however, indisputable that tinned foods, when opened, decompose much more rapidly than fresh. In the case in question, it is in evidence that the contents of the tin were partaken of by others than the deceased at the time of opening. But, the following day, the deceased again eat the salmon, which had in the meantime become injurious. The process of tinning foods will preserve them in the condition in which they are canned so long as they remain hermetically sealed. Any foods, however, not tinned perfectly fresh would rapidly decompose as soon as opened. We have no reason to suppose that such was the case here, as it is pretty clear that the salmon, after being opened, was kept far too long before consumption. The lamentable occurrence, however, shows how necessary it is for dealers to handle only the best descriptions of canned goods, rejecting "seconds" and "off grades," no matter how tempting the quotations at which they may be offered.



We have not seen any reference to the weight of "Wooly's" monster fleece after it was scoured. Possibly the *Texas Wool Grower* has published the result and the item escaped our attention. Many of our subscribers are anxious to know how much weight it lost in the scouring process.

Dockery's bill will perish in the slaughter of the innocents next February, if it does not die of inanition in committee. No Congressman who hopes for re-election from a wool-growing district, dare vote for a further reduction of the tariff, and the member who does not vote for restoring the old duties will have a hard time of it in explaining his action to his wool-growing constituents.

The Associated Press publish the following: "Dockery will introduce a bill on the first opportunity, providing that after June 30, 1884, the rates of duty on all wools of whatever grade or classification to be used in the manufacture of shawls, blankets, flannels, hats, knit goods and wearing apparel of every description be 25 per cent. After June 30, 1885, it will provide for a reduction to bring the average duty on wool to about 22 per cent."

Woolen vs Linen and Cotton Fabrics.

It is noticeable to the ordinary observer, without referring to statistics, that wool is continually gaining in popularity in the estimation of the wearer to the disadvantage of linen and cotton fabrics. Twenty-five years ago the linen suit was almost universally worn during the hot summer months. Now a full suit of this kind would be a curiosity. We still see linen dusters, but they are worn simply as dusters, and do not displace any article of woolen clothing. For some years back soft woolens have been almost universally worn by ladies for their dresses, and when these are laid aside it is to make way for some other fabric of wool, made by the combing process out of our finest merino wools, or mohair, or alpaca. Woolen stockings are far more common now than in the past. Woolen underclothing is making rapid strides into public favor; the only thing that prevents it from being universally worn is the fact that we do not possess a strictly flannel wool. Valuable woolen underclothing is often spoiled the first time it is washed, as the better the fabric the more it will felt in washing. Woolen felt hats are now almost universally worn by ladies during six months of the year in place of straw, as formerly. Wool has largely usurped the place of silk in dress goods, as a summer suit of wool is cooler than a lighter suit of linen or cotton, and much healthier, because it is more porous, and, if you please, allows the body a ventilation unknown in the vegetable fabrics that were full of starch. As an article of underclothing, either at zero or summer heat, there is no comparison.

By a careful examination of the statistics sent out by our government it will be found that each year shows an increase in consumption of wool per head for each in-

habitant, as well as an incr ase in production in pounds for each individual sheep.—*Cotton, Wool and Iron.*

THE WOOL MARKET.

The approach of Christmas seems to have caused an informal adjournment of the wool buying season, until after the holidays. There has been nothing doing this week again. Still, prices are not far from the best authorities both here and in the East, the combined stocks of wool in dealers' and agents' hands is less than at this time last year

The latest telegrams from the East, received Wednesday, are as follows:

New York—Wool steady; domestic fleece, 32@45c; pulled, 18@40c; unwashed, 10@28c. Texas, 14@27c.

Boston—Wool unchanged; sales of California were 447,000 pounds, of which 45,500 Spring sold at 25½@26½c, 8,500 do at 25¼c 16,500 do at 20c, 70,000 do at 22c, and 65,000 Fall at 12c. The business in California Wool has been the largest we have reported in some weeks.

The *Commercial Bulletin*, of New York, of the 19th inst., reviewing the bill introdnced by Representative Converse to replace the old duty on wool, advises Ohio wool-growers to learn a lesson from California, which now supplies the knt goods manufacturers of Cohoes, N. Y., shipping its wool so clean that it has displaced the Australian product in their mills. Cohoes is now the great competitor of Nottingham, England.

Nos. 129 and 131 Fremont Street, San Francisco, Cal.

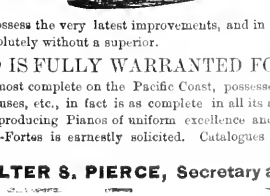
CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882.

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full description mailed on application.

VOL. XI, NO. 12. SAN FRANCISCO, DECEMBER 28, 1883. PRICE TEN CENTS.

A REVIEW OF THE LEAF CROPS.

Meeting with Mr. S. L. Goldberg, of the firm of A. J. Brandenstein & Co., who returned on Wednesday, the 19th instant, from an extensive tour through the tobacco-growing States, including Cuba, we obtained from him the following items: The '82 crop of Pennsylvania was highly spoken of in the MERCHANT and by the trade, judging from sample, but with the caution that it would not reach its full development until spring. Hungry manufacturers, contrary to the advice of experts, commenced working it soon after the first arrivals came to hand, and being disappointed in its yielding qualities blamed the tobacco, and charged that the statements of its high quality had been exaggerated. The crop of '82, Mr. Goldberg says, like that of '79, which was the best we have had of late years, requires time to mature. Hearing during his absence that these complaints had been made by a few manufacturers in this city, who had been "a little previous," he made special inquiries of Eastern cigar manufacturers, and found that no such complaints had been made by them. They knowing that, whatever promise '82 Pennsylvania made, that the stock was not ripe for immediate use, sought other tobacco to carry them over the interval. The promise that this tobacco gave during the packing season, experts and manufacturers claim, is more than qualified, as our too readily despondent friends here will acknowledge before March.

There is not much to be said about '82 Connecticut. It is admitted to be a comparative failure.

Pennsylvania '83 is now being stripped and shows a great deal of mold on the tips, which after it gets into bulk, will probably rot and deteriorate the whole bulk. Some former crops do not show any mold and will prove a very superior article, but the presence of mold in others makes purchasing a very precarious and risky business.

The experiments in Pennsylania with Havana seed have generally been highly successful, so much so indeed that Havana seed will be largely used in planting for '84 The Pennsylvania Havana crop of '83 is of course too small from want of area, to cut much figure on the market. This variety showed none of the mold so common in tobacco raised from Native seed.

About Connecticut '83, opinions are divided, some are sanguine it will come out all right, other buyers are less hopeful.

Quite a demand has sprung up in Pennsylvania for '81 tobacco, especially a low grades for filler purposes. That which is yet held by farmers and speculators is being rapidly taken by manufacturers and dealers at round advances. There is a tobacco raised in Ohio known as "the Little Dutch" which is much sought for by Eastern manufacturers for filler purposes only. It has a pleasant flavor, burns well and is considered by some Eastern experts to be superior to low grade Havana. This tobacco is unknown in this market but Mr. Goldberg has some samples on the way which he will submit to the trade when they arrive.

Seed binders of all descriptions are very scarce in the Eastern States and there is a great demand for them.

Mr. Goldberg spent two weeks on the Island of Cuba, visiting the leading tobacco-growing districts. The '82 crop is now nearly exhausted, most of it having been bought up, manufactured, or shipped. The little left of superior quality is held at enormously high figures, and is beyond the reach of the San Francisco trade. The '83 Vuelta Abajo as a crop is not quite equal to '82, for California uses, on account of a lightness of body, and many planters having over heavily "dotooned" or sauced their tobacco, to give it dark color and apparent strength. The body being light, this has tended to rot the leaf. There is, however, a good portion of fine tobacco in the crop from which careful buyers can safely supply their wants. On account of the faults in much leaf and the errors in treatment, good sound Havana of '83 is held at very stiff figures. The Maneguaragua and Remedios crops are good, both in quality and quantity, though backward in maturing. Being more than usually moist when packed, there will, on arrival in the United States, be a higher percentage than usual of difference between original and reweight. The two latter descriptions are more sought for in the East than here, our people taking more to Vuelta Abajo. Some Vuelta and Partidos are also a good crop, and look fine, but the quality is not so desirable for this market as in some former years.

Comptroller Knox states that the reduction in national bank circulation the current year will be between $20,000,000 and $25,000,000, with the certainty of much more rapid decrease next year.

The Production of Quicksilver.

The only countries of Europe where quicksilver is found are Italy, Spain and Austria; and the production of Italy has greatly increased of late years, owing to the development of the mines of Amiata, in Tuscany. The following, according to a paper by M. Bidon, is the method by which quicksilver is worked at these mines:

The Amiata mountain, situated on the southeast boundary of the province of Sienna, contains several deposits of the minerals employed in the industry, and especially cinnabar, or sulphate of mercury. That in the valley of the Siele is found in an argillaceous lode, in the form of almost invisible particles, and of very rich red masses, sometimes of large size. The vein has been proved for 150 metres horizontally, and 170 meters vertically.

The shafts have been sunk, one 170 meters deep, and the other 75 meters, with horizontal workings, which cut the lode at three different heights. A preliminary separation of the ore underground furnishes sufficient material for filling up the spaces left by working. The ore from the lower heights is brought to the bottom of the deeper shaft, and raised by a winch to the level of the upper height, whence it is conveyed by a slightly inclined gallery to a chamber at the bottom of the smaller shaft, and from thence raised to the surface by engine power. A screen separates the stone from the ore, and also divides the latter into two classes, rich and poor. The ore is run down a self-acting incline, in trucks, to the works, and is reduced by women into small pieces, which are kept as dry as possible.

The Siele Works have twelve half-moon retorts of cast iron for treating the rich ore, vertical furnaces for the poorer ore. The retorts are arranged horizontally, three by three, in four ovens. The mouth of the retort is closed by a cover, luted with clay and kept in place by a screw and strap. The charge of a retort consists of 100 to 120 kilograms (2 to 2½ cwt) of ore and quicklime, in the proportion of one of the latter to eight of the former. The retorts are charged every eight hours, and this operation must be performed very quickly, as distillation begins at once. If the retort be not closed directly there is a great loss of metal, and the men's health suffers through the mercurial vapors. The distilled mercury escapes by the neck of the retort, and passes into a receiver, in which cold water is constantly circulating. The mercurial vapors from the six retorts are condensed in one and the same tank filled with cold water; and the metallic mercury is drawn off from inclined channels at the bottom.

The retorts, fired with wood, of which a large quantity is consumed, only serve for the rich ore; the poor is treated in the three vertical furnaces, which are four meters high by one meter in diameter (13 feet by 3 feet 3 inches). Each furnace is closed at the top by a hopper, with two doors, the upper of which has a water joint. Twelve charges are made a day, and care is taken to open the upper door as little as possible. At the bottom of the furnace there is a grating with moveable bars. The charge consists of 100 kilograms (2 cwt) of ore, mixed with a quarter the quantity of charcoal. The charge is only lowered into the furnace by opening the lower door, while the upper one is closed; and a fire is kept burning at the upper part of the furnace for preventing the escape of the gases. The mercurial vapors and gases of combustion are led by the chimney into condensing chambers. From 150 to 160 tons of ore are extracted from the Siele mines, every month, about 22 tons of metallic quicksilver, which is packed in about 300 flasks with screw stoppers.—*Oil, Paint and Drug Reporter.*

On July 1st there were 11,750,000 cattle in France, and 5,962,000 in Great Britain; there were 2,750,000 pigs in France, and 2,500,000 in Great Britain; there were 23,500,000 sheep in France, 26,000,000 in England.

F[illegible] *in another column.*

C[illegible] recently sold his vineyard, near [illegible] Sonoma county, to Eli T. Sheppard of Napa, and has purchased a large [illegible] property in Contra Costa county

---

Eastern [illegible] papers, which deal with questions [illegible] important to retailers, are discussing the propriety of making gifts to purchasers. In this practice the retailers are but following a fashion very commonly observed by manufacturers, wholesale houses, and even newspaper publishers.

The Cloverdale *Reveille* is very much astonished that the MERCHANT should think identification with the leading producing interests of the State a better qualification for a United States Senator than membership of the Bar, or, still more so, that we should express an opinion that one of our United States Senators should be selected from one of the southern counties. The *Reveille* is all broke up by our heretical views.

The *Sugar Bowl*, Louisiana, recently said. "We are glad to be able to increase our estimate of the total sugar yield from this year's Louisiana crop. At one time it seemed unreasonable to expect over 160,000 hogsheads of sugar, but now it will reach 175,000 and possibly come near 190,000. Of course the most favorable fall weather has produced this change for the better, for the canes have fully ripened and the sugar yield is remarkably good.

The Cloverdale *Sentinel* volunteers this good advice to those contemplating setting out vines: Never plant vines when there is frost on the ground. Do not plant too deeply, or a cold soil may be reached that will prevent the vine from starting properly. Put good mellow surface earth into the holes and avoid hard dry clods. If water lies in the holes, it shows that the land is shallow, or needs draining, and is not fit for planting.

Varieties of Olives.

Mr F. Pohndorff, of Napa county, writes as follows to the Anaheim *Gazette* relative to the olive:

For the guidance of intending olive rearers let me say a few words here about our Mission olive. Comparing olives grown in five counties, although an earlier degree of maturity distinguishes those of southern counties, the fact seems patent that all belong to the Cornezuelo Cornicabra family, and leaf, shape of fruit and seed show an exact similarity to the Olea Europea Cerotiampa variety, as it is called by Clemente, and Olea Adorata by Ros, while in France it is named Lucquoise or la Luques, this latter appellation indicating its origin or propagation from the Italian olive region of Lucca. The observations on this variety are: "It is a good oil fruit, and the oil is of the best grown in Central Spain. The fruit matures late; the tree is probably of all of the genus olive that which requires most degrees of heat to ripen its fruit. It resists cold. Requires good cultivation and manure, loose soil ventilation. Young trees bear better than old ones. Its bark contracts warts and nodosities, is therefore not a clean wood. It can resist drought. Deep loosening of soil is convenient for this tree, which cannot bear amputations of large limbs. Pruning ought to be done with care and discernment."

With the great advantages our Mission olive possesses, therefore, the inconveniences of it are also apparent. It requires most degrees of heat of all; it bears a late-maturing fruit. These two disadvantages are serious, for why should we have only a late maturing fruit, while a dozen or more early maturing ones from Europe, many of them superior in every other respect, are at our command? A late maturer, having need of a continued active flow of sap from, say, the end of March to the end of December and even to the end of January, cannot be as durable a tree as one that, with perhaps 25 per cent. of degrees of heat less, works only from March to the end of October or the beginning of November, and yields a finer fruit for oil and pickling. There are varieties bringing forth olives of treble the size of the Cornicabra, that require less time and heat for their product. We shall be in possession of collections of the best early varieties in a few months, and gentlemen from southern counties are among those for whose account they are coming. This reform is timely, and we may hope for fine results, where the propagation of these varieties, some twenty, will take place for the benefit of the whole State. The University of California, and Professor Hilgard personally, will receive collections among others.

The Cloverdale *Sentinel* says: Our opinion was recently asked on the advantage or disadvantage of manuring young vines—vines that have never yielded a crop. If the intention is to continually manure them, and the farm or the vineyard from its stock gives assurance that the fertilization can be annually carried on, then we say manure your vines from the time of planting for evermore. We know how the famous vineyards of the Rhine and of the Gironde thrive on the strong, fresh dairy manure with which they are yearly fertilized. But we think manuring young vines for a year or two, or even until they are brought to bearing, and then discontinuing the fertilization is a positive injury. By such a plan the vines are in their infancy fed without any labor on their part, a precocious growth is developed without the necessity of the production of extra roots, and then suddenly, just as it is most positively required, the source of sustinence is cut off, and the vine without a proper root system has to maintain an extraordinary growth above ground.

The Phylloxera,

M Cramoisy, a member of the Society of Horticulture in France, declares that he has discovered a composition which is fatal to the much-dreaded phylloxera. The discovery was accidental, having first been successfully used for the destruction of vermin infesting apple trees. The constituents of the composition are as follows:

Acid pyrolign, or wood vinegar, gram	1,000
Salicylic acid, gram	2
Red oxide of mercury, gram	1
Fuschine, centigram	25

This composition was fatal to the male phylloxera, did no injury to the bark of the vine, and could also be diluted to water the roots and destroy the insects preying upon them.—*St. Helena Star.*

WANTED.

AN EXPERIENCED, INDUSTRIOUS AND SOBER man, native of Rhine, wants employment in a vineyard or orchard. Understands pruning. Address: J. SCHNUR, this office.

"THE WINE PRESS AND THE CELLAR."

A MANUAL FOR THE WINE MAKER AND THE CELLAR MAN

A Few Press Notices.

[PACIFIC RURAL PRESS.]

"Mr Rixford has made a very careful study and comparison of all means and methods described in the many good French works on wine-making, and has prepared a book which is a model of concise statement, very comprehensive in its scope, and still so skillfully condensed that the book is compact and concentrated, which is the secret of success in a manual. Mr Rixford's book will supply a lack which the recent extension of the grape interest has made very great and will do much service in the advancement of the industry in this State."

Letter to the author from E. J Wickson Esq., editor of the *Pacific Rural Press* and Secretary of the State Horticultural Society:

"CALIFORNIA STATE HORTICULTURAL SOCIETY, }
Secretary's Office }
SAN FRANCISCO, September 29, 1883

E H RIXFORD, ESQ —*Dear Sir* I have been much interested in a careful perusal of your manual, "The Wine Press and the Cellar," and am pleased to announce that I find it exceedingly valuable as a source of information on practical wine making. It seems to me a model of explicit statement and intelligent condensation. Certainly there is nothing in the English language which can be at all compared with it as a guide to the most correct and successful practice with the juice of the grape, from the vat to the bottle. The publication will be of invaluable benefit to the wine interest of the State

Very truly yours,
E J WICKSON, Secretary.

SAN FRANCISCO MERCHANT, SEPT 13, 1883.

THE WINE PRESS AND THE CELLAR - E H Rixford, a lawyer of this city, who like many of his profession has engaged in viticulture and takes a deep interest in the industry, has laid on our table a book of 240 pages with the above title. It shows indefatigable labor and judgment on the author's part. While studying the works of other authors, mostly French, for his own instruction, he has compiled this brochure for the benefit of other young wine-makers. There is probably nothing in it absolutely new or unknown to our older wine growers, but it will be a very useful manual for the vineyardist's making wine for the first time, as it furnishes information in a handy form on matters simple enough when once learned, but which would bother a tyro if he had no near neighbor of more experience than himself to whom he could apply for a solution of his difficulties. We cordially recommend Mr Rixford's work to all beginners. In the preface the author gives a short history of California Viticulture during the last seven years. The book is illustrated with 42 wood cuts and has an index for readier reference.

DAILY CALL, OCT. 18, 1883.

THE WINE PRESS AND THE CELLAR.—A manual for the Wine Maker and the Cellar Man, is the title of a work just published, from the pen of E. H Rixford. The work, the author says in the preface, is the result of research by himself, chiefly for his own benefit, and in going over the literature of the subject of wine making, he failed to find a work in the English language which is adequate to the needs of the practical wine maker. The book is intended to supply the deficiency. Elaborate statistics of the California wine product are given. Besides the preface, the work contains twenty chapters, each embracing a distinct subject relating to the manufactures of the various wines and putting it up for market, defects and diseases of the liquor, mixing wines, analysis, etc., with forty-two illustrations in all. The processes begin with the gathering of the grape, following each step and the processes attending it, in the manufacture, treating of the various qualities, and the causes upon which these various differences depend. The book contains 240 pages, and is thoroughly indexed.

Fruitgrowing in Central America and Mexico.

No. 3.

[Written especially for the MERCHANT.]

What really is most astonishing to a foreigner visiting our Spanish-speaking neighbors is to find peaches grown in the tropical countries. To judge the productions of the country by its peach crop would be exceedingly unfair, and still it is by no means uncommon to hear exclamations of disgust and sarcastic remarks in regard to a country where peaches of such poor quality find a ready market. The peaches of Central America find not only ready sale, but are highly esteemed and highly paid for by the easily pleased native population. These peaches are not only exceedingly green, small and unripe, but woody and tasteless, resembling the last peaches produced on a dying or drying up tree. Still, when cooked they are palatable enough, and the natives eat them because they consider them an exotic fruit, and the foreigners buy them because they remind them of the fruit in their native country, and so everybody seems pleased. To the horticulturist it is, however, extremely interesting to study these temperate fruits as they now exist in these out of the way countries, as it gives him a certain idea how the same varieties of fruits did taste and look ten to fifteen centuries ago or more, during the infancy of horticulture. We can well imagine that when the Roman emperors and gourmands feasted on peaches that the fruit in question was nothing similar to one of our fine varieties, but much more resembling these poor fruits from the Central American highlands. Unlike other fruit trees in Central America, the peach, which is not a native tree, is the only one that is cultivated. We do not mean cultivated in our sense, of course; no trees are cultivated there, but, we should rather say, planted, as planted they certainly are. With the planting the human care for the tree ends, and nature, including rain, wind, lightning, parrots and cattle, take charge of the trees, and take the care of them entirely out of the hands of the Central American horticulturists. Of course, the peaches are never planted in the tropical ports, along the coast, or in low inter-mountain valleys. We find them only in the highlands at elevations of 4,000 to 9,000 feet. Especially favorite localities are the slopes of the volcanoes. I have seen peach groves on the slope of Volcan de Agua, in Guatemala, and around Quezaltenango peach groves are common. I passed these peach groves several times before I comprehended their real nature. I always considered these plantations as pastures, and the peach trees as some large forage plants. The error was caused by the fact that the trees had never been pruned at all after the peach stones had been planted. The result was, of course, not trees, but a thicket of innumerable branches shooting directly out of the ground, and as sorrowful a tree as our wildest fancy can imagine. No wonder, then, that the fruit is poor. During the year's travels I never found any one that had ever heard that a peach tree should be pruned. Even the, in many respects, enlightened Agricultural Minister of one of the republics had very vague ideas of peach culture, and allowed me once to prune a peach tree which some of his forefathers had raised from seed, a tree which really produced some very fine but small peaches. Upon learning the way a tree ought to be pruned, his astonishment was great, and he thereupon decided that all the peach trees in the republic should be pruned. The good old fellow, however, died soon afterward, and I suppose the peach trees will remain in peace.

As budding and grafting trees is an unknown art in Central America, all trees are grown from seed. Nobody understands the advantage of planting the seeds of the best kinds. These are invariably sold, and when a new orchard is started by the Indians, or anybody else, for that matter, it is the seeds of the poorest peaches, those that cannot be sold, that are planted in the place where they are to grow. In this way the peaches, instead of becoming better in every succeeding generation, are gradually deteriorating, if indeed they can become worse than they are now.

I need hardly add that with proper culture, by grafting on the stocks from the already acclimated peaches, by proper pruning and care, and finally by selecting the proper places for the culture of this noble tree, even in the Central Americans could be blessed with the finest specimens of this the noblest of all our cultivated fruits.

GUSTAV EISEN.

Is the Fruit and Grape Culture Overdone?

The Dixon *Tribune* says: To those who think that in California grape culture is liable to be overdone, we recommend the perusal of the following statistics: The strip of country from which the celebrated Malaga raisins are produced, is about six miles wide and seventy miles long. We annually import 2,000,000 boxes of raisins. Raisin curing is comparatively a new industry in California. Notwithstanding this fact, it is not an uncommon thing to cure 240 boxes to the acre, which readily sell at $2 a box. The largest production of raisins for any one year in California has been 110,000 boxes. When it is remembered that there is an annual demand for 1,800,000 more boxes, it will be seen that grape culture is not likely to be overdone, at least for many years to come.

The *Press and Horticulturist* writes. Matthew Cooke, who knows what he is talking of, says: "I have received several letters, also personal inquiries from fruit growers, asking, 'Do you think fruit growing or orchard planting is being overdone in California?' I have answered the inquiries as follows: 'I do not think fruit growing can be overdone, or, in other words, I do not think an over production of choice marketable fruit will be found in our markets in the near future. Such fruit growers as will send to market fruit free from insect pests, mildew, etc., will command a good price for their products. From present indications a large number of fruit growers will remain inactive; or, in other words, will not do any thorough work to prevent the spread of insect pests, etc., so that an overstock of choice fruits in the market need not be feared for some years to come.'"

More Wineries for Los Angeles County.

The Los Angeles *Herald* says:

The great need of the vineyardists of the Santa Ana valley is the establishment here of a large wine manufactory which can handle our immense and rapidly increasing grape crop, making it remunerative to the growers of grapes as well as the wine manufacturer. The wine manufacturers of the Napa valley pay from $30 to $40 per ton for grapes, which our people would be willing to furnish for $20. Our facilities for Eastern shipment are equal to those of Napa and Sonoma valleys. There is money to be made by the establishment of a large wine manufactory here, to handle our big grape crop, which is being added to every year, and which is fully equal in every respect to the grapes of Napa and Sonoma. There is no better locality in the whole State for the establishment of such an industry.

Santa Ana Valley will be a good point in another year or two for the erection of a large winery.

Los Angeles County has several large wineries, L. J. Rose's Sunny-Slope establishment and Kohler & Frohling's, in this city. Mr. Rose has also another large establishment, for brandy making exclusively, in the city, and there is E. J. Baldwin's large distillery, Santa Anita, and more capacious by far than anything in the state, is the newly erected winery, distillery and carrying cellars of the San Gabriel Wine Company J. De Barth Shorb, President. This latter institution can take care of the crop of 3,000 to 4,000 acres of bearing

Fertilizing Olive Yards.

The indifference in many parts of southern Europe to care for the precious olive tree, which in spite of the neglect on the part of man in positions favorable to its prosperity excels dates work, aided by nature only, has become in many a district so great that the habitual abandonment of pruning and stirring up the ground, often for a number of years, has led people to assume that justice is being done to their inheritance. Not long ago, a paper in the south of the State, writing up the tree now at last getting into favor with Californians, nearly expressed the needlessness of cultivation. No person who can inquire into and judge of the nature of any tree and deduce therefrom that of the olive tree, can easily be taken in by such heresy. May the idea that a tree like the olive tree can take care of itself never gain credence in this State. If you look for returns which can be justly expected from the olive tree, do your duty toward it first, and it will not disappoint you. No true friend of the olive who has investigated and observed the habits and wants of the tree, has ever been led to advise indifference, but declared, with reason, what you give to the tree, it will require with large interest.

It seems to the point to quote an authority on olive culture, Professor Caruso, of the Pisa University, on that subject. That gentleman has laid down rules on the question of fertilizing the olive tree, which we will give in their entirety.

1. To maintain constancy in the bearing power and general prosperity of the tree, manuring is a necessity. In very fertile soils it may be left without that supply for some years, but to delay it indefinitely would impair and gradually diminish its fruitful years of full fructification would fail, and your olive plantation become unremunerative.

2. To fertilize well, render to the soil the refuse from the manufacture of the oil and the wood cut in trimming the tree.

3. Proportions and compositions of the ashes vary, and for this reason it is not exactly clear which kind of manure is necessary in different soils.

4. The most certain way to apply fertilizers is to know the average loss each year of fruiting of the tree, in fruit, leaves and wood, and restore to the soil the principles of fertilizing essences contained in those three parts of the tree.

5. The total weight of the leaves that annually fall naturally from the tree, rotting at its base, may be at an average 11 pounds 12½ ounces, and 2,442 pounds per acre. This weight in relation to the fruit is as 71 to 100, and not, as stated by Gasparin, as 50 to 100.

6. The growth of leaves prevented by pruning, if that labor is practiced with prudence and at regular periods, represents annually about 1 pound 1¼ ounces, or 236 pounds per acre. This part of foliage, not returning to the soil, is about 5 per cent., or 1-18 of the total restored to the plant.

7. The wood lost by the tree in a year by meteorological accidents and by pruning may be calculated to amount to 7½ pounds, or, per acre, 1,377 pounds, and not to a minimum of 11 pounds per plant, as calculated by Mr. Andoynaud.

8. The wood and leaves separated in pruning are in proportion of weight as 87 parts of the former and 22 of the latter.

9. The annual loss of the tree in the weight of the three said products would give us the amount of the wants of the tree to produce them as follows: Nitrogen, per tree, 2 47-100 ounces; per acre, 25 pounds, 15 ounces. Potash, per tree, 1⅔ ounces; per acre, 17 pounds, 5 ounces. Phosphoric acid, per tree, 5-9 of an ounce, per acre, 5 pounds, 6 ounces.

10. The amount of fertilizers necessary for that consumption would be 39 pounds 9 3-5 ounces for each olive tree of regular size and regularly trimmed, or per acre, 4,692 pounds.

11. The whole of which for consumption to each plant each year has to be restituted, of fertilizing principles of the plant itself, viz, residues of the oil press, washings of the same, and leaves and wood, would be 56 pounds.

12. Useful for adding to manure and macerating with the same for olive trees are seaweeds (algae), reeds, corn leaves, straw of cereals, branches of the grape vine and herbs. Poor in mineral elements are canes from marshy soil, but still useful for olive manure. Ashes and rotten olive paste may also serve to add to manure in state of fermentation. A layer of about a foot high of manure with a thin cap of lime or gypsum on the top on level soil, impermeable and slightly slanting, so as to allow rain water to pass through the heap, is advisable. The liquid may be used to moisten the mass in maceration, in order to effect uniformity of decomposition.

13. The season for manuring the olive tree depends upon the climate, site and the season of gathering the crop. In the south manuring is convenient late in the fall or in winter, while in the olive grove situated at the extreme north of the region it proves best to manure at the end of the winter, in February or March, when the danger of the intensest cold is passed.

14. Old olive trees in decay should be manured constantly by devising a small excavation around the trunk about one foot deep, into which the manure is placed and buried, opening the ditch some weeks before feeding the tree with the manure, in order to let the soil be aerated in which the roots live.

15. It is advisable in parts where manure is scarce to alternate manuring by cultivating leguminous plants of easy growth and developing rapidly at the expense of the atmosphere, and plowing in. Where manure can be used every second year half of the ground should be thus employed alternately. If every three years, the following year the leguminous plants should be planted, and the third year a simple plowing of the olive grove take place. Where only every fourth year manuring can be done, the easiest way is to divide the surface of the ground in four portions and successively manure the first, plant the second, plant vegetables in the third, and cultivate the fourth. F. P.

RAIN IN THE SOUTHERN COUNTIES

San Francisco, Dec. 27, 1883.

Editor Merchant:—The rains appear to be capricious this year—first falling in the south, then in the north, and giving the center a cold shoulder. It may be interesting for some of your readers to know that in the coast valleys of San Diego county there have fallen nearly five inches already. In those valleys eight inches always insures abundant crops; so you may well believe that the people are happy. Here are specimen paragraphs from a friend, whose letters have come this week:

San Diego, December 21st. " " "

"Just had another beautiful rain; up to this writing we have .77 inch covered over a period of two days, every drop of it going into the ground. It is not clear yet, and we may get more to-night. Back in the valleys I think they have had fully an inch. I was at the Cajon Wednesday and Thursday. It is looking fine and green. You can whoop it up this year, and you friends will not be disappointed when they see it." " " "

"San Diego, December 22d. " " "

"We have had one of the best rains ever known here—for it came slow and has all gone into the ground. Report says there have been two inches at the Cajon; I put it at 1.75. Country is green and nice."

Another correspondent writes that San Diego is full of strangers, and that an air of prosperity is pervading all.

I desire to inform those who are looking towards our Cajon valley that I shall go south some time next week, and that I hope the public will take an early opportunity to judge for themselves of what I have said of the chances valleys of San Diego county. The trouble in the past has been that only the poorest sections, with small exceptions, of the county have been examined by visitors, and with little exception offered to settlers in small subdivisions. The real agricultural progress of the county has been due mainly to the experiments of settlers on scraps of public lands, not included in the main valleys covered by Spanish grants. On the Cajon, which was partially cut up, the experiments of Mr. Clark proved the success of raisin culture;

Major Clare proved citrus culture; Capt. Sherman proved wine making opportunities, Mr. George A. Cowles proved the apple, pear, etc., and the practicability of alfalfa without irrigation in the bottom lands. Others near San Diego have proved that the true home of the lemon is there, and that the guava is a profitable plant to cultivate. The olive has long been known to be a success. These are the incentives for more cautious men to plant largely, and it is to be done from this time forth. *This is the last year of cheap land in San Diego county.*

Yours sincerely,

Chas. A. Wetmore.

P. S.—Here is a letter I have just received from Professor Pohndoff:

St. Helena, Dec. 21, 1883.

Chas. A. Wetmore, Esq.,

San Francisco, Cala.

My Dear Friend:

I have examined with particular interest the sample of 1883 Zinfandel wine, from the Cajon estate. As I saw the wine at your office a week ago, when I expressed my most favorable impressions, and since have heard that Mr. Haraszthy had been equally agreeably impressed with the wine, I now examined it with more critical care, submitting it to the test of comparison with very good Napa '83 Zinfandels.

It stood that test. The Cajon Zinfandel has even the advantage of a superior astringency, well harmonized with other taste elements. For the age, or the youth, rather of the Cajon sample it has developed well; its color is unobjectionable, as dense as the regular run of well-made Napa or Sonoma Zinfandels; its alc. strength 11 per cent, fully covered; its acids, which I have no time to test now, apparently in a very good proportion, its body very good and certainly not excessive for a good table beverage. As to its etherons and aromatic elements, the grape flavor, characteristic of the Zinfandel, is well defined, even if in that respect it has to concede the precedence to first-class Napa Zinfandel wines.

Different from the general tone of the wines from southern counties, it has nothing of heaviness and the two full-bodied taste that would call for dilution. I drank of the Cajon sample at my meal, and was perfectly satisfied with its deglutition undiluted, a shape in which I seldom drink my potation of red wine at the dinner table, except if I have a light wine that will satisfy my thirst in its pure state, some wine that I should consider too good to be diluted.

A parcel of wine of the shape of the sample from the Cajon will not be given a back place by any dealer, nor be graded lower than a really good Zinfandel of regular, not exactly exceptionally high classification.

Who would hesitate to grow that wine, if its vine is a good bearer at the Cajon?

I received the raisins. They are a testimony to the great possibilities of the Cajon lands.

On Monday I shall be in the city, and hope to see you. Received circulars.

Yours, very truly F. Pohndoff.

The demand for grape vines and cuttings grown in Fresno vineyards is growing to immense proportions. The Eggers Vineyard has received an order for 250,000 cuttings of one variety from a San Joaquin county land owner, who proposes to start a vineyard.—*Fresno Republican.*

The olive crop of France and Italy is reported to turn out short by sixty per cent of an ordinary crop.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties: — FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schiffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Le franc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 inch cuttings at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

All of these Riparia stocks not sold before January 15th will be sold at public auction to the highest bidder.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs,
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

[Continued on Page 186.]

AD MAJOREM
CLORIAM BONI VINI.

The undersigned having enlarged his business, has opened a branch office at No. 321 Montgomery Street, where information can be obtained concerning viticultural and horticultural lands, and where orders for vines and vine cuttings will be received, as well as at the old office, No. 111 Leidesdorff Street.

Having accomplished nearly all that is necessary to be done in establishing a flourishing colony of wine producers in the Livermore Valley, I shall now devote my attention especially to the development of the Viticultural and Horticultural resources of San Diego County, which county is one of the most promising in the State.

Information may be had at this office concerning the remarkable offering of the

EL CAJON LAND COMPANY,

And selections of land and subscriptions to the stock of the Company may be made through this agency. This Company controls 27,000 acres of land in the richest part of San Diego County, where the finest raisins in the State are now made, and where nearly all kinds of fruit, particularly the apricot, pear, apple and olive, are raised to perfection without irrigation, and where, in proper sites, the orange and lemon are successfully grown with such slight irrigation as may be provided by means of windmills. The property commands ample means for irrigation whenever its settlers may desire to use the same.

This property is being subscribed for at an average price of less than $10 per acre to the stockholders; 2500 acres of choice land, platted and laid out with broad avenues, will be immediately allotted to subscribers in severalty. This tract of platted land is worth and has been selling for $100 per acre, but it is included in the whole tract at the average price; 10,000 acres of the whole tract are arable; the balance grazing lands.

THE DIRECTORS

Of this Company will soon be announced officially, as follows:

ARPAD HARASZTHY, President,
DR. JOSEPH JARVIS, Vice-President,
GEORGE WEST,
GEORGE A. COWLES,
CHAS A. WETMORE.

The Trustee, during the subscription to the stock, is Mr. Bryant Howard, the cashier of the Consolidated Bank of San Diego. Wm. B. West, Esq., who has made special studies in viticulture and horticulture and who has studied raisin-making in Spain, as well as in this State, is a subscriber to the stock of the Company and will devote considerable time during the coming Winter at the San Francisco office of the Company, for the purpose of giving information to those who may desire the same, concerning the prospects of this enterprise. Prof. Frederico Pohndorff has engaged a portion of the land and stock with the object of establishing an olive orchard.

Those who subscribe early and make early selections of the platted land will never regret doing so. It is expected that all the land will soon be taken up. Samples of fruit, raisins and wine, raised in the El Cajon Valley, can be seen at this office; also maps and the plan of the subdivided tract.

Those desirous of purchasing a large tract of land—say 10,000 acres, part grazing and part arable—partly the finest alfalfa land, can find a good opportunity, if applied for soon, as the company can dispose of that much for each in one body in terms that will be most advantageous.

CHAS. A. WETMORE,
No. 111 Leidesdorff street,
Branch office:
No. 321 Montgomery st.,
San Francisco.

For information address also:
GEO. WEST, Stockton.
DR. JOSEPH JARVIS, San Diego.

RIPARIA CUTTINGS.

We offer the above from $4.50 to $7.50 per M., according to size. They are cut fresh and heeled in every day, from the vineyard of Judge Stanly, near Suscol, Napa county. The wood is much shorter jointed and better ripened than imported cuttings, and guaranteed true. There are frequently five buds on a cutting, where there will be only two or three on one of the same length raised in Nebraska or Missouri. We have used imported cuttings for the past four years, and our experience, together with others, abundantly proves that cuttings raised here will root 20 per cent, against 15 or 20 per cent of the imported ones. This we will demonstrate to any who will call at our nurseries. Therefore, 1,000 of our Riparia cuttings are worth more than 5,000 of the Eastern ones. By the first of January we shall have about 300,000 good cuttings made (although the Hon. C. A. Wetmore says he doesn't believe it).

Best references given.

COATES & TOOL,
NAPA, CAL.

THE WINE MARKET.

Nearly all the larger cellars of wine that are not usually lobbed by the wine makers have been already sold to dealers. There are, however, a good many cellars of 50,000 gallons, and under which are yet held by fresh hands. The transactions during the week have not been many.

Cocoa, 15c @ lb. Colman's Mustard, 60c @ lb.

COAL—Imports, 9119 tons Pacific Coast, 15731 tons Foreign and Eastern. Exports, 10 tons.

There have been very few transactions this week from first hands. There is not 10 per cent of the Foreign Coal now loading and afloat, which has not already changed hands once at least, and the prices asked for only loading, debar buyers from trading. The lowest freight rates named for Coal from any of the English or Scotch Ports, and even Australia, are above 20 shillings per ton, and even 24 shillings per ton freight has been paid for early loading Coal, at some of the British Ports. These freights signify high cost Coal, and make buyers timid, hence the amount being loaded is unprecedentedly small, and the effect of this will commence to be felt about 60 days hence. The bulk of our supplies will have to be furnished by our Coast Collieries, as the total visible quantity afloat and loading, is not equal to sixty days consumption.

Importers' prices of coal, Foreign and American, to arrive: Australian, $8 50@8 75, Liverpool Steam, $8 00@8 25; West Hartley, $8 75@9 00; Scotch Splint, $7 @7 50; Cardiff Steam, $7 75@8; Lump, Lehigh, $13@13½; Egg Hard, 11½@12½; Cumberland, bulk $10@10½; Pennsylvania Anthracite, as to Size, $17@18. Exchange, Liverpool Steam, $9 00; West Hartley, $8 00@8 50; Scotch Splint, $7 50@8 00; Cardiff, $8 00; Lehigh Lump, @$13; Cum berland, bulk, $11 50; Egg Hard, $11 50.

COFFEE—Imports, 952 bags. Exports, 5187 lbs.

There is nothing doing, about 1000 bags of new crop Grades have arrived, but no transaction of any account has taken place.

We quote Prime Guatemala, 13@13½c; Cost, Rica, 13@13c; Good Salvador, 13c, O G Java @20c.

CORKS—Imports, 10 bls.

DRIED FRUITS—Imports, 27 boxs figs, 10 boxs raisins. Exports, 91691 lbs dried fruits, 1341 boxs raisins.

DRUGS AND CHEMICALS—Imports, 16 cs drugs, 5 cs acid, 61 csks alum, 2690 lbs cassia, 6 cs opium. Exports, 249 cs drugs, 42,040 lbs quicksilver.

We quote Nitric Acid, 12c, Strong Sulphuric Acid 3@3½c, Sulphuric Acid, 2½c; Muriatic Acid 4½c; all bottled 20 carboys or more); Caustic Soda, 60 dec, 5c, 70 dec, 4½@5c; 76 deg, 6½@6½c; Powdered Caustic Soda, 7@7½c; Caustic Potash, 9½@10½c; Chlorate of Potash, 16@16c; Soda Ash, 2½@3½c; Soda Crystals, 1½c.

We quote at shipside: Soda Ash, 1 90@2¼c for 52 deg. Ash, Soda Crystals, 1¼c; Chloride Lime, 2½ @2½c; Copperas, 1½c on spot, Caustic Soda, 60 per cent, 5c.

FISH—Imports, 136 cs. Exports, 50 cs, 556 lbs.

FISH—Imports, 236 csks, 107 bbls, 160 cs, 273 pkgs fish; 291 cs salmon. Exports, 698 cs fish, 12127 cs salmon.

We quote: Columbia River, $1 20, Sacramento, $1 10, 100 lb; barrels $11 00, ½ barrels, $7 00, California Cod, in 50-lb bundles, 5c; selected, in cases, 6c, boneless, 7c.

HARDWARE—Imports, 551 pkgs. Exports, 103 pkgs.

IRON—Imports, 7456 bdls 1411 tons 1112 bs 1508 lbs iron 2911 pcs iron pipe, 35 pkgs 66 lbs steel. Exports, 61 pcs iron, 2980 pcs 12 lbs steel.

Business is at a standstill, no sales to note, sellers have been meeting buyer's views, and have supplied their wants at a marked loss on each sale, and even then they have been obliged to place considerable in store. Trade for the moment is very dull with Foundrymen, hence low prices do not tempt them.

The bulk of the Pig Iron afloat has arrived, and none is being loaded.

Importers prices of Pig Iron, Foreign and American, to arrive. Shotts No 1, $27½ pc.; Glengarnock, $26 00@27; Eglinton, $25 00, Clay Lane White, $23 50; American, Eastern, Soft, $28 00; Spot prices are as follows: Glengarnock, $25 50; Eglinton, $25 00, Clay Lane, white, $25 c; Shotts No 1, $28 50, American, Soft Eastern, $30. Clipper Gap Nos. 1 to 4 $32 50@35 00.

Black Sheet Iron Nos 11 to 16, 5c ₱ lb; Nos 18 @20, 5¼c; Nos 22 to 24, 6c, Nos 26, 6¼; No. 27, 6½c. No 28, 6¾; Galvanized Corrugated Sheet Iron, Nos 10 to 20, 10c ₱ lb; Nos 22 to 24, 11; No 26, 12. No. 27, 12½, No. 28, 13¼, second quality 1c ₱ lb less than first.

Wrought Iron Pipe, discount, 45@50; Manufacturers' list, per ft, Black ¼ inch, 12 lbs ₱ 100 ft, 8c, 60 lbs ₱ lb, 8½c, 85 lbs 11c; ¾, 112 lbs, 13½c; 1, 167 lbs, 16c, pipe, 226 lbs, 27c, 1¼, 270 lbs, 33c, 2, 367 lbs, 44c, 2½, 576 lbs, 67c; 3, 755 lbs, 95c, 3½, 905 lbs, $1 25, 4, 1072 lbs, $1 00. Galvanized, ¼, 11c; ⅜, 12c; ½, 15c; ¾, 19c; 1, 22 1¼, 30c, 1½, 37c, 2, 61c; 2½, $1 3, $1 30.

QUICKSILVER—Exports, 1817 flasks.

Quicksilver continues in fair demand at 33@34½c.

The London Quicksilver Market. The exports for the month of November, 6,069 flasks, are the largest ever reported for any month, of which about 1,600 were taken for the China market, and the movement is owing to the unprecedentedly low prices ruling there, £5 5s, less 3 per cent per flask, equal to about 32 cents per pound. The price here is squarely down to 34 cents per lb, at which price it is freely offered. The China steamer of the 24th inst. carried 1,000 flasks, understood to have been taken something under ruling rates.

LONDON BOARD OF TRADE RETURNS FOR QUICKSILVER

RICE—Imports, 2535 bgs. Exports, 50296 lbs.

Business in this, as every other article is very dull. No change in quotations for any kind, but higher prices are anticipated after the first of January.

We quote Mixed $4 10@——; No 2 China $4 65 @4 75; No 1 do $4 50@4 60c, Extra No 1 $6 50. Hawaiian $4 62½@4 75.

SPIRITS—Imports, 68 cs brandy 630 cs gin, 619 bbls whiskey 249 cs 217 bbls liquors. Exports, 127 gls brandy, 213 gls whiskey.

SUGAR—Imports, 13,708 bgs raw, 1 bbl refined. Exports, 270 lbs refined.

RAWS.—The sales of grocery grades have not been heavy this week only 700 bags being sold at 5⅝@6 7/16.

REFINED.—The local demand continues as it has been for the past month. The New York market is about steady with a fair demand

We quote New York prices yesterday. A crushed 8¼c. Granulated 7⅞c, and Standard A 7 7/16 7 7/16c, Yellow C 6¾@7¼c

We quote local refinery rates, prices subject to change without notice.

(A) Pat Cube Sugar, in bbls, 10½c; (A) Crushed Sugar, 10¾c; Extra Powdered sugar, in barrels, 8c; Fine Crushed sugar, in barrels, 10½c, Granulated sugar, in barrels, 10c; Extra C 9⅝c; Golden C sugar, in barrels 9c, 9 sugar in barrels, 8⅝c; Extra Fine Powdered, in bbls, 11½c; Confectioners' (A), 10c; El Dorado C, in barrels, 9¼c; Mariposa C, 8¾c; Nonpareil, 8⅝c; half barrels, ½c, and boxes, ⅛c, more for all kinds.

TEA—Imports, 710 pkgs. Exports, 1090 lbs.

WINES—Imports, 1 bbl, 314 cs foreign, 4 cs native, 750 cs champagne. Exports, 1480 gls 288 cs native wines, 10 cs champagne.

Freights and Charters.

Two iron vessels were chartered Cork, U. K., last Saturday, and that is the business of the week in wheat charters. There are 150,000 tons disengaged tonnage here, but no ships pressing for business be low pro rata of rates quoted above.

The engagements of the week have been: German ship Amalia, 1391 tons, wheat to Cork, U. K., Havre or Antwerp; 35s. Ship Wallacetown, 1326 tons, now at Wilmington, proceeds to Australia in ballast, seeking. British ship Sierra Parima, 1518 tons, wheat to Cork, U. K.; 30s. British ship Glendarnel, 1761 tons, wheat to Cork, U. K.; 30s—rechartered. British ship Theophane, 1519 tons, wheat to Cork, U. K.; 37s 6d—rechartered prior to arrival. British ship Cockermouth, 1296 tons, wheat to Cork, U. K.; private—chartered prior to arrival. Hawaiian bark Kalakaua, 382 tons, returns to Honolulu. Schooner J. N. Ingalls, 91 tons, merchandise to Mexico. Salvadorian schooner Teresa, 70 tons, merchandise to Central America. Brig W. G. Irwin, 331 tons, and schooner Claus Spreckels, 234 tons, return to the Hawaiian Islands.

Meat Market.

BEEF—First quality, 8@8½c; second quality, 7 to 7½c; third quality, 6@6½c ₱ lb.

VEAL—Large Calves, 8½@9c; small ones, 9@10¼c ₱ lb.

MUTTON—Wethers are quotable at 7½@8c and Ewes at 6@6½c ₱ lb, according to quality.

LAMB—Spring is quotable at 7@8c ₱ lb.

PORK—Live Hogs, 5¾@6¼c for hard grain hogs of 150, dressed do 7¼@7¾c.

Imports.

(Continued from Page 185.)

PORTLAND—Per str Oregon, Dec 25—1 box apples, 3 hales bags, 1000 sacks bran, 36 cs canned goods, 2278 bdls hides, 15589 sacks oats, 63 cs salmon, 8 bdls skins, 27 cs miscellaneous

VICTORIA—Per sch Coquille, Dec. 21—157 M ft lumber.

DEPARTURE BAY—Per Br str Wellington, Dec 21—2500 tons coal.

ANTWERP—Per Br ship Three Brothers, Dec 21—60 cs brandy, 100 cs champagne, 150 cs cheese, 26 cs cognac, 1 cs drugs, 20 csks glycerine, 630 cs gin, 6080 tons iron, 50 cs liquors, 155 cs foreign wines, 29127 pkgs miscellaneous

LIVERPOOL—Per ship Farragut, Dec 22—2068 tons coal.

LIVERPOOL—Per ship Baring Bros., Dec 22—2492 tons coal.

DEPARTURE BAY—Per Bri ship Nicolas, Dec 22—1530 tons coal.

DUNDEE—Per Br ship Ispahan, Dec 22—1536 tons coal, 100 tons iron.

LIVERPOOL—Per Br ship Borrowdale, Dec 21—61 csks alum, 125 bbls beer, 650 cs champagne, 5 cs hardware, 1580 pcs iron, 10 cs liquors, 2120 sks salt, 95 cs steel, 189 cs foreign wines, 5012 cs miscellaneous

COLUMBIA RIVER—Per bktne Webfoot, Dec 21—400 M ft lumber.

NEWCASTLE, N S W—Per ship Oriental, Dec 21—2275 tons coal.

NANAIMO—Per bark Enoch Talbot, Dec 21—1810 tons coal.

NEW TACOMA—Per bark Aurecla, Dec 21—1300 tons coal.

LA LIBERTAD—Per Sal. schr Teresa, Dec 20—130 cedar logs.

DEPARTURE BAY—Per ship Belvidere, Dec 20—2000 tons coal.

TACOMA—Per ship Yosemite, Dec 20—1920 tons coal.

TAHITI—Per bktne Tropic Bird, Dec 20—175 bdls hides, 20116 sks nuts, 1 bag seeds, 4 bdls skins, 5468 cs miscellaneous.

PORTLAND—Per str Queen of the Pacific, Dec 20—36 bxs apples, 1 bx butter, 1 cs cigars, 4 cs dry goods, 216 bbls flour, 10 cs hardware, 617 bdls hides, 7 rolls leather, 16 M ft lumber, 642 ctls potatoes, 4 bags seeds, 11 bdls skins, 625 sks wheat, 4 cs native wines, 10 sks wool, $19547 treasure.

ASTORIA—Per same—1 bx butter, 373 cs canned goods, 101 cs salmon, $1600 treasure.

LIVERPOOL—Per ship Tacoma, Dec 20—2261 tons coal.

SOUTHAMPTON—Per same—50 cs cheese, 25 cs dry goods, 50 cs fish, 10 cs hardware, 185 cs liquors, 128 cs miscellaneous.

LIVERPOOL—Per same—38 cs dry goods, 35 cs miscellaneous.

BARCELONA—Per same—1 bl foreign wines, 8 cs miscellaneous.

SOUTH AMERICA—Per same—6 cs opium.

CENTRAL AMERICA—Per same—1952 bags coffee, 261 bags raw sugar.

MEXICO—Per same—1 bunches bananas, 658 bxs limes, 11 bxs oranges, 3 bales skins, 1 bbl refined sugar, 52 cs miscellaneous, $99699 treasure.

SEATTLE—Per str Wilmington, Dec 22—800 tons coal, 3 cs fruit, 44 bales hides, 6 bags seeds, 5 bdls skins, 12 cs miscellaneous.

COLUMBIA RIVER—Per schr Coquille, Dec. 21—157 M ft lumber.

DEPARTURE BAY—Per Br str Wellington, Dec 21—2500 tons coal.

FRIDAY ... DECEMBER 28, 1883

The price of gas in this city is $1.50 per M. cubic feet, in New York it is $2.25. Our Gas Company uses imported coal on which a duty of 75 cents per ton is paid. New York uses domestic coal and therefore pays nothing in duties.

The first cotton grown in Northern California was received in Sacramento last week by the Capital Woolen Mills. The price paid was eleven cents a pound. It is said to be superior to the cotton of Southern California, the latter requiring to be mixed with cotton brought from the East at a cost, including freight, of 13 to 14 cents. If cotton can be grown largely on this coast with profit, it will stimulate the manufacture of many varieties of fabrics.

If Congress listens to delegations from the several branches of trade, importing, manufacturing and producing, this session will have more than enough to occupy its whole time, and yet it is a safe prophecy that more hours will be spent on purely political questions with an view to advancing the interests of one party and injuring those of the other in the coming presidential election, than in investigating matters connected with the material interests of the country. The most earnest politician, not an office-seeker, can better afford to have his party defeated than his business go wrong, but the class of men we generally send to Congress know little of business and care nothing about the interests involved except when delivery of a speech prepared by some business man promises to help their re-election.

The Law and the Bench.

In last week's MERCHANT, we quoted the following:

"THE COURT MUST IN EVERY STAGE OF AN ACTION DISREGARD ANY ERROR OR DEFECT IN THE PLEADINGS OR PROCEEDINGS WHICH DOES NOT AFFECT THE SUBSTANTIAL RIGHTS OF THE PARTIES, AND NO JUDGMENT SHALL BE REVERSED OR AFFECTED BY REASON OF SUCH ERROR OR DEFECT." California Code of Civil Procedure, Section 475.

Unless language was invented to mislead, then this plain and emphatic declaration of the law is too frequently overlooked by judges when adjusting the disputes of men. Society has burdened itself with the judicial establishment to secure practical justice, and it is not surprising that the law pointedly directs judicial attention to the doing of justice as the leading and vital purpose of its existence. By the strongest implication this law declares that everything except an unjust result shall be disregarded. It will be said, perhaps, that a litigant is deprived of a substantial right when some matter of procedure has been omitted or improperly applied; but the law itself answers that objection by placing "substantial rights" and errors of procedure in antithetical relation to each other. "Substantial rights" must be of and connected with the subject matter of the litigation, and so long as a litigant has all of that to which he may be entitled, then his "substantial rights" have been conserved, no matter how irregular the proceedings by which the result was reached.

When the law commands a court to "disregard any error or defect in the pleadings or proceedings which does not affect the substantial rights of the parties," it surely declares that the "substantial rights" contemplated relate to the causes of action about which the parties have appealed to the arbitrament of justice, and not to matters of procedure.

If upon inspection it should appear that the duties, etc., of the litigants as to the subject matter of the suit have been adjusted in harmony with their substantial rights, then a disturbance of that result would itself be an act of injustice.

The Rubber Industry.

The rubber industry of the United States has no rival in foreign countries. There is something like $75,000,000 invested in the business of manufacturing rubber goods, $30,000,000 of which is confined to the rubber boot and shoe industry. The total number of employes is placed at 15,000, and the total number of factories at 120. According to a recent census bulletin, the value of the annual product is $250,000,000. Some 30,000 tons of raw rubber are imported every year, which, when combined with other materials in manufacturing, amount to 300,000 tons. The market price of the raw materials has been forced up to $1.25 per pound, while six years ago the price was scarcely fifty cents. In consequence of the advance in price, several substances have been prepared as substitutes for it, of which celluloid is the most important.

The condition of the Island of Cuba, with all its natural advantages, is lamentable. The industries of peace are harrassed by bad government and heavy taxation, and latterly these evils have been aggravated by diseases amounting to epidemics. If peace were established and contentment prevailed, the burden of taxation lightened and industry and production encouraged, fertile lands that have lain idle for a generation would be cultivated, and the crops from these new fields would far surpass in quality those from the overworked fertilized lands from which we now obtain our tobacco, and equal the noble leaf that Cuba gave to the world twenty years ago.

The St. Louis *Grocer* says: "The vinegar men are moving upon Congress. The whisky men are moving upon Congress; so are the iron men, the tin-plate men, the silver men, the sugar men, the salt men, the wool men, the tobacco men, and many other men, each with their little axe to have ground. Poor Congress!"

There are "axes" and "axes" wanted to be ground; there are axes that will be used for the destruction of some healthy natural growth and axes that are intended for use in building fences around our sheep pastures, grain fields, sugar plantations, vineyards, orchards and manufactories, to keep out foreign intruders. Part of the business of Congress is to grind axes, but much depends on whom they grind them for

That cultured people speak of fish balls as piscatorial globes.

That Baltimore wants a sugar refinery. Why not? That is a convenient point for West Indian and South American imports.

That Boss Buckley seems to have enlarged his sphere of action and formed himself into a Pardoning Board.

That the welcome showers made Christmas more cheerful for those who have the responsibility of providing. Those who have the pleasure of spending and nothing more, alone regretted the rains.

That the general retrospect shows the past a good year for California—indeed we have had a better year than any state in a Union in which all have been more or less prosperous.

That the use of the polariscope is tending to an improvement in the color of Demarara sugars. Dark sugars do not pass into the United States at a duty sufficiently low to encourage the planters to make dark crystals.

That two well-known merchants, after dinner on Christmas day in a general conversation on the secrets of success in business, pointed out to a young friend entering in life the immorality of betting, and joined in describing it as one of the most dangerous of vices. The young fellow took his lecture in good part, but when the speakers ceased turned to one with the question, "What about speculating in chartering prior to arrival?" and to the other "What about barley futures, buyer season?" The bottle was passed to him and the subject changed.

RETAILERS' CORNER.

The trade at present is not only small in individual transactions, but also small in volume. At this season of the year more attention is paid to the settling of accounts than to selling goods. The failures have been increasing during the past few weeks, accounts that have been allowed to run along during the year being obliged to be settled at this time. Our jobbers are all busy taking inventory of stock for the annual balance sheet. Jobbers and dealers will not find the past year a good one as far as regards profits. Sales have been large, but the margin has been exceedingly small. There is too much attempt on the part of young firms to obtain trade by selling goods at too small a margin, or even at an actual loss, in order to drive others out of trade. This is generally a suicidal policy, for the others are sure to see their hands, and sometimes even go them one better when necessary, and stick to their profit where it can be obtained. The only effect of such a policy is the demoralization of trade all round, without doing any good to any one.

SUGAR.

The beet sugar crop in Europe this year promises to be the largest ever known. The crop of Louisiana promises also to be the largest ever known—say, 180,000 to 185,000 tons. The West India group will produce a full average crop, and the Pacific and Indian Islands and countries will not be behind. The Hawaiian Islands will make about 60,000 tons. Beet and sorghum domestic sugars are in their infancy yet, but promise well and add a little to the world's stock of saccharines. Altogether, the outlook indicates no high prices for sugars anywhere this year. In California prices of raws follows either the New York, Cuba or the San Francisco Manila basis, and the parity of Eastern markets will rule, as heretofore.

COFFEE.

Some of the new crop of Guatemala Coffee came to this market, on the Grenada, which arrived on the 24th inst. There are about 1,000 bags, but they have not yet been offered on the market. This consignment is the earliest we have had for some years, and is due to the high prices and short stock in this market. There has been nothing doing during the week. We expect that after next Tuesday there will be quite a demand for the new Coffee. The New York market is in a very unsatisfactory condition; stocks are accumulating, and in the face of a weak market, buying is very limited. Cable advices from Rio indicate an easier market there. Receipts last week averaged 16,000 bags, and as the purchases were moderate, stocks increased to 447,000 bags. Prices are one-eighth of a cent lower, with tone weak. The receipts on Monday were 17,500 bags, which is a full quantity.

RICE.

The Rice market is extremely dull and prices are nominal. We can expect no change in the situation this year.

CANNED GOODS.

Business in this line still continues extremely dull, the only change being a decline in Lobsters. In the East the condition is the same, but there are strong hopes of a brisk trade after the opening of the new year. Prices there are so low that as soon as trade opens an advance is expected.

DRIED FRUITS.

Raisins are lower this week, especially for common to fair and layers. Other fruits are unchanged. Business is very dull, there being no Eastern shipments.

MISCELLANEOUS.

Provisions are dull, but prices are kept firm. Beef and Hams have advanced. There has been a further decline of 10 cents a keg on Nails. They have been a losing property for some time. Olive Oils are lower.

PERSONAL.—George Hood, of the Geyser vineyard, Lake county, is in town.

OBITUARY.—The firm of Heywood & Hendly, produce dealers, of Clay street, was closed yesterday on account of the death of A. C. Hendly, a member of the firm. In the death of Mr. Hendly the commercial circles of San Francisco lose one of their best and most distinguished members.

To Hawaiians.

After January 1st, 1884, postage of fifty cents will be added to the subscription price of the MERCHANT, making the cost to Hawiian Island subscribers $3.50. We do this in consequence of the change in the rate caused by the Hawaiian Kingdom entering the Postal Union.

PRODUCE MARKET.

The Imports and Exports given below are up to Wednesday evening.

As anticipated in our last week's report, we have been favored with light showers of rain in the city, and in many parts of the country the fall has been much greater that here. These rains came at a most opportune moment, and the present outlook is more than favorable for their continuance for several days. The result is that plowing is being carried on with great vigor and the amount of land seeded is daily largely increased, and the husbandman's prospects are certainly very encouraging.

FLOUR—
Imports, 2584 bbls. Exports, 19765 bbls
Receipts, of week, 64 129 qr sks.

Owing to a slightly lessened rate paid for the raw material, prices for Flour are weak, but no reduction has as yet been announced by the city millers

Extra, $5 75@6 00; Superfine, $4 00@4 75; Country ditto, $3 65@4 50; Inferior Extra $5 00@5 50 per bbl for jobbing parcels; to local consumers, but round lots for export can be obtained for some what less figures

WHEAT—
Imports, 3012 sks. Exports, 213006 ctls.
Receipts for the week, 175432 ctls.

The English and Continental markets are reported at unchanged figures, and at the close yesterday were said to be weak, with a declining tendency. During the week the Chicago market has declined about 2½c per bushel for futures. In New York figures show but little change. Here the market has presented a holiday appearance, and but few transactions have been recorded, and no activity can be said before the turn of the year. In the sample market shippers are very indifferent bidders, in fact show no desire to purchase. No 1 White can be had for $1 80, and it is not probable that over $1 82½ could be obtained for choice milling on call yesterday, at the Produce Exchange. No 1 White Wheat opened at $1 80, and closed at $1 77½. Other bids for futures were as follows: Seller season, $1 76¾, buyer 1886, $1 77½; buyer January, $1 78. Sales of buyer the season included 300 tons, $1 80, 200 do, $1 87½, 300 do, $1 87½.

BARLEY—
Exports, 800 ctls.
Receipts of week, 20187 ctls.

The rains have caused a very weak feeling in the market, and prices are lower for all futures. Undoubtedly a few days continuance of the present rains would cause a further break in the market, as holders show great anxiety to dispose of their holdings, and are only too ready to make concessions in buyer's favor.

In the sample market No 1 Feed is quotable at about 1c; No 1 Brewing, $1 15@1 17½; No 2 do, $1 07½@1 10, Coast Chevalier, $1 10@1 17½, Bay do, $1 30@1 40 per ctl. On call yesterday bids for No. 1 Feed were as follows. Spot, 90c, buyer season, $1 11⅝; seller season, $1 00⅜, buyer December, $1 00, seller 1883, 1094c, seller January, $1 00, buyer January, $1 02⅜, seller May, $1 06. Sales included 300 tons, $1 12; 300 do, $1 11, 1300 do, $1 11¼, buyer season, 100 do, $1 00; 100 do, $1 00⅝, 200 do, $1 00¾, 100 do, $1 00⅜, seller season, 200 do, $1 02½, buyer January.

OATS—
Imp rts, 13770 sks. Exports, 236 ctls.
Receipts of week, 17291 ctls.

Receipts during the week include about 14,000 ctls from Puget Sound ports, but as the same came to strong hands the market is not materially affected. Stocks on hand in the city are liberal but strongly held, parties interested having sufficient capital to hold for full figures. In the sample market we quote black, $1 55@1 60, common to good, white, $1 50@1 75; extra choice, $1 80@1 90 per ctl. No recent sales have been recorded on call.

CORN—
Exports, 11 ctls.
Receipts of week, 1507 sks.

Receipts are exceedingly light and quotations largely nominal.

BUCKWHEAT—
Receipts of the week, 29 sks.

Arrivals are very light, and for supplies of Buckwheat, Flour, we are largely dependant upon consignments from the East. Nominally quotable at $3@3 25 per ctl.

RYE—
Receipts of the week,
A sale of 100 tons No. 1 was made on call at $1.35 per ctl., Seller 1883.

MILLSTUFFS—
Imports, 1000 sks bran. Exports, 556 ctls bran, 488 ctls millstuffs.
Receipts of week, 10,615 sks Bran, 633 sks Middlings, 2361 ctls Ground Barley, 203 ctls ground feed.

We quote: Ground Barley, $23 50@24 per ton. Middlings are selling at $21@22 00 per ton, Wheat Bran, $15 00@16 00 per ton; Oil Cake Meal $30, old process, and $28 50 new process; Feed Corn Meal, $36@36; Cracked Corn, $36 per ton; Rye Flour, $6 per bbl; Rye Meal, $5 50 per bbl; Buckwheat Flour, $6 per lb; Pearl Barley, 1 95c per lb; Eastern Oat Meal, $9 75 per bbl; Cracked Wheat,

HAY—
Exports, 48 tons.
Receipts of the week, 120 tons.
Receipts are light, but the market continues steady at unchanged prices. Local consumers have supplied their winter wants, and consequently are out of the market.

We quote: Alfalfa, $7@810; Wheat, $13@15, Stable, $12 00@14 00, Wild oat, $13@15, Cow, $9@11, Barley, $10@12 50 per ton.

STRAW—
Receipts of week, ———.
Quotable at 50@60c ₱ bale, as to condition.

SEEDS—
Imports, 18sks Exports, 2 bgs 14 cs.
Receipts of week, 665 sks alfalfa

Flax quotable at $2 50@2 75 ₱ ctl; Canary, fair 5½c, Alfalfa, 10@10c ₱ lb; Timothy, 7@8c for native and 8@9 for imported; Mustard, choice Brown, $3 00@3 25 ₱ ctl; White, $2 75@3 00, Hemp, 4c, Rape, 3@3½c

BEANS—
Exports, 167 ctls
Receipts of the week, 1797 bags

Arrivals are light and so is trade. Colored are the only Beans that there is any inquiry for. Whites are not in demand Limas continue going down.

Our quotations are, for round lots from the wharf, Small White and Pea, $3 12½; Bayos, $3 40, Pinks, $3 15@3 40, Reds 3½; Butters, $3¾, Limas, $3½

VEGETABLES—
The only change of the week is in mushrooms which are selling lower on account of the increased supply caused by the rains.

We quote Carrots, 30@35c, Turnips, 75@81 00, Cauliflower, $1@1 50 ₱ doz, Cabbage, 60@75c ₱ ctl, Garlic, 2@2½c ₱ lb, Celery, 50c ₱ doz, Dried Okra, 30c ₱ lb, Dried Peppers, 12c ₱ lb, Tomatoes, 50@75c ₱ box, Artichokes, 40@60 ₱ doz, Beets, 75c ₱ ctl, Parsnips, $1@1 25 ₱ ctl, Marrow Fat Squash, $20 ₱ ton, Mushrooms, 5@8c ₱ lb.

FRUITS—
Imports, 40 box apples, 2115 bnch bananas, 658 cs limes, 12 box oranges. Exports, 228 box apples,

New California Oranges and Mexican Limes are lower than last week. The supply of Bananas is very large and there is a wide range in prices

We quote Domestic—Apples, 50c@$2 00 ₱ box, Pears, 75c@$2 00 per box, Cape Cod Cranberries, $8 50@9 00 ₱ box, Quinces, $2 00@2 75 ₱ bbl.

Tropical—Lemons, $6 50@7 per box for Sicily. Limes, $10 00@12 00 per box for Mexican, Bananas, 12½@15c per lb; Bananas, $1 75@4 00 per bunch, California Oranges, $2@3 for old and $3@5 for new; Loretto Oranges, $20 50@22 50 per M.

NUTS—
Imports, 20140 bgs nuts, Exports, 8 bgs.

We quote: Cocoanuts, $6@6 50 ₱ 100, California Walnuts, 9@9½c ₱ lb, Chili do, 8½@10c, California Almonds, hard shell, 7@8c, soft shell, 13 @15c; Filberts, 15@16c; Pecan, 13@14c; Pea nuts, 5@5½c; Brazil Nuts, 15@16c, Hickory Nuts, 7@8c.

HONEY—
Exports, 1165 cs.

We quote Extracted, 5½@7c; Ex White Comb 18@20c; White, 13@16c, Dark, 8@10c

BEESWAX—
We quote 26@30 c per lb.

DAIRY PRODUCE—
Imports, 2 lvs butter, 1010 lbs 200 cs cheese. Exports, 10275 lbs butter, 5001 lbs cheese

Butter has declined from the top figure, but other grades are unchanged.

We quote Point Reyes, 36c; Choice, 32½@34c; Fair to Good, 22½@30, inferior lots from country stores, 16@17c, firkin, 20@21c for old and 21@ 23 for new, Eastern, 15@17c, Pickled Roll, 25@ 27½, Cheese, California, 12@13c for choice, 11@ 12c for Fair to Good; Goirut, in drums, 16@18c, Eastern, 17@18c, Western, 10@13c.

OLEOMARGARINE—
We quote the range from 20 to 22c, according to package

ONIONS—
Exports, 57 ctls
Receipts of week, 2235 sks.

Arrivals are heavy and prices are lower Choice sell at 75c.

GAME—
Prices are higher than last week, but prices are often demoralized late in the day in working off stocks.

We quote; quail, 1@1 25 ₱ dozen; Hare, $2 00@2 25, Rabbits, small, $1@1 25, cottontail $1 25@1 50 ₱ doz; Teal, 75@$1 00, Sprigs, $1 50@2 00; Widgeon, $1 00, Mallards, $2 00@2 50 ₱ doz; canvasbacks, $1 00@4 50 per doz, common snipe, 50@75c ₱ doz, do, English, $1 50@2 00 ₱ doz, Grey Geese, $2 50@2 75 per doz; White Geese, $1 25@1 50; Honkers, $4 50@ $5 00 per doz.

POTATOES—
Imports, 374 sks, 642 ctls Exports, 203 ctls.
Receipts of week, 19521 sks

There is an improved feeling all around on Potatoes.

Arrivals, which are not heavy, go off easily.

We quote Early Rose 50@55c, River Reds, 40@ 45c; Tomales and Petaluma, 85c, Cuffy's Cove, 90c, Humboldts, 90c, Sweets, $2@2 25.

HOPS—
Imports, 14 lbs. Exports, 23596 lbs 1 bl.
Receipts of the week, 47 bls.

As is to be expected at this season of the year business is entirely at a standstill. The arrivals of Hops of the present crop so far have been 17769 bales of which 12,000 bales have been shipped out of the State. There must be at least 5,000 in the interior and the 6,000 in the city gives us 11,000 bales to last till the new crop commences to arrive. There will be very little doing till March and then we may expect business to revive, to dispose of this stock 1750 bales will have to be shipped a month, from March till August, to dispose of the stock The Oregon and Washington Territory hops are not counted in this estimate. They hold about three quarters of their crop yet and are not disposed to sell, they may find themselves stuck about the end of the season and not be able to dispose of their goods. A lot of gilt edge Russian river hops were offered to a New York house at 19c f. o. b here, but the offer was refused as there is nothing doing, this is the nearest we can come to a quotation.

WOOL—
Imports, 10 sks, 12 lbs
Receipts of week, 755 lbs.
For Wool market see Wool Department.

HIDES, SKINS, ETC.
Imports, 1107 bills Hides, 122 bills, 8 bls skins, 59 pkgs Tallow.

Heavy Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½ Light do Salted Cows and Steers, 39@50 lbs, 8c per lb. Salted hips, 10c per lb Salted Veal, 12½ per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 17½——c per lb Dry Kips, do, 17c——c per lb. Dry Calf, do, 17@21c per lb.

POULTRY—
Christmas being over prices have gone back to their normal figure. Arrivals are very few and business is light.

We quote Turkeys, Live Gobblers, 20@21c per lb Turkey Hens, 20@21c, Dressed, 21@22c, Young Roosters, 36 00@7 00, Old Roosters, $5 00@6 50, Hens $6 00@7 00, Broilers, $5 00@6 00, according to size. Ducks, $10 @12 00 ₱ doz, Geese, $2 25c @2 50 per pair.

EGGS—
Exports, 11 cs
The rain has had the effect of increasing the supply and weakening the market

We quote. California Eggs, Choice Ranch, 30½@ 30c per doz; California limed, 25@30c, Eastern, 35@37½c, for fresh, limed, 22@25c.

Customs Duties.

Duties paid at Custom House for week ending Dec 27, 1883. Duties payable in United States gold coin, Standard dollars or greenbacks.

" 22, Saturday	15,025 29
" 24, Monday (Christmas)	30,000 42
" 27, Thursday	13,348 17
Total	$87,192 86

Spirit of the New York Markets.

NEW YORK, Dec 15th.—The business situation is substantially unchanged. The colder weather of the last few days has given a slight impetus to trade in a few products, whose distribution is always affected by even slight low temperature, but as a whole the movement is perceptibly decreasing. As a rule, manufactured goods are available at low prices, too low indeed in most cases for profit to producers and sale to jobbers, generally, all branches of manufactures, and in many kinds of general merchandise, the question is whether the lowest point has not been reached. It is claimed that prices cannot go lower without failing, low, and possibly disaster. Consumers cannot well carry economy further, unless they cease to purchase altogether, and as production has been materially curtailed, the opinion is gaining ground that the bottom has at length been reached, and that any change must be for the better. Such change, however, is not looked for until after the turn of the year as industrial classes generally throughout the country have submitted to a reduction of wages, even cheerfully, when they became satisfied that the choice was between reduction and absolute loss of employment. Those who have not yet submitted to the reduction, it is unprecedented, and prices are manufactured goods upon which to base bonds. A lack of confidence in the future tends to limit the demand for money from the strong and conservative class of business men who could obtain it readily, while those whose exigencies are pressing cannot obtain accommodation. Between the lack of demand from those whom the banks would gladly supply, and a general disinclination to favor those whose interests are urged, the banks and bankers generally are having an unsatisfactory season. They are evidently acting upon the principle that self-protection is the first law of nature.—*Shipping List.*

The price of grapes in the district of Chichana (Cadiz, Spain), where ordinary sherry is reared, was in the last vintage four to six *reales de vellon* (20 to 30 cents) per arroba of 25 pounds, or $16 to $24 per ton.

TOBACCO MARKETS.

SAN FRANCISCO—There is a brisk demand for Havana fillers, and the tone as regards Sumatra is healthy. There have been some sales of '80 and '81 domestic leaf and many manufacturers are examining '82 Pennsylvania with a view to early purchases in quantities.

The business in manufactured tobacco has been unusually light this week, owing to the holiday season.

Some of our chinese cigar factories are full of orders on the other hand several of the American owned manufactories complain of lighter business.

The reading of the numerous affidavits and arguments of counsel in the Seal Rock Tobacco Company injunction suit and application for the appointment of a receiver are closed, and the court has taken matter under advisements with an understanding that a decision will be rendered this morning.

Herman Heyneman, the well known manufacturers agent, leaves for the East on Sunday, on business, and will be absent a few weeks. Mr Heyneman during his residence in California has always been a gentleman of remarkable business ability, and his career among us has been marked by success. His personal popularity among our merchants is also seen by the letter voluntarily sent him, and we are informed on the 11th inst, signed by twenty of the largest wholesale houses in San Francisco, Sacramento, Los Angeles, and Portland

Lombard & Co., distributed $1600 amongst their employees at Christmas

U. S. Tobacco Journal:

NEW YORK, Dec 15th. Quite unusually business greatly improved during the past week. Several large manufactures invested in cigars, while jobbers bought with less timidity than has been exhibited for some time past. Actual sales, however, have begun a speculative movement, lasting up 82 but often country packers. Under the circumstances, this is very proper, and will result in gain to the investors. Comparing the starting point in the country for the '83 crop, the figures that are quoted for the '82 crop appear greatly below the former. With a prospects indicating a burning, the '83 crop can be safely relied on next year, the demand for the leaf will be greatly increased. Looking at the stock of old in the markets and the somewhat doubtful yield and quality of the crop, we can see that another scarcity of fine tobaccos will be lost in next Spring. Sumatra will reap the advantage. It sells to-day with ease at rising figures. The low and medium grades which, a few months ago, were in demand, if buyers at 85 cents have run up to $1 20. The general figure for fine grades is $1 50@1 65. A little extra fine lot of 30 bales was sold at $1 75. The seller claims that at such a price (for goods running with 1 pounds) the tobacco can be imported under the new duty.

[New York Tobacco Leaf.]

NEW YORK, Dec 15th. *Tobacco Leaf*—said an observer to us—"The market is quiet for leaf tobacco, with small transactions. Manufacturers are doing so, but little, as usual at this season of the year. Some export orders have been filled, but there is nothing worthy of special comment."

Tobacco Leaf. The local demand has been moderate, but we note sales to large manufacturers of some magnitude, a circumstance not unusual, but one, at the same time, indicating belief in short supplies in the home market.

Seed Leaf. This article has been in better request than for several weeks past, though the inquiry is still less than we could wish to behold it and than is necessary to give a good sounding to the year's transactions, which it is already apparent are to fall considerably below early anticipations. The year 1883 cannot be numbered as a good one for the tobacco trade, which is to be regretted, as something better than has latterly been had was to be looked and looked for.

REMOVAL!

He Gave Him a Pointer on the Bird.

An oviparous story is told concerning the parrot, the burden of which falls, as a matter of course, on an Irishman. He had never seen a bird of the kind before, and had been listening for half an hour to wise sayings with the keenest interest, unmixed with awe.

"It's a quare, wondherful burd, intirely. Do she lay anny eggs?" he asked of the market man.

"Oh, yes, once in a while," replied the owner, who saw a chance to amuse himself.

"Could you sell me an egg from that burd?"

"Yes, if you come here in a day or two I'll have one for you," said the poultry dealer, and the inquirer went away highly pleased.

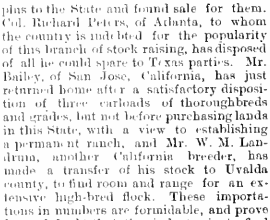
He was back again on the second day and asked for the promised egg. The dealer had forgotten the circumstance till now, but to carry out the joke, walked to the back part of the store, and, picking an egg out of one of the nearest boxes, wrapped it up in paper and handed it to Paddy, who cheerfully paid the ten cents demanded and departed with a smile of satisfaction.

Two or three weeks passed before the poultry dealer saw his egg customer again, and then he noticed him one morning standing on the sidewalk and gazing at the parrot with a half-sorrowful, half-reproachful air. Presently he stepped up to the dealer and whispered:

"Luk here, misther, does that burd o' yonrs run around much o' nights?"

"Well, I don't know exactly," replied the dealer, with difficulty suppressing a grin, as a suspicion of what was coming flouted across his mind; "perhaps she might hop out into the back yard sometimes."

"Lemme give yez a pinther on that burd," said the Irishman in a sepulchral whisper. "There's a duck been l'ading her asthray."



Angoras.

The Angora industry has grown apace in Texas of late, in a manner at once substantial and satisfactory. The importations have been large and of good quality. Two Kentucky breeders have sent all their surplus to the State and found sale for them. Col. Richard Peters, of Atlanta, to whom the country is indebted for the popularity of this branch of stock raising, has disposed of all he could spare to Texas parties. Mr. Bailey, of San Jose, California, has just returned home after a satisfactory disposition of three carloads of thoroughbreds and grades, but not before purchasing lands in this State, with a view to establishing a permanent ranch, and Mr. W. M. Landrum, another California breeder, has made a transfer of his stock to Uvalda county, to find room and range for an extensive high-bred flock. These importations in numbers are formidable, and prove beyond doubt that the industry is to find its home in Texas, and together with the home flocks of Messrs. Devine, Haupt, Arnold Bros., others of the Parrish stock and flocks too numerous to mention, will cause much interest to be manifested in the business, as others find there are fleece-bearing sheep. Angoras are to have a thorough test in Texas from this time on, and in the future it is possible that the State will lead all others in the quantity of mohair shipped to manufacturing centers.—*Texas Wool Grower.*

Carbon Bisulphide as a Wool Cleanser.

Although the cleansing of wool was among the earliest of human employments, yet it is still an imperfect art. To the uninitiated it would seem to be a very simple process, and so, indeed, it is, if we do not regard the effect of our cleansing agents upon the texture of the fibre. That this should, after scouring, retain all of its natural softness, lustre and flexibility is self-evident and how to remove the grease without injury to the wool is as important and interesting a query as ever. This grease, called suint, is very abundant on the fine wool breeds, especially the Spanish merino, and such wool is precisely that most susceptible to injury from the use of alkaline baths. The alkalies combine readily with the suint, saponifying it, and the soap thus formed is soluble in water. But the alkalies also act on the oil contained in the wool itself. Each fibre is a tube containing the oil necessary to preserve its quality, and to remove the oil is to take the *life* out of the wool. The constant seeking after new soaps and other detergents, and new washing machines, is the everyday testimony to the unsatisfactory results in present use. Of late, attention has been called to the substitution of carbonate of ammonia and other salts of that base, for those of the fixed alkalies, and with some promise of success, but the boldest and perhaps most promising change is that which substitutes the dissolving out of the suint for the combination of it with a base, as has been almost the universal practice.

The solvent recommended is carbon bisulphide known also as bisulphide of carbon and sulpho-carbonic acid. This substance, which is readily and cheaply made by the direct combination of sulphur with carbon at a red heat, is a volatile liquid, colorless, not miscible in water, and largely used as an insecticide.

At the recent meeting of the British Association for the Advancement of Science, Professor Ramsey read a paper on the application of carbon bisulphide to the scouring of wool, and claimed for it great economy. The extraction is effected in centrifugal machines, the wool being placed in perforated baskets. Neither benzine nor heat is applied, cold water and the bisulphide alone being employed. The whole of the latter is regained by evaporation, and as it is retained under water, there is no loss by keeping or danger of explosion. Care must be taken that the bisulphide be of good quality, as an inferior article may slightly discolor the wool, a result which never takes place when the pure is used.—*The Textile Record.*

Don't Waste The Pens.

A German technological journal points out the fact that a vast amount of valuable steel is lost every year in the shape of pens that become unfit for writing and are thrown away. Pens are made of the very finest steel, and it can be remelted and used again for many purposes. They can be turned into watch springs and knife blades, and can be dissolved and made available in the manufacture of ink. The suggestion is made that the children of the poor should be taught to collect cast-away pens, and thereby save valuable material and earn money.—*New York Sun.*

The loss on the Virginia peanut crop this year has been estimated at $200,000.

Artificial ice, which is produced by vaporized ammonia, is turned out in slabs eight inches thick by twenty-two inches wide and six feet long, weighing 350 pounds. It is made at a cost of less than $1 per ton.

The American Consul in Germany reports that all the marriages between American girls and German noblemen which he has heard of—thirty-one in number—have resulted in divorce, abandonment or separation.

United States railways employ over 17,000 locomotives; while in actual commission these are run at an estimated cost, including actual cost of engines, fuel, water and repairs, of about $90,000,000, making an average of something more than $5,000 for each engine. Fuel alone costs $33,000,000, but the waste is enormous.

THE WOOL MARKET.

There has been no movement in Wool in this city during the week, and with no transactions, quotations must be considered nominal.

CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882.

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant.

Old Kimball Carriage Factory.

Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full descriptions mailed on application.

VOL. XI. NO. 13. SAN FRANCISCO, JANUARY 1, 1881. PRICE TEN CENTS.

A GREAT ESTABLISHMENT.

W. W. MONTAGUE & CO'S

NEW PREMISES.

The Largest and Oldest of Our Stove, Tinware, Pipe and Metal Firms.

A Successful Mercantile and Manufacturing Career.

An Exhibition Worth Seeing.

Away back in the first half of the present century, a bright youth was introduced into the business of selling stoves. At first he was not quite a success as a salesman, not because he had not ability to present to a purchaser the qualities of the article he was selling, but because he hardly had patience to listen to some one who told him that a stove would not draw, or an oven would not bake, when some other persons who had purchased stoves of identically the same pattern had come back to tell him that they never had a stove with so sharp a draft, or that gave so hot an oven with so little fuel. On a hint from a friendly employer, that youth, W. W. Montague, changed his tactics, took quietly for gospel all his refractory customers said, and with a sweet, convincing smile, sold them another. Hence he acquired the most difficult art of selling stoves. In time he had drifted to California, and, like other early Californians, suffered, no doubt, some of the ordinary vicissitudes of the peculiar life of the "Early Fifties." In 1857 he came to the front as a merchant in partnership with the late S. M. Locke, and opened a store on Battery street, near Washington, then the centre of the heavy trade. In those days tin-roofing was a great business, and as an importer of sheet-tin, many an anxious hour this gentleman spent in devising plans for making tin roofs suffice for all the requirements of California property owners. Meantime, his business grew, and to selling stoves and the importation of tin and terne plates, his firm added the manufacture of tinware, which, in California, was then a comparative novelty, and something of an experiment. At the end of some six years, the heavy business having begun its movement westward, Locke & Montague made a bold step, and built for themselves the property which they occupied until last month, 112 and 114 Battery street. In two or three years nearly every firm in a similar trade followed their example, and they soon found themselves in the very centre of a host of competitors. Business grew, and they added another story to their building, already two stories and a basement. Then they leased the adjoining store, and then another.

In the meantime, they added to their enormous business in stoves, pumps, pipes, tinware, kitchen and furnishing utensils, tin plate, copper sheets and other metals, two specialties: marbleized mantels and fancy tiles. Mr. Locke died in 1876, but not before Mr. Watkins, who began his experience in the house as book-keeper and cashier, had become an active working partner. On Mr. Locke's death, two or three gentlemen purchased shares of his interest, and the business of the firm grew to larger proportions than ever, under the name and style of

W. W. MONTAGUE & CO.

At length, trade constantly increasing with them, the buildings occupied by them became utterly inadequate for their business, and in the spring of 1883 they made arrangements for more commodious quarters, and in December removed to the handsome new building, 309, 311, 313, 315 and 317, south side of Market street, between Beale and Fremont, a most handsome block, which was built especially for them and under their own supervision.

Before describing the new premises, it may be well to say one or two words about the principal of the firm. Mr. Montague is an educated gentleman of refined tastes, a shrewd manufacturer and an enterprising merchant. In his business relations he treats every man cordially and courteously, but he exacts similar treatment in return. Many of his customers have dealt with his firm from its commencement, but whether they are new customers or old, they are dealt with liberally, even generously, until he finds his kindness and fair-dealing imposed upon; then his manhood revolts.

In public life, Mr. Montague is one of our best citizens, full of enthusiasm when anything is proposed that will benefit the material progress or social advancement of the State. He forms his opinions on all matters from quiet study, and those opinions cannot easily be shaken. He may be convinced by sound argument, but not by fallacies or the arts of demagogues. He will not bow his knee to Baal. In social life he is a favorite, and in his charities, however much he may strive to conceal them, he is a prince among men.

But to return to our business, which is a description of the new premises on Market street now occupied by this firm.

W. W. MONTAGUE & CO. AT HOME.

The building has a frontage of 90 feet by 137½ feet in depth, is six stories high, including basement, giving them 70,000 square feet of floor surface for the transaction of their business. Each floor is arranged with an especial view to the convenience of handling, manufacturing and displaying goods.

We will endeavor to give our readers some idea of the arrangement and magnitude of this business.

BEGINNING WITH THE BASEMENT.

We noticed piles after piles of wrought-iron pipe for gas, water and steam—black and galvanized, sizes from one-quarter of an inch to 4 inches in diameter.

The next thing that attracted our attention was the long rows of bars, built one on top of the other, from the floor to the ceiling. These were filled with malleable iron fittings of every conceivable form and shape, such as tees, elbows, crosses, bushings, nipples, flanges, unions, couplings—black and galvanized, all sizes from one-quarter of an inch to 4 inches, suitable for pipe.

In another portion of the basement were stowed away on shelves and in bins castings to manufacture.

COOKING STOVES AND RANGES, BOX AND PARLOR STOVES

Of every variety, style and pattern, hot-air furnaces, etc.

Under the area, in a space 90x20 feet, are stationed the lathes, drills, emory wheels, etc., all required in mounting and fitting the stove plates.

Here also were pipe-cutting and threading machines, adapted for all sizes of pipe, from one half inch to four inches. The motive power for the machinery in the basements and for the elevators, of which there are three in the building, is a ten-horse power engine, located in one corner of the basement. Near by is a furnace and all conveniences for making solder to the amount of three tons per day.

ON THE FIRST FLOOR

Are arranged samples of cooking stoves and ranges. There are five rows, each 120 feet long. Here may be seen stoves and ranges in a variety of patterns and styles, fitted with every conceivable attachment, fixture and convenience for either utility or ornamentation, and for either coal or for wood.

On the right hand as you enter is a row of 16 sample stands, each 10 feet long, containing samples of granite and agate ware, plain and retinned stamped ware, planished, japanned and priced tinware, tinned and enameled hollow-ware, copper and galvanized iron-ware. The stove samples are divided from the iron department by a row of pumps, force and lift, in a great variety of styles and sizes, and adapted for either hand, windmill or power. Continuing the line on the same platform are kitchen range boilers, galvanized iron and copper, from 18 to 100 gallons capacity, kitchen sinks, plain, galvanized and enameled, and a variety of plumbers' goods.

Then comes the

METAL DEPARTMENT,

Where is carried the stock for daily requirements of tin plate, roofing plates, black and galvanized sheet iron, sheet copper, pig tin, Russia sheet iron, sheet zinc, wire, solder, etc. The greater portion of their stock of goods of this class is contained in their warehouses near by, on Beale street.

The offices are on the first floor in the rear; occupy a space 75x16 feet; are elegantly fitted up with all conveniences for transacting business.

ON THE SECOND FLOOR

Are their samples of box, parlor and heating stoves, French ranges for hotels, restaurants and families, hot-air furnaces and bath heaters. On this floor, separated from the other portion of the room by means of a glass partition, is fitted up undoubtedly one of the finest show-rooms on the Pacific coast. It is 30x137 feet, and is for the display of decorative brass and iron work, mantels, grates, andirons, fire tools and fenders, plain, hand-painted, glazed and art tiles.

This firm are the sole agents for Low's Chelsea tiles, and are the only importers on the Pacific coast of the celebrated Minton and other English tiles for the interior decoration of buildings, vestibules, hearths, fireplaces, etc.

Montague & Co. have fitted up the finest residences in California and Oregon with mantels, fire grates, tile hearths, facings, etc.

ON THE THIRD FLOOR

Is arranged a system of bins, over 1,000 in number, designed especially for carrying a stock of goods, consisting of granite and agate ware, plain and retinned stamped ware, blue, white and grey enameled hollow-ware, force and lift pumps; tinners' tools and machines; polished and hammered iron fry-pans, etc. One-half of this floor is devoted to the storage of goods which are sold in original packages, such as lanterns, sieves, rivets, stoveboards, coffee mills, stove polish, etc.

THE FOURTH FLOOR

Is filled with goods of their own manufacture, fine priced tinware, galvanized iron and copper ware, japanned ware, such as coal hods, coal vases, water coolers and toilet ware; butter, lard, syrup, paint, fruit and honey cans, and pails of a variety of shapes and sizes.

THE FIFTH FLOOR

Is devoted entirely to the manufacturing department, and is equipped with a multitude of presses, stamping, cutting and punching, forming, crimping and beading machines, all driven by an engine of ten-horse power located on this floor.

Square dealing, enterprise and immense capital are a good foundation on which to build a business, and with a reputation for these unexcelled by that of any firm amongst the many honorable and wealthy firms we have in San Francisco, the growth of the business of W. W. Montague & Co. must keep pace with the growth of this city and of California.

PROTECTION, WITH INCIDENTAL REVENUE.

We are very much afraid that the Cobden Club, with its influence and publications, has turned the heads of many of our editors and legislators. They have read these effusions until in a half-hearted way they have come to believe that free trade, or some policy akin to it, is expedient for the United States to follow. Our college professors and so-called political economists, at least a majority of them, are rehashing the arguments of Cobden and Bright. But these professors and students of political science are not practical men, and even in their study of English commerce under free trade, they are behind the age. For some years free trade did give an impetus to the export of British manufactures, but the high tariff necessitated in the United States by the civil war, and the stimulus that accidental protection gave to American manufactures, reduced these British exports and turned the balance of trade to our side. The British manufacturers boldly claim that our tariff has robbed them of millions of business which rightfully belonged to them. They coolly deny that we have any right to manufacture for ourselves, and at the same time their statesmen admit that, in spite of our mistaken policy, we have been more prosperous and accumulated more wealth, and attained more equal distribution of that wealth, than any nation ever achieved in so short a time. If our commercial policy is all wrong, how have we been so prosperous? So grave an error in policy should have led to ruin; if it has not, is it not a proof that it was not error, but wisdom? Have not our high tariff makers builded better than they knew? A vote in England taken to-day on free trade or protection would be given in favor of a restoration of British customs duties, were it not that English manufacturers still have hopes that their efforts to get the American tariff largely reduced will prevail. For this end they are subsidizing American newspapers, distributing millions of pamphlets, taking part in American politics, and corrupting our Congressmen. The laboring classes of this country are told that the tariff is injuring them. How can this be when they are so much better off than their European brethren? They are told that they could buy a suit of clothes for ten dollars, that now costs them twenty, if we had free trade. What would that privilege be worth if they were out of employment, or were paid for their labor at the rate European labor is paid? We have heard all the arguments of the authors of the free trade policy from their own lips; we have read the arguments of their English and American followers; we have voted in this country for men who stood on a platform that announced "a tariff for revenue, with incidental protection," but, unless our opinions undergo a radical change, we have so voted for the last time. The result of all we have learned, with a full knowledge of the discussions into which free trade has dragged the majority of British manufacturers, we are for protection for all our home manufacturers and producers. We hope to see some party, scorning quibbles and rejecting words with double meanings, build up a platform with this plank: "A Protective Tariff, and Incidental Revenue." On such a platform no candidate could make a free trade speech to one portion of the people whose votes he was soliciting and a protection speech to another. With a majority of Congress elected on such a platform, the surplus revenue question would settle itself. An advance in the tariff all round of twenty-five per cent. would contract imports and reduce the receipts from customs. Every steam engine in the United States would be in motion, every wheel would revolve, and every industrious man, from the Atlantic to the Pacific, would be at work on good wages, and the prosperity of the next twenty years would be as much greater than that of the last twenty, as that was greater than that of any twenty years in our history, or the history of any people under the sun.

INFERIOR WHEAT.

The light demand, dull sale and low prices of California wheat in Great Britain, it is said, are not entirely due to an overstock of grain in Europe, but partially to the fact that for some time we have been allowing the quality of our wheat to run down. This tendency has been noted and commented on for several years past, and this year it is said that No. 1 wheat is barely superior to their standard for No. 2 two years ago, which was none too good. The truth is that better wheats than Californian are now obtainable by English millers, notably Indian and Australian. We must go back to the standards of six and eight years ago, if we desire free sale for our surplus wheat. Our farmers must exercise more care in cultivating their land, in selecting their seed and in cleaning their wheat, and the Produce Exchange must raise their standards. There is nothing gained by lowering them; doing so is inevitably met by a decline in the prices obtainable for California cargoes.

A NEW BROKER FIRM.—Mr. C. F. Chadbourne, who for the past twenty-three years has been in the employ of Kittle & Co. and for the last sixteen their outside salesman, has determined on going into business on his own account. Mr. Chadbourne has his office in 202 California street, immediately under Kittle & Co., where he will in future be found. No gentleman on the street is better known or more respected by the old established firms than C. F. Chadbourne, and he has them all amongst his well-wishers, and as far as is in their power they will make his success as great when working for himself as it has been while transacting business for his late employers.

CHANGES.—Seller Bros. & Co., manufacturers of plain, stamped and Japanese tin ware, and importers of agate, granite and holloware, have removed from Sacramento street to the premises recently occupied by W. W. Montague & Co., 112 and 114 Battery street.

W. T. COLEMAN & CO.

By advertisement in another column it will be seen that three gentlemen have been admitted partners in the old-established, wealthy and enterprising firm of W. T. Coleman & Co., of this city, New York and Chicago. Mr. Carlton C. Coleman is the son of the head of the firm, and one who gives promise of following in the footsteps of his eminent parent. Mr. Frank S. Johnson is well known to every wholesale dealer on this coast. He entered the house in which he is now a partner as a youth, and by his own merits, by industry, and by remarkable mercantile ability has fairly and squarely worked himself into his present prominent position. During the life of Mr. Williams, this gentleman's talent was appreciated, and a portion of the large business of the house was intrusted to his care. On the death of Mr. Williams, in the prime of life, the sphere of Mr. Johnson's duties was enlarged, and with the growth of the business, Mr. Johnson became Mr. Coleman's right-hand man. While an employe, Mr. Johnson has been the recipient of many manifestations of Mr. Coleman's hearty appreciation of his labors for the good of the house; but this latest reward outshadows all previous gifts. Of Mr. Richard Delafield we know less than of Mr. Carlton C. Coleman, or Mr. Frank S. Johnson, but understand that he has done good service for the firm in New York, where he resides. Mr. W. T. Coleman himself has been one of the most active of our merchants from the earliest days, and not only active in commerce, but he has been a leader in public affairs—a leader when cool judgment and rare courage were at a premium if personal safety was to be secured, and order was to be preserved. The obligations that San Francisco society is under to W. T. Coleman can never be overestimated, and ought never to be forgotten. With advancing years, few of our junior merchants can equal this gentleman in close attention to business, and yet he may naturally look to his new associates to lift some of the load off his shoulders, and allow him that leisure and rest which he has so well earned during a well-spent and noble life.

THE NEW SUGAR REFINERY.

The new refinery of the California Sugar Refinery was quietly opened last Saturday, December 29th, 1883. It has been two and one-half years in erection, and is supplied with every new appliance and mechanical device that is known abroad, as has been suggested by the long experience of the managers. In previous trials of the works, every piece of machinery, every pump and every pipe, was thoroughly tested, so that when business began there was no fracture, leakage or hitch to interfere with the production of sugar. The first pan of sugar was boiled, clarified and crystallized by Mr. John D. Spreckels himself, and everything worked to a charm. A part of the force remained at the old refinery to clean up, but the last man will be transferred to the new refinery after to-morrow night. It is the intention of the company to keep the old refinery on Brannan street in running order, as a reserve in case of a fire or other accident in the Potrero establishment. A very full description of the new building, the largest and most costly manufacturing establishment on this coast, and the most complete sugar refinery in the United States, appeared in the MERCHANT on the occasion of the laying of the foundation stone in 1881.

That even Utah is manufacturing silk goods.

That France is clearly not quite ready to take China by the throat.

That this week's MERCHANT is full of meat for our viticulturists.

That farmers must raise better wheat, or we will lose our export business.

That our millers are doing better in exporting flour than our shippers with wheat.

That the northern and upper Sacramento river counties are getting a fair share of immigrants.

That the rain, the welcome rain, has come, but the wind is not yet in the right quarter.

That '83, while fairly prosperous for Californians, was not generally "a big year" for her merchants or her mine-owners.

That the habeas corpus gate stands wide open for Chinese perjurers to enter the United States.

That Professor Hilgard's department of the University is worth all the cost of that institution.

That Parisian politeness does not protect lone females from insults in the streets of Paris.

That the *Chronicle* is very happy over the Huntington letters, but can always spare a little space for a few lies about the Hawaiian treaty.

That there is every probability of a viticultural and horticultural boom arising in San Diego county equal to that which Los Angeles county has enjoyed for the past three years.

That some of our California postmasters seem to have a spite against the MERCHANT, and throw difficulties in the way of its circulation. We wonder if as many *Rescues* miscarry in the post-offices as MERCHANTS.

That some of these stories of outrages in the Southern States appear to be authentic. If some of these Southern Democrats are brutes, they should have political sense enough to control their brutality.

That men should study the free trade or protection question from the standpoint of self. Whatever is the best for the majority is the best for the whole country.

That a sparrow, with its gizzard, can digest a big snail at a meal and eat another an hour after. If a man had a gizzard instead of a stomach, he would eat a leg of mutton for his lunch and a round of beef for his dinner, and go hungry to bed.

That while China is denying that she is helping the Black Flags, she is furnishing men, money and arms, and the French Government knows it, but with England's opposition to any interference with the treaty ports, and Germany waiting for an opportunity to attack her at home, she seems to think it the part of wisdom to shut her eyes.

RETAILERS' CORNER.

If the whol sale grocery business of this city has not increased during the past year, it has not been because the population of Central American and Northern California has not increased, or the people of these sections been fairly prosperous, but because much of our Southern and Oregon trade, by the inevitable results of railroad facilities, has been cut off.

One of the features of the week has been the commencement of work in the new establishment of the California Refinery.

The sales of Grocery Sugars have been fair during the week, and many negotiations yesterday afternoon were in progress but unclosed. The actual sales of the week were 630 kegs and 600 bags at prices ranging from 5⅞ to 7 ¼.

The Sugar importations by sea during the year 1883 were: Hawaiian Island, 51,921 tons of 2,000 pounds each; of China, including 700 tons of refined, 1,079 tons; of Central American, 888 tons; and of Manila, 9,198 tons. Total importations from foreign countries, 63,086 short tons. It is understood that a considerable quantity of the latest arrival of the China-refined Sugar has gone into store, not being salable at a profit at present prices for that grade.

Our fruit canners have had a fairly prosperous year; their profits, however, have been curtailed by the high prices of fruits. In two or three years lower prices will probably obtain, and they will be able to extend their market for our Canned Fruits to an extent hitherto unobtainable.

The Provision market has been very dull during the past week.

The last steamer brought only some 655 bags of Coffee, new and old. The demand during the week has been very light.

Sandwich Island Rice is now offered at 4⅝ for cash, on short time.

Candies have followed Sugar, and are quoted half a cent to a cent lower.

Graham Flour and J. L. Groats are a ¼c. higher.

In Pails we notice a reduction of 25c. a dozen.

TRAVEL TO HONOLULU.

The Oceanic Steamship Company's magnificent vessel, The Mariposa, sailed on Wednesday for Honolulu with fifty saloon and twenty-two steerage passengers. Amongst the former were Colonel Claus Spreckles, Adolph B. Spreckles, Governor Low, Mr. Tillmann, E. W. Macfarlane, Mr. Borel, and Rev. Father Buchard, S.J., of this city; and W. G. Irwin, Major Geo. F. Macfarlane, Sam Parker and Mr. Tucker, of Honolulu.

Trade Failures.

There were 280 failures in the United States reported to *Bradstreet's* during the week ending Dec. 22nd, 31 more than the preceding week, 44 more than the corresponding week of 1882 and 135 more than the same week of 1881. About 75 per cent of the failures were those of small traders, whose capital was under $5,000. Among the important concerns embarrassed were Clune & Son, grain, W. P. & A. M. Parsons, builders Willett Brodson, real estate speculator, and Bomann & Von Bernuth, importers of worsteds and trimmings, New York city; D. M. & E. G. Hulbert, dry goods, Binghampton, N. Y.; Donald Gordon, dry goods, Rochester, N. Y.; The Hartford Engineering Company, Hartford, Conn., and the Standard Coal & Iron Company, Columbus, Ohio. Compared with the previous week the middle states had 63, an increase of 2; New England states 37, an increase of 1; southern states 51, an increase of 8, western states 96, an increase of 7; Pacific states and territories 33, an increase of 13, Canada and the Provinces 33, an increase of 1. In the principal trades they were as follows: General stores 52, grocers 35; clothing 24; hardware and agricultural implements 16; liquors 15; dry goods 14; manufacturers 12; tobacco and cigars 9; shoes 9, drugs 8; fancy goods 8; stationers and printers 7; produce and provisions 6; lumber 6; furniture 5; hotels and restaurants 5; jewelry 5; millinery 5; commission 4; bakers and confectioners 4; builders 3; grain and flour 3, harness 3; men's furnishing goods 2; hats 2; crockery 2; coal and wood 2.—*Bradstreet's.*

TOBACCO MARKETS.

SAN FRANCISCO.—The cigar manufacturers have not done much this week, business being interfered with by New Years day and by the usual accounting with the Revenue Department.

Trade in manufactured tobacco has been dull, as may be expected at this season

In leaf there have been some transactions in Havana, indeed, the demand has been very good, and there has been also a good inquiry for Sumatra. The trouble about the construction of the section of the Revised Code enacting the higher duty on Sumatra wrappers does not extend to this coast, as all the tobacco here and nearly all in the United States was imported under the old duty.

Dealers in leaf look for a heavy business during the next few weeks.

The court has dissolved the injunction suit against the Seal Rock Tobacco Company and others. The petitioner, Witcher Jones, was allowed several weeks after the injunction was granted, to get up his case, but when the matter was heard, the court dissolved the injunction with an intimation that had he supposed the petitioner's case was so weak the injunction would not have been granted. The parties interested in the Seal Rock Tobacco Company, have been seriously injured and put to considerable costs; and as Witcher Jones was not required to give bonds it is unlikely they will be able to recover anything from the petitioner. This is another instance of an abuse of the power our judges have of issuing injunctions on ex parte statements

The Internal Revenue returns show that our local cigar manufacturers did a good business in December The tobacco returns were reduced by the injunction, now dissolved, on all business by the Seal Rock Co.

The returns for December are:

Cigars	$47,883 98
Cigarettes	202 25
Tobacco	2,073 68

Total imports by sea and rail, 3,163 lbs Manufactured Tobacco, 360 lbs Leaf, 5 cs Cigars, 13 cs Cigarettes. Total exports by sea, 17,40 lbs Leaf, 6127 lbs Manufactured Tobacco; 16 M Cigars, 200 M Cigarettes.

[U. S. Tobacco Journal.]

NEW YORK, Dec. 22.—The market is feverish and excited. The decision of the Treasury department in Washington regarding the importation of Sumatra tobacco has roused the temper of the trade, and anger, fear and disgust are visible in quarters where seed leaf, especially of nonscript quality, is held in heavy quantities. Under such circumstances all speculative movement, active and contemplated, has come to a dead stop This blow has stunned the trade; it has put all and every calculation, and all operations have virtually ceased.

The total sales, comprising a number of small transactions, aggregate about 600 cases at last week's figures The sale of Sumatra tobacco also is almost stopped, while no fixed market price exists. Under these circumstances, nobody is willing to invest. Manufactured also from the reigning excitement, and only a few sales direct to manufacturers were recorded.

The *Tobacco Leaf* of the same date says:

Wisconsin Leaf—Business continues moderate. The trade is waiting for the new year to open.

Messrs. M. Rader & Son report to *The Tobacco Leaf*:

Market quiet. Prices firm at 7@10½c.

Virginia Leaf—The demand the past week as might be expected at this season, has been light, though sales have been effected for both home and foreign account.

Seed Leaf—In this department, as in others, only a small business has been done the past week.

Messrs. A. S. Gans Son & Co., report to *The Tobacco Leaf*:—As we approach the holidays, business, as usual, becomes stagnant. Total sales the week 900 cases.

Spanish—About 400 bales of Havana fill ers were disposed of at from 85c to $1.15 per lb.

Sumatra—The demand during the past week, in spite of the general dullness, has been a good one, sales amounting to 275 bales The stock of fine leaf is becoming quite scarce in this market A broker informed us during the week that he had orders for 158 bales of fine Sumatra which he was unable to fill in this market. The prospect for the future is bright.

Plug—The situation remains unchanged as far as tax-paid goods are concerned. Our jobbers only buy small parcels, and will continue in that line until after the end of the year and accounts of stock are taken. There will be more doing after the old year is out. From some foreign markets encouraging reports are received, and orders are coming in. The exports for the week were 80,381 pounds.

Smoking—Inquiry continues brisk for popular brands.

Cigars—Trade in cigars, both domestic and foreign, is fair.

All efforts to make hay by gaslight have failed, but it is discovered that wild oats can be sown under its benign and cheerful rays.

THE WINE MARKET.

The wine makers of California with a few exceptions, had in 1883 fair prosperity; and some did excellently. It must be observed, however that neither the crop of '82 or '83 was up to the average in yield. The latter year has given them the shortest crop considering the acreage that has been gathered for several seasons, owing chiefly to the hot northers of last summer. The wine of '83 is said to be better than that of '82 but we fear it is only better because of a large amount of foreign wine grapes entering into the stock, from the old vineyards especially Missions which formed half the production, it was really not any better than '82 These makers who had sound wines realized what must be considered good prices, often a cent above last year, and we are informed that cellars and parts of cellars that were choice have been resold by first buyers at a very fair advance On the other hand we regret to say that some of our wine makers have again made serious failures in manipulating their product, and had to sell their wines "as is" that is, they were admittedly unsound. In some districts also where the must would show, say 25 per cent sugar, makers to overcome that objection have lowered its strength, and have overdone it and reached the other extreme—say only 9.0 to 10.4 in alcoholic strength Such makers would have found a readier sale for their wines if they had allowed them to stand at 12.4 alcohol. These errors tune and lessons in the costly school of experience will remedy.

On account of the holidays of the past fortnight and the custom of annual stock taking at this season, actual transactions have been few, but brokers tell us that a number of negotiations.

First hands that have good sound merchantable wine of desirable varieties in their cellars have a very cheering prospect before them are in progress City jobbers, as usual, have had during the past week, an excellent domestic trade. Our table of exports, via Panama, in another column of this issue of the MERCHANT, will show something of what exporters are doing. Besides this, considerable wine has been sent to other States by rail

Brandy, though in better demand than it has been for the past month, having lately been more inquired for, is still anything but active. The outlook for holders of brandy, especially the distillation of fine grapes, is, however, better than at this time last year [For Exports and Imports, see Merchandise Marks.

NAPA WINEGROWERS

ADDRESSES BY PROF. HILGARD AND C. A. WETMORE.

A Most Interesting Meeting---Resistant Vines Discussed.

The vignerons who reside in the lower end of Napa valley are not less enthusiastic in the study of their noble industry in all its branches, than the vineyardists in any part of the State. Under the presidency of the Hon. Morris M. Estee, the Napa Wine Growers' Association is a thoroughly live institution. On Saturday, the 29th inst., this association held an important meeting at which Professor E. W. Hilgard and Hon. C. A. Wetmore, Chief Executive Viticultural Officer, were invited to address the club. The meeting was held in the Court House, M. M. Estee presiding, and over one hundred practical viticulturalists were present. Before the regular proceedings commenced, Mr. Wetmore exhibited some samples of wine and brandy. First, a Folle Blanche, a white wine; next a Zinfandel from Stockton, blended with a small quantity of Trousseau. The Zinfandel was an inferior wine before blending. By adding Malbeck to Zinfandel, a Bordeaux wine can be produced; by adding Trousseau, a Burgundy. Also a sample of Norton's Virginia, which on some soils made a wine nearly as black as ink, but with Mr. Eisen in Fresno had a nice full, but not an extremely dark color. It was a good wine with a Madeira flavor, pointing to some value as a blend. Some Feherzagos, four years old, from the Cajon valley of San Diego county, showed fine color. Another sample was a Zinfandel. Mr. Wetmore remarked that where there was no clay Zinfandel had little color. On other soils a few miles distant it had plenty of color. On the contrary, Malbec grew to perfection where there was a sandy soil. In exhibiting a brandy, Wests' Prolific, Mr. Wetmore spoke of this grape as being probably allied to the Colombar, as it had the true cognac flavor as well as the general appearance of that vine. *En passant*, he said that wine that produced a headache, if distilled, would make a brandy that would give headache. This was shown in Mission wine, as when it was distilled the heady qualities seemed to go over into the spirit, and made a brandy less wholesome than the pomace brandy of finer grapes.

The Chairman then called the meeting to order, and in his opening remarks said while he was glad to see so good an attendance, he felt that from the very large number who were directly interested in vine growing in the country around Napa City, the attendance should have been larger. Vine growing was a business that required constant study, and all of them had much to learn. For this occasion, Professor E. W. Hilgard had kindly consented to leave his home at Berkely and address them. The Hon. Charles A. Wetmore, of the Viticultural Commission, had also responded to his invitation, and brought with him these samples of wines to illustrate his observations. Mr. Bell, of the MERCHANT, had also come from San Francisco to make a record of their proceedings. The Association was indebted to Mr. Bell for a very full report of the proceedings of the Association in April last.

The Chairman then introduced Professor E. W. Hilgard, of the University of California. This gentleman was greeted with much warmth.

PROFESSOR E. W. HILGARD.

Professor Hilgard said that from pressure of other duties and indisposition, he had not come prepared to give an elaborated address, and that he thought perhaps discussion would be more useful. When he came to California, eight years ago, the wine interest was depressed. Afterwards came a boom, and planting was engaged in to a large extent, but the method was very promiscuous. He spoke of the great interest on this subject, as shown by the large attendance. Speaking of the phylloxera, he said it would possibly spread over the whole State, but though the old vineyards might not be saved, the phylloxera could be overcome by planting resistant vines. We shall go on for a long time before we produce too much good wine, but if we are careless in selecting varieties we may easily produce more inferior wines than could be sold at profit. He spoke of Mr. Wetmore's long and continued labors, and particularly of his study of blends, as illustrated by his informal remarks before the meeting regularly opened. He thought with Mr. Wetmore we must follow the types which had attained pre-eminence for centuries, and not seek for new types, and these types could not be obtained by promiscuous planting. Mr. Wetmore guided by his European knowledge and taste was making experiments in blends which would prove of great value to them all. In the University, the speaker was working to the same end by the methods of chemistry. The University was taking care of one branch and the Viticultural Commission of the other, but both were engaged in the same work. He could not too strongly warn his hearers against promiscuous planting. It was only by the merest chance that loss, serious loss, could be avoided. He regretted that all the proceedings of these associations, with members' statements of individual experience, were not always put on record for future use. He spoke of the ignorance even of legislators about what his department of the University was doing for viticulture. He said that practical experiments should be conducted in several parts of the State. Mr. J. T. Doyle had offered the University the use of two acres in the Santa Clara Valley for experiments. The offer was accepted. There should be an experimental vineyard in Napa and in every other wine county. The peculiarities, the yield, the quality of the several grapes and of the wine produced by them could then be definitely ascertained. Experiments regarding the best time for blending, whether before or after fermenting, should be made. It might be found that the wine of one district was not fit for use alone, but became valuable by blending with the wines of other districts. He brought up the vexed subject of fermenting Riesling on the skins, which was argued *pro* and *con* at the State Convention held in San Francisco last September. He was making in all cases wines both on the skins and without them, developing thereby what varieties might be best fermented either way.

The old way of selling cellars at a fixed price, say 25 to 30 cents all round was over; the dealers had hitherto been supposed to be the only men who understood blending. Perhaps they did understand it, perhaps they did not. But the wine makers, through such institutions as these, should by experiment definitely settle some of

DISINFECT

Your Cuttings and Roots

Before Planting,

WITH—

Sulphocarbonate of Potassium.

TO CLEAN THEM OF PHYLLOXERA AND OTHER DISEASES.

With the opening of another planting season I am able to offer for sale Sulphocarbonate of potassium, the leading disinfectant recommended by the Board of State Viticultural Commissioners of California for cleaning vine cuttings, rooted vines, trees, etc., of phylloxera and other diseases. To prevent the introduction and further spread of phylloxera in new vineyards in California, the sulphocarbonate has been used during the past three years almost exclusively and with entire satisfaction. It has stood the test of eight years in France, and enjoys especially the reputation that its use is not attended with any danger to the vine roots or cuttings On the contrary, containing over 50 per cent. of pure potash (the most valuable element for vineyard fertilizers), besides anilphur, etc., it stimulates growth and permits of no waste The eggs of all other insects, as well as the germs of mildew and other fungi are alike destroyed by 15 minutes immersion in a solution of 1 part to 100 of water for cuttings or rooted vines, and by washing with concentrated solution for old vines The sulphocarbonate of potassium, as prepared by me for disinfecting purposes, is a liquid put up in the following packages Each package is accompanied by a complete direction and ready for use. Must be ordered direct from the manufacturer. Sent by freight or express, on receipt of price.

PRICE LIST—Quart bottles, each, $1 00; gallon cans, each, $3 00, 5 gallon kegs, each, $9 00.

ADDRESS,

JOHN H. WHEELER, III Leidesdorff St., San Francisco.

Manufacturer, also, of Carbon Bisulphide, for destroying phylloxera, squirrels, gophers, rats, weevil, etc Tree Washes and Disinfectants Injectors for Bisulphide, sulphur bellows, sulphur for vineyards, and all kinds of fertilizers furnished.

these questions. The question of how to make wines fit for shipment and fit for drinking after shipment ought to be answered by such associations as that he was addressing. He and Mr. Wetmore were feeling their way in this direction, but the field of investigation and number of operators in experiments should be enlarged. The wine growers should help themselves and others, and especially take care that the appropriations for this purpose were enlarged. California would be the wine growing State of the Union—the Atlantic States, with the peculiar flavor of all their wines, could not compete with this State, for we alone could produce wines corresponding to European types. He spoke of the difference between the wines of the heavy yielding vines and those of the light bearing vines. At the close, Professor Hilgard was again applauded.

Mr. Wetmore then asked the professor to give his opinion on resistant vines, as he knew the gentleman had been examining that subject with great care, with a view of determining what to plant in his own vineyard.

Professor Hilgard in response said from the habits of the Atlantic native vines they could not bear drouth like our native Californicas. They originated in countries where there was rain every two or three weeks, the other in a country where there are several months of drouth. The resistant qualities of the Californica, however, had not been proved to the extent that those of the Atlantic vines had. He spoke of the growth of Riparias in this State as he had seen them in Judge Stanley's vineyard and at Mr. Wetmore's place when compared to that of the Californicas. The Californica vines made an excellent growth and their roots went straight down to the moisture of the subsoil and therefore allowed closer cultivation. He thought that the growth of both Rupestris and Riparia was checked by the summer drought which from the downward growth of the roots of the Californica its vitality was not checked during the dry season. In his own vineyard he was giving two-thirds of his ground to Californicas for the reasons stated.

The President thanked the Professor in the name of the Association, and said it was most fortunate for this State that when the Viticultural Commission was instituted, the Commissioners happily secured the services of so able a gentleman as Mr. Wetmore for their chief executive officer. He then called upon that gentleman to address them.

Mr. Wetmore was warmly applauded on rising. He said that we were trying to crowd the experience of a thousand years into four or five. One great difficulty in our way in developing a comparatively new industry in America was that all the literature of wine was in foreign languages. Even a man who came from Burgundy, or from the Rhine, and talked about knowing all about all grapes and wines, talked nonsence. He could learn something from such gentlemen, but we could teach them something also. There was no country like California; nowhere such a variety of fruits could be grown on one tract of land. We cannot afford to be dogmatic, however, and we must study in each part of the State the literature and experience of those other countries something similar to ours. In no European country can they make Claret, Sauterne and Sherry from the grapes of one vineyard. In Fresno everything seemed to run into Sherry in three or four years, therefore he thought it would not prove a Claret country. He went over the samples he had exhibited before the meeting came to order, particularly the Zinfandel blended with a small proportion of Trousseau. He believed that the Zinfandel would have turned milk-sour but for the well known keeping qualities of Trousseau. Mataro had the same property. After determining how to plant our vineyards so that they would be permanent, we must decide how to make wine that will sell, and sell readily. We must have wine that will keep without being nursed by an expert We must find out what the people like and what they can afford to pay. Then, wine must be wholesome, or people will not drink it. The Bordeaux Claret is popular because it is wholesome and will keep. The Burgundy is gouty, and is gouty from the same cause that prevents its keeping well or bearing transportation. The unfermented sugar in wine is the injurious property. Wine that will not bear transportation is not a wholesome wine to drink. The Spanish Claret wine cannot be sent to America, but it can be sent to France and blended with Folle Blanche, and other keeping wines, and then it can be transported anywhere.

Transportability and wholesomeness are even more important than high quality. Civilization teaches us to seek enjoyment in exercising all the functions of life, and we want pleasure in drinking our wine as well as nutriment. Ten per cent. of Trousseau had made this sample of Zinfandel a merchantable Burgundy, and nearly doubled its value. The Zinfandel, a heavy yielding grape, formed the bulk—the small proportion of juice of grapes of lighter bearing vines gave the quality. By planting ten per cent. of noble vines, which are all light bearers, we could by blending furnish quality as well as quantity. Every man should plant as if he was going to make wine, and even though he was going to sell his grapes, the aim should be to make in each vineyard the necessary blend, and then the wine dealers' cellars would be full of good wines. If a small proportion of each vineyard were grafted over with noble vines, we should in three years hardly know our wine. We must, above all, improve the keeping qualities of our wine, so that it could be shipped to St. Louis, thence back to Denver, if necessary, and finally sold to a saloonkeeper, who has neither the convenience nor knowledge to take proper care of it, without risk of its spoiling.

I am satisfied, he said, we can control the phylloxera by insecticides, but I know we will not do it. We talk of what we will do before we are hurt, if phylloxera should attack our vineyards, but it ends there; when the phylloxera does come, you all, like others, do nothing. We are not using insecticides, and phylloxera is spreading. For what reason the American vines resist phylloxera, I cannot decide. The Riparia, a wild vine grown on river banks in the Atlantic States, resists phylloxera, and stands our dry summers. The Californicas in most soils will make the best growth, but Riparias have been proved beyond all doubt, by European experiments, to be phylloxera resistant. It is folly in this valley to plant anything but resistant vines, Riparias or Californicas. All new vineyards should be planted in resistant vines, but to improve the quality of the wine now being made, and to be made, within the next three years, some of the yield should be sacrificed by grafting proportions of vineyards with finer varieties.

He then spoke of the necessity of wine makers making a home market, and that they should insist on the restaurants and hotels which they patronized furnishing wine as cheaply as coffee or tea. It costs as little. They should also themselves furnish it to their workmen. It was a mistake to treat wine as a fancy article in our own homes, and then expect people at a distance to make a market for our products. He spoke of the Palace Hotel charging one dollar a bottle for Zinfandel, and the St. Helena Hotel 75 cents, when their proprietors could buy of any of those present good sound wines at sixty cents a gallon. [Applause.]

On the motion of the chair, a vote of thanks was tendered to Messrs. Hilgard and Wetmore for their services on this occasion.

Dr. Wilkins desired to know of Mr. Wetmore what varieties and what proportions he would plant in a new vineyard for red wine in this county.

In answer to Dr. Wilkins, Mr. Wetmore said: I would plant some Mataro, say 25 per cent.; then at least about 25 per cent. Malbec, if I could get them; about 25 per cent. Zinfandel, and the balance Cabernet Sauvignon The last is a liggt bearer, but if we want quality, we must yield something in quantity. I would not plant Zinfandel on extreme bottom land. The Malbec is a bottom land grape, but in this valley I would rather plant resistant vines and graft them over, and then the difficulty of getting enough of these fine varieties would be over. It did not follow that fine qualities always meant small quantity. By judicious pruning a good crop of noble quality might be obtained.

In answer to Professor Husmann, Mr. Wetmore, speaking of white wines, said there were two popular varieties, of white wines the Sauterne and the Rhine. We had no true Sauterne in this State, but this county could always sell all the Riesling it could make. There was no county in which that grape did better. For a white wine vineyard he should also recommend Burger, Folle Blanche and Sauvignon vert. He said something about the misapprehension that adobe lands were unfit for vineyard purposes, and cited the wine produced on Mr. Smorntomn's vineyard, under the charge of Professor Husmann, as instance to the contrary.

Professor Hilgard then, by request, spoke on fruits, adding to his previous remarks on wine, some comments on wine making. He believed that while we had much to learn from Europe, we could teach Europeans something in our mechanical devices for crushing, appliances which aerated the must in the process of crushing, and thus promoted fermentation.

In conclusion, the President reminded the members that the annual dues of the Association, one dollar, were due, and that Mr. Goodman, the Treasurer, who was then present, would hand them their receipts if they would call on him at his bank.

Mr. Estee then addressed some appreciative words, advising all who had not already subscribed for the MERCHANT, which had so devoted itself to their service as to become the organ of the wine interests of the State, to become subscribers at once.

The meeting then adjourned.

Some of those present then came forward and paid their subscriptions, and a number we expect to hear from by mail, which will add considerably to the very large clientelle the MERCHANT already has in that county.

Whites are excluded from the San Carlos Reservation.

Large numbers of British troops have been ordered home from Egypt.

The number of Indians in the everglades of Florida is estimated at 800.

Grilley's prospects for a newspaper are brightening.

Advance Sheets

OF THE

CHIEF EXECUTIVE VITICULTURAL OFFICER'S ANNUAL REPORT.

This being the season when vineyardists in all parts of the State are selecting the varieties of vines which they will plant, and so many new vineyards and additions to old ones are in contemplation, and Mr. Wetmore is besought every day by letter and personal interrogation for advice on varieties and kindred subjects, he has consented to allow the notes of his Annual Report to be published in the MERCHANT in advance. Had publication been delayed until this report appeared from the State Printing Office it would have been of little use this year to most of our vineyardists, and in departing from the usual rule, Mr. Wetmore confers a material benefit on viticulturists, and saves himself much time and labor in giving information orally or by letter, and is able to impart the advice his great experience dictates in much fuller form than he otherwise could.

WHAT TO PLANT—WHERE TO PLANT.

Mr. C. A. Wetmore says:

I am continually receiving letters from all parts of the State, asking advice concerning the varieties of vines that should be planted in new vineyards, or the varieties that should be used to improve the products of those already planted by judicious blending. These letters come from so many different places and the problems suggested by their inquiries are so varied that it seems almost impossible to give in one document any adequate guide for all. So much depends on an intimate knowledge of almost infinitely varying conditions of soil and climates, on the purposes, ambitions, and financial ability of planters, on local wants created by plantations already made, and more especially on the resources of our vineyards to furnish cuttings and vines, that I am often conscious of apparent inconsistency in my recommendations I am often, in the same breath, recommending the cultivation of a certain variety in a certain place and advising the planting of other varieties—knowing—as I may at the time—that the most desirable may not be obtainable and keeping in mind others that may be equally valuable from other standpoints and at the time within reach of the planter.

The day will no doubt come when certain places will become devoted mainly to the culture of certain varieties known to produce the best results; but now we can only estimate within certain limits wherein the best average results may be reached, leaving the future to determine where the highest success is achieved. There are so many ways of accomplishing success in viticulture in any locality that the vine grower is not confined to any fixed selection of varieties of vines. One may believe that quantity will pay better than quality; one may prefer fair quality with good quantity to either great quantity and poor quality, or the finest quality, regardless of quantity; one may even believe that the finest quality will always be profitable and the safest to pursue, or one may be satisfied that in his locality the finest quality is not attainable and therefore believe that it would be best to compete for cheap prices with large quantity. Again, one may think it safer to produce white wine than to produce red; sweet wine than dry; brandy rather than wine, table or shipping grapes; raisins, etc. And indeed one may prefer to produce raisins but may find that his locality is best suited to wine grapes and *vice versa*.

My own line of policy has been to advise planters to aim to produce that quality and kind of goods, which their particular localities promise to produce best. I have believed that, if ever we do over-plant grape-vines, or "over-do the business" as is often talked about, it will be in producing inferior qualities of grapes, wines, brandies or raisins, which the markets will not be ready to take so long as plenty of better quality is offered. In developing a new industry and opening new markets, we must aim, by the tempting quality of our goods as well as also by cheap prices, especially where we come in contact with adverse customs and prejudices, to achieve success. This State has so much land to develop, that can be made to produce superior quality, that I do not believe that this generation will see the day, after we have once produced sufficient to satisfy created demands, when good quality will be suffered to waste, while poor quality is marketed.

I know that at present it pays better generally to produce quantity rather than quality, but that has been for several reasons, viz:—wine makers and buyers have not yet well learned where to detect good quality until after they have had the wines a-ored awhile; the markets have needed all that could be produced; and in most vineyards the grapes producing finest quality, have been drowned beyond recognition in inferior lots. The progress that has been made in the last few years in experimenting with single varieties of vines has, however, been very great and although not appreciable yet in the general markets, it has served to guide many planters in grafting over old stocks and in making new plantations. This process of improvement has been systematised to such an extent that in two or three years more the market can be supplied with considerable quantities of superior wines and brandies—much finer than any now offered in merchantable lots. Then will commence the true competition among wine and brandy producers, and it is hardly fair to presume that the dealers will fail to secure first for their cellars the most desirable goods. Those who fear that the "business may be overdone" should certainly believe that safety is on the side of quality, and danger on the side of inferiority. I myself do believe that the business of making inferior wines, brandies and raisins will be overdone, but that good quality will always find a ready market.

If I am right in this proposition, then I have been right in urging on our people the careful study and selection of varieties of vines—not so much with reference to their fertility as with reference to their value in producing certain qualities after fermentation, distillation or drying. And, as it is known that a certain vine does not produce the same results in all places, and even that where one fails another succeeds, the question of the selection of varieties can only be approximately solved by any process of reasoning in advance of actual experiment. We know, however, certain general rules of climate and the adaptations of vines, something but not a great deal about soils, and we know that success is always to be found, if found at all, within certain limits of selection. Advice can therefore be given without too large a margin of doubt. I have always felt my conscience clear when I have told a planter the best that is known, and have always tried to make him understand, whenever he is inexperienced, that his percentages of failure will be less where he plants in accordance with an intelligent theory. This I have always been able to demonstrate by appealing to whatever successes we have attained. Our *Zinfandel* was not propagated by accident, but by the advice of intelligent and experienced winemakers, who recognized in it certain good qualities; it has been of great value to us, yet experience proves it to be a failure in many places. It is by applying theory, together with such experience as is now open to study, that we hope to make more rapid progress and fewer failures in the future. Let the beginner not be dismayed by the chance of failure, such as I refer to; his vines will serve at least as roots to graft upon, when he has determined how to improve his plantings. If he is timid, let him plant varieties of known excellence in situations of known results. If he tries unknown spots, let him try to understand why he selects any particular variety before doing so.

With these remarks I will endeavor to outline the known characteristics and uses of the most prominent varieties of vines that have proved their excellencies and uses in various parts of the State, and afterwards to suggest certain combinations for vineyards in different parts of the State.

THE RHENISH WHITE WINE VARIETIES.

RIESLING.—This is the noble grape *par excellence* of the Rhine, excelling in its aroma. Properly speaking, there is only one true *Riesling*, viz: that which is by courtesy called the *Johannisberg*, after one famous vineyard, where it predominates. Custom has, however, attached the name to other varieties, so that when we wish to speak of this genuine variety, we must now use the word Johannisberg to identify it. This is a shy bearer, requires long pruning, and succeeds well only on soil of sufficient moisture and strength. (N. B.—I shall speak of characteristics mainly as they are shown in this State, where climatic conditions are different from those of the native homes of the varieties). It is an early ripener, otherwise it could not succeed on the Rhine. Experience in Europe shows that it loses its aroma and quality when cultivated in warmer countries and situations, where later ripening varieties come to perfection. On the Rhine the greatest perfection is often obtained only when the berries are left on the vines until long after the usual time of vintage. This should not be the rule here except under similar circumstances, viz: where sufficient saccharine is not obtained early. I believe that we shall not succeed in making fine Riesling wine of Rhenish type except in such places where over maturity is difficult to obtain, and where at the time of ordinary ripening the must does not exceed twenty-two per cent in sugar. In such places, I believe the excellence of the product will be, as on the Rhine and as with the varieties used in making Sauternes in France, improved by leaving the fruit as long as possible on the vines. What soils are not suited to the *Riesling* we do not well know; but we do know that this variety is a failure, as to quality of wine, in the greater number of our wine-producing districts, and it is only popular in the counties north of the bay of San Francisco, and west of the Sacramento valley. Other districts appear to be too warm or too dry for it. It would probably do well in Santa Cruz and San Mateo counties, south of the Golden Gate,

SYLVANER.—Better known as *Franken* Riesling: This variety is associated on the Rhine with the *Johannisberg* in producing the finest wines. It is a fine wine grape, and, until experience proves the contrary, should be limited to the counties where the *Riesling* is known to make fine wine. This is the variety known as *Green Hungarian* in El Dorado county. The wine made there from it shows its noble origin, but also that it is not in its true home.

TRAMINER.—This variety is also a noble one, but is very little cultivated outside the Sonoma valley. Not much is therefore known about it. An inferior grape, similar in color but with longer bunches, is sometimes confounded with the *Traminer* in Napa county. Probably the *Traminer* should be limited to the known Riesling districts.

KLEVNER.—This belongs to the Pinot family and will be treated under that head.

KLEINBERGER, ELBLING, ALBA, WHITE ELBA.—This variety is the so-called common grape of the Rhine, bearing well and making an agreable, light white wine. Its quality is sufficiently high to permit its use in vineyards where the *Riesling* is cultivated, contributing to the blend its own excellencies. I cannot find this grape with certainty except in the Sonoma valley in small lots. It is the history of this variety that it improves by being moved to a warmer climate. It enters into the composition of French champagne in some degree. Probably this grape ought to be cultivated more in the Sonoma and Napa white wine vineyards. Mr. Dresel, of Sonoma, has a small block of this vine. This is the true *Burger* of the Rhine, though I do not use this name here because we might confound it with another variety known erroneously by that name.

BLAUE ELBA, OR ELBLING.—This is simply a dark-skinned variety of the *Kleinberger*, or *White Elbling* of the Rhine. Rhenish authorities say it is superior in quality to its fairer sister. It makes a very good white wine in Los Angeles county, proving thereby that the authorities are correct in saying that it may be moved to warmer climates without danger. It should be blended with some milder grape. I believe that in Los Angeles county in places where the *Zinfandel* does not show good color, the latter should be made into white wine and blended with the *Blaue Elbling* and possibly also with the *Burger* (so-called), these varieties being sufficiently planted there already.

CHASSELAS.—Under this name are classed a number of varieties, but for wine making only one is prominent, viz: the *Chasselas Doré*, otherwise known as *Chasselas Fontainbleau* or *Gutedel*. This is the true *Golden Chasselas*; the latter name has been accidentally misapplied in Napa county. In France and on the Rhine, the *Chasselas* is not highly esteemed as a wine grape, on account particularly of its low degree of sugar. It is generally used in France as a table grape; in the south of France sometimes for wine, but as such is not highly esteemed. In this State, even in Sonoma and Napa counties, this grape demonstrates the marked difference of our climate, when compared with that of the home of the Rhenish vines. Here it obtains sufficient sugar to make a good-bodied wine, which is highly esteemed by many. I will state it, as a rule that I think will be followed in future, that in proportion as we find the *Chasselas* succeeding in making good wine in any given spot, we shall find the *Riesling* falling behind the standard excellence of the Rhine. The north slopes should be preferred for the *Riesling* and the south slopes for the *Chasselas*, or the *Riesling* may go with advantage to the bottom land and the *Chasselas* to the hill side.

GOLDEN CHASSELAS (so-called).—This variety, well known in Napa county, is, without doubt, accidentally misnamed. It is so well known, however, that it will be with difficulty changed to another name. What its true name is I do not know. Mr. Morel thinks it is the French *Roussanne*, but I am inclined to believe that it is one of the many Rhenish varieties, which are little known, and which might easily have been sent here mixed with *Chasselas*, or accidentally mis-labeled. It is a very vigorous and fertile vine, best known in the vicinity of St. Helena, and would, no doubt, bear planting in places where even more generous wines are produced. It makes good white wine, but not of very high promise unless blended.

MOSELLE RIESLING.—I have found this excellent variety only in San Joaquin county. It is very much needed in the Riesling vineyards of Napa and Sonoma to impart it a

characteristic acids and aroma to blends of the *Johannisberg* and *Franken*. It is, I believe, a better bearer than the last two named. When distilled in Stockton with the *White Prolific* it assists in making fine brandy. On the Rhine it is called also the *Klein-Rauschling*. It should not be neglected.

OTHER GERMAN VARIETIES.

MALVASIER.—Known also here as *Black Malvasia, Malvoisie*, etc. This is no true *Malvoisie*, but came to this country under the name of the *Malvoisie Noir de Berlin*. This I am told in Santa Clara county. It is probably a German grape of the *Trollinger* family, of which our

BLACK HAMBURG is a representative. Both these varieties are properly only suitable for the table. The dry red wine of the *Malvasier* is disliked by the dealers; some claim to make excellent port wine with it, but the standard of taste for port has not been high, and it has only been compared with *Mission* port. I believe it may be serviceable for port wine, but will need other and finer varieties to improve it by blending.

GERMAN MUSCATELLER.—This variety is different from the French *Frontignan*, or *Muscat Blanc*. It is useful in very small proportions in blending with almost neutral white wines to give a slight aroma. The Schramsberg leading wine is a light *Burger* slightly flavored with *Muscatteller*.

OTHER WHITE WINE VARIETIES.

Only the Rhenish white wine varieties are well represented and studied in this State. The noblest French and Spanish are scarcely known, which is to be regretted, as we are thereby prevented at present from reproducing the Santerne and Sherry types. The Burgundy types of white wine are represented only experimentally. We have, however, in considerable quantities the following varieties of considerable interest, and already distributed in several parts of the State.

BURGER.—This variety, now so well known, is evidently misnamed. How such accidents of nomenclature could happen might easily be explained to any one who has ever attempted to introduce and propagate foreign varieties of vines; the accident is apt to happen in the vineyard in Europe, where the cuttings were made, through the mistake of some workmen; it is apt to happen through similar mistakes in nurseries here; and we even find that we are in danger everywhere of carelessly adopting the names which European workmen erroneously give to varieties which they find growing here and which they think they recognize. Many of our most important stocks of vines are now passing in this State under names which have been given to them by French or German workmen after they have been grown here for years. For instance, Mr. Chas. Lefranc will tell you that he had great trouble with his importations made about twenty-five years ago, the time in transport being long and labels often being rotted off before their arrival. Thus he had cultivated the *Grenache* for a long time without knowing its name, when accidentally he fell upon a workman from the south of France, who recognized it. Such recognitions are, however, generally to be distrusted. I have found by experience that very few French or German workmen have even a faint idea of the great number of varieties of vines that are known outside the districts they used to work in, and very often they imagine that they are acquainted with all important ones; so they will generally attempt to identify in every variety that they find here some one variety that they knew in their native homes. It is very difficult now to trace back the origin of many of our well known varieties, and some of them are nearly hopelessly lost to history, as, for instance, the *Black Prince* or *Rose of Peru*, the *Feher Zagos, White Nice, Emperor, Petit Pinot* or *Crabb's Black Burgundy, West's White Prolific*, and more especially our popular *Zinfandel*. Those who imported vines between the years 1850 and 1860, exchanged with each other without preserving records of origin; and nearly all the public spirited men who promoted this great work are now dead, without leaving records of their own importations. The great collections of Col. Agoston Haraszthy were made up of a large number of varieties, collected from all sources in this State and supplemented by his most important importation during his studies in Europe, while traveling as the Commissioner for California. We cannot tell now from his published catalogue which varieties he imported himself from the European collections and which he had gathered from other importers in this State. During his life he distributed hundreds of varieties throughout the State, the greater number of which are now lost to name and in artificially mixed up in old vineyards. It is well known that several parties have commenced to form new and authentic collections by direct importations, which will be the ultimate means of assisting in future in unraveling many present mysteries. It is possible, however, that in some cases we may forever remain in the dark. We have no doubt propagated, in some instances, vines taken from collections in Europe that are almost as little known there as here, rare curiosities of viticulture, which we have utilized this, I believe, is the truth about our *Zinfandel* and *Emperor*, which I have found, so far, impossible to trace back.

These remarks, suggested by the *Burger* so-called by us, are properly placed here, because this variety is destined to play an important role in our industry

The *Burger* of the Rhine, as explained before, is, no doubt, the *Rhinhesper* or *White Elbling*, and far different from our grape of that name. Our *Burger* I have no doubt, however, came from the Rhine; yet I have not classed it among the Rhenish varieties, because it does not belong to them. The climate of the Rhine is quite unsuited to bring this vine into proper maturity, except, perhaps in most favorable situations and years. Its home is in a warmer climate. In the *Ampelographie Rhenane*, among the varieties cultivated on the Rhine, is described the *Grand Tokayer*, which also, is called there the *Thalhaper* and *Putscher*. The history of this variety is that it came from Hungary and that it even is used in the Grand Tokay vineyards, together with the *Furmint*. This statement, however, is doubtful. It was introduced on the Rhine as a curiosity, on account of its extreme fertility, but the Germans were soon forbidden by their government to propagate it, for fear the quality of German wine would be injured by its introduction. On the Rhine, as in this State, it was a tempting variety to plant, on account of its great fertility, but the rule, as even here, in some situations, it would not sufficiently mature its fruit, the climate being unfavorable. From the description of this variety, I inferred at once that our *Burger* was the *Putscheer*, which appears to be the proper name of the *Grand Tokayer*.

The picture of this variety, however, differs from our *Burger*, both in shape of bunch and leaf. While in this confusion, Mr. Grozinger, of Yountville, imported the *Putscher* from the Rhine. He succeeded in fruiting about ten vines, among which all but two were identical with our *Burger*, and two were identical with the illustrated plate in the *Ampelographie Rhenane*. Now, we are left to think several things, either that our *Burger* is the *Putscheer* and that the artist made an error in his illustration, or that what is known as *Putscher* really comprises two varieties of similar characteristics; but the evidence points certainly to Hungary as the native home of our *Burger*. Such an opinion accords with its character here, for here we find it ripening its fruit to perfection only in most favored situations.

I believe that it is destined, together with small proportions of more aromatic varieties, to make the white wines of California as celebrated as the light table wines of the Rhine. With this variety as a base for blending, an agreable, wholesome, light white wine can be made in all viticultural sections of the State, where it can be well ripened.

In the northern bay counties it should always be confined to the warmest exposures and should never be planted on rich, moist bottom lands. In Santa Cruz county and in similar places, where the proximity to the sea tends to reduce the saccharine of grapes, the *Burger* may be unsuccessful except in the most favored spots, on rocky or gravelly soil.

In Fresno county and along the hot foothills of the Sierras, I believe that if this grape will stand the excessive heats of the summers it may be used to produce a wine of Manzanilla sherry type, provided the fruit is allowed to attain all the maturity possible. At least it will be useful, I shall confidently predict, for such purpose, if blended with true sherry varieties from Spain.

In Southern California, Los Angeles, San Diego, etc., it promises to form the basis of light white wines. This I state while knowing that it has apparently failed in Anaheim for two years, the leaves dropping and exposing the fruit during the hot spells. I say *apparently*, because I do not believe that this accident is to be a permanent one; at least I believe that it is a question of soil rather than climate in Los Angeles county.

The hot spells of Napa county are certainly more severe than those of Southern California. I will venture to say that the trouble at Anaheim with this grape was due to a sandy soil, not retaining moisture during the summer, and that the *Burger* will succeed, like the *Zinfandel, it not suffered to over-bear*, on soils or sub-soils where there is a sufficiency of clay and red oxide of iron.

The wine from the *Burger* is generally called neutral, and as valued by the merchants to blend with heavy or aromatic wines. It will, no doubt, play an important part hereafter in blending with heavy red wines, to reduce the strength and to add life to the dull characters.

I shall hereafter call attention to two important characteristics that we must seek for the bulk of our wine grapes, viz: wholesomeness and transportability. The latter characteristic every wine-maker knows means also easy fermentation.

The must of the *Burger* ferments easily and the wine keeps well. Hence it will be used to some extent in many vineyards where fermentation is difficult, even in combination with black as well as with white grapes. The *Burger* and the *Mataro* are to prove the chief safety valves of fermentation in California and the hoops of our wine trade. Let it be understood generally that a poorly fermented wine is unwholesome; that wines of difficult fermentation cannot be safely handled nor consumed when young; that wines easily fermented and good keepers are the known wholesome wines; that a great wine trade can only be built upon a reputation for wholesomeness and small risks to the merchant, and the public will understand why I have encouraged the planting of varieties known to produce sanitary rather than fancy wines. These so-called noble varieties in some cases are not easy to ferment, and do not produce wholesome wine, but their true office should be to be blended in fermentation with more useful plain varieties, to add character and beauty to the vintage. In the vat the *Mataro* and the *Burger* will correct the defects of fermentation of many other varieties, will render unwholesome musts wholesome, and save the merchant from handling rebellious new wines.

For making fine brandy I believe the *Burger* is also destined to play another important role. In many respects it resembles the *Folle Blanche*, which is the leading grape of the Cognac county. I believe that they are of one family. If I had a vineyard such as some of those in the bottom lands of St. Helena, where ten to twenty tons of grapes to the acre is not an uncommon yield, and where the quality of the wine is often very poor, I should plant *Burger, Folle Blanche* and *Colombur*—producing thereby a very large crop of very light, greenish white wine, which I would carefully distill, fully believing that the brandy I should make could only be surpassed in quality by the same method in some other similar place, where perhaps there may be more calcareous matter in the soil. If we are ever to make a fine reproduction of the highest type of Cognac, such as was exhibited at our last State Viticultural Convention, the type of which is known as *Grand fine Champagne*, we must certainly do it after the manner I have indicated. Whatever of delicacy there is in the Naglee brandy is, no doubt, due to the rankness of the vegetation of the maker's vines, the lightness of his wines and their comparative immaturity, together with a certain small proportion of quality in the grapes themselves. On the same land the *Burger, Folle Blanche* and *Colombur* would have made Naglee brandy, I firmly believe, immensely superior to what it is now. *West's White Prolific* as a brandy grape I shall discuss by itself. I believe it is a variety of the Colombar family.

Let some one in Napa county try this experiment next year. Mr. Crabb is the man to do it; take some valley *Burgers* from the bottom land, with sixteen per cent sugar; send for some *Folle Blanche* from Alameda or Santa Clara county, with instructions to pick at not exceeding twenty per cent sugar, send also for some *Colombur* of twenty to twenty-four per cent sugar; ferment, without pressing the skin too much, and distil immediately after fermentation at low temperature; and then let the public note the result from year to year as the brandy improves—being careful to keep it in proper cooperage of not more than one hundred and fifty gallons in size and changing cooperage every two years for new wood. See what can be done this year by a distillate from such light *Burger, Colombar (white green Riesling)* and *Folle Blanche* wines, as can be found, to experiment with.

COLOMBAR.—This variety came under its true name to Mr. Pellier, of Santa Clara county, from the Charente district in France. It is one of the celebrated Cognac varieties, cultivated with the *Folle Blanche* and *St. Pierre* in all the finest Cognac growths. Mr. Lefranc has it under the name of *Sauvignon Vert*, and for some time it was supposed to be the *Sauvignon* of the high-classed Santerne vineyards. This latter supposition has been proved a mistake, both by comparing the vine with the true *Sauvignon* recently imported in experimental lots, and by the study of the wine. Mr. Lefranc's white wine owes its Santerne character, no doubt, to the mixture of the *Colombur* with other varieties, not yet clearly known to the public. It is not improbable that in some part near Bordeaux, the *Colombar* may be known as the *Sauvignon Vert*; the Charente, or Cognac country and the Santernes are not far apart. Some authorities put the *Colombar* as a synonym of the *Semillon* of Santerne; but comparisons made recently disprove this.

The *Colombur* is, however, a known fine variety for white wine, both in France and in this State. At St. Helena it acquired accidentally the name of *White Green Riesling*; then it took on the name *Sauvignon Vert* from Lefranc's collection. I have little doubt in saying now that I believe it should only be called the *Colombur*. We need the Santerne varieties, and should not confound their names.

The *Colombur* has much similarity with *West's White Prolific*, and I believe, from all I know of the vine, that it will make a fine blend for *Burger* in the interior and southern, as well as in the northern counties; a blend that may be improved into a light fine Santerne type, by grafting in as rapidly as possible a certain percentage—say, about one-fourth of the true *Sauvignon* of the Santerne country. To obtain a finer reproduction of the Santerne type, we must wait until we have stocks of *Semillon, Sauvignon* and *Muscadelle de Bordelais* (*Raisinotte, Cadillac*, etc., synonyms).

The *Colombur*, as has been said before, should accompany the selections for brandy vineyards, where it is desired to produce the Cognac type.

This vine is a fair bearer—sufficiently fertile with short pruning.

FOLLE BLANCHE.—We are indebted to Mr. Pellier's collection also for the celebrated *Folle Blanche*, of the Charente, which near Cognac is the dominant variety. The vine bears abundantly, with close-set bunches of white, or greenish-yellow (when ripe), grapes. Near Cognac it is distilled, because its wine there is so light in alcohol (generally six to seven per cent) that it will not keep over the season. In the lower Charente and in the Gironde, near Bordeaux, it ripens better and makes a very light, wholesome white wine, very much liked by German importers. This wine often passes in our market as a cheap Santerne, probably it has been blended with a small quantity of real Santerne. The quality of the grape for wine appears to improve as it goes south, and for brandy as it goes north; which, together with other facts, has made me announce this rule, that to make the finest brands we must distill the lightest white wine from a certain type of grapes, and that a certain degree of immaturity will result in better brandy.

As a wine grape, however, I believe the *Folle Blanche* is important to us. Unfortunately we have not seen many samples fermented separately in this State. When

very coarse; it appears to have an objectionable rankness of flavor; but this passes off within the year. It has tremendous qualities similar to the *Burger*, and for that reason will be valuable to us. Probably the finest other white wine in France that can be handled with so low a degree of alcohol as the wine of this grape. In Bordeaux, is used in preparing what are known as "Argeo charets," which, in fact, comprise the bulk of the Bordeaux wines exported to the country and which are labeled to market the wine just on our market. The best of these preparations is to mingle the Spanish charets and those of the Mediterranean coast, made from the *Mataro* (pronounced), *Grenache* and *Carignane*, with dark coloring wines of Cahors, etc., and pineapply from the *Malbeck* (giving the so-called Bordeaux flavor, and the clear white wines from the *Folle Blanche*. These white wines impart to the other heavy red wines that quality which causes them to be called charets, and improves them for table use. I believe that the *Folle Blanche* can be made to play the same role in this State—where similar combinations will be much needed; but probably the grape must not be permitted to pass a certain degree of maturity—possibly IS to 20 per cent of sugar. This is a matter for experiment. Our internal charets, I believe, will not be made by fermenting together with the *Mataro*, *Carignan* and *Grenache* a certain portion of highly coloring grapes, such as *Lenoir*, *Bouschet-Aliconte*, *Petit Bouschet*, etc., and the *Folle Blanche* or *Burger*, or with both the last two named. If the result is lacking in characteristic flavors and bouquets, the merchants will blend it with certain proportions of old, high-grade wines of true Médoc wines, such as *Cabernet-Sauvignon*, *Malbeck*, etc., or, if Burgundy types are wanted, with rich old wines from the *Pinots*, *Meunier* or *Trousseau*. These latter high-classed blending wines will probably come from the coast counties or above a certain altitude in the Sierras.

If the experiment of using the *Folle Blanche* as a wine grape should fail anywhere, it may be relied on for distillation. Hence I have indorsed its wide-spread propagation, together with the *Burger* and *Colombar*.

WEST'S WHITE PROLIFIC.—This grape came originally to this State, many years ago, in a collection from Hovey's of Boston to the nursery of Mr George West of Stockton. There were two vines in the lot, and for years they attracted attention on account of their great vigor and constant fertility. For these reasons, Mr. George West propagated a considerable lot of this variety and made up the fruit into wine for distillation, together with *Riesling*s and sometimes *Missions*. The quality of his brandy began to attract attention, and finally the improvement was traced to this grape, which was then named *West's White Prolific*, to avoid confusion. The true name is not now known. Brandy of 1881 from this grape has this year been sold in San Francisco, and has elicited much admiration, being Cognac in type and much finer than any other known product of its age, and much finer than any of Mr. West's older distillations from mixed grapes. This result, together with its marked resemblance with the *Colombar*, though more fertile, causes me to believe that it belongs to the Cognac group by some relationship. Wine made from this grape has remarkable keeping qualities. I found it impossible to spoil it during the last year, though testing a demijohn, two-thirds empty, during six months in many ways—by the side of the kitchen stove, in a sunny window, etc. Whether this quality comes of the soil of Mr. West's vineyard, or is a constant property of the grape, remains to be proved. The wine has a peculiar flavor, but very agreeable. At Mr. West's it attains a high degree of alcohol. If fermented from grapes less mature, probably the brandy would be still further improved.

West's White Prolific is therefore to be classed with our groups of varieties for Cognac types of brandy. I believe also that in the Fresno country and along the Sierra foot-hills it may be used when fully ripened with *Burger* for a type of so-called sherries.

FEHER ZAGOS.—This variety received its name at a State Fair in Sacramento, when being exhibited by Mr. Bugby. The words mean simply *white grape*, and serve only to designate a lost child of viticulture. What its true name is we do not know. What its use will be is also obscure. The wine from the old vines of the Bugby vineyard near Folsom becomes very light as the vines grow old, and lost year it was scarcely merchantable except for distillation. A sample that I kept in a half-filled bottle in my office was examined a few days ago, after a year's exposure, and was found to be perfectly sound, though very light in alcohol, and greenish in acid. Mr. Harasztby believes that this wine has value for blending purposes. In Napa county I have seen a wine from it of rather inferior quality. In the Elsen vineyard near Fresno it produces abundantly, and its wine a sample of which is now four years old, has taken on a marked so-called sherry character. This sample is certainly worthy of study, and other experiments will be made. I should not, however, risk planting this grape for sherry purposes except where there is intense summer heat and a general disposition of other varieties towards a high saccharine percentage. It would no doubt produce a good brandy, but not so surely as the varieties I have named for such purpose.

ZINFANDEL.—This should be classed as a white wine grape of importance, but I reserve notice of it for its place under red wine grapes.

MISSION.—The *Mission* variety, so named after the Spanish Missions, where it was found, is probably a seedling propagated by the Franciscan fathers. There is no variety of Spain that is known to resemble it. Governor Downey had no authority whatever for saying that the Franciscans imported it from Spain as one of the finest varieties of sherry grapes. The sherry grapes are well known and in no respect resemble the *Mission*. But if the *Mission* is to have any role in future in our viticulture, it will certainly be only as a blend for sherries of an inferior type, or as a table fruit. It will no doubt be used for some time for sweet red or port types, but must gradually be abandoned even for that as finer and more sanitary products are made from other varieties. When our Los Angeles friends have practiced awhile with *Mataro* and *Trousseau* as a base with *Carignan* and *Grenache* blends for ports, they will find their wines will give them less trouble in transportation, will have fine character, and will be so wholesome, that, like the old fashioned Englishmen, our American lovers of sweetish wines or ports will drink their bottle without ruining their digestion. I have, therefore, classed the *Mission* as a white wine variety. As a dry red wine grape, it is a nuisance. As a brandy grape, it is a hindrance to our progress; because one has only to try Mission brandy a few times to be satisfied that whiskey is the better drink. The same property—whatever it may be—that makes *Mission* wine so "heady," appears to go over in distillation and impart the same trouble to the distillate. I have never used Mission brandy without suffering afterwards from a dull headache with almost a suicidal tendency. I have never had such a result after using brandies from our other grapes—even the pomace brandy of Napa county is not so objectionable. Probably if the *Mission* grape were picked before complete maturity, the brandy might be free from its most objectionable features. I say these things as forcibly as I can, because I realize that any unwholesome product of viticulture will seriously retard our progress in our contest in the whiskey and beer markets. Those who have Mission vines should use them as stocks to graft better varieties upon as soon as experience tells them what selections to make. In Los Angeles county, they need not fear to use *Mataro*, *Carignan*, *Grenache* and *Trousseau* and two years by grafting will determine other varieties.

VERDELHO.—This is *par excellence* the finest of the Madeira varieties. It also enters into the Sherries of Spain and the finest liqueur wines. It is found in this State in very small lots; therefore, it is not much known. However, its history is a sufficient guaranty for its use here, where we lean towards the Sherry, Madeira and liqueur types in many places. It does not appear to be a very abundant bearer, but its quality should cause it to be grafted in where Sherry, Madeira and liqueur wines are aimed at, to at least a limited per centage. In Fresno, if it does not sunburn, it will hasten progress towards desirable types; so, also, in Los Angeles county, and other similar districts. I believe its value should be tested also in Napa and Sonoma. A small percentage of noble grapes will work wonderful results in our vineyards; witness the effect of a small dose of *Reisling* in tanks of *Burger*, *White Malvasia*, *White Zinfandel*, etc.; or the effect of a little *Chauche Noir*, or *Trousseau* on a bottom land *Zinfandel*.

FRONTIGNAN.—Of all the varieties with Muscat flavor, the *Frontignan* is by far the finest for wine making. It is called *Muscat Blanc* (White Muscat) in France, but to avoid confounding it with other very different grapes, let us keep the name *Frontignan*, the name of the place where it made its greatest reputation before the phylloxera devastated that region. Where this variety will succeed best, I cannot tell. It does very well in Stockton, and I feel safe in predicting success with it in the climate of Southern California. In Fresno I do not know whether it will stand the intense summer heats. In Stockton there can be produced from it a most superior liqueur, or sweet wine, with delicate Muscat flavor, which surpasses, I believe, the famous *Frontignan* wine itself. It enough were made to warrant some merchant making an effort to bring it before the public in England, and in Russia, I believe that it would add lasting credit to our industry.

It may be used in very small proportions to flavor otherwise characterless white wines. I have known very important improvements in otherwise very ordinary brandy being made by mixing its wine with the other before distilling. This proves nothing new, for at one time *Frontignan* brandy was so famous that chemists even sold extracts to imitate it. *Frontignan* wine became too valuable to distill.

An excellent wine is sometimes made in the south of France by blending *Mataro* (fermented when over ripe) with the *Frontignan*. This wine is said to resemble the wine of Constance. This could be done whenever the *Mataro* could be ripened sufficiently.

SEMILLON.—This sauterne variety, recently imported by Mr. J. H. Drummond, the Natoma company and myself, has already proved its value at Mr. Drummond's through grafting. This, however, as well as the other sauterne varieties, viz: *Sauvignon* and *Muscadelle de Bordelais*, can only be had now by direct importations from France, the vines in this State being insufficient yet to supply the wants of those who have them. Santa Clara, Alameda, Contra Costa, San Joaquin, Solano, Los Angeles, San Diego and other similar regions should get ready to propagate these vines, if they desire high quality sauternes. Napa and Sonoma may also be benefited by them.

SHERRY VARIETIES.—The important true sherry varieties of Spain—such as the *Listan*, or *Palomino Blanco*, etc.—are practically unknown to us, although during the last year some stocks have been imported for trial. This and the Sauterne groups have been strangely neglected. Our best success may be in those types.

BURGUNDY AND CHAMPAGNE VARIETIES.—Of the varieties which produce the noble white wines of the Burgundy and Champagne districts of France, we have very few propagated in California. The true Burgundy *Pinot*, of which there are several varieties, is so light a bearer that it has been generally discarded as a practical variety. Mr. Benson, of Napa county, has the *Plant vert doree* and the *Fabraune* of the Champagne country in sufficient numbers to commence testing its wine. A sample I have seen was excellent. The white and gray *Pinot*, which make the famous Chablis wine, are not practically known to us, although we have scattering lots of *Klevner* (*Gray Pinot*) and *White Pinot*, and I believe that a *Melon Blanc* in Santa Clara county, which Mr. Crabb is now using in grafting old vines, is a true Burgundy vine. I am going to test the Chaintre system of pruning on these shy bearing vines, and perhaps I may succeed in getting a profitable crop. The *Pinot* ripens too early for the hot valleys.

CHAUCHE GRIS.—This variety came first to Santa Clara county together with the *Chauche Noir* from the country north of Bordeaux, France,—the *Lower Charente*. I find the two together in the collection imported from the Charente by Mr. P. Pellier, and I have little doubt that they were both propagated from his collection through the San Jose nurseries. In St. Helena we find a grape which I cannot distinguish from the *Chauche Gris*, viz. the so-called *Gray Riesling*, or *Gray d' Ischia*. I believe it is the same variety and that there never was any authority for the name known in St. Helena. There was a *Black d' Ischia* in Colonel Harasztby's collection, which resembles the *Chauche Noir*—hence some one has named the *Chauche Gris* the *Gray d' Ischia* by reason of the resemblance. This *Chauche* is the gray variety of the *Pinot de Poitou*—known as *Black Pinot* in many parts. It is not a Burgundy vine—but comes from the west of France. With long pruning, in good moist, deep soil, it yields abundantly. The wine is of fair quality, but varies with the soil apparently; where it may make a fine wine, if any where, we do not yet well know. It will probably succeed in many places too warm for the *Riesling*. It will furnish a good stock to graft on for those who may get tired of cultivating it. I use the word "wine" with discretion: few varieties will make *fine* wine, though many may make good, or fair quality.

RED WINE VARIETIES.

MISCELLANEOUS UNCLASSIFIED GRAPES.

ZINFANDEL.—The origin of this popular variety as veiled in mystery. It is quite certain that its propagation was a favorite hobby of Colonel Agoston Harasztby and his son Arpad Harasztby, who in unstinted terms urged vine-growers to adopt it as a claret grape; but it is equally certain that it was in this State long before Colonel Harasztby visited Europe as a State Viticultural Commissioner. I am strongly inclined to believe that there has been a mistake in naming it. Certainly it does not appear to belong to the varieties of *Sylvaners* or *Zinfandels*, described by Count Odart. I have seen four samples of old *Zinfandel* wine in this State which had such a remarkable resemblance to high classed Medoc (Bordeaux) wines that for all practical purposes I shall continue to recommend it for blends of Bordeaux claret types, although I think that judicious blends with Burgundy varieties can also be made. The four instances of true Medoc types from the Zinfandel were, viz: samples of wine two to four years old from the vineyards of J. H. Drummond, Glen Ellen, Sonoma Co., and of the Natoma Vineyard Company, Folsom, Sacramento Co.; also from the wineries of Mess. Anderson & Co., Napa, and Messrs. Brun & Chaix, Oakville, Napa Co. Where the grapes in the two latter cases grew I do not know. In three of these instances I believe there was no doubt as to the absolute purity of this wine—being from Zinfandel grapes only. In these instances I recognize the finest wines of Bordeaux type that I have ever seen in the State. In each case the peculiar Medoc flavors and bouquet were produced by age and were not detected in the new wines. I am therefore convinced that in districts where the claret types are possible and where the soil is proper, the *Zinfandel* is destined to assist us in rivaling the most popular of the French wines of exportation.

The *Zinfandel* apparently succeeds everywhere that the grape grows in this State; but in the wine cellar it records many dismal failures. My present impression is that whenever its must marks less than eleven or more than $12\frac{1}{2}$ per cent of alcohol for the wine, its product will be inferior and lose its Medoc character. In certain counties, such as Napa and Sonoma, it must have warm exposures, in others, such as Santa Cruz, I believe it will fail to properly mature; in others, such as Fresno and the foot hills of the Sierras, it ripens too fast and loses its character. In sandy and gravelly soils, where the proportion of clay is small, its wine is thin, lacking in color and greenish acid.

In soils where there is a firm foundation of clay it gives good color, and when such soils are well provided with red oxide of iron, and are well drained hill sides, it yields *finesse*, Bordeaux flavor and bouquet. Where there is an abundance of clay, the wine is not afflicted by free acid, but is delicate and velvety to the palate.

In many places, such as Yolo and San Joaquin counties, it should be classed, I

think, as a white wine grape. Its must, when not fermented on the skins, produces a wine delicate in flavor and sub-acid, in those places where the crop is large and the saccharine in high degree. In the sandy granite alluvial soil of Los Angeles county it should be made into white wine, unless experiment by fermenting it with the *Mataro*, or some similar variety, should prove a great improvement. In San Diego county we have found it succeeding well in the Cajon Valley, in red loam overlying a clay sub-soil. Across the ridge on similar loam, without clay, it fails to give color. In Fresno county and the Sierra foot-hills it is either a pour or a white wine grape.

Judging from its acid and other general characteristics, I believe that it will produce fine brandy, when it does not overripen.

There will be many who will insist on keeping *Zinfandel* unblended. Certainly when a perfect degree of maturity, neither under nor over ripe, can be obtained, together with good color, the *Zinfandel* promises well without the aid of any other variety. But I firmly believe that our markets will be better pleased with more solid and expressive wines. The *Zinfandel* and *Mataro*, each good bearers, will, I believe, become the favorite basis of our red wine vineyards, to be directed in expression towards favorite types by judicious blends with fine Burgundy or Bordeaux varieties. These blends, if perfected by being racked together as soon as each has finished the first violent fermentation, will be, I think, the foundation of our trade in dry red wines. The *Mataro* and *Zinfandel*, in many cases, may be fermented together with great advantage—the *Mataro* correcting any excess of ripeness of the *Zinfandel*.

The *Zinfandel* should not be long pruned; long wood results in light color and irregular maturity with this grape. Possibly this rule might be changed if the Chantre system of pruning be followed. I believe it is worth while to experiment in doing so.

MATARO.—Although this is not as extensively cultivated now as other varieties for red wine, yet its present popularity demands for it a place next to the *Zinfandel*; indeed, I believe that for the future it will have a wider range of new fields. It comes to us from two ports of France, under different names. Along the Mediterranean coast of France it is called generally *Morastel*, although it is sometimes called *Etrangedin* (dog strangler), probably on account of the roughness of the wine when young. Along the Spanish coast it is known as *Mataro*, *Boniel* or *Ecorce*. In the Charente north of Bordeaux, it is called *Becane*. We find it reported here and both in names *Mataro* and *Becane*. It is here, without reason called the *Upright Burgundy* at St. Helena, and *Mataro Burgundy* in Santa Clara; the former is an invention, the latter a misappropriation of name.

All the great French authorities agree in placing the *Mataro* as the first red wine grape of the southern regions, and many. Count Odart included, have counseled its use, even in the Bordeaux districts. By reason of its peculiar adaptability, it can be cultivated much further north than its common southern associates, the *Grenache* and *Carignane*. It ripens generally a little later than *Zinfandel*, and its must should promise an alcoholic strength of twelve per cent before the grapes are picked; when picked at a less degree of maturity, it fails in color.

The apparent defect of this grape is the roughness of the new wine; but this is the defect of most noble varieties. Like the *Cabernet-Sauvignon* of Bordeaux, it may engage to develop its qualities quickly. It should be remembered that wine which is somewhat wholesome, rich in extract, ripe and with age; but such can be got to sell, markets, unassisted and carefully with wines that are durable. The *Mataro* has been generally preferred at St. Helena to the *Mataro*, because its young wine is more agreeable to the palate. I have recently, at Captain Nickman's, seen the one year old Carignan deteriorating and becoming acid, while the *Mataro* was improving rapidly. I believe that the durable merit of the wine of Mr. Scheller, known as *Carignan* was due to the *Mataro* contained in it.

In testing red wine samples at St. Helena two years ago, the St. Helena Club gave the preference to a blend of *Mataro* and *Zinfandel*.

The chief merits of *Mataro* are, viz: The vine bears well and resists early fall rains, the fruit contains an abundance of tannin, the wine is wholesome, easily fermented and contributes its fermenting and keeping qualities to others with which it is combined. A mixture of *Mataro* in the fermenting vat with varieties that ferment with difficulty is often a sovereign remedy in the south of France. Whenever it is well suited in soil, exposure and climate, it gives an intensely colored wine. It dominates in the vineyards from which the Roussillon wines of commerce come. When excessively ripe, it combines well in port wines, and it bids fair to come over-ripe on the vine and partially desiccated after picking, it has been combined with the *Muscat of Frontignan*, to make a sun raisin liquorish wine said to resemble the wine of Constance.

Dr. Jules Guyot, the most celebrated of French viticultural writers, says of this grape: "But, of all its advantages, that which should cause it to be certainly preserved in Var, in Provence, and in all those regions of the Mediterranean coast of France, where it is cultivated, is this: the wines produced by it are unaffected by the mist, fuma, agreeable and salutary to a high degree than the wines of any other varieties of those districts."

Mr. Pellicot, a later authority, and one most competent, says: "I believe we should add to the judgement of Dr. Guyot "that no other wine of our country (the "south of France), stands transportation "by land and by sea, and equatorial heat "better than that of the *Mataro*. The tannin, with which it is well provided, gives it, in a high degree, preservative qualities; but it is at the same time the cause of the bitterness which is noticeable in "the new wine."

I believe there are few red wine vineyards in California, whether for dry or sweet wine, where the introduction of a proportion of *Mataro*, varying from ten to seventy-five per cent, will not be a positive gain. The *Mataro*, however, should not be planted on shallow, poor or dry soils; it flourishes best where there is a sufficiency of humus, or leaf mold, and where the subsoil permits the easy descent of its roots. It should not be placed in those vineyards where the *Zinfandel* and *Burger* do not ripen well. It yields well, when properly placed, with short pruning.

CARIGNANE.—I can find much fault, only on one point with this grape. I have not yet found it up to the "Commercial," as I sometimes seen here. The sun reaches from the dance to the truth in Tennessee and Portland. The dance is south and the Burgundy district, being to the Alps. Its names are sometimes and sweeter is given, that this fact alone, together with the history will in some time it, indicate that it is not the most esteemed variety of that country. Its leading names as *Cabanu*, it was imported by Mr. Drummond, and is another synonym—the *Plant de Martinique*. It is undoubtedly true to name.

The reader should remember that different varieties of vines received local names throughout Europe long before there was any careful classification of them. The confusion of the vine names is bad enough, what we should avoid here is the misapplication we well known names.

The *Chenin blanc* in Santa Clara county yields abundantly, and its wine, when under favorable conditions of culture, has a fine, delicate flavor. It will not however, at all the cause of attention, beyond the supply of a few particular pockets for cultivators. Be chary in the use of that grape in red wines, as the color is not lasting. Think the *Zinfandel* or *Mataro* is best when the *Chenin blanc* is used. The vine is of the most thrifty habit. There you find the most thrifty habit. The vine is of the most thrifty habit. The vine is of the most thrifty habit. The vine is of

[illegible]

[illegible] from the Chemin, France. I find all his [illegible] except this one, true to the description given by Count Odart of Chaudenay. There is a *Petit Pinot* [illegible] but it is a white variety. I have [illegible] and [illegible] but [illegible] the Chemin, and it may be the same as described by Odart as the *Fined Noir* of Beaune. It is a fine, of great promise, [illegible] some of fine color and burgundy [illegible]. It ripens nearly as late as the *Zinfandel*, and might be [illegible] to the *Malbeck*; possibly in some seasons with the *Zinfandel*. It has a drooping [illegible] and would probably do well on [illegible] lands in *Chaintree*. Combined with *Malbeck*, *Zinfandel* and *Trousseau*, it would probably furnish its color foundation in the blend. Only with *Trousseau*, *Chauche Noir* and *Mataro*, are fully handled, it ought to make a fine Burgundy type.

THE BURGUNDY PINOT.—This, *par excellence* the Burgundy wine, boast of a family of varieties, of which the *Franc Pinot* is the chief. It is not yet cultivated in any quantity sufficient to give token of its merits in this State. It has been abandoned on account of its very shy bearings. However, those who have tried it in the past have generally subjected it to short pruning, and there is yet not any true test of its value to us. By the *Chaintre* system I believe it could be made to yield, on our good Napa and Sonoma hillsides and in similar good places, a crop of two tons and a half to the acre. This would be profitable if the wine should prove af fine quality. It will require considerable experiment before we make any positive advance in this direction. Mr. J. H. Drummond has inaugurated experiments at Glen Ellen, as I have done also near Livermore.

PETITE SIRRAH.—This noble variety is the same that forms the foundation for the grand wines of the Hermitage, in the valley of the Rhone, France. It requires long pruning and is a shy bearer, though a vigorous vine. Its vigor indicates to me that by the Chemin system a profitable crop might be obtained, at least I am willing to test it. A small quantity of wine made in 1882 by Mr. Drummond sufficiently proved its fidelity to its reputation. None are yet planted in practical quantities. A white grape, the *Chasselas*, is the most prominent associate that it has in the Hermitage. So much is thought of the Hermitage wines in France that a large portion is taken to Bordeaux, there to be blend d with the fine Médocs. I believe that the *Sirrah* would succeed well at San Gabriel, although a small crop could only be expected, it would set its berries well also in San Diego county, probably. In a few years we shall know something of this interesting variety.

MALBECK.—This vine, of which there appear to be several varieties—generally classed under the name *Cot*, viz.: *Cot queue rel, Cot a queue rouge, Cot de Bordeaux* (this last is properly the Malbeck), is the most popular claret grape through the centre of France—from the Burgundy district to the Atlantic coast at Bordeaux. Of the Bordeaux clarets, as known to the world, the wine from the *Malbeck* is no doubt the characteristic base. Near Bordeaux it is cultivated in the bottom lands, or Palus, besides being in certain proportions in choice Médoc vineyards, though not in all. A Bordeaux critic says that the *Malbeck* is the most inferior variety that can be suffered to enter into the composition of the celebrated Bordeaux clarets. This, however, is drawing a fine point, because *Malbeck* wine is relatively superior to the greater portion of the French vintage. If we only had our California clarets up to the standard of a good *Malbeck*, we should have no fear in entering the markets of the world; we could sell now a hundred million gallons of *Malbeck* wine to France.

Of the Bordeaux varieties this is the only one that has been sufficiently propagated here to be considered practically introduced. The other higher classed varieties were gradually abandoned because their crops were so light and proper systems of pruning were not understood, and even the *Malbeck* was only preserved in a sufficient quantity in Mr. Lefranc's vineyard in Santa Clara county, although it is found scattering throughout several others. A few have tried to propagate it systematically in recent years, notably Mr. G. Groezinger of Yountville, Captain Nicholson of Rutherford, Mr. Schallek of St. Helena, Mr. J. P. Smith and others of the Arroyo del Valle district in the Livermore Valley and the Natoma Vineyard Company. Mr. Crabb of Oakville is also to be mentioned in this connection, and to his experiments mainly is due the present favor with which the wine is received. Mr. Lefranc has not pruned his *Malbecks* as they should be, and has fallen into the error of picking his grapes over ripe. I have seen two only of his vintages of this grape which were successful in point of perfect fermentation. These, however, have caused me to believe that in this State we need not despair of rivaling the highest types of Bordeaux wines. The bouquet and general character were exceedingly fine. Mr. Crabb has shown that with this vine he can obtain abundant color in places where *Zinfandel* and *Mataro* refuse to respond. It is indeed a bottom land grape.

It is subject to *coulure* (failure to set its fruit), and this year was one of the many choice varieties that succumbed to the hot blasts in June. This ought, however, not to discourage planters too much. We cannot produce choicest wines and obtain highest prices without some sacrifices. If it can be cultivated profitably in France, it ought to be done also here. The *Cot* is the variety most used in the region where the *Chaintre* system was invented. There it yields more than twice as much by the new system as it did under old systems, most carefully managed. I believe that by the *Chaintre* system we may succeed in our coast counties in profitably cultivating the *Malbeck*. The same might be said of the regions about San Gabriel and San Diego. I should not expect it to succeed well in regions of great heat and sudden extremes of temperature. With *Malbeck*, a combination of *Mataro*, *Zinfandel* and *Chauche Noir* ought to produce a fine wine of Bordeaux type after two or three years in cask.

Mr. Lefranc calls his vines *Cabernet-Malbeck*; that is because he believes he has *Cabernets* mixed with them. If there is such a mixture, which I do not doubt, it is one of advantage. True collections are now being propagated most extensively, being those of Mr. Drummond, the Natoma Land and Water Company, H. W. Crabb and my own—the soil will serve to verify the vines now planted in mixture. I believe it would be wrong to the this variety up to high stakes, as is done at St. Helena with *Bordeaux*. Such a practice cannot be followed with black grapes without loss of quality and color. Some one of the methods practiced near Bordeaux or the Chantre must be adopted for the *Malbeck*. The fruit must be kept near the ground to secure even maturity and good color.

Those who have been disappointed with the *Malbeck* this year should remember that this is an unusual year for such varieties, the *Malbeck* not being the only one to suffer. Moreover, those who would profit by quality can afford to take some risks. I would counsel the use of the *Malbeck* with the *Mataro* in *Zinfandel* vineyards—the *Malbeck* being in a proportion of about twenty per cent. Future experience may demand for it a wider range.

CABERNET-SAUVIGNON.—This is the highest type of Bordeaux claret grapes. It is a very shy bearer and demands long pruning—framed low. It is only experimentally known here at present. The sample of wine made by Mr. Drummond in 1882 was more admired at the last State Viticultural Convention than any other on exhibition—notwithstanding its youth. Those who are now experimenting with this variety are importing their cuttings from France. I am testing its practical value near Livermore. I believe that those who aim at fine vines of Bordeaux type cannot afford to be without it. Those who intend to use such vines would probably be wise to plant resistant stocks while experimenting with them; as soon as they have determined what they will select to graft with, they will have well developed resistant roots ready for their work. That is the plan I am pursuing. I have an experimental block, where nearly all the most celebrated vines are growing; meanwhile my fields of *Californica*, *Riparia* and *Arizonica* are losing no time in burying their roots deep into my rich marl subsoil. I have already grafted many varieties to test them—hoping to succeed well with either the *Cabernet-Sauvignon*, *Petite Sirrah*, or *Franc Pinot*, as a principal stock, my resistant roots nearly all being planted for the *Chaintre* system—some 7x14 feet, some 7x21 feet.

I shall not mention the *Grand Merlot* and other Médoc vines. This paper cannot be extended so far as to discuss all important experiments; I aim to cover leading features only.

CARIGNANE.—I do not participate in the opinion of those who are now inclined to give this vine by a higher rank than it has in Europe. I believe they are misled by the delusions of new wines. It may be safely said that when new wines are agreeable to drink they will not be improved by age. I have seen lately a *Carignane* sample at Captain Nicholson's, which was the favorite last year when it was first made, now becoming diseased and acid, and by its side a *Mataro* and a *Chauche Noir*, which were not liked last year, are now beginning to show quality.

The *Carignane* is a variety from the Mediterranean coast of France, and is there cultivated with the *Mataro* and *Grenache*, principally on account of its deep color. I cannot find that it dominates in any vineyard. It is a most valuable vine, used in conjunction with such grapes as the *Mataro* and *Grenache*. It is best suited to districts where the earlier-ripening noble vines are apt to become over-ripe. It requires short pruning.

GRENACHE.—This vine is so vigorous and fertile, and so well adapted to dry, warm regions, that there is danger that it may be planted too numerously. Its chief value is in adding finesse and delicacy to the *Mataro*, although it may be used to make a sweet red wine. In France it does not go alone into the cellars. It is destined to play an important part here, but should be kept out of the claret vineyards of the coast counties. For the interior and some parts of the south, together with *Mataro* and *Carignane*, it will probably find its true place, as in Europe. It will succeed and flourish in arid places, where a *Zinfandel* would fail, and it will strike its roots into rebellious soil where a *Mataro* would perish. It should be kept away from early fall frosts.

PORTUGAL, OR PLOUSSARD.—This variety, which is known as the vine of finest quality in the Jura, where it is cultivated with the *Trousseau*, *Bichon*, etc., is found, true to name, in Mr. Pellier's collection, though in small numbers. It is very subject to *coulure*, and was not propagated for that reason. Mr. Portal has a vine which he calls *Ploussard* one of the synonyms of the *Poulsard*—which, until the last State Viticultural Convention, was supposed to be correctly named, notwithstanding its affinity. When shown at the Convention, however, it was clearly not correctly named. It is no doubt a valuable grape, but what its true name is we have not yet discovered. Mr. Portal's vine might profitably be propagated, but the *Poulsard* is not a desirable acquisition until after experiment has proved that it may be suited to the soil and climate selected for it.

FOLLE NOIRE.—This is also a fertile vine of the Charente, apparently giving good color and quality to claret blends. Not much, however, is known of it here. It bears well in the one place that I have seen it.

MISCELLANEOUS VARIETIES.—Experiments are now being made with a great many other important vines, such as *Tannat*, *Mondeuse*, *Aramon*, the Portuguese varieties, etc., but the record is too voluminous for the present writing. I have touched upon the most important varieties for those who wish to plant new vineyards with stocks that can now be obtained in the State; also the well-known types which we should strive to reproduce if possible and practicable. The studies of Portuguese, Sherry and Madeira varieties are too new for much comment.

COLORING VARIETIES.—There are varieties of vines specially valuable for their coloring properties—useful to the winemaker whose wine is deficient in color. Prominent among these is the American grape, *Lenoir*, which has a colored juice, and whose wine is a tincture of coloring

CRABB'S BLACK BURGUNDY. This variety has been given a conventional name for purposes of identification. Mr. Crabb obtained it from Mr. Delmas, who brought it to Green Valley from San Jose. I find it in Mr. Pellier's collection under the name of *Petit Pinot*. He claims that he im-

matter. It has the merit also of being a true resistant to the phylloxera, but it is very difficult to propagate. Those who wish this variety had better plant it low down on vines already growing, so that it may strike its own root above the point of union, and so accomplish also its resistant role. Mr. Childs has two vines, which he calls *Bird* or *Feathered* and the *Lemon Leaf-vine*, both of which are not as much cut up as the *Taurifolia*. The former, which has been accidentally discovered, is the common *Taurifolia* as well known, but its crop is too small to permit it to be much used.

In the south of France, during this generation, there has been created a new family of colouring varieties, being hybrids between fertile, heavy-bearing vines and the *Teinturier*. This is the Bouschet collection, most of which I am now experimenting with. The best known are the *Petit Bouschet* (hybrid between *Aramon* and *Teinturier*) and the *Alicante Bouschet* (hybrid between the *Petit Bouschet* and the *Grenache*). The latter grows vigorously with me, and I expect to see its fruit next season; so, also, I expect to have fruit from the *Petit Bouschet, Gros Bouschet, Petit Bouschet à Mourastel*, etc.

We shall soon know how to correct deficiencies of color. In Fresno, at the Eisen vineyard, I have observed that the *Teinturier* and the *Norton's Virginia* fail to give their accustomed color. I noticed the same as to the *Teinturier* at Folsom.

The *Cynthiana*, of the same family as the *Lenoir*, shall receive attention as a variety valuable for color, and fine in quality, but less fertile.

AMERICAN RESISTANT STOCKS.

I shall refer only briefly to American stocks for grafting—not those valuable for their fruit. This subject has been fully treated upon in my first Annual Report to the Commission, excepting perhaps the latest knowledge concerning the *Californica* and *Arizonica*. I shall now only dwell on this topic sufficiently to speak of three species which I consider most important.

VITIS RIPARIA.—This wild species grows in the Mississippi and Missouri valleys, having the widest range of adaptability known to any vine. It is now the favorite grafting stock in Europe, it grows freely from cuttings, and is reliable as to resistant vine. Cuttings may be procured in this State from Professor George Hussmann and Messrs. Coates & Tool, of Napa, or from my own collections. Seedlings and root cuttings have been exhausted, so as not I know. I have received of the *Riparia* of this received from the wilds of Nebraska. Seeds can be procured by those who wish to propagate seedlings.

Vitis Californica.—This is the native wild vine of California. I was the first to send it and the *V. Arizonica* to Europe for experiment, and have cultivated and propagated it largely for four years. It is certainly a resistant vine, our experiments in Sonoma clearly demonstrate this fact. It is also a vigorous grower, when in cultivated ground, and makes a stout trunk to graft into than any other of the wild species now used. It strikes deep tap roots and takes the graft of all the European varieties that have been tried, with great facility. In my opinion, all its merits being considered, it is superior as a grafting stock to all others. It does not take root readily from cuttings—so the plant must be for practical purposes, propagated from the seed, which is not difficult to accomplish. About 100,000 seedling *Californicas* have been planted in this State during the last year, one hundred and forty thousand are engaged for planting this coming season, and I know of only forty thousand remaining unengaged.

VITIS ARIZONICA.—This is the wild vine of Arizona. My first essays were with seed procured at an altitude of six thousand feet above the sea. It is unlike in growth any other species of American vine. It makes a straight, thrifty stalk from the seed, and is more robust in the trunk than the *Riparia*. It is a most resistant vine. In San Diego county I have seen a specimen seedling, which I sent to Major Merriam, outstripping all others in the experimental block. With me in the Livermore Valley it prospers, but does not quite equal the *Californica* in growth. I am not certain whether it can be propagated from cuttings with facility. I believe not. For two years I have failed to obtain fresh seed. The crop of wild fruit having dropped in both maturity; so I have been unable to get more stocks to cut. I believe it will grow well on our moist and hillsides.

IN CONCLUSION.

I shall apologize for not discussing to-day such questions as the *Berlandieri*, *Rupestris*, *Rosata* and *Labrusca*, but shall do so hereafter. I shall also ask the privilege of not discussing to-day the *Vinifera* question, but shall reserve the right to be incorrect at, when we further study it, as in many things that I have taken notes. I shall try to avoid a pride of opinion, while I shall always state as positively as I can all that I think I know with certainty. This study of vines is most bewilderingly complex and sometimes confusing. I believe, however, in fixing upon certain objects to attain, and from those standpoints trying to bring order out of chaos.

AD MAJOREM
GLORIAM BONI VINI.

The undersigned having enlarged his business, has opened a branch office at No. 321 Montgomery Street, where information can be obtained concerning viticultural and horticultural lands, and where orders for vines and vine cuttings will be received, as well as at the old office, No. 111 Leidesdorff Street.

Having accomplished nearly all that is necessary to be done in establishing a flourishing colony of wine producers in the Livermore Valley, I shall now devote my attention especially to the development of the Viticultural and Horticultural resources of San Diego County, which county is one of the most promising in the State.

Information may be had at this office concerning the remarkable offers of the

EL CAJON LAND COMPANY.

And subscriptions of land and subscriptions to the stock of the Company may be made through this agency. This Company controls 27,000 acres of land in the richest part of San Diego County, where the finest raisins in the State are now made, and where nearly all kinds of fruit, particularly the apricot, pear, apple and olive, are raised to perfection without irrigation, and where, in proper sites, the orange and lemon are successfully grown with such slight irrigation as may be provided by means of windmills. The property commands ample means for irrigation whenever its settlers may desire to use the same.

This property is being subscribed for at an average price of less than $10 per acre to the stockholders; 2500 acres of choice land, platted and laid out with broad avenues, will be immediately allotted to subscribers in severalty. This tract of platted land is worth and has been selling for $100 per acre, but it is included in the whole tract at the average price; 10,000 acres of the whole tract are arable; the balance grazing lands.

THE DIRECTORS

Of this Company will soon be announced officially, as follows:

ARPAD HARASZTHY, President,
DR. JOSEPH JARVIS, Vice-President,
GEORGE WEST,
GEORGE A. COALES,
CHAS. A. WETMORE.

The Treasurer, during the subscription to the stock, is Mr. Byron Thomas, Cashier of the Commercial Bank of San Diego. Wm. B. West, Esq., who has made special studies in viticulture and horticulture, and who has studied viticulture in Spain, as well as in the States, is a subscriber to the stock of the Company and will devote considerable time during the coming Winter at the San Francisco office of the Company, for the purpose of giving information to those who may desire the same, concerning the prospects of this enterprise. Prof. Frederico Pohlandoff has engaged a portion of the land and stock with the object of establishing an olive orchard.

Those who subscribe early and make early selections of the platted land will never regret doing so. It is expected that all the land will soon be taken up. Samples of fruit, raisins and wine, raised in the El Cajon Valley, can be seen at this office; also maps and the plan of the subdivided tract.

Those desirous of purchasing a large tract of land—say 10,000 acres, part grazing and part arable—partly the finest alfalfa land, can find a good opportunity, if applied for soon, as the company can dispose of that much for each in one body in terms that will be most advantageous.

DR. JOSEPH JARVIS, San Diego.

Keeping up Business.

Success in business matters is a subject that has been well worn by trade papers, and yet there is one feature that is connected with the matter that will bear considerable comment. That feature is how to maintain a successful business after it has once been obtained. Examples are numerous where merchants have worked hard, built up a fine business, and were making money, when a palsy would seem to have fallen on their business, and the trade they had worked up rapidly dwindled away.

There must be some reason for such a change, and it is not hard to find. The simple fact of the matter is that no business, even at a successful stage, will run itself. Here is where many men make a mistake. Being in a prosperous condition, they say to themselves, "now I will eat, drink, and be merry, for my business will now take care of itself." But a grand mistake is made, and, left to itself, the business does not gather volume of its own accord, but goes down hill with an astonishing rapidity.

We believe it takes as much or more energy and push to maintain a business than it does to build it up. This is a truth that will apply to enterprise of every kind. How soon Stewart's immense trade was lost when left to run by itself momentum. In commercial matters eternal vigilance and work is the price of success. He who neglects to use every means to increase his trade must inevitably run behind. There are no commercial hitching-posts, where a man can tie and be safe to take his ease. Mortgages and Government bonds are about the only business investments that do not suffer by neglect. A house divided against itself can not stand, and a business without pushers is in a divided condition. —*St. Louis Grocer.*

RIPARIA CUTTINGS.

We have for sale 1 to 2 feet, $1.00 to $7.50 per M. [illegible] They are cut in the fall of 1883, and are from the vineyard of Judge Soule, near Suisun, Solano county. The wood is much shorter jointed and better ripened than imported cuttings, and is untainted true. There are not only five buds on a cutting, where there will be only two or three on one of the same length raised in Nebraska or Missouri. We have used imported cuttings for the past four years, and our experience, together with others, abundantly proves that cuttings raised here will root 90 per cent, against 15 or 20 per cent of the imported ones. This we will demonstrate to any who will call at our nurseries. Therefore, 1,000 of our Riparia cuttings are worth more than 5,000 of the Eastern ones.

The El Cajon Zinfandel.

Here is another positive testimony as to the quality of the Zinfandel wine made this season from the El Cajon made a crop.

SAN FRANCISCO, Dec. 29, 1883.

Chas. A. Wetmore, Esq., San Francisco:

DEAR SIR.—The sample of Zinfandel claret you sent me, made on the El Cajon property, near San Diego, has caused me a most gratifying and agreeable surprise. Without the sample, I would not have believed that any place located so far south in our State could produce a claret with all the characteristics and best qualities of the wine produced from the Zinfandel grape in our most favored coolest north in counties. Since its receipt I have tested this wine carefully, and many times during the day, to assertain whether I could detect any objectionable peculiarity, and have failed to do so. It is an excellent wine in depth and tone of color, in that elegant characteristic, Zinfandel bouquet, that inviting freshness of taste belonging to the wine of this grape, accompanied by a pleasing astringency, and possessing a good body, without any lingering sweetness. In short, it is a characteristic and good Zinfandel claret in every sense.

The Zinfandel grape I have found to be the most sensitive of any grape coming under my observation in our State, and loses most of its characteristic finer qualities, such as bouquet, flavor and agreeable freshness, when ever planted in any soil or climate that is the least uncongenial. In this sample from San Diego it has retained everything, and I can safely say that the land on which it was grown is capable of producing most excellent wines without irrigation. With a view to ascertaining its alcoholic strength, I made three tests, and find the sample to be 12.4 strong, which shows an excellent and complete fermentation, the residuing to the palate no appreciable amount of saccharine left.

I may say here that I have for many years been in favor in the great agricultural and horticultural resources of San Diego county, and have accommodingly refused to dispose of lands acquired by me by my father and grandfather in 1840, and which are still held by our family. He held a mandate from my father, whose wishes he was such that, in 1870, he organized a company among his friends to plant a vineyard and horticultural garden in the Mission Valley, and work began on a wine vineyard, from records in hand, on the 17th of March, 1850, and finished February 13th, 1851. These plantations were made, I believe, on the present lot No. 1107 of the hundred and sixty acre range, and Joseph Romero was put in charge. Upon my father's election to the Assembly the plantations were discontinued, and afterwards entirely abandoned.

I remember distinctly the bringing and planting of grape cuttings from the old Mission of San Luis Rey, and the planting of grape seeds taken from boxes of Malaga raisins, as well as table seeds, tobacco, and all manner and kinds of vegetable seeds. Had the soil, water, location quality of climate been equal to that of San Diego county, I do not remember to have seen in my travels. The exact location of the old vineyard, I think, was on the present Horton property, and I am willing to bet a box of cigars against a box of wine that the property will soon attract people's attention as its location and environments become known, which, after a careful examination, I consider to be unexcelled by any part of our State. Yours sincerely,

ALFRED HARASZTHY.

What a waste of water power! It is estimated that ninety thousand millions of cubic feet of water pour over Niagara every hour. Estimating the fall at 168 feet, this means about 500 million horse power running to waste.

THE RAISIN INDUSTRY.

Mr William B. West is unquestionably the best informed man in this State in the matter of raisin culture. Having had a large experience as a pioneer vine grower and raisin-man on this coast, he was well prepared to make the investigations that he undertook in going to Spain to study raisin making at Malaga. He gave the subject close attention, and has frequently made public his observations. At Sacramento, three years ago, he delivered the lecture on raisins before the Sacramento Valley Agricultural District meeting, presided over by Mr. Blowers. His remarks were widely published. We remember that at the close of his lecture, being questioned as to the climate of Malaga, he said it was more delicious and mild than the climate of California. He was then asked by Mr. Wetmore who the he had ever visited Southern California, and particularly San Diego county. He replied that he had not done so; and Mr. Wetmore told him that he would find the climate of Malaga at San Diego. This was three years ago. This year Mr. West has visited San Diego, and becoming charmed with its climate and prospects, has invested in land, and is now planting a vineyard of Muscat grapes there. This much *a propos* to the following extract from a letter, which he has written to us in response to an inquiry about raisins, etc. He now writes:

"I have watched with much interest the progress of raisin culture in this State, and have long been of the opinion that the Muscat varieties for raisins are not a perfect success in the northern portions of the State, except in a few localities. There are still many boxes of good raisins made, but not near the quantity that was anticipated. The reason for this is that the Muscats are very sensitive to climatic influences. A cold wind during the season of ripening seems will render the blossoms sterile; a hot spell during the early summer will cause the fruit to shot, or a cold summer will retard the maturity of the fruit so that it is difficult to cure, while the early fall rains often destroy the crop, or make costly outlay to shelter it from the rain necessary. It is a well known fact that the raisins produced in Illinois which is about as far north as can be successfully grown, except in the district surrounding Malaga, where the climate is exactly suited to it. This will be found to be the case here. Only in choice localities, fitted by nature for its growth, will it be found profitable to cultivate them for raisins.

"A careful consideration of the conditions necessary, and a study of its products, lead me to believe that the southern portion of the State, the counties of Los Angeles, San Bernardino and San Diego, are particularly favored with the climate necessary, and will soon be the raisin center of California. These remarks apply, of course, only to favored portions of those counties, sufficiently moist and free from damp fogs and hot blasts.

"As you request my opinion particularly about San Diego county, I will say that, previous to my visit last summer, I had supposed that it was almost a desert, possessing neither a fine climate and one of the best harbors in the world, but very little water and no cultivation. I found many fine soil, rich valleys, producing fine, rich crops, thousand of acres which could be used for the best of grain, vegetables and fruit. Lots of such as could be made very productive if they had water, and which would be profitable to grow for either San Francisco or the Eastern market. There are other varieties of late-ripening grapes of a firmer texture, suitable also for the Eastern market. I am told that apricot peaches and prunes do well, although I did not see them, but am satisfied, from the vigor of the trees, that it is the case.

"The apples were the greatest surprise to me—hard, firm, and of the finest flavor, they rival the best of our mountain fruit. No better investment can be made in the fruit line than the planting of an orchard of Newtown pippins or Gravenstown apples in San Diego county.

"The pears also were of the same nature, firm and good-flavored, suitable for Eastern shipment.

"It will astonish you perhaps when I tell you that beside the apple, pear, plum and peach, they can grow the orange, lemon, lime and pomegranate to perfection; that the guava is profitable, that the olive is thrifty and wonderfully productive; that all these can be produced at little expense, in most places without irrigation; that there is a freedom from blight, mildew and insect pests that is unknown in other parts of the State; that, with all this, they have a most delightful climate, a foothill country with a seaside air, and a soil not worn by previous cultivation.

"I have become so much impressed with the value of the lands in San Diego county, that, with some of my friends, I have purchased a large tract for the purpose of planting a vineyard and orchard. I have also taken an interest in the El Cajon Land Company."

Tricks of French Brandy Merchants.

The French brandy merchants are much moved at the publicity given to the tricks of their trade in the English newspapers. The figures given by their own Minister of Agriculture in his recent report on the wines of 1882, are conclusive as to the fact that the vineyards of the two Charentes, which alone supplied the genuine wine brandy, are irretrievably ruined. These two departments, which were devoted almost wholly to grape culture, gave 311,000,000 gallons of wine in 1875. Last year they only gave one-eighth of that quantity, being a falling off of 273,000,000 gallons, and the quality was execrable. The condition of Charente proper, which produced the true cognac, is even worse, for the vintage only gave the twenty-second part of the yield of 1875, and the ravages of phylloxera are each successive year going from bad to worse. In fact, the pest has now utterly destroyed throughout France nearly 2,000,000 acres of vineyards. Besides this, 1,600,000 acres more are now in different stages of destruction, which goes on at the rate of three years to each plant, for that is the time the insect takes to kill the hardiest vine.—*N. Y. Sun.*

A man has invented a chair that can be adjusted to 800 different positions. It is recommended as a boon to sit in when he goes to church.

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. Whereas a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 buds, which are looked in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $4.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.

NAPA, CAL.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:— FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schoffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Le franc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I can prepare until January 15th to offer such RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

50 inch cuttings at $ 10.00 per M.
12 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

All of these Riparia stocks not sold before January 15th will be sold at public auction to the highest bidder.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb, for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb, for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

DUNDEE—Per same—100 tons iron.

PRODUCE MARKET.

The Imports and Exports given below are up to Wednesday evening.

From very full accounts received from along the lines of the Central Pacific and Southern Pacific railroads, it would appear that the rainfall has been much less than for several previous seasons, and the outlook is far from favorable for even an average crop, but with liberal showers during the current and ensuing months a fairly average crop will probably be harvested

FLOUR—

Imports, 100 bbls. Exports, 23640 bbls.
Receipts, of week, 179,331 qr sks.

Extra, $5 75@6 00. Superfine, $4 00@4 75. Country dtto, $3 50@4 50. Inferior Extra $5 00@5 50 per bbl, for jobbing parcels to local consumers, but round lots for export can be obtained for some what less figures.

WHEAT—

Imports, 1260 sks Exports, 89767 ctls
Receipts for the week, 117,452 ctls.

During the week there has been a very weak feeling in the local market, and figures quoted in the Eastern and European markets are a decline. Shippers are very shy buklers, in fact, take only parcels to meet immediate requirements, and the local millers take only sufficient lots to supply their daily wants. Quotations, are the best, largely nominal, in the sam ple market, at $1 80 is considered an outside figure for No. 1 White. On Call yesterday, for No. 1 White $1 80½, was bid for buyer the season, and $1 75⅞ per ctl for seller the season, but no sales were recorded.

BARLEY—

Exports, 1404 ctls.
Receipts of week, 16023 ctls.

The Produce Exchange is actively engaged in taking an account of stock on hand in the State, and until returns are made public, dealers well be other than active buyers or sellers It is generally supposed that the report of the Directors will show the crop to be fully 2,000,000 ctls in the State, and many interested parties claim that the total will considerably exceed the figures mentioned

In the sample market $1 06½ is the price for No 1 Feed, Brewing is quotable at $1 12½@1 17½ for No 1 Transactions on call yesterday to a moderate extent 1400 tons of No. 1 Feed, at $1 12½, lower the season 500, $1 14⅝, 2100, $1 15, same the season, 1700, $1 01, May, 500@$1 10½, lower 1884, 200, $1 18¾ per ctl

BUCKWHEAT

Receipts of the week, 12 sks.

Quotations are entirely nominal at $3@3 25 per cental.

OATS—

Exports, 3220 ctls.
Receipts of week, 1007 ctls

Quotations are almost entirely nominal By sample, figures are almost as follows: Black, $1 75@$1 60; White $1 75@$1 70 for common to choice, extra choice, $1 80 per ctl.

CORN—

Exports, 589 ctls.
Receipts of week, 2120 sks

It is currently reported that a leading distiller has made extended purchases in Nebraska, and that arrangements have been made for the shipm nt thence to this city, by rail, of several thousand tons. Receipts of the crop from the southern coast portions are increased, but yet are insufficient to meet market wants For California yellow and white, the quotable range is $1 50@$1 60 per ctl

Receipts are exceedingly light and quotations largely nominal.

RYE—

Supplies are light, and a choice parcel would sell for an advance, say about $1 50 per ctl

MILLSTUFFS—

Exports, 3518 ctls bran, 5895 ctls millstuffs
Receipts of week, 1,5770 sks bran, 1643 sks Middlings, 2800 ctls Ground Barley, 2 2 ctls ground feed.

We quote: Ground Barley, $21 00@25 per ton, Middlings are selling at $18@$21 00 per ton Wheat Bran, $14 00@15 00 per ton, Oil Cake Meal, $30, old process, and $26 50 new process, Feed corn Meal, $35@36, Cracked Corn, $36 per ton, Rye Flour, $5 per bbl, Rye Meal, $4 00 per bbl, Hominy, $6 per 100 lbs, Oat Meal, $6 per lb, Pearl Barley, 7@8c per lb Eastern Oat Meal, $9 75 per bbl, Cracked Wheat, 6c per lb

HAY

Exports, 1020 tons
Receipts of the week, 598 tons.

Receipts are light, but the market continues steady.

We quote, Alfalfa, $7@$10, Wheat, $12 50@14 50, Stable, $12 00@14 00, Wild Oat, $12 50@14 50, Cow, $10@12, Barley, $10@12 00 per ton.

STRAW—

Receipts of week, 90 bls

Quotable at 55@60c ₰ bale, as to condition.

SEEDS—

Imports, 54 sks 3 bxs. Exports, 1 bx
Receipts of week, 35 sks alfalfa, 28 sks mustard

The seed business promises to be very brisk if rains are plentiful this month. Great expectations were raised yesterday morning by the showers that fell, but the wind persisted in holding to the wrong quarter and late in the day the feeling was less hopeful.

Flax quotable at $2 50@2 75 ₰ ctl, Canary, 5@5½c, Alfalfa, 9@9½c ₰ lb, Timothy, 6@6½c for native and 8@8½c for imported, Mustard, Lees Brown, $3 00@3 25 ₰ ctl, White, $2 75@3 00, Hemp, 1c, Rape, 3@3½c

BEANS—

Exports, 108 ctls.
Receipts of the week, 3272 bags

The holidays are over, but trade does not revive. Arrivals continue light. There is much excitement among dealers on colored, especially pinks, in which there is not so many as was calculated on. Whites are badly neglected, but we do not anticipate that depreciation in prices that the situation would warrant. Limas are very dull—no offers can be had for lots, although we have not heard of any selling at less than three cents

Our quotations are, for round lots from the wharf, Small White and Pea, $2 75; Bayos, $3 40, Pinks, $3½, Reds, 4, Butters, $3½, Limas, 3½c

VEGETABLES—

Tomatoes are now out of the market Dried peppers have advanced one cent since our last. The first consignment of cucumbers of the season was received yesterday from San Jose by a Gallo & Co.

We quote: Carrots, 30@35c; Turnips, 75c@1 00; Cauliflower, $1 of 1 50 ₰ doz, Cabbage, 40@75c ₰ ctl, Garlic, 2@2½c ₰ lb, Celery, 50@60c, Dried Okra, 30@35c ₰ lb, Dried Peppers, 10@12½c ₰ lb, Artichokes, 40@60c ₰ doz, Beets, 75c@1 00, Parsnips, $1@1 25 ₰ ctl, Marrow Fat Squash, $20 ₰ ton, Mushrooms, 50@85c ₰ lb.

FRUITS—

Imports, 3223 bxs fruit, 685 bxcbs bananas, 10 cs lemons, 8852 bxs oranges. Exports, 1188 bxs fruit, 325 bxs apples.

In fruits we have to report a good business during the week, with Mexican limes from excessive receipts still on the decline No other changes from our last week's quotations.

We quote: Bananas—Apples, 50c@$2 00 ₰ box; Pears, 75c@$2 00 per box, Cape Cod Cranberries, $18 00 ₰ bbl, We repeat our $17 00@17 50 ₰ bbl, Tropical Lemons, $6 50@7 per box for early;

JOBBERS' PRICES.

THE WOOL MARKET.

During the past week there has been a libera movement of wools, on account of Eastern buyers and local scourers, principally by the latter's purchases The sorts taken were "mountain free" and "slightly defective" fall wools. The unsold wool in this city is only about half what it was at the opening of '83. The market closed yesterday fairly steady.

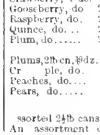
Freights and Charters.

We cannot report any improvement in ships this week. There has hardly been a wheat charter for the past seven days; the few engagements that have been made have been for outside business, and the prospect for wheat ships is anything but bright for the immediate future. Lowering the standard of our Produce Exchange samples has seriously affected the business Whether the fault was in the weather or in careless farming or so the part of the Exchange is hardly worth discussing. Probably the fault is in all three but California must restore its reputation in Europe for fine milling wheat, if our future wheat trade is to be prosperous.

Attention, Sheep-Breeders!

MR. GERMAIN PELLISIER,



Has a few of his unequaled Thoroughbred French Merino Yearling Rams for sale. Breeders of fine stock will do well to call or write to the office of the

HUTTON BROS

9 & 10 Ducommun Block, Los Angeles,

who will take pleasure in exhibiting and giving information with regard to the stock.

BEET SUGAR.

An Industry in California that will in Time Largely Supply Our Home Consumption and Prove Highly Remunerative.

In the days of tariff discussion, reciprocity treaties and contests between rival sugar producers and refiners, the public will read with interest anything about our domestic industry of beet sugar production. We are indebted to the *Record-Union* for some interesting facts on this topic:

The manufacture of beet sugar in California has had many setbacks, and for a long time it was regarded as a problem of very doubtful solution. But the errors and misfortunes which were the natural effects of inexperience have been gradually overcome, until to-day the industry is in every respect a success. The Standard Sugar Refinery at Alvarado commenced the manufacture of beet sugar in 1879. In the "campaign" of 1879–80 its production of refined sugar was 1,231,366 pounds; in 1880-81, 1,391,688 pounds; in 1881-82, 1,391,-680 pounds; in 1882-83, 1,980,583 pounds, while this year it will be about 1,500,000 pounds, making a total of the five years of about 7,596,000 pounds. We are indebted to Mr. E. H. Dyer, its General Superintendent for the following statement of the business of the refinery for the month of October last, which is interesting as going to show the items of expense entailed in the manufacture of beet sugar, and the gratifying outcome:

STATEMENT OF STANDARD SUGAR REFINERY FOR OCTOBER, 1883.

Acid	$ 300 60
Barrels and packing materials	842 00
Coke	45 10
Bone coal	620 00
Drayage	67 94
Coal (for bone kiln)	523 20
Filter cloth	144 04
Freight (on sugar to San Francisco)	185 40
Incidentals	30 00
Insurance	310 00
Interest	28 82
Lime	308 85
Light	201 00
Oil, tallow and waste	72 00
Petroleum	4,650 00
Running repairs	174 80
Supplies	344 67
Sales expenses	133 52
Storage on sugar in San Francisco	3 20
Pay-roll	3,873 45
Beet acct (2,406 88-100 tons at $4 60)	11,071 64
Total	$23,938 03
Sugar produced (341,016 pounds)	$34,891 17
Pulp (722 tons, at $1)	722 00
Total	$35,616 17
Expenses as above	$23,938 03
Profit for October	11,678 14
Total	$35,616 17

It will be seen by this statement that pure white sugar made from beets costs 1.0198 cents a pound, laid down in San Francisco. Raw sugar could be produced for refining purposes for less than five cents a pound, in sufficient quantities to supply the present refineries on this coast. Our climate and soil are as well adapted to the production of sugar beets as those of any country where beets have been cultivated for sugar, and are as rich in saccharine, and yield as many tons per acre, the average being about fifteen. There are thousands of acres of the best quality of land on this coast for the production of sugar beets, extending from California to British Columbia, which can be made to produce more sugar per acre than the average cane lands.

On the continent of Europe great improvements have been made in machinery, and technical skill in the manufacture of beet sugar, and the percentage of the saccharine proportion of the beets is greatly increased by intelligent cultivation. More has been accomplished in the improvement of machinery, quality of the beet, and the technical management of the business in the last two years than during the ten years preceding. Still the world's consumption of sugar increases faster than the production, and even with the stimulus to sugar growing given by the Hawaiian treaty and what may be expected from the Mexican reciprocity treaty, if it is ratified, we shall soon be forced to resort to the sugar beet to meet the increasing demand. The United States ought to produce the larger portion of the sugar for her own needs, and here on the Pacific Coast we have more land adapted for the cultivation of the beet than Louisiana has for the sugar cane.

Those Tobacco Rebate Claims.

Senator Aldrich has introduced in the Senate a bill making appropriation for the payment of the rebate claims. By unanimous consent the bill was read twice and referred to the Committee on Appropriations.

The bill is very brief, simply appropriating $3,725,913.97 to pay the "rebate claims on tobacco, snuff, etc., under provisions of the Act of March 3, 1883."

There are 47,000 of these claims, and they are now in Fifth Auditor Alexander's office. He hopes, by the aid of his clerks, who are working over time, without compensation, to get through in March.

It is in Judge Lawrence's, the Tenth Auditor's office, where the hitch is, and it is doubtful if there will be a single claim ready for payment before June 1st next. Judge Lawrence takes the matter very coolly, and says that not a claim has been taken up yet, much less acted upon. He says that it is impossible with his present force to do anything with them, and that unless his force is increased there is no telling when they will be passed. If Congress gives him the force, he will put them through in 60 days.

Prospects of Tariff and Finance Legislation.

[From Bradstreet's.]

The Ways and Means Committee, judged by the majority of its units, is radically in favor of very important modifications of the tariff. Morrison, the chairman, has unequivocally announced it to be his purpose to report, at the earliest possible moment, a bill which will disregard the revision of last year and propose a complete system of legislation upon this subject. He favors the plan of a horizontal reduction of the whole list of from 15 to 20 per cent., and a very material increase of the free list. It is believed that war will, undoubtedly, be made upon whole lines of manufactured goods. The Carlisle-Morrison wing of the Democratic party has decided to make an aggressive stand on the tariff question, and to cut loose from the tariff protectionists of the Eastern States. The theory of this policy is that the Democrats must have an issue, and that the tariff is the natural issue; that the Democracy has little to hope from the protection wing of its party in Pennsylvania or New England; that it must select a line of new departure, and that, while on the subject of radical tariff legislation it may expect to lose votes in Pennsylvania; and, perhaps, not gain any in Ohio, it has more reasonable prospects of success in the more strictly agricultural States of Wisconsin and Illinois, where protection is less strong. This, unquestionably, is the Carlisle-Morrison tariff programme. Mr. Morrison avows it. It remains to be seen whether the Democrats as a whole can be made to indorse this policy when the Morrison bill shall be reported from committee. The presidential question is intimately connected with the business side of this problem. It is very possible that rivals for the presidential nomination in the Democratic party, or the friends of the rivals of Mr. Morrison, in view of the fact that no legislation is probable, will not enter into a scheme which has so evident a personal and political purpose. As a practical fact, of course, with the two houses so sharply divided, politically, and the administration in harmony with the dominant party in the Senate, no bill of the nature which will be reported by the Ways and Means Committee can ever become a law. Complicated with personal ambition, as the question is, it is by no means certain that Mr. Morrison's committee can report a bill which will even pass the House. Mr. Morrison himself has admitted, since the committee was announced, that there are enough protection Democrats in the House to defeat the passage of any bill through that body, if they shall choose to unite with the Republicans. This is a very serious and important admission.

There is another element in the tariff question which is likely to give the Democratic party in the House much concern. It is not the Democratic programme to make any very radical reductions in the duties on sugar. There is a large Democratic protection vote, and Louisiana is "solid" for sugar. It is reported that the Louisiana Democrats have been notified that "sugar is not to be hurt." The Republicans, on the contrary, have very decided views on the propriety of large reductions of the sugar duties. The proposition to abolish the duty on sugar altogether, and to couple with it a bounty for American producers, is strongly advocated by many Republicans, particularly by those who are most interested in a protective tariff. The Republican protected sections derive comparatively little benefit from the duty on sugar. If the duty on sugar should be abolished, the question of further material reduction, either of internal revenue or of the tariff, would no longer be a practical one, for much as is said about the surplus, the United States Treasury, with the duties on sugar abolished, and the revenue from existing tariff legislation still an uncertain quantity, would have no considerable surplus. If the Republicans as a party shall decide upon the policy of solving the problem of surplus revenue by abolishing the sugar duties, and providing for a bounty to producers of American sugar, the tariff question would take on a new aspect. From a canvass which has already been partially made it is learned that the representatives of the Louisiana sugar interests would, for the most part, consent to the plan to give a bounty to the sugar producers. An annual bounty from the Government for an average crop would, some of them maintain, be a much more certain source of income than a crop subject to so many hazards as is the sugar crop of Louisiana. If the Republicans should agree to this policy it would, unquestionably, be supported by most of the protection Democrats, notably those of Louisiana, Pennsylvania, New England and Ohio. And a combination based upon such an alliance may pass a bill through both houses. The protection Democrats are very much displeased with the tariff intentions of the dominant party in the House, and it is not to be forgotten that some of these Congressmen are protectionists first and Democrats afterwards.

It is, of course, unnecessary to say that the Pennsylvania Democrats are very much alarmed at the Carlisle-Morrison policy, which they declare is a threat to the "business interests." The Ohio Democrats are alarmed also at the policy which has been pursued by the Speaker with respect to that state on the Ways and Means Committee. Frank Hurd, the only man who refused to stand upon the Ohio Democratic tariff platform, and who defined the Democratic policy as to the wool tariff, is made the Ohio representative on the Ways and Means Committee. He, of course, does not represent the Ohio Democracy on the tariff, for the Ohio Democracy as a whole is a protective party, and its leader is Mr. Converse, who has already introduced in the House a bill to restore the wool tariff to the old rates of 1867.

TABLE AND SHIPPING GRAPES.

Under this head I shall, at present, write very briefly. We have, I believe, scarcely developed any positive knowledge on the subject of a comprehensive nature. The adaptation of varieties of vines are fullest proof. Text books, but of the varieties of near at hand, such as we may cultivate, I find the books conspicuously at fault. In all the books I consult I recognize by description in part *Tokay*, *Emperor* and *Black Ferrol*. I can find no true description of the *Almeria*, the well-known green grape commonly imported in barrels from Spain. The *Rose of Peru* I have not yet located. From record and tradition, I am led to believe that there are many most valuable varieties to be found in Asia Minor, Persia and countries even farther east, the possession of which would enrich us. If the State would send a competent person thus about those countries to gather specimens for us, the investment would, no doubt, be the most profitable one that could be undertaken for the benefit of our farmers. If some one of our wealthy men would devote, say, twenty thousand dollars to making such a collection, I will undertake to demonstrate to him that it would prove profitable to him, through the sale of vines and cuttings propagated. There are vineyards in this State now receiving an annual income of several thousand dollars from the sale of cuttings at ordinary prices. Will not the press give this suggestion a wide circulation. If I could find the man who would support such an enterprise, with ample funds, I would gladly undertake the direction of the work as a business proposition, with full confidence in reaping individual as well as public profits. There are many varieties of vines grown in Italy than in France, yet we know very little about them.

Of the varieties now known in this State valuable for table and shipping purposes, we should make two classes, viz:

First: those which are best suited for the home and near markets;

Second: those which are suited for long transportation.

It happens that those varieties which are the most palatable and delicate are not very durable; hence, these must stay at home, and will therefore have a limited market. It happens, also, that even in the home market grapes are valued often more for their appearance than for their delicacy and flavor. This last condition, I believe, will change with time.

FOR THE HOME MARKET: Of varieties of real excellence, we have the several kinds of *Chasselas*, *Black Prince* and *Muscadel*. The *Black Hamburg*, *Malvasia* (black) and *Mission* are also valuable.

Of varieties serviceable for early and late pickings, but not of particular merit otherwise, are the *Sweetwater*, *Magdalene*, *Black July*, *St. Peters* (?) for early, and the *Verdal* for late fruit.

FOR DISTANT AS WELL AS HOME MARKETS;

Of good shipping and keeping varieties, suitable for long transportation, as well as filling certain local demands, we have the *Muscatel*, *Flame Tokay*, *Cornichon*, *Black Ferrara*, and *Emperor*. There are also some curious vines such as the *Zubulskanskoi*, but we know little yet about their productive properties.

I am now testing the *Cinsaut*—an early black variety from the south of France, valuable both for wine and shipping. The same is being done at Folsom by the Natoma Company. Next year we shall know its period of ripening with us, and may test its shipping properties.

The *Aramon*, now being tested also in the same way, will probably prove of value as a table grape, as well as for the wine maker.

The *Almeria* is being tested, but gives unsatisfactory results generally, on account of *coulure*. It might succeed well in San Diego county. Its home is Malaga. It will prove a fortune as a late keeping variety where it succeeds well.

Some of the American varieties, such as *Isabella*, *Goethe*, etc., will always find a home market of limited extent, which should not be neglected. Few of them, however, have yet been tested here.

CAUTION: Those who desire to produce table and shipping grapes should remember that transportation facilities are prime requisites; for the home markets, the vineyard should not be far from the centers of population and should be on lines of easy and quick communication. For Eastern markets, it should be on or near some grand trunk line of railway and the planter should have enough products to make up car-load lots. It is doubtful whether the future shipping grapes will come from irrigated vineyards.

P. S.—In my notes published last week, mention should have been made of the

ORLEANS: This is a white grape, generally called the *Orleans Riesling*. I think there is no good reason for calling it a *Riesling*. It is cultivated in this State principally at the Orleans Hills vineyard, now the property of Messrs. Arpad Haraszthy & Co. It was first imported by Mr. Jacob Knauth, of Sacramento. At the Orleans Hills it ripens early, but in such warm situations (near Cuppy Valley, Yolo County) it appears to need some companion to assist and complete fermentation. The proprietors are now adding *Folle Blanche* and *Burger*, I understand, for that purpose.

In the Napa and similar valleys, it should go to the warm hillsides; it does not ripen early there. It is a prolific bearer; and would probably make a good combination with *Folle Blanche* and *Burger* for the southern counties. Mr. Haraszthy considers this variety as of fine quality.

Los Angeles District.

THE STATE COMMISSIONER'S REPORT,

—BY THE—

Hon L. J. ROSE.

Progress in Vine Planting Hints on Varieties and on Blending Wines—The crop of 1883—Honest Labels.

Being Advance Sheets of the Report of the State Viticultural Commission.

By the courtesy of commissioner Rose and the Secretary of the State Viticultural Commission, we are enabled to publish the interesting report on the Southern District in advance of the publication of all the complete reports by the State Printer. This is the season when viticulturists are studying the questions on which Mr. Rose gives much valuable counsel, and if we waited for the issue of the State publication, some four months hence, these suggestions would reach the viticulturists too late for use this year.

L. J. ROSE'S REPORT.

SAN GABRIEL, LOS ANGELES CO.
Dec. 29th, 1883.

TO THE BOARD OF STATE VITICULTURAL COMMISSIONERS. Gentlemen:

Again I am notified by the Secretary "time to report." Two years have slipped by and it almost seems like yesterday. As I look out at the open window, the same men are busy in the vineyard, some pruning and their bright pruning hooks are glistening and flashing in the sunlight; others are busy gathering the brush and burning it and here and there a straight column of smoke curls up in the air. The same family of linnets are on the edge of the gravelly brook taking a bath and splashing the water in small showers around them. The bees are humming the same old drowsy tune in the orange trees, sipping sweets out of the fragrant blossoms. The humming birds are flashing their metallic lusters of changing hues as they hover over the rose. The same quiet, balmy, sunny day is here. All is busy, happy content, yet two years have slipped by, years that have added much to the viticulture of California, have doubled the acreage of vines, have added to the knowledge of wine-making, have added very much to the varieties of grapes and opportunities for testing their adaptibility and to the making of improved kinds of wine. More has been accomplished in these ways in the last two years than in ten years previous, and as yet the work has only begun. Grape cuttings are being introduced from all grape-growing countries of the world. Each one is trying for himself some new varieties of grapes. This may be termed the experimental era, and that much good will grow out of this work is certain. These two years have been two years of prosperity to all, to the grape grower, to the wine maker and to the wine merchant. Debts have been paid, plantings have been extended, ornamental houses and surroundings have been built and new cellars, fermenting houses and store rooms are seen in both city and country. All is prosperity, and good will from one to the other pervades.

RED WINES.

In view of our large planting of vineyards, the question arises what we shall plant. Reds, Claret, Burgundy and Port, are the wines we have to make in larger proportions than White wine, when we sell to England or France; in fact Claret is the wine of America, England and France. To make then the best Claret is the important problem. California, up to this time, has made its Claret from *Mission*, *Mollyisis* and *Zinfandel* as a rule. In fact, nine-tenths of all the Claret made now in this State is produced from *Zinfandel*, and it is much superior to the other two and has done a noble work, making a wine which will compare very favorably with the ordinary wines of Europe. Yet I think that there are other grapes which make a wine that is a great improvement on *Zinfandel*. In fact it is hard to find a *Zinfandel* which is a wine of the first quality. As a rule it has too much acid. It is not smooth enough for the general taste and that improvements can be found in other varieties is certain. Nor do I speak of the *Zinfandel* of Southern California only, for we make *Zinfandel* here of fair average quality. I speak about it as I have seen it in cellars in San Francisco, Napa and other localities in this State. I buy wine as well as make it. We have bought wines and do so yearly from the northern cellars, wherever we could find what suited us, and last year could not find a year-old *Zinfandel* wine, or older, in any quantity that would answer for the purpose we wanted it. That is for the best bottle trade for New York. We found, however, a wine in Mr. Schetler's cellar, at St. Helena, which we bought and it was suited to our requirements and has given satisfaction to the buyer. This he called *Carignan*, but it was understood at the time that it was a blend of two or more kinds. What these blends were I have not learned. We also found small lots of wine at Mr. H. W. Crabb's, Oakville, which were very fine, consisting of *Malbeck*, *Pied de Perdrix*, *Gamay*, *Teinturier*, *Lemoir* and *Petit Pinot*. The first four are wines of intense color and wines that would be desirable and salable in any market in Europe to be used as blends and many such wines would now sell in this State for a high price, to blend with lighter-colored wines to give color, and no one can go wrong in planting largely of all or any of these varieties. The *Petit Pinot* makes a very nice wine of better quality than *Zinfandel*. At Mr. Crabb's an intelligent comparison could be instituted, for there could be seen *Zinfandel* and other old known varieties of wine, made in the same manner as the others and grown at the same locality and all the old varieties were inferior to the varieties I have named.

THE BEARING QUALITIES,

Or rather quantities, I also observed at Mr. Crabb's. The *Pied de Perdrix*, *Gamay*, *Teinturier* and *Lemoir* are all good bearers. The *Malbeck* is a light bearer. The *Mataro* and *Carignan* were highly spoken of by Mr. Crabb, as good bearers, while the *Petit Sarrah* and *Cabernet* are very shy bearers. The *Semillon* and *Sauvignon Vert* are heavy bearers and for a white wine of a Sauterne type have no superior. The *Trousseau* also is a fair bearer and for Port wine or perhaps for a red wine of a Burgundy type it has no superior. I saw, too, a sample of *Saltanat* wine at Mr. Crabb's, a very nice wine indeed, and that grape is the heaviest bearer of all grapes, except the *Burger*, perhaps, which may be its equal. *Burger*, in favorable warm localities makes a wine which will hold its own against all comers and will be especially valuable as a base for blending.

I have indicated these few varieties, as I have seen the grapes growing and examined their products and for that reason they can be called facts. Facts are what are wanted and are the only educators. Coming years will give us many more, for many are experimenting and many rosy visions are painted by us all. What the red wine of the future will be is yet in doubt. Here and there some fact points in a certain direction, but my belief is that

BLENDING

Two or more kinds will in time make the perfect wine, and with the dark-colored varieties of wine grapes in abundance, the white wine grapes, such as *Burger*, *Sauvignon Vert*, *Semillon* and perhaps *Saltanat* and others, will in my opinion, play an important role in this make up. This blending may be done in the fermenting tub, during vintage, and that no doubt will be the best way, or it may be done after each kind has been made separately.

FERMENTATION.

This is a very important subject and one that is as yet imperfectly understood. There is more wine spoiled by faulty fermentation than all other causes combined, for a must only partly fermented will never make good wine. Such wine carries within itself a germ of sure decay and will turn what is termed milk sour. The greatest trouble seems to be with red wine, and some kinds of grapes are more difficult to ferment dry than others. I have never had any trouble with *Burger* or *Blanc Ellora*. Grapes over ripe or very sweet are more troublesome than those less matured. I regret that I am unable to tell you how to do it or even the best way, but have to go into the region of surmises instead of facts. Mr. Crabb drew my attention to a fact which had always escaped my notice. That a violent and hot fermentation was always dangerous and when the heat in the mass rose to 95 degrees, Fahrenheit, or over, such was never made a dry wine. That a slow and regular fermentation, at low temperature, was the favorable one. A wine maker now with Mr. Barton is quite noted for the success he has in his fermenting and making of red wines, succeeding this year at Fresno where the weather, during vintage, is hot and grapes are liable to become over ripe. The great difference in his treatment of the grape consists in rubbing them off from the stems, but not mashing them and then frequently stirring them in the vat. This is, too, the practice in the south of France. I had heard of this way, not mashing the grapes, years ago, but could see no reason for following or trying it; for my belief was, air being an active agent in fermentation, the more air the better, and by crushing the grapes thoroughly they would become saturated with air and fermentation would be stronger, quicker and better. Then I did not know that too much heat would check fermentation, before all the sugar was changed into alcohol. Now I can see that excluding the excess of air may prevent this violent and rapid fermentation, and may be the very method essential for making a more slow but complete one. I make the suggestion for the benefit of the wine makers and as an experiment well worth trying.

EVERYTHING UNDER ITS TRUE NAME.

It is of the first importance that we make the best wine possible and that all make good wine, for one lot of poor wine will damage a great deal of good. It is also important that there shall be a uniformity in the general product of the State, so that California wine and brandy will mean something definite to the consumer. This will all come with time, for it would be hard to find a more wide-awake and intelligent class of men than the viticulturists of California. But there is still another matter almost equally important, and that is that everything should be pure, made from the grape alone, and the more clearly we can make this self-evident to the consumer, the surer and greater will be our success. California wine should be sold under its own name and the labels should set forth by whom made and by whom sold. Brandy should be sold in original package only and all other products. For instance, brandy made from spirits should show its origin. Adulterated wines made from various con-

coctions should show from what they are made; whiskey, pure spirits and alcohol, all should be sold in original package only, or if anything is done to make them appear something else, by making them into gin, rum or what not, it should so appear on the barrel. We have a right to ask from Congress that it will make laws to protect us in our honest efforts to sell pure wine from grapes. It is in the interest of honesty, morals and good health. It is right, and every honest man in the world has a direct interest in this matter. The man who makes a spurious article has no reason for complaint if compelled to sell it for what it is, or be punished, any more than the man who makes imitation jewelry and sells it for real, has a cause to complain because he is put in jail for swindling. We do not ask Congress to stop the making of spurious wines, brandies, gin or any drink whatever, we only wish the article which is offered for sale to show for itself what it is. If it is Pinchbeck, let the card or label show that it is Pinchbeck. Let it be sold on its own merits for what it is, and not by its imitation mislead the buyer and hurt the sale of true gold. This matter has come up in our Board and there has been some effort made to introduce a bill with this end in view and a strong move will be made in that direction, but it will require the help of every grape grower in the land, and although objections will be made and we shall encounter much opposition, yet the right in the end must prevail, for it is justice.

CHANGES IN LOS ANGELES COUNTY.

Since I made my first report in 1880, there have been many great changes in this county. Vineyard planting has tripled the acreage of our vineyards, and although not in full bearing, yet the coming year will feel the increase in yield. Lands that could have been bought for ten dollars an acre would now sell for from fifty to one hundred dollars. Pleasant homes with vine-clad cottages are now dotted over our plains which were formerly grazed by flocks of sheep. The transcontinental railroads, which were then in process of construction, are now completed and long lines of cars are transporting the products of every clime, taking our wine, our oranges and our wheat to the four corners of the earth.

LAST YEAR'S PRODUCT

Of grapes was but little short of the previous year's product. The hot weather in June made the crop somewhat shorter than it would have been otherwise, but we were as little affected as any portion of the State. The heat continued throughout the month of June; indeed it was the hottest June I ever remember here, yet it shows what a wonderful climate that of California is when so much comment is made over a small falling off in production. The fact is we are like spoiled children who are accustomed to have everything their own way. We measure everything by the largest possible production and if some circumstance occurs at rare intervals which cuts short, in some small degree, that production, we make as great an outcry as if we were ruined. The grape crop in this county, if I may judge by my own crop and from the crops of some hundred other grape growers in this county, did not fall short by ten per cent of that of the year previous. The yield must have been fully fifty-five million pounds of grapes, which was made into wine and brandy. The raisin interest has also largely increased. The quantity of the wine made in this district cannot be estimated very closely, for no one is willing to give an accurate statement. The quantity of grapes made into brandy and wine I approximate by the number of crushers in the county and the time they were at work.

Our wine does not now figure in the exports of San Francisco. All our wines are now shipped by rail, and those shipped to New York go by way of New Orleans.

This general prosperity and planting of vines and trees extends to adjoining counties, all of which are keeping fully abreast in that particular with Los Angeles, San Diego, San Bernardino, and Santa Barbara. All are teeming with life and energy, new people, new hopes and new homes.

L. J. ROSE.
Sunny Slope.
State Viticultural Commissioner for Los Angeles District.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:—FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Scheffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—our land already arrived in better condition than ever before received in this State, as follows:

36 inch cuttings at $10.00 per M.
12 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS;

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

Address

CHAS. A. WETMORE,
No. 321 Montgomery St., or
No. 111 Leidesdorff St.,
San Francisco, Cal.

P. O. Address
No. 111 Leidesdorff St. S. F

AD MAJOREM

GLORIAM BONI VINI.

The undersigned having enlarged his business, has opened a branch office at No. 321 Montgomery Street, where information can be obtained concerning viticultural and horticultural lands, and where orders for vines and vine cuttings will be received, as well as at the old office, No. 111 Leidesdorff Street.

Having accomplished nearly all that is necessary to be done in establishing a flourishing colony of wine producers in the Livermore Valley, I shall now devote my attention especially to the development of the Viticultural and Horticultural resources of San Diego County, which county is one of the most promising in the State.

Information may be had at this office concerning the remarkable offering of the

EL CAJON LAND COMPANY.

And selections of land and subscriptions to the stock of the Company may be made through this agency. This Company controls 27,000 acres of land in the richest part of San Diego County, where the finest raisins in the State are now made, and where nearly all kinds of fruit, particularly the apricot, pear, apple and olive, are raised to perfection without irrigation, and where, in proper sites, the orange and lemon are successfully grown with such slight irrigation as may be provided by means of windmills. The property commands ample means for irrigation whenever its settlers may desire to use the same.

This property is being subscribed for at an average price of less than $10 per acre to the stockholders; 2500 acres of choice land, platted and laid out with broad avenues, will be immediately allotted to subscribers in severalty. This tract of platted land is worth and has been selling for $100 per acre, but it is included in the whole tract at the average price; 10,000 acres of the whole tract are arable; the balance grazing lands.

THE DIRECTORS

Of this Company will soon be announced officially, as follows:

ARPAD HARASZTHY, President,
DR. JOSEPH JARVIS, Vice-President,
GEORGE WEST,
GEORGE A. COWLES,
CHAS A. WETMORE.

The Trustee, during the subscription to the stock, is Mr. Bryant Howard, the cashier of the Consolidated Bank of San Diego. Wm. B. West, Esq., who has made special studies in viticulture and horticulture and who has studied raisin-making in Spain, as well as in this State, is a subscriber to the stock of the Company and will devote considerable time during the coming Winter at the San Francisco office of the Company, for the purpose of giving information to those who may desire the same, concerning the prospects of this enterprise. Prof. Frederico Polmdorff has engaged a portion of the land and stock with the object of establishing an olive orchard.

Those who subscribe early and make early selections of the platted land will never regret doing so. It is expected that all the land will soon be taken up. Samples of fruit, raisins and wine, raised in the El Cajon Valley, can be seen at this office; also maps and the plan of the subdivided tract.

Those desirous of purchasing a large tract of land—say 10,000 acres, part grazing and part arable—partly the finest alfalfa land, can find a good opportunity, if applied for soon, as the company can dispose of that much for cash in one body in terms that will be most advantageous.

RIPARIA CUTTINGS.

We offer the above from $4.50 to $7.50 per M., according to size. They are cut fresh and heeled in every day, from the vineyard of Judge Stanly, near Soscol, Napa county. The wood is much shorter jointed and better ripened than imported cuttings, and guaranteed true. There are frequently five buds on a cutting, where there will be only two or three on one of the same length raised in Nebraska or Missouri. We have used imported cuttings for the past four years, and our experience, together with others, abundantly proves that cuttings raised here will root 90 per cent, against 15 or 20 per cent of the imported ones. This we will demonstrate to any who will call at our nurseries. Therefore, 1,000 of Riparia cuttings are worth more than 5,000 of the Eastern ones.

Best references given.

"The Wine Press and the Celler."

Letter from Charles A. Wetmore, Esq.

STATE OF CALIFORNIA, BOARD OF STATE VITICULTURAL COMMISSIONERS. OFFICE OF THE CHIEF EXECUTIVE VITICULTURAL OFFICER.
SAN FRANCISCO, Dec. 24, 1883.

E. H. RIXFORD, Esq.

Dear Sir.—Though late in doing so, permit me to compliment you on the successful issue of your labor in compiling the European authorities on wine making. Yours is in the form of a digest, such as a lawyer only would know how to prepare carefully and reliably. It is exceedingly valuable as a means of developing thought and observation in each of the topics so digested. For those who desire to be directed into a course of study and to be led to appreciate the multitude of questions that arise in vinification and the care of wines, this work of yours will be an invaluable assistance. Readers who have not extensively studied such matters should, however, be taught to hold all maxims drawn from varied European sources, in abeyance until local experience has verified the same in this country. So much depends on the varying conditions of climate, soil and the varieties of vines cultivated, that very few questions in wine making can have more than a local solution.

The vine growers of the State should add your book to their libraries without delay, and they all owe you many thanks for your painstaking industry in preparing for them a digest, such as can nowhere else be found in the language.

Yours respectfully,
CHAS. A. WETMORE.

CALIFORNIA VINES AND WINES.

Areas of Vines Planted, Growing, Etc. Vintages. Revenue Tax — Government Aid.

Anything C. A. Wetmore, Chief Executive Viticultural Officer, says on the se subjects should be read by every one interested in this industry. We therefore reproduce from the New Year's edition of the *Record-Union* the following:

A brief statement of the acreage of vineyards and of wine and brandy productions will be of interest to those not familiar with the facts. I have estimated, without the aid of accurate statistics, the area of vines in California as follows: Planted prior to 1881 and now bearing, 60,000 acres; planted in 1881, 10,000; planted in 1882, 35,000 acres, planted in 1883, 35,000 acres; estimate for planting in 1884, 30,000 acres.

BEARING VINES AND VINTAGES.

I should say in relation to bearing vines five years old and upwards, that there will be in 1885, 70,000 acres; in 1886, 105,000, in 1887, 140,000, and in 1888, 170,000. These may be estimated as 20 per cent of vines planted for table, shipping and raisin purposes and 80 per cent for wine and brandy. I estimate the vintages as follows: For 1881, 12,000,000 gallons; 1882, 9,000,000; 1883, 8,000,000; 1884 (yield) 14,000,000; 1885 (yield), 15,000,000; 1886 (yield), 20,000,000; 1887 (yield), 25,000,000; 1888 (yield), 33,000,000. These estimates may appear low, but will probably hold true in the average. Not all the vineyards planted will be carefully cultivated; not all are planted in the best locations. The figures given include brandy, as wine; excepting brandy distilled from pomace, which will be a large but inferior product. As the new vines come into bearing, owing to deficiency of cellarage and imperfections in fermentation, for a number of years probably a considerable percentage of wine will be distilled, and the quality of our brandies will improve.

DISTILLATION AND REVENUE TAX.

I expect that in 1887 one-third of the crop will be distilled, requiring an average of four gallons of wine to produce one of brandy (proof). Hence we shall have in 1887 about 16,000,000 gallons of wine, and 2,000,000 gallons of brandy. In 1888 about 22,000,000 gallons of wine, and 5,000,000 gallons of brandy. The foregoing figures do not include pomace brandy. If the present Internal Revenue tax should remain, the Government would derive from the vintage of 1888 $2,700,000 from our brandy product alone. I insist that the Government should pay into the State treasury a percentage of the tax on brandy, to be used by the State in advancing the viticultural industries by the proper maintenance of viticultural schools (University branch particularly), viticultural experimental fields and laboratories, and the protection of vineyards from disease. The United States should not permit its citizens to keep a back seat in viticultural councils.

THE QUALITY OF OLD WINES AND BRANDIES

Constantly improves, but the first great step in advance—when the open markets will feel the greatest impetus from the effect of a largely increased proportion of superior grades of wine—will be in 1887, when the vintage of 1886 is offered to the dealers, that vintage, including the crops of the five-year old vines planted in 1882, in which year a larger number of choice vines were planted than in all the preceding. This impetus will be accelerated in 1888 on the strength of the two-year-old vintage of 1886, backed by the promise of a much greater improvement in the vintage of 1887. In 1888 we may think, for the first time, of practically opening a foreign market, having then stocks of sufficient quantity, age and quality to test the London trade. American commerce in good table wines and brandies will fairly commence in 1888.

GRAPES FOR OTHER PURPOSES.

It is easier to guess at than to estimate the results of the table, shipping and raisin grape crops. I believe, however, that the markets will increase more rapidly than the crops. The American people, under the influence of custom, made easy by the canning and fruit transporting industries, is becoming habituated to the constant use of fruit and vegetables as articles of regular diet. Facilities for transportation, it is probable, will keep pace with this growing trade. Realizing how much the future prosperity of the State will be dependent upon fruit and wine culture, our people should anticipate future wants by providing amply for the education of a special class of experts and for the protection of orchards and vineyards. The efforts of the State so far have been crowned with a partial success; there is, however, a great need of more comprehensive public instruction and general research than the limited funds provided for the State University and the Board of State Viticultural Commissioners can cover.

ANOTHER WITNESS.

Charles Kohler's Opinion on Zinfandel from El Cajon, San Diego County.

Having been presented with a bottle of Zinfandel, made last vintage from El Cajon, San Diego county, we submitted it to Mr. Charles Kohler, of the well-known wine-growing and wine-dealing firm of Kohler & Frohling, of San Francisco, Sonoma and Los Angeles. Mr. Kohler said, with emphasis: "It is as fine Zinfandel as I ever tasted. It is full, rich and remarkably fine in flavor, and absolutely sound. Clearly, the grapes must have grown within the influence of the coast breezes. All Zinfandels grown within the reach of the sea air have that raspberry or true Zinfandel flavor. Beyond this region we do not find this flavor in the same degree. This peculiar flavor, however, even when most marked in new wines, becomes weaker with age, and is replaced by a finer flavor and bouquet. If I could purchase 100,000 gallons of wine, naked in the maker's cellar, as fine as this sample, I would give 35 cents a gallon for it and pay cash. This sample has all the tannin and preservative qualities required for transportation, and the wine will undoubtedly improve for five years to come. It is of exquisite quality, and is perfectly free from fault or defect. It tastes like a very good vintage in one of the best years, from the hills of Sonoma valley.

San Diego's Future.

From the *Press and Horticulturist*.

At the conclusion of a letter on San Diego County, Mr. Wetmore writes:

I might add some interesting items of similar character, but I will close by making the prediction that San Diego, which is the keystone of Southern California, will soon attract the attention that she has long deserved, and that through her the interests of the southern counties will become commercially and agriculturally consolidated. San Diego will never be so great that she will forget her neighbors, and San Bernardino and Los Angeles will never seem smaller than when they feel that they are hopelessly dangling at the tail of San Francisco's kite. Without the full development of San Diego county, Southern California can never boast of an important and prideful community. All our interests are in common, and we need to make them known to the world. The day of San Diego's obscurity is past. CHAS. A. WETMORE.

The difference between a cat and a comma is that one has the claws at the end of the paws, while the other has the pause at the end of the clause.

Those who profess to know state that the coming winter will be a mild one. We are not aware that there is any truth in the statement, but if married men can make their wives believe it, the latter may think they can get along with their old cloth coats and not be worrying for sealskin sacques.—*Hotel Mail.*

PORT OF SAN FRANCISCO.

Imports.

OVERLAND RECEIPTS FOR WEEK ENDING JAN 9—421 cs agricultural implements, 37900 lbs bacon, 113 cs beer, 2725 bxs candles, 90 cs canned goods, 6 cs cigars, 12 cs cigarettes, 8020 lbs cheese, 600 cs coal oil, 19 coils cordage, 95 cs drugs, 163 cs dry goods, 175 cs 110 kits fish, 60 cs 12 kegs figs, 40, 606 lbs hams, 320 cs hardware, 127 bdls 1147 pcs 5 cs iron, 329 bdls 744 pcs iron pipe, 5 bales leather, 10 cs matches, 22500 lbs middlings, 730 kegs nails, 8 sks nuts, 6 cs paints, 13 cks prunes, 10 bgs seeds, 176 bbls spirits, 410 bxs starch, 219 cs 5 bars steel, 5888 lbs manufactured tobacco, 38553 lbs leaf tobacco, 82 bbls whiskey.

Principal Imports by sea, for week ending Jan. 9th.

NANAIMO—Per Br ship Don Enrique, Jan 9—2045 tons coal.

KAHULUI—Per schr. Anna, Jan 9—2674 bags raw sugar.

HONOLULU—Per str Alameda, Jan 9—2001 bunches bananas, 2 cs limes, 24471 bgs raw sugar, 1510 bags rice, 287 pkgs miscellaneous, $2241 treasure.

TACOMA—Per schr Geo. C. Perkins, Jan 9—460 M ft lumber.

SOUTH PACIFIC OCEAN—Per bark Emma F. Harriman, Jan 9—500 bbls sperm oil, 200 bbls whale oil.

HONOLULU Per bark Cabarran, Jan 9—2 bags coffee, 130 bunches bananas, 6 cs fish, 240 bbls molasses, 3243 bags rice, 16 cs salmon, 2138 bags raw sugar.

DEPARTURE BAY—Per Br str Wellington, Jan 7 2300 tons coal.

CARDIFF—Per Ger, ship Hugo, Jan 5—2232 tons coal.

PORTLAND—Per str Columbia, Jan 4—10 cs dry goods, 3635 sks flour, 827 bdls hides, 147 pcs iron, 2 bales leather, 14 bdls liquors, 5 sks nuts, 70 cs oil, 1843 sks wheat, 18 sks wool, 3352 cs miscellaneous.

NEW YORK—Per ship Landseer, Jan 4—404 ton coal, 15 cs dry goods, 50 drums glycerine, 117 cs hardware, 100 tons 144 pcs iron, 50 tierces lard, 6667 pcs lumber, 1000 bales oakum, 75 bbls oil, 3500 bbls rosin, 110 bbls rum, 65 pcs steel, 50 bbls tar, 1000 cs turpentine, 10 bbls varnish, 153 bbls whiskey, 24188 cs miscellaneous.

PORT TOWNSEND—Per str Mexico, Jan 4—455 tons coal, 2 coils cordage, 1 cs dry goods, 1 tierce hams, 1 cs hardware, 31 bdls hides, 135 M laths, 12 bbls liquors, 1 bbl molasses, 29 cs salmon, 5 bags seeds, 25 bdls skins, 1 bx manufactured tobacco, 12 sks wool, 41 cs miscellaneous, $10,772 treasure.

ALASKA—Per same—3 bdls hides, 46 bdls skins, $2393 treasure.

VICTORIA—Per same—37 bdls hides, 7229 cs salmon, $13900 treasure.

NEWCASTLE (England)—Per Br bark James Livesey, Jan 3—600 csks cement, 1195 tons coal, 40,000 fire brick.

CARDIFF—Per Ger bark Fulda, Jan 3—1172 tons coal.

PHILADELPHIA—Per ship Ivy, Jan 4—1170 tons coal, 2029 bars steel, 300 bdls miscellaneous.

TACOMA—Per ship Dashing Wave, Jan 4—80 M laths, 620 M ft lumber.

CARDIFF—Per Ger ship Roland, Jan 4—1843 tons coal.

SYDNEY—Per Br ship Phasis, Jan 4—2198 tons coal.

NEWCASTLE, N S. W.—Per Br bark Buttermere, Jan 4—1420 tons coal.

CARDIFF—Per Br ship W. J. Pierre, Jan 4—2462 tons coal, 980 tons iron.

CHINA—Per str City of Rio de Janeiro, Jan 2—10 cs cigars, 140 bags coffee, 10 cs drugs, 77 cs dry goods, 100 bales hops, 220 cs oil, 30 cs oranges, 21,491 bgs rice, 5500 bgs raw sugar, 550 pkgs tea, 6488 cs miscellaneous.

JAPAN—Per same—30 cs oranges, 8272 pkgs tea, 5 bales wool, 247 cs miscellaneous, $34,250 treasure.

Meat Market.

BEEF—First quality, 8@8½c; second quality, 7 to 7½c; third quality, 6@6½c ₰ lb.

VEAL—Large Calves, 8@9c; small ones, 9@10½c ₰ lb.

MUTTON — Wethers are quotable at 5½@6c and Ewes at 5@5½c ₰ lb, according to quality.

LAMB—Spring is quotable at 7@8c ₰ lb.

PORK—Live Hogs, 5½@5¾c for bard grain hogs on foot; dressed do 7¼@7¾c.

PRODUCE MARKET.

The Imports and Exports given below are compiled from Thursday morning to Wednesday evening of the current week.

Gentle showers have fallen at times during the week in many parts of the State, but the aggregate of the fall has not been nearly so great as was wanted, and further and more liberal rains are needed in the near future in most of the important grain growing sections of the State.

FLOUR—
Imports, 3635 bags Exports, 23980 bbls.
Receipts, of week, 107,551 qr sks

Market is very weak and the probability is that a reduction in prices will be made before the close the current week.

Extra, $5 75@6 00; Superfine, $4 00@4 75; Country ditto, $3 65@4 50; Interior Extra $3 00@5 50 per bbl for jobbing parcels to local consumers, but round lots for export can be obtained for some what less figures.

WHEAT—
Imports, 1843 bgs. Exports, 96115 ctls
Receipts for the week, 35,152 ctls.

The market has been in a very depressed condition all the week. Shippers have only taken petty parcels, to meet immediate necessities, and the local millers purchase sparingly. The Eastern and European markets have shown a continually weakening tendency, and altogether the outlook is far from favorable to the holders of wheat in this State. That there will be any great decline during the present month, is not expected, but that holders will be enabled to dispose of their grain at full figures would seem improbable, except that the pressing requirements of shippers, in exceptional instances, should compel the purchase of some few round parcels.

Sales of No. 1 White on Call yesterday included 400 tons at $1 80¾@1 80½, buyer season, and 100 tons at $1 71 seller season. In the sample market, $1 75 is the best bid for No. 1 White.

BARLEY—
Exports, 1742 ctls
Receipts of week, 11653 ctls.

It is now considered not improbable that the stock on hand in the State on the 1st of January was fully 2,500,000 ctls The report of the Produce Exchange will be out on Monday next, and until that time nothing definite will be known.

The fluctuations on Call have been important, and the turns made have been of such magnitude as to cause increased interest in this manner of transacting business.

At the morning session of the Produce Exchange Call Board yesterday, sales of No. 1 Feed were made as follows 4,300 tons @1 13@1 13½, opening at the former and closing at the latter figure, buyer season; 300, $1 01½@1 02 seller season; In the sample market No. 1 Feed $1 03@1 05, brewing $1 15@$1 17½ for No. 1, and $1 07½@$1 10 for No 2. Chevalier, entirely nominal.

BUCKWHEAT—
Receipts of the week,
Quotations are entirely nominal, at $3@$3 4 per ctl.

OATS—
Exports, 374 ctls.
Receipts of week, 2851 ctls.

Market steady Black, $1 52½@$1 57½. White, $1 50@$1 60 for ordinary; $1 62½@$1 70 for fair to good and $1 75@$1 80 per ctl., for choice to extra choice.

CORN—
Exports, 192 ctls.
Receipts of week, 2188 sks.

It is quite probable that the stocks in the southern counties have been considerably underestimated, and that the forthcoming report of the Produce Exchange will show greater supplies than were anticipated. California Yellow is quotable at $1 50@1 60 per ctl

RYE—
Receipts of week, 2730 sks.

Stocks on hand in the State are, probably, greater than ever before, but growers have formarded only small parcels to market, so prices are largely nomina at $1 25@$1 30 per ctl.

MILLSTUFFS—
Imports, 22500 ctls middlings. Exports, 901 ctls millstuffs, 1115 ctls bran.
Receipts of week, 8800 sks Bran, 2517 sks Middlings, 715 ctls Ground Barley, 610 ctls ground feed.

We quote: Ground Barley, $21 00@25 per ton. Middlings are selling at $19@$21 00 per ton, Wheat Bran, $14 00@15 00 per ton; Oil Cake Meal $30, old process, and $26 50 new process; Feed Corn Meal, $25@26; Cracked Corn, $30 per ton, Rye Flour, $6 per bbl; Rye Meal, $5 50 per bbl; Buckwheat Flour, 5c per lb; Pearl Barley, 4@5c per lb; Eastern Oat Meal, $9 75 per bbl; Cracked Wheat, 6c per lb.

HAY—
Exports, 101 tons.
Receipts of the week, 590 tons.

We quote: Alfalfa, $7@$10; Wheat, $13 00@15 00, Stable, $12 00@14 00; Wild Oat, $13 00@15 00; Cow, $10@12; Barley, $10@12 00 per ton.

STRAW—
Receipts of week, 86 bls.
Quotable at 55@60c ₱ bale, as to condition.

SEEDS—
Imports, 26 bgs. Exports, 15 bgs

Receipts of week, 20 sks alfalfa, 2 sks mustard
Exports, Alfalfa, 20@30c ₱ lb, Timothy, 6@7½c for native and 8@9c for imported; Mustard, choice Brown, $3 00@3 25 ₱ ctl; White, $2 75@3 00, Hemp, 3c, Rape, 3@3½c

Native timothy is out of the market. Business in all other descriptions is improving, with fair prospects of a good trade in the future, if we have seasonable rains.

BEANS—
Exports, 17 ctls.
Receipts of the week, 6423 bags.

Our quotations are, for round lots from the wharf. Small White and Pea, $3 25; Bayos, $3 50; Pinks, $3 75; Reds, $4; Butters, $3 25; Limas, $3 00@

The falchhood of a heavy failure in the Produce line has cast a depression over the whole street. All are in sympathy with the house in difficulties. They feel also that the failure of such a house must have a bad effect in the country. Farmers will think that if that firm can't be trusted, who can.

The Call Board this morning acted as if a wet blanket was thrown over it, for the firm was the most a live and heaviest operator there.

Even the festive bean dealer who has done most of the talking on 'Change for the past month seemed not to be impervious to the calamity that has fallen on "the street." We are all sorry; and your reporter feels that he ought to go after somebody, but let us take up the good old fashioned method for once, and "never kick a man when he's down," and we all live in glass houses—that is, all producemen.

There is no bean business going on that's worth talking about.

VEGETABLES—
Receipts of week, 514 sks peas.

The first asparagus of the season has arrived, and is selling at from 50 to 55 cents per pound.

We quote: Carrots, 30@35c; Turnips, 75c@$1 00; Cauliflower, $1@1 50 ₱ doz; Cabbage, 60@75c ₱ ctl; Garlic, 2c@2½c ₱ lb; Celery, 50c @75c; Dried Okra, 5c@6c; Dried Peppers, 15c@14c ₱ lb, String Peppers, 18@20c per lb, Artichokes, 40c@60c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1@1 25 ₱ ctl; Marrow Fat Squash, $20 ₱ ton; Mushrooms, 30@38c ₱ lb.

FRUITS—
Imports, 2131 bunches bananas, 2 cs limes, 60 bxs oranges Exports, 27 bxs fruit, 319 bxs apples

Business is very dull, with no change in prices. The bananas received by the Alameda were in very poor condition, being mostly all over-ripe or half rotten

We quote: Domestic—Apples, 50c@$2 00 ₱ box, Pears, 75c@$2 00 per box; Cape Cod Cranberries, $8 50@9 00 ₱ bbl; Western do, $11 00@17 75 ₱ bbl. Tropical—Lemons, 86 50@7 per box for Sicily; Limes, 50 @60c 00 per box for Mexican; Bananas, 12½@15c per lb; Bananas, $1 75@4 00 per bunch; California Oranges, $2@3 for old and $3@5 for new; Loretto Oranges, $20 50@22 50 per M.

NUTS
Imports, 13 sks Exports, 20 bgs.

As is usual at this time of the year, trade in nuts is very dull No change is noticeable in prices. We note the arrival of a choice lot of Italian chestnuts, which are selling at from 18 to 22 cents per pound.

We quote: Cocoanuts, 86@6 50 ₱ 100; California Walnuts, 8@9c ₱ lb; Chili do, 8½@9c, California Almonds, hard shell, 7@8c, soft shell, 13 @14c; Filberts, 15@16c; Pecan, 13@14c; Peanuts, 5@5½c; Brazil Nuts, 15@16c; Hickory Nuts, 7@8c; Italian Chestnuts, 18@22c.

HONEY—
Exports, 1 cs.
We quote: Extracted, 5½@7c; Ex White Comb 15@20c, White, 13@16c, Dark, 8@10c.

BEESWAX—
We quote 26@30 c per lb.

DAIRY PRODUCE—
Pickled roll is about out of the market Fresh butter is arriving more freely and we note a decline to 32½ cents. Cheese remains steady, without change in quotations.

We quote: Point Reyes, 32½c; Choice, 28½@c 31 Fair to Good, 25@27, interior lots from country stores, 16@17c, Brkin, 20@21c for old and 24@ 27½ for new, Eastern, 14@17c, Pickled Roll, 25@ 27½, Cheese, California, 10@13c for choice, 11@ 12c for Fair to Good; Gilroy, in drums, 16@18c, Eastern, 17@18c; Western, 10@15c.

POULTRY—
Receipts are still light with good demand, and prices have advanced considerably. On the other hand, game, being in large supply, is consequently selling at low prices

We quote: Turkeys, Live Gobblers, 24@25c per lb Turkey Hens, 24@25c; Dressed, 27@28c; Young Roosters, $7 00@8 00, Old Roosters, $6 00@7 00, Hens, $8 00@8 50; Broilers, $6 50@7 00, according to size; Ducks, $10@12 00 ₱ doz; Geese, $2 25@ $2 50 per pair.

OLEOMARGARINE—
We quote the range from 20 to 22c, according to package.

ONIONS—
Exports, 124 ctls
Receipts of week, 1579 sks.

Arrivals of good are rare, and are eagerly bought by dealers at 80c,

GAME—
We quote: Quail, 1@$1 25 ₱ dozen; Hare, $2 00@2 25, Rabbits, small, $1@$1 25, cotton-tail $1 25@$1 50 ₱ doz; Teal, 75c; Sprigs, $1 50@ $2 00; Widgeon, $1 00, Mallards, $2 00@2 50 ₱ doz, canvas-backs, $ 50@$5 00 per doz, common snipe, 50c @ 75c ₱ doz; do, English, $1 50@2 00 ₱ doz; Grey Geese, $2 50@2 75 per doz; White Geese, $1 25@1 50; Honkers, $4 50@ $5 00 per doz.

HOPS—
Exports, 64 ctls.
Receipts of the week, 64 bls.

Market is without material change, there having been no revival since the New Year; in fact, if there is any change it is for the worse, as it is impossible to make sales, even at reductions

We quote medium to good 15@17½c; choice, 18 @19c.

WOOL—
Imports, 30 sks 5 bls. Exports, 1 bag.
Receipts of week, 166 bls
For full detail of market see Wool Department.

HIDES, SKINS, ETC.
Imports, 898 hds hides, 71 bdls skins. Exports, 18 bdls tallow
Heavy Salted Steers, over 57lbs, 10@10½c per lb
Medium Salted Cows and Steers, 50@55 lbs, 8@9c
Light Salted Cows and Steers, 40@50 lbs, 8c per lb. Salted kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18@——c per lb; Dry kips, do, 18@——c per lb. Dry Calf, do, 18@20c per lb.

The market for salted hides is rather quiet, but the small volume of business is due rather to the closing of the year's work.

Heavy steers are in demand, and clean, spready cows find a ready sale Medium hides can be placed.

Steers of 40@50 lbs and plump, coarse cows are rather slow. The stock of salted hides is moderately large.

The market East is steady, but perhaps there is a tendency to lower values. Of late there has been a tendency in the East to cull California hides more closely than in previous years, and during the twelve months shippers have lost in the culling as a rule, during this summer many hides have been damaged by worms, or by being tanned during the drying and there should, as a rule, be but few calls in a lot of dry hides that have been dried with care and then peosoned.

Dry Kip and Calf, off good weights and well cured, can be used for tannage here, but poor stock, or skins which have been badly or carelessly handled, have to be shipped, and such stock is sold in the East at rates less than those which can be obtained for dry hides

TALLOW—For fair and good grades, 7½ c. @— c. per lb. To-day the market is firm and steady.

EGGS—
We quote: California Eggs, Choice Ranch, 31@ 32c per doz; California Inued, 25@30c; Eastern, 35@37½c; for fresh lined, 22@25c.

Eggs are arriving freely, with a good demand; prices, however, are slightly on the decline.

POTATOES—
Exports, 867 ctls.
Receipts of week, 19212 sks

Arrivals heavy; trade is fair, but not enough to work off stocks gracefully They are accumulating

We quote: Early Rose 50@75c, River Reds, 35@ 45c; Tomales and Petaluma, 80c; Cuffy's Cove, 90c; Humboldts, 90c, Sweets, $2@2 25.

THE WINE MARKET.

There have been some more sales and re-sales of wine '83 vintage, during the week. Cellars of '83 owned by makers who do not job are getting scarce and are held very firmly.

For Exports and Imports, see Merchandise Markets

Brandy—Original Government Gauge in Bond made from Wine—

Bbls	'81—95 @$1 10	'82—85 @ 95 cts
Hlf bbls	'81—$1 05 @$1 15	'82—90 @$1 00
Pumace—		
Bbls	'81—90 @ 95	'82—75 @ 80 "
Hlf bbls	'81—95 @ 100	'82—80 @ 85 "

The above is in round lots of 100 bbls or more.

Jobbers furnish shipping lots in good coopage f. o. b. ship or rail, as follows:

White Mission	'82—42½ @ 45	'81—50 @
Red Mission	'82—42½ @ 45	'81—50 @
Zinfandel	'82—50 @ 55	'81— @ 60
Riesling	'82—60 @ 65	'81—65 @ 70

Burgundy, Red	'82—57½ @ 60	'81—65 @ 70

Trade Failures.

There were 260 failures in the United States reported to *Bradstreet's* during the week ending December 29th, 20 less than the preceding week, 18 more than the corresponding week of 1882 and 99 more than the same week of 1881. About 70 per cent. of the failures were those of small traders, whose capital was under $5,000 Compared with the previous week the middle states had 54, a decrease of 9; New England states 21, a decrease of 10; southern states 63, an increase of 12; western states 72, an increase of 5; Pacific states and territories 21, a decrease of 12; Canada and the Provinces 24, a decrease of 9. Among the important firms reported embarrassed were William Carroll & Co., manufacturers of fur and wool mats, Carroll & Co., manufacturers of straw hats, and Higgins & Fowler, soap manufacturers, New York city; Amos D. Smith & Co., cotton goods manufacturers, Providence, and their companies, the Franklin Manufacturing Company, the Groton Manufacturing Company and the Providence Steam Mill; C. A. Coutant & Co., notions, Chicago; H. S. Gilbert & Co., bankers and grain, Ottawa, Ill.; Lamborn & Gray, bankers and grain, Ottawa, Ill.; Lamborn & Gray, bankers, Alliance, Ohio In the principal trades they were as follows: General stores 48; grocers 41; dry goods 17; clothing 12; liquors 12; [illegible] 11; hardware and agricultural implements 9; machinery and straw goods 8; shoes 8; drugs 7; stock and millers 7; jewelry 2; hotels and restaurants 6; furniture 6; bankers and brokers 5; cotton and woolen mills 5; hats 5; crockery 4; manufacturers 4; produce and provisions 3; carpenters and builders 3; men's furnishing goods 3 *Bradstreet*

Freights and Charters.

The sensation of the day in this branch of business is the reported trouble originating in the financial affairs of Waterman & Co., it is said at Antwerp, on a chartering prior to arrival. This is very probable, because we know all such charterers have suffered severely. Yet it appeared at the time the charters were made a safe business proposition. But for the later hot northers, California would have had a much larger crop of wheat than in 1880. From climatic causes, beyond ordinary calculation, the wheat crop suffered, and consequently, with a low European market, freights have declined to figures never known since California has been recognized as a wheat exporting country.

There has been little business done in ships this week, the most notable charter being a re-charter, British iron ship, Cork, U. K. at 27s 6d. This was a re-charter forced on the market and is no criterion of the asking prices of free ships. The latter prefer to go into winter quarters until freights reach at least 30s, Cork, U. K., for orders. Wood vessels are out of the market entirely and have laid up for a better time coming.

The charters for the week have been as follows:

British ship Fredrick Cuthbert, 1785 tons, wheat to Cork, U. K., 27s 6d, prompt; British bark James Tavernier, 1072 tons, wheat to Cork, U. K., Havre or Antwerp, private, chartered prior to arrival. British ship Howard D. Troop, 1511 tons, merchandise to Sydney or Melbourne, 17s 6d. Australia, 508 to Sydney or Melbourne, 17s 6d. Australia, 508 to British ship seaforth, 1180 tons, wheat to Cork, U. K., 27s 6d, rechartered. The Howard D. Troop loads lumber on Puget Sound; ship D. N. Troop, 1295 tons, proceeds to Valparaiso. Bark Forest Queen, 1481 tons, now due here from Port Discovery; merchandise to Central America; returns with coffee. Schooner Falcon, 196 tons, merchandise to Central America and returns with coffee.

Rice Movement

The movement of rice, as compiled by S. L. Jones & Co., is as follows:

	China—Hawaiians	Japan—mats	bags.
Stock on hand Dec. 31, 1882	111,484		10,797
Imports for 1883	1,024,818		121,076
	1,159,332		132,773
Stock on hand Dec. 31, 1883	287,571		9,639
	871,761		123,134
Exported	55,711		50,777
Apparent home consumption	816,217		72,357

Shipments of Hawaiian rice overland fall considerably below those of 1882, which aggregated 98,187 bags.

Unsatisfactory Condition of Business in New York.

The wholesale business of New York does not appear to be any more profitable than that of San Francisco. We notice in the trade papers of the Atlantic complaints similar to those we have published in the MERCHANT, namely: small margins resulting from excessive competition, and too many sellers for the number of buyers.

The *Northwestern Grocer* on this subject says:

The wholesale trade in New York is represented to be in an unsatisfactory condition, with an unusually narrow margin of profit. It is said by those who are suffering from this adverse condition of trade that there are obviously just now too many persons in the community who are sellers and not enough who are producers; that is, there is an overproduction of middlemen—commission houses, agents, clerks, professional speculators, and generally those who consume rather than produce. This complaint, it is said, is now heard in nearly every office and counting-room in the metropolis, especially in the dry goods district; but still that the volume of goods going forward to distributing points is about as large as it usually is at the close of the year, while the season promises to be a profitable one for the retailers of "Gotham." In reality, we are in a period of low profits on every side, and that is where the shoe pinches. The proportion of middlemen and producers is much about the same, but the profits of both are greatly less than formerly.

A. D. BELL ..... Editor.

FRIDAY . . JANUARY 11, 1884

TURNING THEM LOOSE.

At the meeting of the State Prison Directors on Thursday week, several applications for pardon of convicts were discussed. The crimes of some sick men were not mentioned in the reports of the daily press, but in two cases the convictions of the healthy applicants were reported as murder in the second degree and one as manslaughter. These under our lax administration are in a fair way to be set at liberty. There are a large number of other applications for pardon on file. Twelve of these men were convicted of murder or murder in the first degree. Seven others of murder in the second degree. One of manslaughter; and three of attempt to murder. The total number of manslayers, besides those hopelessly affected by disease, applying for pardon, is 26. We do not mean to express the opinion that the whole 26 will succeed in obtaining free pardons this year; but judging by the experience of former administrations, it is probable that a score of them will be turned loose. And it is equally probable that, though some two or three of them may spend the remainder of their days in peace, some of these comrades will make up the average, and twenty murders will be committed before these guilty men will swing on the gallows or be returned to the State prison.

Besides the above petitioners for restoration to society, there are nine convicted of robbery, five of burglary, two of forgery, two of felony, one of arson and one of rape; also a number whose crimes only amounted, in legal parlance, to grand larceny. Some of these may not obtain the freedom they seek, but probably within the next six months as many or more applications for pardon will be filed, and unless prosecuting attorneys, State prison directors and our Governor harden their hearts toward evil doers, and show a little mercy toward peaceable, law-abiding citizens, the whole crowd, or at least a crowd as large, are likely to be turned loose on society—to slay, rob, rape and forge, and commit arson and perjury at their sweet will. The community ought to rise and protest against such outrages. We all know that crime too often goes unpunished through the blunders of prosecuting attorneys, the weakness of juries, inadequate sentences, and the hair splitting and technicalities of the Supreme Court, but when we do get some of these wolves in human shape into the penitentiary, it is too bad to have them turned loose before their time is up. It is rarely that good reasons can be given for granting a pardon. Where there is a prior conviction, there is no possible justification for shortening the term of punishment, unless there are strong grounds for the presumption that the second conviction was unjust. As a matter of expense we could, as a community, better afford to build and maintain two more State prisons than suffer the loss by other crimes perpetrated by these old hands, and bear the expense of prosecuting and convicting them afresh. And what value shall we place on human life; property stolen or burned we can estimate, but the suffering caused by murder and rape cannot be compensated or appraised. A man may commit one crime and reform, but the chances, if he is set at liberty, are five to one that he will commit other crimes, and his incarceration will leave no better result than to make him more skillful in avoiding detection. Decent people, who neither murder nor rob, may well cry, "Oh, for a Governor with the virtue to say, 'No.'"

In the same daily paper that made report of the applications which gave occasion for the above article, we read of the arrest of a thief for larceny, who had on two previous occasions served a term in the County jail and for other crimes had been three times an inmate of San Quentin. As a business proposition, what a saving it would have been to the commonwealth if he had never been allowed to go out of the penitentiary, after his second conviction, until he was carried to his grave.

The American Stock of Coffee.

Our local market for coffee is ruled partially by our stocks and local demand, and partially by stocks and prices on the Atlantic side. At the close of the year the stock of Rio on the other side in first hands was:

New York ..... bags,	238,248
Of the above 111,543 were Santos.	
Galveston	13,000
New Orleans	29,392
Baltimore	9,048
Savannah.	3,000
	352,088
In second hands:	
New York .	159,477
Baltimore ..	37,693
New Orleans	10,068
Afloat and loading for Atlantic ports	66,507
Purchased to December 22, including 20,000 Santos...	168,000
Total in sight and on hand on the Atlantic Coast .. ..bags,	794,433

On the Pacific Coast the stock, January 1st, in importers' hands, was:

Central American..... bags,	8,481
Other kinds	846
Total	9,327
In warehouse but owned by dealers.	
Central American..... .. bags,	24,299
Other kinds.....	4,331
Total stock Jan'y 1st, bags	37,958

PETITE SIRRAH.—In another column will be found an advertisement of Mr. J. H. Drummond of Petite Sirrah cuttings from imported stock. It is well known that Mr. Drummond imported two years ago, through the largest seed establishment in France, a great number of cuttings, certified true to name—some for the purpose of identifying varieties—and therefore all cuttings that he offers obtained from this imported stock, can be relied upon. The Petite Sirrah ought to do well in Los Angeles county.

Fruits and wine will reign as King and Queen in California.

Hawaiian Statistics.

From Thrum's Hawaiian Annual, a very valuable compilation of statistics, we learn that the total value of Hawaiian exports is $8,299,016.70; of which $80,000 were domestic goods supplied to shipping and $133,085.36 foreign goods re-exported. The sugar exports to San Francisco were 107,275,724 lbs., and to Atlantic ports 6,898,478 lbs.; of rice and paddy 12,594,707 lbs.; of coffee 7,981 lbs.; of wool 528,913 lbs.

The Islands imported from abroad free by treaty $2,788,974.63; paying duty $1,686,768.93; value bonded $260,006.54; value on free list $238,789.91; total $1,974,510.01. The goods free by treaty were all domestic productions of the United States. Of goods paying duty or bonded, $649,506.51 came from United States Pacific ports and $35,126.48 from Atlantic ports. Total imports from America $684,633.09 paying duty against; $798,763.46 from Great Britain and $185,189.57 from Germany. The imports from China were under $140,000 and from other countries trifling. The total value of all goods imported being on the "free list" exclusive of those free by treaty was $258,759.91, and by far the larger half of these came from the United States. The Islands are consuming pro rata of population more domestic United States productions, except such food as fruits and meats, which are produced in both countries, than the same amount of population in this country consumes. That is the Hawaiians are more American in their habits of life than any people in the United States.

Tariff Dangers.

That reduction of the duty on dried fruits of 25 per cent such as Morrison of the Ways and Means Committee and Speaker Carlisle favor would be ruin to the fruit interest of San Diego, Riverside, Colton, Tustin City, Orange, Santa Ana, Pasadena, Ontario, Etuwanda, Pomona and a number of other southern fruit colonies and also all the Fresno colonies. It would blight the prospects and stop progress, ruin families and depress all land values in San Diego county, San Bernardino county, Los Angeles county, San Luis Obispo county, Santa Barbara, county Ventura county, Tulare county, Kern county, Fresno county through the river counties and all the foot-hill counties as far north as Shasta. Such a reduction of the duty on raisins, currants and prunes would be a greater blow to some of these counties than the slickens injunction is to the hydraulic mining counties. If the tariff on dried fruits is let alone, California will, in ten years or less, produce five million boxes of raisins, where she now produces one hundred thousand, besides half the prunes, and, there is good reason for believing, a large proportion of the currants consumed in the United States. Fruit, wine and olive oil are as important to California as sugar to Louisiana and cotton to Mississippi. The Congressman or the party that makes a blunder on this point need expect no pardon from those whose property and occupation they have helped to destroy. If Morrison and Carlisle carry out their schemes, or openly declare their intention of doing so if their party wins the Presidency, money, speeches ,barbecues and torchlight processions cannot hold together a decent minority of those who have hitherto voted the Democratic ticket.

Possibly if field laborers' wages were, in the harvest of 1885, to run up to five dollars a day, the State would eventually gain.

Some Who Should Advertise.

When we look over our advertising columns, liberally as they are patronized by some interests which have by experience learned the value of advertising in the MERCHANT, we are surprised at the total blindness of some other interests. For instance, there are the Agricultural Implement makers. The vineyard owning subscribers of the MERCHANT are cultivating some 180,000 acres of land, and use a greater variety of field implements and more implements than wheat growers cultivating 1,000,000 acres, nay, than those cultivating 2,000,000. Many of these vineyards are irrigated by pumping, and almost every day at this season some viticulturist is in the city talking "pumps" and yet not a pump maker or Eastern agent has had the business intelligence to advertise his pumps in a paper which is sought for, read with interest and kept for reference by every leading vine-planter in the State.

New wineries are going up every season in thirty different counties of California; the owner of every one of these, unless it is some small concern, reads the MERCHANT, every issue, with avidity, and for all these wineries a large initial expenditure must be made in cooperage, pumps, pipes, hose and mechanical and technical appliances. Every dealer and manufacturer of the articles wine makers and grape growers need in their business seems to think every viticulturist knows all about what they make or have for sale. The viticulturists do not—and we know it, because every day we are questioned on these subjects. Another instance may be cited. Some Stockton firms are making windmills of extraordinary utility. It is said that some of these mills will raise water enough from wells in San Joaquin county to irrigate fifteen acres of land. These are just what our friends who are now crowding into San Diego want. The Stockton windmill men are welcome to this free notice, but we do not propose to help either them or the implement makers or machinists or dealers in vineyard and wine cellar appliances to enlarge their business, unless they reciprocate by advertising their specialties in our columns. Every wine man and vineyard owner in the State can be reached through the MERCHANT and they cannot be reached with certainty, in any other way except at a cost ten times as great as our charges. A word to the wise should be sufficient. Are these men wise?

Value of Hawaiian Sugar Interests.

From Thrum's Almanac and Annual for 1884, we learn that the total estimated value of the sugar interests in the Hawaiian Islands is $15,886,800; of which $10,185,464, or two-thirds of the whole, is American; $3,230,050 is British, $970,046 is German $641,240 is Hawaiian and $560,000, or about one twenty-eighth of the whole, is Chinese.

That clearly one wing of the Democratic party has decided upon abandoning "fence straddling" and proposes to go to the country on the presidential election on a low tariff record. Morrison's Ways and Means Committee, if the Chairman's views control, will fire the first gun, and when the report of that gun is heard throughout the States, a good many voters who have hitherto voted the Democratic ticket will walk over to the other camp.

RETAILERS' CORNER.

Our wholesale grocers differ this week in their reports of the business done; some say it has been good; others speak of it as quieter than was expected. Undoubtedly, the lack of rain in some districts is creating an anxiety which tends to caution. In several districts the rain has been all that is required at this season, and we know that California as a whole is better prepared this year to withstand a dry season than ever. Neither has any positive injury yet accrued from the absence of heavy rain storms. All the moisture we need for the heaviest crops we ever raised may yet fall and in full time.

We notice that the California Sugar Refinery has reduced the price of D sugar to 7¼; this reduction, with the low prices at which good Hawaiian grocery grades are selling, makes it impossible to dispose of choice refined sugars in this market at a profit, even if there was no prejudice against them.

The stock of coffee in first hands in this city on January 1st was light, and dealers had no excessive supply, as will be seen by an article in another column. The demand during the week has been light, and quotations are nominal.

Asiatic rices are weaker all round, with reduced quotations, as will be seen in our merchandise report. Hawaiian rices can be bought in round lots at $4.62½, ninety days, with 2½ per cent. discount for cash.

Salmon of favorite brands is scarce, and we notice an advance of 2½ to 5 cents on such qualities.

The stock of canned fruits in first hands is being rapidly reduced, and higher prices may be expected shortly. Notwithstanding the above, some kinds of table and pie fruits are quoted lower. Tomatoes have advanced.

Candles are half a cent to a cent higher than last week's quotations.

In provisions business is light, without change in quotations, and a heavy stock of Eastern products on hand.

Our quotations of spices are lower than in our last issue.

California codfish has advanced half a cent all round.

There is a fair demand for dried fruits, without much change in quotations.

The California Cracker Company is now manufacturing oatmeal goods, which are much in request, if we are to judge by the letters we receive from subscribers inquiring where they can be had.

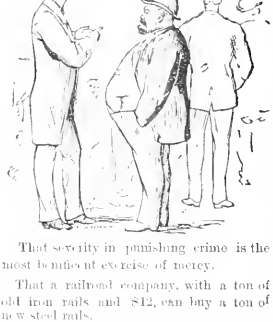
The Standard Soap Company reports business dull since the commencement of the holidays, but every prospect of a good demand as spring advances.

Eastern and Portland cement is cheaper.

Nails are reduced on the 10d to 60d rate ten cents. We notice that the men engaged in the Pacific Iron and Nail Works have struck for higher wages, which being refused, the factory is closed. On the other hand, Eastern nail factories are shutting down because the stock unsold has accumulated beyond any reasonable expectation of the requirements of the market.

The agricultural implement business during the last six weeks has been good, and in some articles we note an advance. With two or three inches more of rain, it would almost amount to a boom.

Meats are dearer, both here and on the other side of the mountains, and an early advance in canned descriptions is expected.



That severity in punishing crime is the most humane exercise of mercy.

That a railroad company, with a ton of old iron rails and $12, can buy a ton of new steel rails.

That when a man's prosperity depends on protection, he is a protectionist first and a Democrat afterwards.

That "protection with incidental revenue" should be the political cry of every American producer, manufacturer, mechanic and laborer.

That "protection with incidental revenue" is the policy that will best meet the views of the majority of the producers and manufacturers of California.

That the man-slayer who shows no pity to his victim, but murders him for gain or to avenge a trivial wrong or fancied insult, ought not to receive any pity from decent people.

That a reduction in the duty on foreign raisins would cripple one of the most promising industries of California and seriously check investment in and emigration to Fresno and all the southern counties.

That our orchardists and viticulturists ought to give some attention to the labor question, and give it in time. It will not do to wait until the harvest is at hand and the labor to gather it is found wanting.

That the *Ontario Fruit Grower* remarks that the mildness of the present winter recalls those previous to the last four, which were unusually cold for that district. Fruit trees have not needed protection so far this season.

That the southern portion of this State is growing rapidly, and now San Diego is moving into line and promises to keep step with Los Angeles and San Bernardino in material progress and increase of population.

That even to save the fruit and vine men from extortionate demands by laborers, the MERCHANT will not openly or tacitly acquiesce in any movement to lessen the restrictions on the influx of Chinese labor. There is a better remedy if recourse is had to it in time.

That the money which comes in from the sale of goods bought on time belongs to the creditor and not to the dealer, and the dealer is dishonest if, forgetting that he is only a trusted agent, he spends more than his share, that is his profits.

That to make an olographic will—that is, a will signed by the testator but not witnessed—valid according to the laws of California, the testator must not use a printed blank, but every letter and figure, including the date and year, must be in his own handwriting and signed by himself.

That the national banks are on the anxious seat, waiting for the action of the Ways and Means Committee. That committee may not carry any measure affecting the banks, but it would outline the national policy, should that party carry the Presidency.

That last year our California flour found its way into several new markets. China has taken our flour for years; and the demand from Central America is growing. We have added Siberia, on the Pacific, to our list of countries, and also the Azores Islands, in the Atlantic, Switzerland and other countries where it has hitherto been unknown.

That a few years ago many wheat farmers favored free trade or low tariff, because under it they would be able to purchase their necessary supplies at lower rates than under the protective policy. Now that they all see that fruit growing pays much better than wheat, and so many of them are interested in orchards and vineyards or in lands adapted for these purposes, their opinions are changing.

That the demands on our labor supply made last year by our vineyards and orchards caused an advance in the price of Chinese labor of five to twenty-five per cent. Another advance may be expected when this year's crop is to be gathered, unless climatic disasters intervene, and in 1885 matters will be still worse. Our merchants through their Immigration Bureau are doing a noble work for the whole State. It is of course their interest to populate the State. But the men primarily interested, that is, the orchard and vineyard men, are doing nothing. In former days, when grain was everything, we had little to offer white field laborers beyond three or four months' employment at good wages. With these new interests we can furnish employment for many men eight months in the year, and some all the year round. Our horticulturists and viticulturists must strive to furnish work all the year round for a larger number, even if in some weeks or months the work they do is barely necessary. Any sensible, industrious man would rather work twelve months a year for fifteen or twenty dollars a month than receive thirty dollars during four months of the year and spend the remainder of his time in idleness. The several viticultural and horticultural clubs ought to discuss this labor question at the earliest opportunity, and not only communicate their views and needs to President A. R. Briggs, Esq., of the California Immigrant Association, but contribute freely to the treasury of that meritorious institution. If this matter is neglected they may as well stop planting, for there are more trees and vines now growing in the State three times over than there is labor in the State to gather the fruit, while other fields of labor are filled.

AN HONEST FAILURE.

The old established firm of Detrick & Co. has made an assignment to Jacob S. Taber, President of the Board of Trade. There are some things about this failure which are deserving of comment. The cause were the depreciation in jute material and its products. The noticeable matter, however, is that the firm of Detrick & Co. was in excellent credit at the time; that they had over $5,000 cash in hand; that no creditor was pressing them; but on striking the customary annual balance, the firm found that its own capital was gone, and that its assets were one-sixth less than its liabilities. Many firms would have continued the struggle, with the almost inevitable result of losing other people's money. This firm decided to take the brave and more honest course of calling its creditors together, and acknowledging the unfortunate condition of affairs. For this these gentlemen are entitled to the respect of the community, and to the sympathy and liberality of their creditors. If every merchant and manufacturer would follow the noble course pursued by Detrick & Co., there would be no disastrous insolvencies, and com mercial faith and honor would rank higher.

TOBACCO MARKETS.

SAN FRANCISCO The leaf market is not very active on account of the decision of the Commissioner, allowing Sumatra to enter at the old duty if over 15 per cent of each bale is unfit for wrappers. This ruling is much discussed pro and con both here and in the East. There is a demand, however, for '82, and it is improving. Some manufacturers find that the '82 Sumatra is hardly sufficiently sweated and therefore are running on '82 Penang and Java wrapping purposes.

The manufactured tobacco trade is quiet, there having been no large buyers yet in the market this year. The anxiety about the rain fall is probably inducing many to postpone their purchases.

Our local cigar manufacturers are pursuing the even tenor of their way and expect a full average month's business for this season of the year. They are clearly little affected by the increased facilities for direct railroad communication with the Atlantic coast, which has taken so much trade from the grocery and dry goods houses in Southern California and Oregon.

[New York Tobacco Leaf.]

NEW YORK, Dec 28th *Western Leaf.*—But little has been done in this market since our last report, and buyers and sellers are awaiting the opening of the New Year and the new Exchange

Virginia Leaf.—Not much done in Virginia tobacco this week. Except a fair sale of bright Virginia cutters to the one or two local manufacturers the trade was of a retail character. Business will pick up after January 1st. Little doing in Burley tobaccos, manufacturers being busy taking stock and will not purchase until next month.

Seed Leaf.—Business in this article has been extremely light the past week, but the fact is a necessary incident of the closing year. Trades men are now buying freely, but are balancing their yearly accounts. Business will revive, as usual, after the holiday season is over

Let no one imagine—as it is possible some will—that the decision of the Secretary of the Treasury on the Sumatra duty question has anything to do with the dullness of the week last past. That circumstance has no effect whatever on the market, as is proved by the corresponding dullness in other branches of the tobacco trade which have no connection with and little knowledge of Sumatra leaf.

[U. S. Tobacco Journal.]

NEW YORK, Dec 29th.—Some hold that the absence of business in the market was due to the Sumatra tobacco agitation, some held that the last week of the year is always dull for business. Be this as it may, there was no business worth speaking about, and the year closes quietly indeed

While the Sumatra question undoubtedly depresses the spirits of holders of large quantities of borderland tobaccos, those having really fine tobaccos on hand still feel safe in their investments. Those having wanted to make purchases of '83 tobaccos are highly elated at the decision of the Treasury Department. They believe that the effect of this decision will be to bridle hasty and reckless purchases of new tobaccos and allow the establishing of reasonable prices for it.

A noteworthy feature was the sale of over 200 bales of Sumatra tobacco in the market during the past week. As we have no reason to doubt the statements of those connected in the transactions, the prices obtained did not vary at all from those asked for the goods previous to the publication of the decision of the Treasury Department. The stock of Sumatra in the New York market is calculated to be above 6,000 bales.

Havana sold slowly during the week. Altogether, the business done by the importers during the year has been prosperous.

Customs Duties.

Duties paid at Custom House for week ending Jan. 10, 1884. Duties payable in United States gold coin, standard dollars or greenbacks:

Jan. 4, Friday	$13,023 60

BAGS AND BAGGING—

Standard Calcutta Wheat Bags are offered on Call at 7¾c, heavy Chaff Bags and Grain bags, but such offerings meet with no favor, the bidding price being 7c. Potato Gunnies sell for 11c (11½), as to quantity.

BORAX—

There is no change of importance to note in the prices and condition of the market as given in our last week's statement. The demand here is light and nearly overall of the receipts are being sent away either by ship or rail

We quote concentrated in sacks 9@10c and refined in barrels 10@11c

The production for last year was in round numbers about 3000 tons, of which 1600 went by rail to Liverpool, 620 by ship to New York and 1614 by rail eastward, chiefly to New York, although a portion went to Liverpool via New Orleans—$106,600 this borate of lime, equal to about 3500 tons of borax were also shipped to Liverpool in 1883.

BROOMS—

Exports, 126 doz

Trade in brooms is very fair, without any "rush prospects for an improvement are good. Prices remain unchanged.

We quote: "Common" Hurl—No. 4, $2 50; No. 3 $2 75, No 2, $3 00; No. 1, $3 50; "Extra" Hurl—No. 3 Parlor, (Little Beauty) $3 00; No. 2, $3 50, No 2, $4 00; No. 1, $4 50. "Best" Hurl—No. 4 $4 00, No. 3, $4 50, No. 2, $5 00; No. 1, $5 50 Ship, Mill and Stable—No 3, $4 50; No. 2, $5 00; No. 1, $5 50; 8sq, twine bound, $3 00; without galvanized bands, 50c ₱ doz less. "Common" Stalk No. 3, $2 25; No. 2, $2 50; No. 1, $3 00 Armes' Stair Extra—No. 3, $3 50; No. 2, $4 00; $4 Wisps and Toy Brooms—Toy Brooms, $2 00; Stable Handled Whisks, $1 75; 1 String Wood Handled Whisks, $1 75; 2 string Wood Handled Whisks, $2 00; 2 String Velvet Top Whisks, $2 25; 3 do, $2 50; 4 do, 2 $75.

CANNED GOODS, ETC.—

Imports, 90 cs canned goods. Exports 317 cs canned goods, 9 cs canned meats, 28 cs milk.

Trade remains very dull and prices are nominal. The stock of canned on hand is generally light, and on the usual opening of spring trade present asking prices can be readily obtained, and an advance in many articles can be hopefully looked for

We quote California assorted Table fruits, 2½ ₱s cans, $2 25 ₱ doz; do pie fruit, 2½ ₱s cans, $1 50, 2 ₱s cans, $2 50; Pineapple fruits, $00 ₱ doz. Pie Fruits, $1 25; Tomatoes, 2½ ₱s cans, $1 12½ ₱ doz; Jellies, $2 25; Jams, $2 25 ₱ doz: Pickles in 5 gallon kegs, $13½; California Sauce, pints, $3 50, ½ pints, $2 50, ¼ ₱s do; Ketchups, $1 25@1 75 ₱ dozen. English Groceries—Crosse & Blackwell's Pickles, pts, $4; qts, $6 75; Olives, qts, $7; Liucheons, qts, $9; Sauces, $9 00 ₱ case. Jams, $6 00; Jellies, $5 00 ₱ doz; Cox's Chocolate, 50c ₱ lb; Cocoa, 45c ₱ lb; Colman's Mustard, 60c ₱ lb.

COAL—

Imports, 2753 tons Pacific Coast, 16141 tons Foreign and Eastern; Exports, 1 ton.

The annual review of the Coal market for the past year has shown it to have been a particularly profitable one to both importers and dealers, there having been a continuous advance monthly throughout the year. We start this year with Coal of all grades fully $1 50 higher per ton than last January, and it is hazardous to predict a continuance of present prices through the year, as they are entirely regulated by our season's rainfall, which may or may not induce a large influx of vessels from foreign ports. For the coming six months not only should present prices fully sustain themselves, but the outlook is most encouraging for higher figures, as consumption will not be restricted, and our importations are being materially diminished, there being less afloat at the present writing than for years past.

Importers' prices of coal, Foreign and American, to arrive. Australian, ₱ 8 5 or ₱ 8 75, Liverpool steam, ₱ 8 @ ₱ 8 25, West Hartley, ₱ 8 75 @ ₱ 9 00, Scotch Splint, ₱ 8 @ ₱ 8 25, Cardiff Steam, ₱ 7 75 @ ₱ 8 00, Lump Lehigh, ₱ 13 @ ₱ 13 50, Egg Hard, ₱ 11 @ ₱ 11 50, Cumberland, bulk ₱ 10 @ ₱ 10 50 Spot prices are as follows: Australian, ₱ 8 75; Liverpool steam, ₱ 8 50; West Hartley, ₱ 8 @ ₱ 8 50, Scotch Splint, ₱ 8 50; Cardiff, ₱ 8 00; Lehigh Lump, ₱ 13 @ ₱ 13 50; Cumberland, bulk, ₱ 11 50; Egg Hard, ₱ 11 50

COFFEE—

Imports 142 bags. Exports, 51,113 lbs.

The market is quiet with few sales, at prices given below.

We quote: Prime Guatemala, 13½c; Costa Rica, 13@14c, Good Salvador, 12¾@13c; O. G. Java, 17¼

CORDAGE—

Imports, 21 coil cordage, 100 bls hemp. Exports, 58 rls.

We now quote as follows: Manilla, 1¼-inch (7-16 dia) and upward, 15c; do, 12-thread (⅜ dia) 15½c; do, 6 and 9-thread (¼ and 5-16 do 16c; Manilla Jute Rope, 7 and 8-thread, 12c; Manilla Cordage, tarred, 2-in (⅝dia) and upward, 15c; do Lathyarn, 15c. Discount on lots of 10,000 lbs, 1½c ₱ lb. Sisal Rope, 1¼-in (7-16 dia) and upward, 10½c; do, 12-thread (⅜ dia), 11c; do 6 and 9-thread (¼ and 5-16 dia), 11½c. Sisal Bale Rope, 3 and 4-thread, 10¾c.

CORKS—

Imports, 22 bags. Exports, 5 bls.

DRIED FRUITS—

Imports, 66 pcs, 12 kegs figs, 13 cska prunes. Exports 561 lbs dried fruits, 27 bxs raisins.

DRUGS AND CHEMICALS—

Imports, 105 cs drugs. Exports, 39 cs drugs.

We quote: Arsenic Acid, 12c; Strong Sulphuric Acid 30@35c, Sulphuric Acid, 2½c; Muriatic Acid 4½c; all lots of 20 carboys or more); Caustic Soda, 60 deg, 5c; 70 deg, 4¾@5c; 76 deg, 6¼@6½c; Powdered Caustic Soda, 7c; Caustic Potash, 18@20@105c; Chlorate of Potash, 16@18c; Soda Ash, 2@3½c; Soda Crystals, 1¼c

We quote at ships side: Soda Ash, 1 90@2¼c for 52 deg; Soda Crystals, 1¼c; Chloride Lime, 2¼@2¾c; Copperas, 1½c on spot; Caustic Soda, 60 per cent, 5c.

DRY GOODS—

Imports, 266 cs. Exports, 91 cs.

FISH—

Imports, 1½ kgs, 66 cs fish, 7274 cs salmon. Exports, 71 cs fish, 78 cs salmon.

Salmon is very firm at advanced figures. The supply in first hands is comparatively light.

We quote: Columbia River, $1 25; Sacramento, $1 17½, 1 o b; bar, 1, $1 40, hf barrels, $7 50; California Cod, in 50-lb bundles, 5c; selected, in cases, 6c; boneless, 7c.

HARDWARE—

Imports, 458 cs. Exports, 108 cs.

IRON—

Imports, 1080 tns 1438 pcs 127 bdls 5 cs Iron, 329 bdls 744 pcs iron pipe, 2034 brs 65 pcs 219 cs steel. Exports, 325 pcs 6 pkgs iron, 45 pcs iron pipe, 62 bdls steel.

The outlook for any improvement in Pig Iron for several months to come is of a most discouraging character, unless consumption materially increases, as accurate figures, carefully compiled, show a stock on hand and afloat for the port of 74,000 tons, our average annual consumption for the past five years is only a fraction over 140,000 tons.

This explains the spot price for Iron being about $2 00 per ton less than the actual cost of loading the same.

Importers prices of Pig Iron, Foreign and American, to arrive: Shotts No 1, $27½@—; Glengarnock, $26 50@—; Eglinton, $25 00, Clayland White, $23 50; American, Eastern, Soft, $28 @$28 50; prices are as follows: Glengarnock, $25 00; Eglinton, $24 00; Clay Lane, white, $23@; Shotts No 1, $28 50; American, Soft Eastern; $28, Jupper Gap Nos. 1 to 4 $27 50@$30 00.

Black Sheet Iron—Nos. 11 to 16, 5c ₱ lb; Nos 18 @20, 5½; Nos. 22 to 24, 6; No. 26, 6¼; No. 27 6¾, No. 28, 6¾; Galvanized Charcoal Sheet Iron No 10 to 20, 7½ ₱ lb; No. 22 to 24, 8; No. 26 to 28, 9; No. 27, 2½; No. 28, 13½; second quality 1c ₱ lb less than first.

Wrought Iron Pipe, discount, 45@50; Manufacturers' List; per foot—¼ inch, 42 lbs ₱ 100 ft, 8c ₱ lb; ⅜, 60 lbs 9c; ½, 85 lbs 11c; ¾, 112 lbs, 13½c; 1, 167 lbs, 19c; pipe, 226 lbs, 27c; 1½, 270 lbs 34c; 2, 360 lbs, 46c, 2½, 576 lbs, 77c, 3, 750 lbs 95c; 3½, 905 lbs, $1 25; 4, 1072 lbs, $1 00. Ternes "		
I C. Charcoal, Alloway Grade	7 00	7 00
" Terne Plates (Roofing)		6 35

We quote: PigTin, on spot, 22½c.

QUICKSILVER—
Exports, 201 flasks.
Business during the holidays has been at a standstill The asking price is 34c, with no important sales reported. The "Sulphur Bank," which formerly produced largely, is reported closed down The London price is £5 4s@£5 5s, with a stock there estimated at 75,000 or 80,000 flasks.

RICE—
Imports, 270 bgs. Exports, 258,413 lbs.
Asiatic rice is in good demand at the following quotations:
We quote Mixed $4 10@—; No 2 China $4 60 @4 70; good No 1 $5 25@5 50c; Extra No 1 $5 90 @6 10; Hawaian $4 62½@4 75.

SPIRITS—
Imports, 176 bbls spirits, 110 bbls rum, 235 bbls whiskey, 26 bbls liquor. Exports, 1 cs alcohol, 14 gals brandy, 10 cs 84 gals whiskey, 44 cs liquors.
Spirits, $1 21; Alcohol, $1 14.

SUGAR—
Imports, 29833 bgs raw Exports, 369 lbs refined
The local market is healthy with a good demand, The New York market is firmer, and by telegraph we obtain the following quotations A Crushed, 8¾c; 8¾c granulated, 7 13 16; Standard A, 7¾.
We have to report a change in the local market, this week, in California "D," which is quotable at 7¼.
The American Refinery, which has been closed for the annual clean-up, has commenced operations again.
The Standard Sugar Refinery has also recommenced its campaign against beets for the season The president has not decided when he will commence operations on cane raws
Some China merchants have been importing soft refined sugars by the steamers Rio de Janeiro and Oceanic, but the broker in whose hands they are placed informs us that it is uphill work to sell them.
Grocery grades of Island sugars are selling freely, prices in favor of the buyer. Bark as low as 5 cents; good family sugars at 6 to 6½ cents
There were no sales in the early part of the week, but yesterday, the steamer Alameda and two sailing vessels having come in, business was active, a supply being on hand. Though we are unable to give the exact sales, they probably reached 1500 to 2000 bags. There are no kegs in market.
We quote local refinery rates, prices subject to change without notice.
(A) Pat Cube Sugar, in bbls, 10½c; (A) Crushed sugar, 10½c; Extra Powdered sugar, in barrels, 9c; Fine Crushed sugar, in barrels, 10¼c; Dry Granulated sugar, in barrels, 10½c; Extra Granulated sugar in barrels, 10c; Extra C 9⅝c, Golden C sugar, in barrels 9c; D sugar in barrels, 7¾c. Extra Fine Powdered, in bbls, 11¼c. Confectioners' (A), 10c; El Dorado C, in barrels, 9½c; Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ¼c, and boxes, ½c, more for all kinds.

TEA—
Imports, 8822 pkgs. Exports, 1981 lbs.

WINES—
Exports, 1108 gls native.

There are 1,971,365 beehives in France, from which have been taken, this Autumn, 19,879,284 pounds of honey and 5,691,598 pounds of wax, the total value of the product amounting to about $8,000,000.

THE WOOL MARKET.

The free movement in wools noted last week continues. Eastern dealers have purchased several lots and also our local mills and scourers, especially the latter. The sorts in demand are mountain "clips" fall and "slightly defective" spring and fall. The stock of wool in dealers' and agents' in this city is becoming limited, with a fair prospect of the warehouses being cleared before the spring clip of 1884 arrives.

The stock of wool of all kinds in dealers' hands in New York at the close of the year is reported as about 7,500,000 pounds, against 6,500,000 pounds last year. The telegraphic reports say that 1,800,000 pounds of this is California spring, but this last statement is open to question and is probably an error in transmission.

Boston reports 1,000,000 pounds more wool in first hands than a year ago, this excess being about equally divided between foreign and domestic.

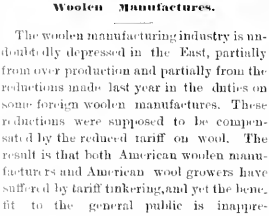
That some of our rich men are like a old-fashioned child's money box. Those that made his wealth for him may hear it clink, but get no good of it until death breaks in and scatters his hoard.



Woolen Manufactures.

The woolen manufacturing industry is undoubtedly depressed in the East, partially from over production and partially from the reductions made last year in the duties on some foreign woolen manufactures. These reductions were supposed to be compensated by the reduced tariff on wool. The result is that both American woolen manufacturers and American wool growers have suffered by tariff tinkering, and yet the benefit to the general public is inappreciable. In this State woolen manufacturing is also depressed. The causes differ in some regards from those which prevail at the East. The raw material, California wool, can be obtained here on better terms than Eastern manufacturers have to give, but the market for the fabrics is restricted. Nearly every one of the eleven mills in California is burdened with an excessive stock of goods; and except the San Jose, which has temporarily closed down, are accumulating stock. This market is being flooded by Eastern consignments, which are being sold at auction at prices regardless of cost. Until business revives at the East, or more of their machinery stops running, this evil will continue. Then again, our market is swamped with shoddy clothing, ready made up. We have no shoddy mills on this coast. Our cloth in the piece is cheap enough, and for wear twice as valuable as Eastern, but cloth is not clothes. There is not a man in California in his sober senses who would not give twenty per cent more for a suit that would wear twice as long as the cheaper one; but while we are making flannel, cassimeres, etc., by millions of yards, we are neglecting the making of these stuffs into garments. There are only one or two wholesale firms engaged in making men's clothing in this city and a few custom tailors. These can neither work up the product of our looms, or begin to supply the demand which would arise if in every town in the State Californians could buy a well-cut, well-sewn suit of clothing, guaranteed to be made from the fleece of California sheep. Home production and home industries are popular, and if woolen mill proprietors desire to end their troubles, they must find some way of gratifying the popular wish for wearing California cloth.

There are 40,000 wool growers in Ohio that will be likely to vote solid for the party that restores the duty on foreign wool to an equivalent of that in force prior to June last.

That Great Fleece.

THE SAN FRANCISCO MERCHANT is anxious to know something about the great fleece of merino wool, sometime since mentioned in the *Herald* as having been sheared from a French Merino buck, and says: "We have not seen any reference to the weight of 'Woolly's' monster fleece after it was scoured. Possibly the *Texas Wool Grower* has published the result, and the item escaped our attention. Many of our subscribers are anxious to know how much weight it lost in the scouring process." The original weight of the fleece was 62¼ pounds, which was clipped from a three-year-old buck that weighed 225 pounds. It was on exhibition at the office of Hutton Brothers in this city and attracted much attention. A notice of this remarkable fleece appeared in the *Daily Herald*. Since that announcement, the fleece has been cleansed, and notwithstanding the vast amount of oil and impurities that gathered within it, it only shrunk *seventy-six* per cent, leaving 15 pounds of choice scoured wool. This leaves Los Angeles the banner county of the Union for large fleeces of fine wool. Our contemporary will please take notice that all great and good products of Southern California are promptly mentioned in the *Daily Herald*.—*Los Angeles Herald*.

Massachusetts might be lost in Maine's woods so that you would need a compass to find it. More than 21,000 square miles are in woodland, despite the immense lumbering operations in the years past.

The average depth of the ocean is 13,000 feet, and the average elevation of the land is 1,000 feet; therefore the total volume of water in the sea is thirty-six times that of the land above the sea.

British Columbia Affairs.

Portland, Oregon, correspondence of *Bradstreets*:

There is a general community of interest between the provincials of British Columbia and citizens of the Pacific Coast States and Territories. Whatever affects our provincial neighbors reacts upon us, adversely or beneficially as the case may be. And since the Northern Pacific transportation system has been perfected, so far as through traffic is concerned, the fortunes of the adjacent province have become more closely allied to those of Oregon and Washington Territory. We are, therefore, watchful of what transpires at Victoria, the seat of provincial government, especially when the provincial Parliament is in session, as at the present time. San Francisco has been the center of the British Columbian trade with America, but Portland will divert a great deal of it, at least until after the completion of the Canadian Pacific Railroad to Port Moody. This is in the future, however, and need not enter into present considerations.

The Chinese question has been considered by the Provincial Parliament, and a very strong case was made out for interference by the Dominion. There are several thousand Chinese laborers out of employment, who have been discharged by the Canadian Pacific Railroad contractors, and thousands more have been imported by Chinese labor organizations. Crimes are of frequent occurrence, several murders being attributed to Chinese. There is no cessation of Chinese immigration, which has been encouraged by the Dominion government, the Macdonald ministry having pledged itself to furnish cheap coolie labor to the Canadian Pacific Railroad syndicate. Every bill opposed to Chinese immigration, passed by the Provincial Legislature, was disallowed by the centralizing government in Ottawa, and British Columbia very soon discovered that in joining the North American federation it had surrendered its right of self-government for a bribe which had not been paid; that its industries were paralyzed by a tariff designed to build up Ontario, and perhaps Quebec, at the expense of the other provinces; and that a non-assimilative, alien population had been introduced to compete with home labor and monopolize in time all productive industries. This state of things naturally created a very strong anti-Dominion feeling, and it is safe to say that until within the past few months a plebiscite would have resulted in the adoption of a declaration in favor of annexation to the United States. But a change has taken place, as shall be explained presently.

The Chinese question in British Columbia is of more than local importance. Chinese capital is buying up desirable business sites for manufacturing and trading purposes at Victoria. Very steep prices are paid by the Chinese, and their march is steadily onward. It is evident that their policy is to make Victoria the great import depot of coolie labor on the Pacific coast, just as they have made Hongkong the great export depot for contract labor to all parts of the world, but especially to the United States. The British flag comes in handy at both ends of the line. A steady stream of coolie immigrants flows into American territory despite our watchmen, as everyone engaged in trade on the coast and frontier lines knows full well.

The change of sentiment toward the Dominion Government, referred to above, was caused by the settlement effected between the Ottawa Government and the Provincial Executive on the railroad and subsidy questions. The second reading of the Settlement bill, giving provincial sanction to this compromise, passed the legislature by a large majority, and its adoption is settled. Under its terms the Province is to receive $250,000, expended by it on the Esquimalt dry dock to June 27, 1882, together with the sum of all payments and liabilities on dock account between that date and May 13, 1883, when the Dominion Parliament passed the Settlement bill. This relieves the Province of a white elephant, and secures a graving dock, the Dominion undertaking to complete it. The Dominion also throws open the railroad reserve land on the mainland at $1 an acre. This has already stimulated settlement, 600 families having located in the New Westminster district. Emigration agencies have been established in London, Paris, and elsewhere, but nothing has been done in the way of assisted immigration.

The Island Railroad is likewise to be built, a contract having been entered into by the Dominion Government with a syndicate of capitalists upon terms exceptionally favorable to the latter. The syndicate is composed of Messrs. Dunsmuir and Bryden, opulent residents of the Province, and Messrs. Stanford, Crocker and Huntington, of the Central and Southern Pacific railroads. They are to build a standard gauge road from Esquimalt to Nanaimo, in Vancouver Island, and equip it in all respects equal to the Canadian Pacific; also to build and operate a telegraph line between these two points. Both enterprises are to be finished on June 10, 1887, under penalty of forfeiting 5 per cent. of the stated payment to be made to the syndicate, incorporated as a railroad company, on each ten mile section, as the work proceeds; also the sum of $250,000, to be deposited by the syndicate as a guarantee, before commencing. The syndicate is to receive $750,000 subsidy and more than 1,500,000 acres of coal and timber land for building this eighty miles of railroad. It was stated in the Provincial Parliament that the timber on this land is worth $8,000,000. It is certainly very valuable, and the grant is known to contain more coal than all the rest of the explored parts of the north Pacific coast. The syndicate is to own the railroad and telegraph line on completion; also the entire foreshore along the land grant, together with all ores, minerals or substances whatsoever in or upon said land and foreshore, and the right to mine and win ores and minerals under said foreshore, etc. This is perhaps the most "lordly" concession made to exploiters of late years, and it certainly is the most valuable for so slight a return ever made in North America. All material to be used in the construction of the railroad, bridges and telegraph is to be admitted duty free. The syndicate named thus become masters of British Columbia upon their own terms. One of their number is a member of the Provincial Parliament, and advocated the Settlement bill as a matter of course. In lieu of the $750,000 to be paid for the Island Railroad the Dominion government takes 3,500,000 acres of land from the province on the Peace river, east of the Rockies. This is a very beggarly ending to the Carnarvon Compromise and the terms upon which British Columbia were cajoled into entering the Dominion federation. It is also a pitiable exhibition of shortsighted subserviency by the province, when it had the power in its own hands to compel a just recognition of its rights in the premises.

Advertising California's Wealth.

It is not much trouble to prepare, box and label specimens of California products and deliver them to a baggage-master on any passenger train for conveyance to the Immigration Department of the Southern Pacific Railroad, and more of our people ought to take this trouble, considering what good use is being made of everything received. The *American Settler* (London, England), of December 22d, says:

Dr. W. G. Kingsbury, General European Agent of the Southern Pacific Railroad, writes: At the Birmingham Cattle and Poultry Show, the exhibit made at Stall 114, in the Gallery, are the products of California, but were received too late to be properly catalogued, and five cases of green fruit have arrived in London, but too late to appear here. The articles now shown consist of fifteen specimens of barley, twenty-two of native grasses, two of canary seeds, of the cultivated grasses, there is the celebrated alfalfa, timothy, evergreen millet, Egyptian millet and Egyptian corn. A specimen of Japanese ash, an olive branch with fruit on it; Italian, American and Eastern chestnuts, with fruit; a California grape vine, the growth of this year to September 12th; a box of California raisins from Briggs Bros. of Winter, California; a variety of tinned fruit from the San Jose Packing company; also of preserves in glass from the same company; three varieties of potatoes from Sonoma county, and contributed by the Pomona Grange—one of these weighs 2 lbs. 7 ozs., and three weigh 6 lbs. 1 oz.; a California squash (vegetable marrow) 3 ft. 6 in. in length and 18 in. in diameter; three pumpkins, weighing respectively 141, 147 and 151 lbs., all raised in Los Angeles county, there are also specimens of linseed, rye, pomegranates, quinces, etc. All these cereals, etc., are exhibited in the straw, and are the growth of this year (1883). After the Birmingham Show, all these products, with many more to be added, may be seen at the office of the Southern Pacific Railroad, 11 Finsbury Pavement, London, where maps and pamphlets may be obtained by addressing W. G. Kingsbury, General European Agent.

About the Sugar Tax.

A special customs agent who has, says the *N. Y. Grocer*, spent much time in Cuba, expresses the opinion that if the United States should abolish the duty on sugar, the Spanish government would impose an equivalent export tax, and the result would be that the price of sugar would not be reduced in the United States. This was the case when the duties upon coffee were removed. These export duties are now equivalent to one-third of one cent per pound on all sugars exported to the United States. The suggestions of this special customs agent are the arguments which are used by the Louisiana sugar planters and others who are opposed to the abolition of duty on sugar. Ex-Senator Kellogg, himself a large sugar planter, says that if the United States duty is removed, practically the same tax will be placed upon the sugar by the Cuban authorities as an export duty.

California Quicksilver.

The Napa *Reporter* says:

The Oat Hill, Phœnix and Star quicksilver mines are the only ones in Napa county that are being worked at the present time. These mines furnish employment to many settlers in the vicinity, and, beside white laborers, employ numbers of Chinamen. They are run day and night, not excepting Sundays, and present a scene of stir and activity, the shrill whistle of the engine echoing through the mountains and valley at regular intervals. The buildings consisting of the mill works, the residence and tenement houses, office, shops and storehouse and the Chinese quarter form a considerable village. A vast amount of wood is used in these mines, and the business of chopping and hauling wood is one of no inconsiderable importance, and furnishes employment to many residents in timbered sections convenient to the mines. Mr. G. Rhodes is the Superintendent. The deposits of cinnabar in the region around Mt. St. Helena are enormous, but the price of quicksilver is so low that it will not pay to develop them at present.

Then the owners of these mines, and the voters who, indirectly, make their living out of them and the editor of the Napa *Reporter* should inform our representatives in Congress that California will be much benefited by advancing the duty on foreign quicksilver from 10 per cent to 25 per cent.

Special Inducement.

As a Special Inducement to the Viticultural Friends of the general viticultural interests in extending the journal which is their exponent so long, THE

SAN FRANCISCO MERCHANT

Will mail free, to any person sending us the names of four new subscribers with their subscription money ($4 dollars) a handsome copy, bound in board and cloth, of

THE WINE PRESS AND THE CELLAR.

BY R. H. RAYMOND.

For press notices see advertisement in another column.

Commissioner Blowers on Raisin Cultivation.

By the courtesy of Mr. Blowers and the Secretary of the State Viticultural Commission, we are enabled this week to give our readers the advance sheets of a part of that gentleman's report. The manuscript not being complete, we cannot give the conclusion until next week.

REPORT OF THE

Hon. R. D. BLOWERS.

COMMISSIONER FOR THE SACRAMENTO DISTRICT

To the State Board of State Viticultural Commissioners.

During the years 1882 and 1883, in the Sacramento District, the establishment of new vineyards has gone steadily forward, the total area having been nearly doubled.

Much attention has been given to growing shipping grapes, as the point of departure for the Eastern markets as in this district and grapes can be placed in the market east with less milage and fewer days from the vines to the consumers. Even grapes grown in San Bernardino Co., pass through Sacramento and over the C. P. R. R., to avoid the hotter climate of the Southern Pacific and connecting lines. Many small as well as large wine vineyards are being planted, also old ones are being extended.

Raisin vineyards stimulated by the fine quality and early ripening of the raisin varieties in this district are rapidly extending. Our usually warm, equable climate, extending from Sacramento county through the fruit belt in the foot hills to Shasta, thence down through to the broad valleys of the Sacramento, embracing the lesser valleys of Butte Creek, Feather, Yuba, Bear and American rivers, all ripen their fruits much earlier than the extreme southern counties of the State, probably with the exception of vineyards on the desert side of San Bernardino Mountain, and earlier than the coast counties from Sonoma to San Diego, inclusive. Grapes ripened in Shasta Co., in 1883 about one week earlier than in Yolo, and about three weeks earlier than in San Diego in an unirrigated vineyard.

The Shasta rain-fall is more than four times that of San Diego.

In Fresno, where the most continuous irrigation is practiced of any locality, they are packing raisins for market before they are ready to pick from the vines, in San Diego. At Orange, Los Angeles Co., where extensive irrigation is practiced, although near the sea than most of the vineyards of San Diego, grapes ripen much earlier.

I make these comparisons for the purpose of correcting some views put forth in Mr. Wetmore's annual report.

His advice as to not irrigatings in varieties is at best only theoretical and it should be received "cum grano salis."

With our experience of twenty years growing the Muscatel both with and without irrigation, I find judicious irrigation does not retard their ripening.

Early pruning, warm, sandy or gravelly soils, as well as young vines ripen earlier, other things being equal. The raisin grower who plants a vineyard where the annual rain fall does not exceed fifteen inches, unless in a peculiar situation where he receives drainage from higher ground to act as a sub-irrigation, or where he can obtain water for irrigation, will be apt to make a financial failure.

My advice to planters is this, and it is founded on a knowledge of the industry from Butte to San Diego. Choose rich, deep, warm soil where water can be obtained. Then plant not closer than eight by ten or ten by ten feet apart, because without a vigorous vine you cannot expect the best return in quality or quantity.

Muscatel grapes this year in nearly all parts of the State were injured by the hot winds during the first week in June. In all raisin districts except the extreme south, the vines were coming into bloom, the pollen on the stamens was prematurely ripened and the viscous juice which exudes from the pistil became too dry to catch and retain the pollen; of course fecundation was either wholly wanting or imperfect and the fruit depending on the degree of fecundation either drops off or developes in all sizes from the small seedless ones to the perfect fruit. This damage was increased by the premature hatching of the "Thrips" by the unusual early hot weather. The Thrips being a honey eater assisted in destroying the vital principle of the flower. These are some of the causes of the so-called *coulure*.

It did not much affect the vines in San Diego County, I think for the reason that the vines were not far enough developed, as during that week I was informed that the thermometer registered 112° for several days in the shade in the Cajon valley.

I saw very fine raisins in the irrigated vineyard of Mr. Clark in that valley, also in the naturally sub-irrigated vineyard of Mr. Whitney, near Apex, same county.

Sultana grapes are grown chiefly in Smyrna and on the eastern shores of the Mediterranean. It is a very productive variety, not naturally as saccharine as the Muscatel, but ripening with us in Yolo about the same time.

In the years 1882 and 1883 at the solicitation of parties interested in wine making I, having a larger quantity of Sultanas than any other grower, sold part of my crop to a wine maker for the purpose of testing its quality, and not because they ripened too late for drying, as stated in Mr Wetmore's report.

I have a drier capable of drying thirty-five tons at one time, and could dry at any time in a few days. The result was satisfactory to the wine maker and also to myself, as I received $500 from the product of one acre in 1882, consisting of seventeen tons, fifteen tons of which weighed twenty-three per cent sugar and two tons second crop twenty-two per cent. The vines counted and grapes weighted, allowing five hundred and fifty vines per acre. This statement can be taken without any grains of allowance.

[To be continued.]

Protecting Their Interests

The New England *Grocer* says: The hop growers of New York State have united in an effort to secure the enactment of a law by the Legislature, requiring the brewers and dealers to brand each and every barrel and bottle of beer, ale and porter, with the articles from which such ale or beer is made, together with the amount of the same, under a heavy penalty. They have also fixed the tare on hops grown after 1883, at 3½ pounds per bale. It is stipulated that the average weight of bales shall be 185 pounds, to be put up in sacking weighing not more than 24 ounces to the yard, any heavier sacking or other extraneous matter to be deducted from the weight of the bales.

San Diego in Winter.

SAN DIEGO, January 14, 1884.

EDITOR MERCHANT: I send you green leaves of grape and tomato vines, which I picked yesterday in the open Cajon Valley. I found also wild flowers in bloom in many places. The country is emerald green everywhere in these coast valleys, and we are having a fine rain to-night. These things are nature's attest to what I have been saying about this county. The climate is heavenly. Let me abstract some figures from the report of the United States Signal Service here for the month of December last. Daily mean temperature, 57.5 deg.; maximum, 85.7 deg.; minimum, 40 deg.; number of foggy days, none; clear days, 21; fair days, 8; cloudy days, 2; number of days when rain fell, 7; comparison of daily mean temperature with other years for month of December: 1871, 58.7 deg.; 1872, 55.4 deg.; 1873, 54 deg.; 1874, 59.3 deg.; 1875, 56.8 deg.; 1876, 56.8 deg.; 1877, 56.8 deg.; 1878, 53.5 deg.; 1879, 53.9 deg.; 1880, 56 deg.; 1882, 55.7 deg.; 1883, 57.5 deg. These show for the wintry month of December a remarkable uniformity and mildness. The green leaves I inclose show what our January is now in the Cajon Valley. I was picking ripening guavas today. The orange and lemon trees are bending under golden fruit. The smilax is bright green in the gardens.

Yours, respectfully,

CHAS. A. WETMORE.

P. S.—Some one ought to raise smilax here for the San Francisco florist stands.

The Merchant Appreciated Abroad

The following letter from Consul Tanner, of Liege, Belgium, speaks for itself:

UNITED STATES CONSULATE U. S. VERVIERS AND LIEGE.

LIEGE, Belgium, 22d Dec., 1883.

To the Publishers of the San Francisco Merchant, San Francisco:

DEAR SIRS—I acknowledge with much pleasure the month ical receipt at this Consulate of the SAN FRANCISCO MERCHANT, handsome, able and interesting journal, the only one coming to this Consulate from the Pacific Coast, therefore the more appreciated and welcome. May I hope that you will continue to send it?

If at any time I can be of any service to you or any of the advertisers in your columns, not forbidden by the consular regulations, I will most cheerfully comply with any request to that end that you may make.

Most respectfully, etc., etc.,

GEO. C. TANNER, Consul.

WANTED.

A COMPETENT MEDICULTURIST, WINE-MAKER and distiller, who has had 10 years' experience in this State, is ready to make wines for the season, which he will do on shares, or will cultivate a few vineyards under charge of a practical man. Refers to S. La Rue and other gentlemen. Address P. O. Box 1, S. Lachman, Market and Fremont streets, S. F.

THE WINE MARKET.

The wine producers, dealers, makers and dealers this week, is quite brisk. Many cellars have been sold at full prices. Among these are John Thomas, of St. Helena; Lachman & Jacobs, also heavy stock of brands of "Sol" price reserved. Robert Barton of Fresno has sold at full figures to Gundlach & Co., Vogler & Co., to Matson, Foley, Sedden & Co., and heavily and sweet wine to Gundlach & Co. Stock of the estate of St. Helena, and to the estate of Sebastiani brands, and by Lemoss to Lachman & Co., they sold to Walter, Schilling & Co. Several small parcels have changed hands during the week, and as a result of E. Hooper, the city wine, and Mr. Allardice, leading sold to various San Francisco houses. E. B. smith, of Santa Barbara, left to-day for his cellars near Santa Barbara, with a little wine. There are not more than two cellars of any size in Sonoma county now unsold. No parcels have exceeded those of last week, probably all sold. Never in the same business, so early so clear at so early a period of the year, and the prices obtained for sound and superior qualities have been largely in advance of last year.

Landsberger & Curtis, brokers, say that they have several orders for sound white wines of '83 which they are unable to fill.

Brandy has moved more freely, and yet we cannot report any brisk demand, nor are prices very satisfactory.

The Hog in France and Wine in California.

U. S. Senator Vest presented on Monday a petition from the pork packers of St. Louis, praying retaliatory legislation for the exclusion of American pork by Germany and France.

A New York *Tribune* editorial, on Monday, on French reprisals, says: "Should Congress think proper to adopt a retaliatory legislation and prohibit the importation of French wines, it will not be difficult to find valid reason in the notorious adulteration of these wines, and the Act would at once stimulate production in our native vineyards. American wines have hitherto had to contend with strong prejudices. Anything which will force public attention to our native vintages will have a salutary result. There are already several brands of California claret much better than the average French table wines, and which can be supplied at half the cost of the latter, and even if the native wines rose in consequence of the prohibition, they could be sold at 25 per cent above the present rates and still be lower than the French vintages.

The Produce Exchange, of Boston, on the same day adopted a resolution calling upon the Massachusetts representatives in Congress to urge the passage of a measure prohibiting the importation from Germany and France of adulterated wines and other articles injurious to health, in view of the interdict placed by those countries on American pork.

Protest of Sugar Planters.

A telegram from New Orleans dated the 15th instant says: The convention of sugar planters, to take action relative to threatened legislation by Congress on the sugar tariff, assembled to-day. Ex-Governor Francis T. Nichols presided. Among the delegates were many of the wealthiest and most influential planters in the State; also a number of colored planters. Resolutions were adopted declaring that the sugar industry should not be annihilated in order to protect more favored industries, nor to settle political difficulties; that capital and labor here have with each other more harmonious relations than exist elsewhere in the United States in any great industry, that our capital will be destroyed and our laborers dispersed and degraded and utterly impoverished by further adverse legislation, and that the present depression of the sugar industry of Louisiana is in a great measure due to the constant agitation of the sugar tariff and the resulting insecurity of capital invested in sugar production.

The resolution further declares that if the Government thinks it right and proper to foster and protect the industries of iron, wool and cotton manufacture, the producers of sugar throughout the United States, as American citizens, are entitled to the same protection, and should not be sacrificed for the benefit of the West Indies, Mexico and the Hawaiian Islands, and concludes with a protest against further reduction of the sugar tariff. A resolution was also adopted protesting against the Hawaiian treaty, and the proposed Mexican reciprocity treaty, also requesting their Senators and Representatives in Congress to protect the sugar-producing interests.

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. Whereas a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 made, which are heeled in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $4.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.

NAPA, CAL.

AD MAJOREM

GLORIAM BONI VINI.

The undersigned having enlarged his business, has opened a branch office at No. 321 Montgomery Street, where information can be obtained concerning viticultural and horticultural lands, and where orders for vines and vine cuttings will be received, as well as at the old office, No. 111 Leidesdorff Street.

Having accomplished nearly all that is necessary to be done in establishing a flourishing colony of wine producers in the Livermore Valley, I shall now devote my attention especially to the development of the Viticultural resources of San Diego County, which county is one of the most promising in the State.

Information may be had at this office concerning the remarkable offering of the

EL CAJON LAND COMPANY.

And selections of land and subscriptions to the stock of the Company may be made through this agency. This company controls 27,000 acres of land in the richest part of San Diego County, where the finest raisins in the State are now made, and where nearly all kinds of fruit, particularly the apricot, pear, apple and olive, are raised to perfection without irrigation, and where, in proper sites, the orange and lemon are successfully grown with such slight irrigation as may be provided by means of windmills. The property commands ample means for irrigation whenever its settlers may desire to use the same.

This property is being subscribed for at an average price of less than $10 per acre to the stockholders; 2500 acres of choice land, platted and laid out with broad avenues, will be immediately allotted to subscribers in severalty. This tract of platted land is worth and has been selling for $100 per acre, but it is included in the whole tract at the average price; 10,000 acres of the whole tract are arable; the balance grazing lands.

Those who do not desire to purchase the stock, can purchase segregated portions at reasonable prices, in portions of from five acres to ten thousand acres, provided the parcel of land desired can be cut off without detriment to other parts.

THE DIRECTORS

Of this Company will soon be announced officially, as follows:

ARPAD HARASZTHY, President,
DR. JOSEPH JARVIS, Vice-President,
GEORGE WEST,
GEORGE A. COWLES,
CHAS A. WETMORE.

The Trustee, during the subscription to the stock, is Mr. Bryant Howard, the cashier of the Consolidated Bank of San Diego. Wm. B. West, Esq., who has made special studies in viticulture and horticulture and who has studied raisin-making in Spain, as well as in this State, is a subscriber to the stock of the Company and will devote considerable time during the coming Winter at the San Francisco office of the Company, for the purpose of giving information to those who may desire the same, concerning the prospects of this enterprise. Prof. Frederico Pohndorff has engaged a portion of the land and stock with the object of establishing an olive orchard.

Those who subscribe early and make early selections of the platted land will never regret doing so. It is expected that all the land will soon be taken up. Samples of fruit, raisins and wine, raised in the El Cajon Valley, can be seen at this office; also maps and the plan of the subdivided tract.

Those desirous of purchasing a large tract of land—say 10,000 acres, part grazing and part arable—partly the finest alfalfa land, can find a good opportunity, if applied for soon, as the company can dispose of that much for cash in one body in terms that will be most advantageous.

CHAS. A. WETMORE,

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:—FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called France-l'mot of Mr. Scheffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricions and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

July 1, 1878	20,231	283,024	147,598
Jan. 1, 1878	57,187	2,646,811	882,046

A PRIVATE COMPUTATION.

Meyer, Wilson & Co. estimate the stock of wheat on hand in the State January 1st at 8,600,000 centals, or 430,000 short tons, distributed as follows:

	Centals.
San Francisco, Mission Rock, Oakland wharf, including wheat afloat in the harbor	1,000,000
Stockton and San Joaquin valley, including Merced, Fresno, etc	2,500,000
Alameda county	250,000
Santa Clara county, Salinas and all coast counties	850,000
Solano county, including Vallejo, Napa and Suisun	800,000
Yolo county	400,000
Colusa county	500,000
Sutter and Yuba counties	500,000
Sacramento county	250,000
Butte and Tehama counties	600,000
Contra Costa County, including Port Costa	850,000
The counties and places not given above	500,000
Total	8,600,000

This estimate was obtained by taking actual quantities in warehouses and on board of vessels, and no account was taken of wheat remaining in farmers' own hands, or of flour in mills or warehouses or on board of ships. The firm reached the conclusion that the whole of the 430,000 tons will be available for export, including wheat in the form of flour.

Customs Duties.

Duties paid at Custom House for week ending Jan 17, 1884. Duties payable in United States gold coin, standard dollars or greenbacks.

Jan 11, Friday	$24,436 10
" 12, Saturday	16,352 87
" 14, Monday	19,074 93
" 15, Tuesday	17,310 76
" 16, Wednesday	16,479 01
" 17, Thursday	7,850 04
Total	$96,601 71

Meat Market.

Beef continues firm at quotations, with moderate supply. Mutton is unchanged, though rather weak at prices quoted. Hogs are firm at quotations, with no heavy receipts. Arrivals are promptly met by a quick demand from local packers. Following are rates for whole carcasses from slaughterers to dealers

BEEF—First quality, 8½@9c; second quality, 7½ to 8c; third quality, 6½@7c ₱ lb.

VEAL. Large calves, 9½@10c; small ones, 10@12½c ₱ lb.

MUTTON — Wethers are quotable at 5½@6c and Ewes at 4½@5c ₱ lb, according to quality

LAMB—Quotable at 12½@5c ₱ lb.

PORK—Live hogs, 5½@6c for hard grain hogs on foot, dressed 6¾ 8c.

PRODUCE MARKET.

The following is the report in below are compiled from the memoranda covering to Wednesday evening of the current week.

The features of the week in the cereal market has been the report of the Produce Exchange and Grain Exchange as to the quantity of Breadstuffs and Feed grains on hand in this State on January 1st. The comparison of the foregoing institution's report with that published on January 1st, 1883, is as follows:

	January 1st	
	1883.	1884.
Flour, bbls	158,893	177,250
Wheat, ctls	5,858,529	6,735,720
Barley	1,911,866	2,431,150
Oats	118,650	119,330
Beans	91,850	53,050
Corn	90,850	90,250
Rye	23,605	58,510

FLOUR—

Imports, 2026 bbls. Exports, 37,022 bbls.

Receipts, of week, 13,815 bbls.

The market is weak and a further decline in prices is not improbable. The stock on hand in the State at the term of the year was by 20,000 bbls greater than at any corresponding period in the history of the trade.

Extra, $5 62½@5 90. Superfine, $4 00@4 75. Country ditto, $3 65@4 50. Interior Extra $5 00@5 50 per bbl for jobbing parcels to local consumers, but round lots for export can be obtained for some what less figures.

WHEAT—

Imports, 370 sks. Exports, 130471 ctls

Receipts for the week, 190,504 ctls.

Though there has been no improvement in the Eastern or European markets, prices here favor sellers, as compared with the figures obtainable one week since. This results largely owing to the very much lessened stock on hand, as reported by the Produce Exchange, as compared with the estimates of leading dealers, and the continuous dry weather, which prohibits the planting and seeding of fields devoted to the wheat raising interest. It would now seem that many sections of the State, unless favored with copious rains at an early date, will not produce enough grain to pay for harvesting, but plentiful showers before the close of the month would very greatly improve the outlook, and give encouragement to the husbandman. Already many of the growers are satisfied that the result will be a light harvest, and daily their offers come in to go long on the market for such quantities as the ir means will permit.

In the sample market shipping is nominal at $1 70 @1 75 per ctl. Choice Milling, $1 77½@1 80. On Call yesterday No. 1 White sold for $1 66 seller sea son, and $1 84½ @ctl buyer season

BARLEY—

Exports, 1229 ctls

Receipts of week, 19108 ctls.

The quantity on hand in the State on January 1st was, at least, 2,431,150 ctls , a greater amount than ever before reported in the history of the trade. This report has a depressing effect upon the market, for only the dry weather helps to support the firmness of those who are bulls in the market. Supplies in Los Angeles are exceptionally large, but a large portion of the same will be required for home consumption, shipped to Arizona, etc. The quantity of strictly choice bay being small (owners running low, the product of feeding grains having been unusually small, taking into consideration the yield of feeding grades.

In the sample market, No 1 Feed is quoted at $1 00 @1 07½, brewing, $1 12½@1 20. Sales on Call yesterday: No 1 Feed were made as follows: buyer season, $1 15½@1 15, seller season, $1 05@1 05½, spot, $1 07½ per ctl.

BUCKWHEAT—

Receipts of the week, 10 ctls.

Sales are exceedingly light, and local consumers are almost entirely dependent upon supplies via rail.

Quotations are entirely nominal, at $3@3¼ per ctl

OATS—

Receipts of week, 3221 ctls.

Imports, 963 sks. Exports, 752 ctls.

Receipts of week, 32221 ctls.

Market steady. Black, $1 50@1 60. White $1 50@1 60 for ordinary, $1 65@1 75 for fair to good and $1 80@1 87½ per ctl., for choice to extra choice.

Under light receipt the market is stronger at rather higher rates. Supplies in the city, amounting to all most 60,000 ctls are firmly held for high figures. An occasional carload is received from Nebraska, but such arrivals are not sufficient to affect prices, and it would now seem that no decline in figures is probable for some time to come.

CORN—

Exports, 44 ctls.

Receipts of week, 4445 sks.

The Produce Exchange reports only 91,220 ctls in the State, but this is probably a very much less amount than there is actually in the State, as large quantities are held by growers in the southern counties, an account of which it was impossible for the Exchange to obtain. An occasional carload is received from Nebraska, the same in all instances consigning consigned to local distillers, who claim the same to be preferable for their use. California is quotable at $1 50@1 60, Nebraska, $1 45@1 50 per ctl.

RYE—

Receipts of week, 309 sks.

Stocks are exceptionally large and principally located in the San Joaquin valley. Prices show no disposition to market, their grain, as quotations are entirely nominal at $1.25@$1 40 per ctl.

MILLSTUFFS—

Exports, 455 ctls bran, 270 ctls millstuffs.

Receipts of week, 3,850 sks Bran, 1,717 sks Middlings, 1,261 sks Ground Barley.§

We quote. Ground Barley, $24 00@25 per ton Middlings are selling at $18@22 00 per ton, Wheat Bran, $16 00@17 00 per ton, Oil Cake Meal $30, old process, and $26 50 new process; Feed Corn Meal, $36@36; Cracked Corn, $36 per ton, Rye Flour, 86 per bbl; Rye Meal, $5 50 per bbl, Buckwheat Flour, 5c per lb; Pearl Barley, 4@5c per lb; Eastern Oat Meal, $9 75 per bbl; Cracked Wheat, 4c per lb.

It is currently reported that the British iron shipland is waxing, will carry fully 1000 tons of Bran to England, the balance of the cargo to be Flour. This proposed shipment of Bran has added great strength to the market, and holders are very firm for advanced rates.

HAY—

Exports, 46tons

Receipts of the week, 1243 tons.

The market, under light receipts, is strong at an advance. No recent consignment of alfalfa have been received.

Quotations: Alfalfa, $7 00, Wheat, $15 00@16 50, stable, $14 00@15 00, Wild oat, $15 00@16 50, Oat, $12@14, Barley, $13 50@14 00 per ton.

STRAW—

Receipts of week, 86 bls

Quotable at 50@60c per bale as to condition.

SEEDS—

Imports, 3118 lbs. Exports, 6 lbs

Receipts of week, 29 sks alfalfa, 2 sks mustard.

Business is very good, though not unusually so, the lack of rain, of course, affecting this as in other lines of business

Flax quotable at $2 50@2 75 ₱ ctl, Canary, 5@5¼c, Alfalfa, 9@9½c ₱ lb, Timothy, 7@7½c per lb nominal and 8@8½c for imported, Mustard, choice Brown, $3 00@3 25 ₱ ctl, White, $2 75@3 00, Hemp, 4c, Rape, 3@3½c

BEANS—

Exports, 222 ctls.

Receipts of the week, 1001 bags

Although the excitement in colored has subsided, the prices they reached are still sustained. The dry weather in Sonora, Lemas into prominence, they are doing a little better Whites are not so weak as they were, there has been some inquiry for them of late.

Our quotations are, for round lots from the wharf Small White and Pea, $3 00; Bayos, $3 50, Pinks, $3 75, Reds, $4, Butters, $3 25, Limas, $3½

VEGETABLES—

The supply and demand are light. We note a few changes in quotations.

We quote: Carrots, 30@35c; Turnips, 75@$1 00, Cauliflower, 40@75c ₱ doz; Cabbage, 60@75c ₱ ctl; Tropical Squash, 2@2½c ₱ lb; Celery, 50c ₱ doz; Dried okra, 25c ₱ lb; Dried Peppers, 13@14c ₱ lb, String Peppers, 18@20c per lb, Artichokes, 40@60c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1@1 25 ₱ ctl, Marrow Fat Squash, $20 ₱ ton, Mushrooms, 10c ₱ lb

FRUITS—

Exports, 1387 bxs fruit, 442 bxs apples

Some little business doing, but not at all brisk. Loretto oranges are nearly out of the market Prices remain about little change.

We quote Domestic—Apples, 50@$2 00 ₱ box. Pears, 75@$2 00 per box, Cape Cod Cranberries, $18 00 ₱ bbl, Western do, $17 00@17 50 ₱ bbl.

Tropical—Lemons, 50@75c per box for Sicily Lemes, 50 00@6 50 per box for Mexican; Tamarinds, 12@13c per lb; Bananas, $1 75@2 00 per bunch, Pineapples, 25@37½c for old and $3@5, for new; Loretto Oranges, $2@5 50@2 50 per M.

NUTS—

Imports, 17 sks. Exports, 12 lbs.

We quote: Cocoanuts, $6@6 50 ₱ 100, California pea nuts, 5@6c ₱ lb; chill do, 8½@8c; California Almonds, hard shel, 7@8c, soft shell, 13 @14c; Filberts, 13@16c, Pecan, 13@14c; Peanuts, 5@6c; Brazil Nuts, 13@16c, Hickory Nuts, 7@10c; Chestnuts, 15@22c.

Trade in nuts is very dull There is absolutely nothing doing, and, to use the expression of one of our oldest dealers, "things are as flat as a flapjack." Prices are unchanged.

HONEY—

Imports, 15 cases; exports, 1071 cs.

We quote: Extracted, 5½@7c; Ex White Comb 18@20c; White, 13@16c, Dark, 8@10c.

BEESWAX—

We quote 26@30c per lb

DAIRY PRODUCE—

Imports, 3540 lbs 1 bx Cheese Exports, 27,380 lbs Butter, 6985 lbs cheese.

We quote: Point Reyes, 32½c; Choice, 28½@c 31; Fair to Good, 25@27c, inferior lots from country stores, 16@17c; firkin, 20@21c for old and 24@ 27½ for new; Eastern, 15@17c; Pickled Roll, 25@ 27½; Cheese, California, 13@15c for choice; 11@ 12½c for Fair to Good; Gilroy, in drums, 10@13c; Eastern, 17@18c; Western, 10@15c

Since our last little is left to report in the way of changes Quotations remain about the same, but we note a little more activity in sales of fresh Roll, which keeps the market well cleared up. The cheaper grades are in demand, as there is no pickle roll to take its place. We look for present figures to prevail till our next report.

Nothing new to note as regards Cheese.

POULTRY—

Trade is very dull Nothing doing, and prices have in some descriptions fallen since our last.

We quote: Turkeys, Live Gobblers, 24@25c per lb Turkey Hens, 24@25c; Dressed, 27@28c. Young Roosters, $7 00@8 00, Old Roosters, $6 00@7 00, Hens, $7 00@7 50; Broilers, $6 00@6 50, according to size; Ducks, $10@12 00 ₱ doz; Geese, $2 25@ $2 50 per pair.

OLEOMARGARINE—

We quote the range from 20 to 22c, according to package

ONIONS—

Exports, 773 ctls

Receipts of week, 1470 sks

Choice continue scarce and sell readily on wharf at 95c.

GAME—

We quote: Quail, 1@$1 25 ₱ dozen; Hare, $2 @$2 25, Rabbits, small, 1@$1 25, cotton tail $1 25@$1 50 ₱ doz; Teal, 75c; Sprigs, $1 50@ $2 00; Widgeon, $1 00, Mallards, $2 00@2 50 ₱ doz, canvas backs, 4 50@5 00 per doz; common snipe, 50c@75c ₱ doz, do, English, $1 50@2 00 ₱ doz, Grey Geese, $2 50@2 75 per doz; White Geese, $1 25@1 50, Honkers, $4 50@ $5 00 per doz.

Though a light business is expected at this time of the year, the present season has been an exceptionally dull one. There is very little doing, and prices remain nominal.

HOPS

Imports, 41 bls. Exports, 230 lbs.

Receipts of the week, 165 bls

During the past week there have been a few transactions for export, as holders were more inclined to meet the limits of shippers. Sales have amounted to probably 500 to 600 bales at 17@19c according to grade

If holders would meet the situation, the bulk of desirable qualities left could probably be placed at these figures

We quote medium to good 15@17½c; choice, 18 @19c.

WOOL—

Receipts of week, 166 bls

For Wool market see Wool Department

HIDES, SKINS, ETC.

Imports, 192 bills hides, 87 bills skins. Exports, 100 bls hides, 3 bbls skins, 1752 ₰ lbs tallow

Hides, Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½c; light Salted Cows and Steers, 30@50 lbs, 8c per lb. Salted kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18@——c per lb. Dry Kips do, 18@——c per lb. Dry Calf, do, 18@20c per lb.

The market for salted hides continues, and we have no change to make in our remarks of last week

TALLOW—For fair and good grades, 7½ @ ——c. per lb. Market firm and steady.

EGGS—

Exports, 54 boxes,

We have to note a large influx of our local products with a light demand—prices rather in favor of the weather as basis. We look for still lower figures, before our next issue.

We quote California Eggs, Choice Ranch, 30c per doz; California limed, 25c; for fresh limed, 22@ 23c.

POTATOES

Exports, 1494 ctls.

Receipts of the week, 23,988 sks

No change in prices. Stocks of Petaluma and Tomales are increasing, for trade in them is very light. The receipts of all kinds have not been by any means so great of late.

We quote Early Rose 50@75c; River Reds, 35@ 45c; Tomales and Petaluma, 85c, Cuffy's Cove, 90c; Humboldts, 90c, Sweets, 82½@2 25.

MERCHANDISE MARKETS

The prices given below are for car load lots and whole consignments

BAGS AND BAGGING—

Exports, 7 bls bags

Standard Wheat Wheat Bags are offered on Call at 7½c, lower June and July, but such offerings meet with no favor, the bidding price being 7c. Potatoe Gunnies sell for 14@14½c, as to quantity.

BORAX—

Exports, 40021 lbs.

We quote concentrated in sacks 9@10c and refined in barrels 10@11c.

Shipments during last year was in round numbers about 30000 tons, of which 600 went by sail to Liverpool, 620 by ship to New York and 1614 by rail eastward, chiefly to New York, although a portion went to Boston. New Orleans—986,000 lbs borate of lime, equal to about 350 tons of borax were also shipped to Liverpool in 1883.

Business is looking up to a slight extent, and a more decided improvement may be looked for as the season advances. Prices remain unchanged.

BROOMS—

Exports, 9 doz

Trade is unusually good for this time of the year and prices of its remaining figure very favorable No change in prices to be noted.

We quote: "Common" Hurl—No. 4, $2 50; No. 3, $2 75; No. 2, $3 00; No. 1, $3 50 "Extra" Hurl—Fancy, (Lady Brush), $4 00; No. 3, $3 50; No. 2, $4 00; No. 1, $4 50. "Best" Hurl—No 4 $4 00, No 3, $4 50; No. 2, $5 00; No. 1, $5 50. Ship, Mill and Stable—No. 3, $4 50; No. 2, $5 00; No. 1, $5 50. Ship, twine bound, $3 00; without galvanized bands, 50c ₱ doz less. "Common" Stalk—No. 3, $2 25; No. 2, $2 00; No. 1, $1 75. Agents' Armed for Extra—No. 3, $3 50; No. 2, $4 00; No. 1, $4 50. Wisps and Toy Brooms—Toy Brooms, $2 00; stalk Handled Whisks, $1 75; 1 String Wood Handled Whisks, $1 75; 2 String Wood Handled Whisks, $2 00; 2 String Velvet Top Whisks, $2 25; 3 do, $2 50; 4 do, 2 $75.

CANNED GOODS, ETC—

Imports, 778 sks canned goods, 25 cases condensed milk. Exports, 295 cs canned goods, 74 cs milk

Trade is very quiet, with very few transactions between canners and dealers.

We quote Hollister assorted Table fruits, 2½-lb cans, $2 25 ₱ doz; do pie fruit, 2½-lb cans, $1 50, doz; do gallons Table fruits, $9 00 ₱ doz. Pie Fruits, $4 25. Tomatoes, 2½-lb cans, $1 12½ ₱ doz; 2-lb cans, $1 25. Jams, $2 25 ₱ doz: Pickles in 5 gallon kegs, $13½; California Sauce, pints, $3 00; ½-pts, $1 75 ₱ doz. Ketchup, $1 25@1 75 ₱ dozen. English Groceries—known as Blackwell's Pickles, pts, $4; qts, $6 75. Olives, qts, $7; Lucca, Oil, qts, $9 50; Sauces, $9 00 ₱ case. Jams, $4 00, Jellies, $5 00 ₱ doz; Fry's Chocolate, 50c ₱ lb; Cocoa, 45c ₱ lb; Colman's Mustard, 60c ₱ lb.

COAL—

Imports, 13074 tons Pacific Coast, 7048 tons Foreign and Eastern; Exports, 1 ton.

For the moment there is an apathy in this article, no disposition to do any business This is caused by an accumulation from heavy arrivals, which temporarily over supplies the market; shortly there will be a marked intermission or cessation of arrivals and the market becomes accessarily lively.

The amount loading in foreign ports does not relatively increase with the arrivals here, hence our supplies are being gradually decreased, with this in view, and the exceptionally small quantity now afloat from foreign sources (less than six weeks' actual consumption) nothing can be clearer than higher prices within sixty days from date, and a continuation of same for several months thereafter.

A cargo of Chase River Coal arrived last week; it is said to be first-class for both domestic and steam purposes.

Importers' prices of coal, Foreign and American, to arrive: Australian, $8 50@8 75; Liverpool 3team, $8@ $8 25; West Hartley, $8 75@9 00, Scotch Splint, $8½ @8½, Cardiff Steam, $7 75@8, Lump Cardiff, $13@ 13½; Egg Hard, $11@@12½; Cumberland, bulk $10½ @10½ Spot prices are as follows: Australian, $8 75; Liverpool Steam, $8 50, West Hartley, $8½; Scotch Splint, 9 50, Cardiff, $8 00, Lehigh Lump, @$13; Cumberland, bulk, $11 50; Egg Hard $11 50

COFFEE—

Imports, 2 bags. Exports, 2431 lbs.

We quote: Fine Costa Rica, 13½c; Costa Rica, 13½—c; Good Salvador, 12½c; O. G. Java, 17.

There is rather more inquiry, but sales are very limited Sales of three car loads for shipment East are within the range of our quotations.

CORDAGE—

Exports, 2 coils.

We now quote as follows: Manila, 11½-inch (7-16 dia) and upward, 10c; do, 12 thread (⅜ dia) 15½c do, 6 and 9-thread (¼ do) 5-16 dia 16c; Manila Sale Rope, 2 and 4-thread, 15c; Manila Cordage, tarred, 2-in (⅝dia) and upward, 15c; do Lathyarn, 15c. Discount on lots of 10,000 lbs, 1½c ₱ lb. Sisal Rope, 11½-in (7-16 dia) and upward, 10½c; do, 12-thread (⅜ dia), 11c; do 6 and 9-thread (¼ and 5-16 dia), 11½c. Sisal Bale Rope, 3 and 4-thread, 10½c.

CORKS—

Imports, 6 bls. Exports, 1 bl.

DRIED FRUITS—

Imports, 2 cases prunes. Exports, 1956 lbs dried fruits, 424 lbs raisins.

Trade is very quiet, and is not expected to improve for six weeks to come.

DRY GOODS—

Imports, 360 cs. Exports, 114cs.

FISH—

Imports, 8 kgs, 20 cs fish, 241 bbls 710 cs salmon. Exports, 309 cs fish, 6103 cs salmon

The most noticeable event this week has been the clearing of the balance of a brand of Alaska salmon to a leading export house, at figures reserved, but said to be very satisfactory to the vendor.

Salmon is very firm at advanced figures. The supply in all the canneries is comparatively light.

We quote: Columbia River, $1 25; Sacramento,, $1 17½, f. o. b.; barrels, $14 00; hf barrels, $7 50; California Cod, in 50-lb bundles, 5c; selected, in cases, 6c; boneless, 7c.

HARDWARE—

Imports, 392 cs Exports, 231 cs.

IRON—

Imports, 288 pcs 674 bdls 313 cs iron, 861 bdls 2127 pcs iron pipe, 34 brs 14 cs steel. Exports, 57 pcs 264 pkgs iron, 65 pcs iron pipe, 1 bdl steel.

Remarks of last week also apply to this; no disposition to do any business. Consumers are melting very little, and the market is handicapped by an overstock. Until our present stock in warehouses becomes materially decreased, there is no hope for any improvement. Nothing is being loaded in Great Britain, and if importations cease for a few months the quotations here would be materially bettered

Importers prices of Pig Iron, Foreign and American, to arrive:—Shotts No 1, $27 50@——; Glengarnock, $26 50@——; Eglinton, $25 00, Clay-Lane White, $23 50; American, Eastern. Soft, $28 00; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 50; Clay, white, 223c; Shotts No 1, $28 50; American, Soft Eastern; $28. Chapman Gap Nos. 1 to 4 $32 50@$33 00

Black Sheet Iron—Nos. 16 to 18, ₱ lb; Nos 19 @20, 3½c; Nos. 22 to 24, 4c; No. 26, 4¼c; No. 27 4½c, No. 28, 4¾; Galvanized Charcoal Sheet Iron Nos 10 to 20, 10c ₱ lb; Nos. 22 to 24, 11; No. 26 12; No. 27, 12½; No. 28, 13½; second quality 1c lb less than first.

Wrought Iron Pipe, discount, 45@50; Manufacturers' last; per ft, Black—½-inch, 42 fts ₱ 100 ft. 8c ⅝, 60 fts 9c; ¾, 85 fts, 11c; 1 inch, 134 fts, 14c; 1, 167 fts, 18c; pipe, 226 fts, 27c; 1½, 270 fts 33c; 2, 367 fts, 46c; 2½, 576 fts, 77c; 3, 755 fts 95c; 3½, 905 fts, 81 25; 4, 1072 fts, $1 00. Galvanized—¼, 11c; ⅜, 14c; ½, 16c; ¾, 19c; 1, 22 1¼, 30c; 1½, 37c; 2, 64c; 2½, $1 ; 3, $1 30.

MATCHES—

Imports, 10 cs

Business dull with no demand. Jobbers and retailers well supplied.

We quote new price list: Block 32@c per gross; Telegraph, 55@70c per gross, according to size.

NAVAL STORES—

Exports, 2 bls oakum, 25 bbls rosin, 3 bbls tar, 16 cs turpentine.

We quote: N Carolina Rosin, $4¼@6½ for No 1, $6½ for Extra Pale; Pitch, $3¾@4¼; Tar, $6 00@ 6 50; Swedish do, $8 75; Oakum, $4 00, for ordinary California, extra do, $4 50; and $4 50 for Eastern ₱ bale; Spirits Turpentine, 60c ₱ gal; Anchors, 7½@8c ₱ lb; Chains, 5½@10c ₱ lb; Wire Rope, heavy, 9@12c; light, 20@30c; Yellow Metal, 24@23c.

MOLASSES AND SYRUPS—

Imports, 200 kgs 24 cs syrup. Exports, 161 galls syrup.

We quote Island molasses 13c, with no very recent sales.

OILS—

Imports, 11 cs naphtha, 19 cs oil. Exports, 55 cs oil, 10 cs sperm oil, 500 gls whale oil.

We quote: California Castor Oil, No. 1, $1 25 ₱ gal.; No. 2, $1 00 . The Pacific Oil Work's list for Linseed, 65c ₱ gal for boiled; 62½c for raw in 100 bbl lots. We quote: Eastern Linseed, 61½c; winter strained lard oil, 95c, in bbls; Cocoanut Oil, in bbls, 57½; China Nut Oil, 80c ₱ gal; Coast Whale, 37½c; Arctic Whale, 42½@45; Cal Neatsfoot, 85c; Eastern do, 90, Naphtha, 10@13c; Red Oil, 5¾; California Olive Oil, $1 ₱ gal or $12 ₱ doz.

PAINTS—

Imports, 29 cs paints. Exports, 8 cs paint, 16 cs varnish, 109 kgs white lead.

Business is much more active than is usual in January. A good trade has been done and is still doing; the future prospects may be said to depend almost entirely upon the all important question of rain or no rain.

We quote White Lead 6¼ in ton lots; and 6¾ in 5 ton lots; Litharge, 6; Orange Mineral, 6½; Chrome, 5 to 5½; Ochre, Ground, 5 to 6

[Continued on page 239.]

RETAILERS' CORNER.

The general grocery business with some houses has been good for the season during the past week, though some firms report it only fair and others dull. Each concern has its special connection and one district may be earlier purchasers than another.

Refined sugar is in fair demand and grocery grades, raw, are very active. There never was so much of the latter offering on the market at one time; at present it is probably four times the quantity that the market would normally take. Hence, low prices prevail, and the lower grades of refined have been reduced to meet the competition of plantation sugars.

Chinese refined sugars are neglected, and first cost on importation cannot be obtained.

Canned goods are very quiet, but holders are not distressed about the future.

Salmon is firm, with a fair demand, and Sisson, Wallace & Co. have cleared their Alaska brand at prices said to be satisfactory. The buyers being in the export business, this lot will probably be sent abroad.

We notice a sale of Hawaiian rice at 4⅞, on sixty days' time. The stock of this description is good and gradually increasing. In Asiatic, business has been dull, without change in quotations. The new crop of No. 1 China is now coming in very freely.

There is a little more doing in Coffee, but the home trade is yet very limited. Holders are very firm, and look with confidence towards realizing full rates now demanded. Sales are reported of three car loads for Eastern account at prices within the range of quotations.

Quicksilver is looking up a little in price, but low prices in London curtail our exports.

Starch is quiet.

Borax has slightly improved.

Provisions continue dull, but an early improvement in demand and in values is looked for.

Lard is firm, and we report an advance in "Banner" of ¼ of a cent.

California Hams, ordinary and "Our Choice," are weaker, while California Bacon, covered, has slightly advanced.

There is considerable activity in Tin Plate. Some descriptions have already advanced, and all are expected to move into line.

Dried fruits are dull of sale, though holders are very hopeful.

The same may be said of Salt.

Soap is dull, but a good feeling prevails with manufacturers.

The Broom trade is unusually active.

Petroleum is moving very fairly, the demand having increased considerably during the past two weeks.

In Spicea we note an active city demand and a fair country demand, though the latter has slackened since the holidays.

There is a rise in Eastern Cream Cheese of ¼ a cent a pound.

Paints are moving more freely than usual in this month, denoting a good deal of present and prospective building in this State. Our people have done fairly well in the past year and are planning many improvements, and our population necessitating more houses increases the demand.

In vegetables there is nothing doing worthy of notice.

Fresh fruits are not brisk; the holiday reaction has set in. Loretto oranges are about out of the market.

Seeds, field sorts, are selling better than might be expected considering the dry weather.

Nuts are very dull.

Game is dull, the high prices, owing to scarcity, restricting the demand.

In Poultry, from similar and other causes, there is nothing doing.

To sum up, the whole trade generally is flat, even for the season, and prices are unchanged; though producers and merchants have full faith that there is a good time coming.

SPIRIT OF THE NEW YORK MARKETS.

The general markets betray a little more vitality, and as the Spring approaches there will be a gradual enlargement of the volume of business. Indeed in the earlier branches of the Spring trade there is already an increased movement and as prices are believed to be down to hard pan there is likely to be less hesitancy in buying than there was last season when values were almost constantly shrinking. There is every reason for believing, too, that the consumptive capacity of the country will be larger than it was last year, as the newer sections of the country have been opened up for trade and traffic during the last few years at a marvelous rate. This is especially the case as regards Dakota, Western Nebraska, Texas and mountain territories, where the new settlers have become producers as well as consumers. The process of opening up new lands and building new towns always has the effect, after a time, of drawing off money from the older sections, while the returns in railroad traffic and general demand for goods, are disappointing. But after a crop is raised, a reaction for the better is always due. From this standpoint we may reasonably conclude that the newer sections of the West will be heard from to the benefit of the entire country during the year. Business men give expression to a unmistakable feeling of relief that the past year closed without any more serious disasters, and it is argued that under all circumstances there is not much risk to run in buying almost any commodity at present prices. The conservatism so widely practiced during the past year has resulted in a sound basis in trade. The improved feeling that may reasonably be anticipated under the circumstances is expected to bring about an increased demand for money, though the supply at present is so abnormally large that nothing like stringency can be looked for in the near future.

TOBACCO MARKETS.

SAN FRANCISCO.—Some leaf houses report an unusually heavy business during the past week, in all grades and descriptions of Pennsylvania, Sumatra and Havana, especially the two latter. The sales have been principally of '80 Pennsylvania and several sales have been made to cigar manufacturers, but not in any large lots. The stuffer figures asked make purchasers cautious about buying largely at this time either '80 or '82. The stock of '81 in this market is very heavy, at no time have we been better supplied with two and three year old domestic.

By a private telegram we learn that the Secretary of the Treasury has decided that the 75 cent duty on Sumatra must be exacted, and that running in a few bales of superior into an invoice of wrappers, or placing fifteen per cent or more of low grade stuff into a bale of wrappers, is an attempt at evasion of the law and will not be recognized as a reason for remitting the higher duty.

Our cigar manufacturers all seem in good spirits and are looking for as good a business during the coming year as in the last.

Business in manufactured tobaccos of all styles continues quiet, as usual at this season.

OVERLAND RECEIPTS OF CIGARS AND TOBACCO

[C. S. Tobacco Journal]

The *U. S. Tobacco Journal* of the same date says: Though the business of the week was exceedingly small, the spirit of the market was greatly improved, and the holders of large quantities of tobacco looked brighter and more chee ful. A survey of the market establishes the fact that the amount of fine leaf on hand is infinitesimally small Whatever may be the result of the Sumatra entanglement, it cannot hurt holders of fine leaf. While it is reasonably certain that the Secretary will not reverse his decision, the enormous pressure about to be brought to bear upon Congress will likely result in stopping the importation of Sumatra under the 35-cent rate before a telling quantity can be brought into the market.

While, to some extent, the line and cry raised regarding the possible introduction of Sumatra at 35 cents has been justified, and that by such measure the trade would be deprived of a source of income, it cannot be denied that the prospects for a remunerative seed leaf business in '83 tobacco were exceeding ly slim, if not entirely cut off. At the prices which buyers paid in New York State and Wisconsin especially the chances for making money, not alone for the buyers, but also for the jobbers and manufactures, were most unfavorable Sumatra would undoubtedly have beaten them at a tariff of 75 cents

Europe has tried our Havana seed. The report is unanimously in favor of it. It is preferred to Sumatra. Now, then, cannot our American farmers drive it from this and other markets by other than legislative efforts?

The few transactions made during the week were mostly in' 82 Pennsylvania. Notwithstanding the depression caused by the Sumatra agitation, there was not the slightest deviation from prices asked and obtained from those ruling four weeks ago. This, of course, has only been the case with prime stock. Low grades are a drug on the market.

Sumatra sold but sparingly during the week. Importers did not show the slightest inclination to unload at lower prices than formerly The total sales were about 150 bales, at from $1 10 to $1.60.

Havana was moderately active. Sales of '83 stock are progressing favorably. This tobacco shows an excellence of quality such as this market has not witnessed in many years.

Both journals have lengthy articles on the Sumatra trouble.

NEW YORK CIGAR PRODUCTION.

In number of cigars on which tax was paid in New York in 1883 ahead of 1882 to the extent of 10,555,279, in the number of cigarettes, 38,189,-501; in the quantity of manufactured tobacco, 410,-624 pounds

The heaviest month in respect to tax receipts was, of course, May, when tax was paid on 146,421,000 cigars, 47,012,000 cigarettes and 1,133,266 pounds of manufactured tobacco The lightest month, as would readily be said, was April. Outside of these two months, the heaviest and the lightest month were August and January respectively.

STOCK OF SEED LEAF

The *Tobacco Leaf* says: On January 1, 1883, the estimated stock of seed leaf on hand, including the growth of 1882 and previous growths, was 295,923 cases, made up as follows.

	Cases
Old Leaf.....	93,923
Crop 1882..	200,000
Total	293,923

The basis of calculation for the crop of 1882 was:—

	Cases
New England	35,000
New York	25,000
Pennsylvania	60,000
Ohio	30,000
Wisconsin	50,000
Total.....	200,000

January 1, 1884, the estimated stock was 213,-112 cases, including old and the growth of 1883 This seems a small supply, and so it is; but it is all that can be accounted for by official statistics The exhibit should tend to relieve the minds of merchants and dealers—who have been alarmed about Sumatra tobacco.

Trade Failures.

There were 282 failures in the United States reported to *Bradstreet's* during the week ending Jan 5th, 22 more than the preceding week 25,more than the corresponding week of 1883 and 130 more than the same week of 1882 About 79 per cent. of the failures were those of small traders, whose capital was under $5,000 Compared with the previous week the middle states had 65,an increase of 11; New England states 38, an increase of 17, southern states 80, an increase of 17, western states 93, a decrease of 8, Pacific states and territories 6, a decrease of 15; Canada and the Provinces 17, a decrease of 7. There were no very large failures during the past week. In the principal trades they were as follows: General stores 61, grocers 37; dry goods 23; clothing 16; fancy goods and laces 16; liquors 12, jewelry 11; men's furnishing goods 10; shoes 10, millinery and straw goods 9, bakers and confectioners 8, manufacturers 8, produce and provisions 8; furniture 6; saloonists, printers, etc., 5, grain and flour 5; banks and stock brokers 3; crockery and glassware 3; hats 3; hotels and restaurants 3, coal 2; drugs 2, lumber 2.

Freights and Charters.

The ship market is steadily firm in one direction, and that is the wrong one; it is getting no better very rapidly. The dry season being so long prolonged is gradually taking away the ship owners' last hope.

Still no one believes, except it be the compilers, that the reports or estimates of the stock of wheat on hand January 1st are nearer than 100,000,000 tons of the actual facts.

There are no more accidents in the chartering business to report. One of our old-established and most respected firms quietly settled with ship owners two or three weeks ago, and it is now hoped that all others have turned the dangerous point. It has been a terrible ordeal for some of them, and we are glad to report that the general opinion is that the worst is over.

German bark Engen, 730 tons, lumber from Puget Sound to a direct port West Coast of South America, 45s

British ship Somersetshire!, 2209 tons, now at Wilmington, proceeds to Valparaiso to load nitrate for England.

British ship Iron Duke!, 1435 tons, proceeds to Australia in ballast, seeking.

Schooner Anna, 228 tons, merchandise to Honolulu.

Ship Farragut, 1476 tons, proceeds to Hongkong.

[Continued from page 238.

cts; Venetia Red, 2 to 3c; do, in oil, 5 to 6c; Chrome, dry, 18 to 30c, ao, in oil, 18c; Red Lead, 6 cents.

PETROLEUM—

Imports, 1800 cs coal oil. Exports, 45 cs coal oil.

We quote: California, S. W., 110 deg, cased with banker fancy, 17c per gal; plain cans, 16c, bulk, in pail, bbls, 12c; per gal.

Business very fair, a considerable improvement having taken place in the last fortnight

PROVISIONS—

Imports, 2600 lbs bacon, 35637 lbs 1 cs hams, 18250 lbs 1 bbl lard. Exports, 5805 lbs bacon, 32 bbls beef, 7300 lbs hams, 10150 lbs lard, 57 bbls pork.

Business continues very dull, but in a few weeks it is expected to improve

We quote: California hams, 13½; Eastern, 15½@16½c, for Choice hams, 15½@15½c, California bacon, 11½@13½c, California covered bacon, 14½c; extra clear sides, 12@12½c, California shoulders—mess pork, $20 per bbl, prime mess $18, clear pork, $21 pr bbl; extra clear do, $22 per bbl; pig pork, $21 per bbl, mess beef, $11 50 per bbl, extra mess beef, $13 50 per bbl, family beef $16@17 per bbl; Eastern refined lard, in tes, 13½c per lb; California refined lard, in tes, 11c per lb, 10s, 10½; 5s, 10¾c; Banner lard, 10s, 12½; 5s, 12¾c; 3s, 13c.

RICE—

Exports, 36253 lbs

Asiatic rice is in good demand at the following quotations:

We quote Mixed $1 10@——; No 2 China $1 60 @1 70, good No 1 $5 25@5 50c, Extra No 1 $5 90 @6 10, Hawaiian $4 62½@4 75.

Business during the week has been dull with no change in quotations. New crop No 1 China is now coming in freely, with fair stock on hand 500 bags ex Alameda new sold this week at 4⅞ on 60 days.

LEATHER—

Imports, 19 lbs. Exports, 1733 lbs.

We quote: Sole, for shipment, 18@21½c ₱ lb; Rough do, 18c; Best Sole Leather, for this market 28c; Medium do, 25c; light do, 23c; Harness, 25@ 30c; Harness No 2 do, 24

SALT—

Exports, 39116 lbs

The movement in salt is unusually large for this season of the year

Liverpool fine we quote at $18@21 50₱ton. California, $9@10 for Bay; do crystal, $10@15 Carmen Island, fine, $16@22; do coarse, $12, do on bay ground, $9@14.

Business continues dull, and no increase in the demand is expected for the next 30 days.

SOAP—

Imports, 1 bbs Exports, 49 lbs.

Business is dull, as it always is this time of the year, but an improvement is confidently looked for very soon

We quote: California Castile, Mottled, 8@9½c, White, 10c; French Castile, Mottled, 11@12½c White, 15c; do, California Pale and Fancy, 16@ 35c; do, Washing Powders, 8@9c 12½ per gross.

SPICES—

City trade is very good and business generally has been fair, but has slacked off since the holidays A large spring trade is expected, but much also is dependent upon the all absorbing question of rain

We quote: Black Pepper, 15@16c; White Pepper, 22@——c; Allspice, 12@15c; Cloves, ——@22½c; Cassia, Scarce, Ceylon Cinnamon, 40@45c, Ginger, 8@15c, Nutmegs, 62½@65c; Mace, 60@62½c; Borneo Ginger, 16@18c.

STARCH—

We quote: Pure Starches 8½c ₱ lb; Corn and Silver Gloss, 10½c; Pearl, 7½c; Pure Starch, in barrels, 7½; Ground and Wheat Starch, 8½c, in barrels; Silver Gloss, in barrels, 9½c.

TIN, ETC—

We note considerable activity in tin plate. Shipments for the first eleven months of 1883 for this coast were 120,000 boxes short of quantity for the same period in 1882. Sales of 60 basis have been made at 3c 25, and B. Y. grade at 3c 00, representing an advance of 15 to 25 cents per box, the demand continues active, favoring higher prices.

A. D. BELL ..... Editor.

FRIDAY ..... JANUARY 18, 1884

The St. Louis *Grocer* takes a gloomy view of prices of many staples in the current year, and seems to recommend a cautious course in filling up stocks.

In an article on Beet Sugar in last week's MERCHANT a type made us give the cost of refined sugar at the Standard Sugarie at Alvarado in October last at 1.0198 instead of 7.0198 cents, though we had marked the error in revising the proof.

The London *Grocer* says a new method of analysis, by the use of photography, is now being made in the Municipal Laboratory of Chemistry at Paris. Photographs of chocolate, tea, coffee, pepper, milk, cheese, etc., as seen through the microscope, are taken and distributed, and by comparing samples of such articles with photos of the pure article, an easy method is afforded, even to non-professionals, of detecting adulteration.

The *Merchants' Review*, New York, says that comparison of quotations show that the same styles of sugar are only about a half cent per pound higher in this country than in England, so that the argument for taking off duties on sugar loses a part of its force, as those who make the demand claim the difference of price of from 1½ to 3¼ cents. The question is, with the scale of wages in the two countries as they are, is not sugar really cheaper here than in England?

Our Italian fishermen are much like the New York news dealers who fought the *Herald* for reducing the price of that paper from two cents to one. These Italians will do nothing to check the destruction of fish in our bays, because the dealers prefer to sell a small quantity of fish at 25 cents a pound that costs 10 cents to selling a larger quantity at 5 cents that costs 2 cents. It goes without saying that the butchers encourage them in all their methods of keeping down the supply of fish in the bay and maintaining high prices in the retail markets.

The motion to dismiss the indictments against Sarah Althea Hill and Wm. M. Neilson, alias McCann, has been overruled, and consequently McCann, if Hill fails to establish her marriage with Senator Sharon, will have, with his principal, to stand his trial for forgery a second time in his life, with, should he be again found guilty, the certainty of wearing a convict's garb a second time, nor will the "sick" dodge open the jail gates in California so readily for him as they did in Australia.

UNITED STATES OR CANADA, WHICH?

The *Chronicle* has a very foolish article on the subject of a reciprocity treaty being made between Great Britain and the Hawaiian Islands, in case that between the United States and the latter country should be abrogated. It was probably founded on an equally stupid and wicked press telegram presumed to come from Washington. Whatever ignorance associated press news gatherers may exhibit on Pacific coast affairs is pardonable, but there is no excuse for a San Francisco journal adopting their blunders. It is the Dominion of Canada, and not England, that stands ready to step into our shoes if we abandon our position in regard to the Islands. This matter has been discussed by Dominion journals and legislatures, and they seem fully to appreciate the advantage they would gain by reciprocity. British Columbia is becoming a very prosperous province, and population and business are rapidly increasing in Victoria. The commerce we have with the Hawaiian Islands would, if transferred to the Dominion, give a further impetus to the healthy progress that city and colony are making, and not only the Provincial Legislature of British Columbia but the Administration at Ottawa are fully alive to the advantages they would gain by such a treaty.

These facts are so well understood in the Hawaiian Islands that some merchants and planters are getting tired of this prolonged demagogic howl against them, and would look upon the abrogation of the present treaty and the negotiation of another with the Dominion Government as a relief from worry.

The abrogation of the American treaty would make no difference to our sugar refiners. Only one concern uses that sugar regularly, and it has to depend in part on Manila for a supply of raws. The American Sugar Refinery is quite satisfied with the prices at which it can obtain these Phillipine sugars. The owners of the California Refinery are also largely interested in sugar planting in the Islands, but it would make little difference to them if all the "raws" of their own raising went to Victoria to be refined, while they purchased other foreign raws for the California Refinery. But it would make a great difference to our merchants and manufacturers and producers, from brick makers to mule breeders, if we lost a trade amounting to several millions a year. Already, San Francisco sends enormous sums and comparatively little merchandise into Asiatic waters to pay for such imports as tea, rice and sugar, and if we are to send five or six millions more a year, without gaining any additional merchandise export, it will not tend to increase the amount of money in circulation on this coast. The men who are fomenting this agitation against the treaty may believe that they are striking at our sugar refiners and the Hawaiian planters, yet neither of them would suffer anything more, probably, than the slight inconvenience of throwing the old business into new channels. The force of the blow would fall on the shipping business of this port, on our merchants, our farmers, our stockbreeders, our lime burners, our lumber men, our wood workers—indeed, it would hit every class of producers and manufacturers in the State.

It is a very patriotic business to send a profitable trade over to our British neighbors to gratify a personal spite against a man whose only crime is that by untiring industry and honorable enterprise he has acquired a fortune, and while doing this has furnished profitable employment, directly and indirectly, to many thousands of people, and since he came to the front, as the records show, has lowered the price to consumers of a great staple. But what is merely unpatriotic in Eastern men becomes the vilest treason in a California journal, which for pay publishes lie upon lie to mislead its own subscribers and enlist their aid in crippling the trade of California.

OUR BAY FISH SUPPLY.

All human food is directly or indirectly obtained by the farmer, the fisherman and the hunter, from the land or the water. The game bird is as much a product of either the land or the water as a sheep or a fish. Therefore, everything that protects and increases the fish supply is as important to the human race as an increase in the yield of a wheat field, or in weight of a bullock or sheep. Our stock of many kinds of food fish frequenting the waters of San Francisco and adjacent bays and the tributary rivers is growing less every year, in spite of the efforts of the State Fish Commission to stock them. This arises from several causes; the salmon fishers are blamable for catching every ton of fish which spoil and have to be thrown away. The Italian fishermen in the bay persist in hauling their nets on the gravelly beach and leaving from 20 to 200 pounds of small fish to perish in the sun every time they empty their nets. The greatest sinners, however, are the Chinese. There are 2,000 Chinamen with over 300 boats engaged in the shrimp and sardine fisheries on the shores of Marin and adjacent counties. The business they are doing has reached startling proportions, and thousands of tons of dried shrimp and small fish and shells and scales are shipped annually to China. The central point of this business is Point San Pedro, opposite which stretching above and below, the shoal waters for many miles are thickly planted with the stakes to which they attach their nets. This is done in open violation of the law, which forbids the setting of nets or any fixed contrivance for the taking of fish. The punishment on conviction is heavy enough, the lowest penalty being thirty days imprisonment and $50 fine, and the highest six months and $300 fine. But the Chinese are shrewd enough to know that the fine, if paid, does not go into the treasury of the county in which the conviction is obtained, while their imprisonment becomes a heavy tax on the community which has to board and guard them. The greater the number of convictions, the more burdensome these prisoners become; besides there is the annoyance and inconvenience to citizens who are summonsed as jurors. The attorney for Chinese defendants accused of offences against the statutes regulating fishing, never fails to demand a separate jury trial for each culprit, and being well paid, protracts the trial, the inconvenience to the jurors and the cost to the county as greatly as possible. Many arrests have been made in Marin county within the past few years, with the above result, and it is not surprising that those who have to serve on the juries and pay the costs urge the constables to shut their eyes to what is going on. This carrying away shrimps and small fish for food or manure has more than decimated each year our supply of young herring, shad, tom cod, flounder, etc. Not only are these fish decreasing in number, but the larger food fish which prey upon them are decreasing. Fifteen years ago our bay and tributary rivers teemed with such fish as flounders, halibut, sea trout, blue cods, smelt and other varieties, but in these latter years the Chinese with their persistent fishing, small meshes and fixed nets have accomplished what neither sea lions nor pelicans nor the 300,000 white people who live on the shores could do, depopulate the bay of its finny habitants. There was a time when any skillful amateur by taking up a good station on some wharf or rocky point, or from a boat, could take in an hour with hook and line a string of fish that would supply a family with wholesome meat for a day. It is not so now, and will never be so again, unless these Chinese exterminators can be stopped. The most certain way of doing so would be an act of Congress forbidding the exportation to any foreign country of dried shrimps or any dried fish under four inches in length, or any fish manure. It would lessen the exports to China, but it would prevent the utter destruction of one of the staple articles of food, the only one which the landless poor can obtain by their own labor, and without money. We will say nothing of the deprivation of another class of an innocent sport.

Australian and New Zealand Club.

A number of Australian residents in this city have determined upon forming an Australian Club. Such an institution will prove agreeable to the many Australians who have made California their home, and it will not only be pleasing for tourists from the Southern Hemisphere to visit a club conducted in the best possible manner according to the system peculiarly English, but it will also be instructive, as every means will be provided to afford information to strangers regarding the United States and California, which is always so eagerly sought. The names of the committee of management will be published at an early date, and we heartily wish the project every success. Persons desirous of becoming members will please intimate their intention, addressed to the Honorary Secretary, Australian and New Zealand Club, Baldwin Hotel.

PERSONAL.—The following wine makers were in the city this week. Charles Krug, of St Helena, James Shaw of Glen Ellen, Mrs. William Hood of Guilucos and Robert Barton of Fresno. L. J. Rose of San Gabriel and Mr. Stern of New York left this city for their respective homes last Saturday.

DECEASED.—John McCracken, Esq., formerly law partner of B. S. Brooks, of this city, died in New York last week from injuries caused by a fall on an icy sidewalk. Mr. McCracken was well known in Sonoma county, and spent several weeks every summer at Guilucos since his retirement from the practice of his profession.

The *Daily Register* has been published for twenty years by Geo. A. Ware, of this city. It contains a full list of the arrival of business men at all the leading hotels, frequented by country merchants, and is always reliable. Such a publication is of great value, not only to mercantile firms, but to all others who have business with persons residing in the interior of the State.

Chamber of Commerce

ANNUAL MEETING.

ADDRESS OF THE PRESIDENT.

Review, Information and Suggestions.

The thirty-fourth annual meeting of the Chamber of Commerce was held Tuesday Jan. 15th afternoon in the Merchants' Exchange, President the Hon. Horace Davis in the chair. The principal business of the meeting was the reading of the annual reports of the officers.

The report of the Secretary, Treasurer and Librarian, Morris Marcus, showed that the number of members at the beginning of the year was 168. The records show that four new members have been elected, while there have been seven deaths, eight resignations and one name dropped off for nonpayment of dues, making the enrolled membership at the present time 156.

PRESIDENT DAVIS' REPORT.

After reciting the work done by the Chamber in 1883, such as the investigation by Committee of pilotage and towage affairs, memorializing Congress against the proposed transfer of the Coast Survey, the Marine Hospital Bureau, the Revenue Marine and the Life-saving Service from the Treasury Department to the Navy Department; in reference to the National bankruptcy law; on the propriety of increasing the efficiency of the Signal Service Bureau on this coast, on the extension of the Life Saving Service to the Pacific shores; on the erection of new post office buildings in San Francisco and a tribute to the memory of the members who had died during the year. Mr. Davis said:

Some of the matters of complaint on the subject of tonnage were partly remedied by the establishment of a second line of towboats. Turning to general matters, the city and State have been fairly prosperous during the year. This is shown by the tables of overland immigration, the increase of capital, the steady march of improvement, both in city and country, and by the long list of exported values. Our yearly rainfall was light, but it fell opportunely and gave us promise of a full crop. The blighting north winds of June did very serious damage, but enough was left to constitute a handsome harvest of grain and fruit, especially with the high prices that have ruled for grain.

He then alluded to the opening of new lines of trans-continental railroad and construction of branch lines and feeders within the State during the year. In respect to the former, Mr. Davis said:

The expectation of opposition and a reduction of rates, if entertained by any, was disappointed, and the rival lines hastened to divide the territory between them. But though there be no rivalry in rates, there is at least a competition in comfort and speed of service. The through time of both passengers and freight is shortened and the accommodations are constantly improved. The competion of these two great roads changes considerably our trade relations to the country along their lines. On the Northern we lose considerable trade, more especially in goods which are the products of the Atlantic States, but this is partly compensated by an increased market for whatever is peculiarly the product of our own State; while on the line of the Atlantic and Pacific a long stretch of fertile country is opened for settlement, which we may reasonably hope will become tributary to San Francisco.

SHIPS, WHEAT AND RAIL RATES.

On this subject we quote Mr. Davis in full, as it is one which in the transaction of his daily business he must necessarily have studied:

The year has been an unfortunate one for shipping. The remarkable accumulation of tonnage in the harbor, coupled with the partial failure of the grain crop, forced freights to a lower figure than was ever known before, first-class iron ships having accepted 27 shillings 6 pence to Cork for orders, while on the other hand the grain holders have realized prices rather above the average on their wheat, although the English market reached a lower point than has been known certainly for 20 years. In the face of these figures no attempt has been made to open the New Orleans route for the outlet of our grain. If, as many suppose, an era of low freights has set in, it becomes a matter of great interest to compare this route with that from Chicago to Liverpool and the rates paid there.

By Mr. Nimmo's tables the all-rail rates from Chicago to New York, 972 miles, averaged 14.6 cents per bushel of 60 pounds; ocean steamers, New York to Liverpool, 3542 miles, 7.76 cents per bushel; and these rates were the lowest average ever known. The distance from San Francisco to New Orleans is 2495 miles; thence to Liverpool 5490. Estimating the cost of transportation over this route at the same rate per bushel and allowing for the increased mileage, it would bring the cost up to 38 cents by land and 12 cents by sea; 50 cents per bushel in all, equivalent to about 78 shillings per 2240 pounds. But elsewhere Mr. Nimmo says that the trunk lines can carry grain at one-quarter of a cent per ton per mile, which is certainly a minimum rate; the average mean rate of 1882 was .27 of a mill per ton per mile. This new basis would give us $6.24 per ton (2000 pounds) to New Orleans and $4.81 thence to Liverpool; a total of $11.05 for the short ton, or about 52 shillings for the long ton. All these rates are for grain in bulk or in ships' sacks; the rail rates in burlap sacks would be somewhat larger.

Undoubtedly the railroads would do considerable business for the inside figures, or even less, for there are other considerations which would make it desirable for them to haul some part of the crop at very low figures, such as the presence of empty cars. Now I am considering the question. At what rate ought we to expect the railways to carry our whole crop to New Orleans and thence to Liverpool? And if the figures I have quoted be at all correct, the sailing ship may still find profitable employment in carrying our grain to England at prices ranging from 50 shillings upward.

INTEROCEANIC CANALS.

I think our true hope lies in the completion of the Isthmus canal. This will give us real competition in freights by opening our trade to the fleets of iron steamers seeking employment all over the world, which to-day are debarred from seeking freight here by the great length and expense of the voyage around the Horn. I regret that I can give you no valuable information of the progress of the Panama Canal; we certainly shall pray earnestly for its successful completion, for the opening of this or the canal by Nicaragua will end our commercial isolation and place us in the circle of cheap and speedy transit for merchandise as well as passengers.

Mr. Davis spoke of the hope that Congress would relieve our ships of the unnecessary burdens now imposed on them, and place them more nearly on a fair level with other nations. Then we might hope that with increased experience in building iron ships and the present low rate of interest, our capital may again seek investment in tonnage and our merchant marine will resume its former glory.

In concluding, he referred to the progress of business in this city by the increase in banking capital deposits, real estate transactions and substantial improvements.

The report was received with applause.

It is reported that the Pacific Steam Ship Company have purchased the pioneer steamer, "Senator," and will send her to Auckland, to be used as a barge. The "Senator is one of the oldest steamers on the coast.

That it is not wise to bite off more than you can chew.

That a fine example of faith is a rheumatic on crutches buying a bottle of St. Joseph's oil.

That if Congressional speeches would smother polygamy, it would have died out long ago.

That reducing the tariff is a scientific way of increasing the revenue from customs by doubling importations.

That the ermine is smetimes used to line ladies' cloaks, and sometimes the pockets of superior judges.

That marriages and divorces seem to run at equal pace; divorces would overtake and pass marriages if it were on the cards.

That retail grocers in some of the Atlantic States are having a hard time of it with so many mills and factories shut down.

That corn and tomatoes are as dissimilar as any two humans or vegetables can be, but when they are married and set up house keeping in a can they get on excellently well.

That leading lawyers in the United States Senate have administered to Judge Hoffman a well-deserved rebuke on his Chinese trader decisions, which he will not be likely to disregard.

That the Starr Flouring Mill at Vallejo is being fitted with a new kind of mill, a recent French invention, which, it is said, costs 60 per cent less than the roller process machinery, and does equal work with 60 per cent less power.

That Salmi Morse, the dullest, though most impudent, of all literary and dramatic frauds, talks of going into the lecturing business, and that amusing maniac George Francis Train will publish a paper. We would rather invest in the paper of the latter than in a ticket for admission to the lectures of the former. George is never dull, Morse is obese with mane stupidity.

That the sensational tone in which the report of the meeting of the stockholders of the Pacific Bank appeared in the *Examiner* was not in good taste, and we are also of opinion that a private remonstrance regarding the inconvenience arising from bank officers giving so much attention to visitors whose business was philanthropic or the advancement of supposed social reforms, would have answered the purpose as well and have been less offensive than a long resolution with a string of preamble attached. We do not coincide with Dr. McDonald in his opinions on many subjects, nor believe that his projects, if successful, would prove beneficial to the country, but there is a certain respect due to a man who honestly labors for what he conscientiously believes to be a noble work.

Every vineyardist and wine-maker on the Pacific Coast should subscribe for the MERCHANT.

The season in Sonoma county is considered promising for grain, fruits, vines and olives, but bad for grapes.

There is undoubtedly on the Atlantic side a very large number of operatives and laborers in factories and mills out of employment. Some by the reduction of hands some by the closing of the works and some by strikes in resistance to reduction of wages. Besides this, other employees are working short time. This is, undoubtedly, in part, the consequence of fears as to tariff tinkering, though other causes also contribute. The tariff reformers complain that manufacturers are trying to forestall the public against any proposed reductions in advance. This may be so, in certain instances, but we cannot see any good reason why a man should pay full American wages to manufacture an article which will not reach the consumer before July next, while before that time a foreign article may be competing with it at prices which will not repay the outlay. There is a wide difference in which commercial writers on the Atlantic coast speak of the future prospects of American manufactures. Those who favor large reductions in the tariff assume a very cheerful tone, or speak of the business of 1884. Those who believe that the present protective tariff has worked beneficially speak less cheerfully, and even a gloomy note is heard.

At the adjourned annual meeting of the Pacific Stove and Iron Work Company, held this day, Denis Kearney, Thomas Francis O'Malley Baines and Dr. O'Donnell were nominated as Directors for the ensuing year, but their names not being on the stock register were declared ineligible. This company has had a long and ridiculous struggle but has not on this occasion fallen into the hands of the Philistines.

A Signal Service Branch.

We have received from Congressman Sumner a copy of a letter addressed him by General Hazen, regarding the establishment of a branch Signal Service office in this city, which would issue indications without waiting for Washington reports.

We give the letter in full:

WAR DEPARTMENT,
OFFICE OF THE CHIEF SIGNAL OFFICER,
WASHINGTON CITY, DEC. 31, 1883.

HON. CHAS. A. SUMNER, M. C.,
House of Representatives, Washington, D. C.

Dear Sir:—I have the honor to acknowledge the receipt of your communication of the 28th instant, and, in reply, to say that no special legislation is necessary to secure the establishment of a branch office on the Pacific Coast for making special weather indications for that region. It has been my intention to establish such an office at San Francisco, and I am only prevented by the lack of a sufficient number of skilled officers to do the work of this office and one at San Francisco.

The fact that the officers of this service, who have devoted the most best years to its special work, receive no increase of rank and pay, as in the case of other officers detailed for like work at West Point and other bureaus of the War Department, while they are charged with duties fully as important, is discouraging to them and is rendering it difficult for me to keep them. Two indication officers have recently been relieved from signal duty, and this alone prevents the immediate establishment of a branch office at San Francisco.

In justice to indication officers I think they should receive the mounted pay and allowances of captains. This would be an inducement to them to remain in the duty, and I could then establish the office at San Francisco at an early date.

I am, very respectfully, your obedient servant,
W. B. HAZEN,
Brig. and Bvt. Maj. General,
Chief Signal Officer, U. S. A.

Subscribe for the MERCHANT, $3 a year, payable in advance.

The St. Louis *Grocer* gives the following excellent advice: All grocers should instruct their customers who use canned goods, to pour out the contents of the can as soon as it is cut; it will not do to wait fifteen or twenty minutes; the cans should be emptied at once. A few minutes' exposure to the air will give the contents a metallic taste that is not at all agreeable.

The New England Commercial travelers held their annual dinner, the seventh reunion, in New Year's week. Two hundred members were present. The Vermonters, numbering 90 members, had a banquet the same week at Burlington, Vt.

JOBBERS' PRICES.

JANUARY 18 1884

The following Prices are those at which city and country Retail Grocers can buy in lots to suit their trade and are corrected weekly.

A Demand for Naval Protection

At the Annual Meeting of the Chamber of Commerce, held on Tuesday, Captain Merry, in behalf of the committee appointed on the naval question, presented the following memorial, addressed to the Senate and House of Representatives:

Your memorialists, the Chamber of Commerce of San Francisco, desire respectfully but urgently, to call your attention to the absolute necessity for a prompt and large increase in the naval forces of the United States, by the addition thereto of heavy and full-powered armored vessels, as well as iron vessels developing the highest speed; both classes to be armed with the heavy rifled ordnance now accepted among maritime powers as a necessity for effective service. With a coast line of thousands of miles on the Atlantic and Pacific oceans, everywhere exposed to the attack of a naval force; with fortifications armed with useless, smooth-bore guns; with rich and prosperous cities defenseless against any power possessed of a few first-class modern war vessels, our country has for years done comparatively nothing for the national defense afloat, and at the initiation of a maritime war would be at the mercy of the enemy.

We respectfully submit that such a condition of affairs is disgraceful to our country, wanting in patriotism and devoid of the prudence which should characterize nations as well as individuals.

With an overflowing treasury and a patriotic people, our Government has depended upon the good-will of foreign nations, without a respectable naval force either to protect its citizens abroad, or to enforce a national policy, in case of necessity.

We respectfully urge upon our fellow-citizens in Congress that an adherence to such a policy is a crime against our country. This Chamber of Commerce, representing a community on the western extreme of the republic, defenseless and inviting attack, respectfully enters its solemn protest against a policy dangerous to our safety and mortifying to our patriotism. We respectfully represent that the American people will not fail to approve of an honest expenditure of millions for defense against aggression. Permit us, then, to inaugurate a policy of preparation for maritime war, remembering always that therein rests the greatest security for peace.

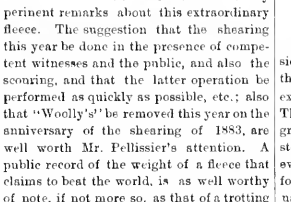
Earnestly requesting your attention to the considerations herein set forth, we subscribe ourselves with great respect, your fellow-citizens, the Chamber of Commerce of San Francisco.

After reading the memorial, Capt. Merry made

A FEW REMARKES

upon it. He said that since 1865 England has expended $156,000,000 on new vessels, France $88,500,000, Russia $35,000,000, Italy $32,250,000 and Germany $37,100,000. Chile, China and Japan have each spent more on new vessels during that time than the United States, which has expended only $3,500,000. "Our country," continued Capt. Merry, "has an annual revenue surplus of $136,000,000, and cannot some of this immense surplus be taken to protect our country? The Government, in this respect, is behind the people. This chamber should use all its influence against such a poor policy as is now pursued by the Government in this matter."

The memorial was unanimously adopted, and signed by the officers and trustees.



MORE ABOUT THE "BIG FLEECE."

The *Texas Wool Grower* makes some very perinent remarks about this extraordinary fleece. The suggestion that the shearing this year be done in the presence of competent witnesses and the public, and also the scouring, and that the latter operation be performed as quickly as possible, etc.; also that "Woolly's" be removed this year on the anniversary of the shearing of 1883, are well worth Mr. Pellissier's attention. A public record of the weight of a fleece that claims to beat the world, is as well worthy of note, if not more so, as that of a trotting horse that pulls down the record half a second.

The *Texas Wool Grower* says:

The Pellisier fleece from California, fourteen months' growth, from "Woolly," a French Merino ram, directly descended from Rambouillet stock, weighed 62½ pounds, was scoured by Berg & Bros., of San Antonio, and in the process lost 76 4-10 per cent, leaving 14 pounds 12 ounces of clean wool. Being a fourteen months' fleece, this would make it equal 12 pounds and 6-10 per one year's growth, nearly two pounds larger than any one year's fleece from a Spanish Merino ram, according to the record. It is unfortunate this fleece was not shorn in public, and of one year's growth exact, as no matter how reliable these figures may be, they are subject to criticism, although we have the affidavit of Mr. Pellissier regarding the age of the fleece and the breeding of the ram. Next time, just one year from last shearing, this ram should again be shorn, this time in public. Then it should be sent direct to one of the leading scouring mills, and the report of the scourer should be supported by his affidavit. A perfect record should be obtained.

Depression of Ocean Freights.

The year closed upon a marked depression of ocean freights the world over, for the reason that the supply of tonnage is in excess of the requirements of commerce. The steam fleet, especially the British, has grown to enormous proportions, and as steam has the preference over sails wherever its employment is feasible, the field for the employment of the latter has gradually been contracted.

From all parts of the world come reports of low freights. From San Francisco to Europe ships have been constrained to accept as low a rate as 20s. to 25s. per ton on Wheat, or about one-half as much as in ordinary seasons. From the ports of Europe, the East Indies, China, Chili, Peru and Australia come similar stories of unremunerative rates, from which it would appear that ship property is at present among the least attractive forms of investment. Nor is there the prospect of much improvement in the near future.—*N. Y. Shipping List.*

British Grain Trade.

LONDON, January 14.—The *Mark Lane Express* in its weekly review of the British grain trade says: The weather continues mild, and trade goes from bad to worse. All else but sound samples of wheat are absolutely unsalable. Flour ruled dull and ¡s from 6d. to 1s. lower. Barley is steady. Wheat afloat is unimproved. For cargoes off the Coast there have been five arrivals, two sold, one withdrawn and five remain, including three cargoes nnmber two American Red Winter Wheat. The sales of English Wheat for the week foot np 41,144 qrs. at 38s. 9d. yer qr., against 23,389 qrs. at 40s. for the corresponding week of last year.

Woolens and Clothing.

The new year has opened with a much better feeling prevailing in dry goods circles. A good many buyers are in the market, and takings of miscellaneous assortments have been of very fair proportions. There is nothing new in the woolen market. Business continues fair on old orders, but no new business worthy of mention is reported. The clothing market shows some improvement, and dealers are hopeful of a good business as this year.—*Bradstreet's, January 5.*

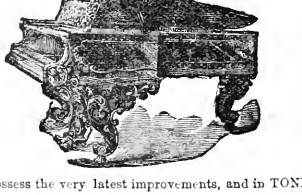
CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882

Manufacturers of Strictly First Class

UPRIGHT PIANOS.



Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.

Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full description mailed on application.

WALTER S. PIERCE, Secretary and Agent.

American Sugar Refinery

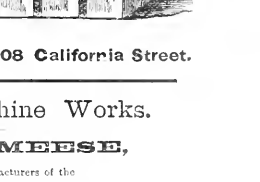
Manufacturers of the Celebrated

CUBE SUGAR

Supplies only Exporters and the Jobbing Trade.

This Company Manufactures all the Grades of HARD AND COFFEE SUGARS AND SYRUPS

Special attention Given to the Making and Packing of LOAF SUGAR FOR EXPORTATION.



C. ADOLPHE LOW & CO., Agents, 208 California Street.

Reliance Machine Works.

CLOT & MEESE,

Sole Licensed Manufacturers of the

Medart Patent Wrought Rim Pulley

For the States of California, Oregon and Nevada, and the Territories of Idaho, Washington, Montana, Wyoming, Utah and Arizona. Lightest, Strongest, Cheapest and Best Balanced Pulley in the World. Also Manufacturers of

PAT. OCT. 25, 1881

CONSULAR REPORTS

American Manufactures in Australia.

An advance copy of the November number of reports of American consuls to the State Department at Washington on the trade and commerce in their respective consular districts and the opportunities for or means to be adopted to secure an increase in the share of America in the same, contains some communications of more than customary value. Consul Charles Kahlo, at Sydney, Australia, discusses American trade in New South Wales. He says that while the value of American agricultural implements purchased during the year has amounted to $3,000 more than from any other foreign country, that total is but one-tenth of the aggregate value of like wares imported from the United Kingdom. With the acknowledged superiority of American reapers and mowers in mind, it is not difficult to perceive how, with proper effort, a greatly increased sale of this class of goods might be brought about in Australia. It is the fact, of course, that the United States labors under the difficulty of having no such adequate freight facilities between its own ports and those in foreign countries as have the leading European commercial nations. Nevertheless, the better the goods the greater the sale in competition of this kind. It is particularly pertinent at this time, when the subject of "encouraging" the creation of a mercantile marine is being widely discussed, to note that the recent establishing of the Compagnie des Messageries Maritimes line of steamships between Marseilles and Sydney has greatly increased the trade between France and New South Wales. The service includes seven new steamships of 4,000 tons each. Our Consul further states that the Australian consumption of beer is heavy and growing. Sydney, England and Germany supply the larger portion, but an American brand is now coming into favor. The duty on bottled beer is 15c. per gallon. Many American-made carriages and wagons are in use in Australia, and this trade is inferentially an increasing one. Regular mail steamers from San Francisco carried thither last year $100,000 worth of doors, some 45,000 in all. The annual consumption of fish in the colony is about 5,000,000 pounds. One-half of this quantity last year came from California. There are about 4,200 tons of foreign fruits consumed annually. Of this quantity the United States has supplied but 200 tons, although that which has gone there has brought good prices. The sales of imported furniture aggregate $725,000 a year; the proportion coming from this country was about $125,000 last year. The total imports of hardware was about $2,750,000 in value last year. Of this over one-half was from the United Kingdom, and about $400,000 worth only from the United States. The prices obtained there leads Mr. Kahlo to think that many varieties of hardware which have never been shipped there could be sent to Australia at a profit. American cut nails have never been offered in that market, and he thinks they would sell well. English, German and French pianos monopolize the market—of inferior style and tone to American makes. There is good reason to think American wood-working machinery would do better than it has if properly pushed. American sewing machines monopolize the market there. Oregon and British Columbia supply the imported lumber. This country supplies about one-half the total imported manufactured tobacco, and more than a like proportion of leaf, although our exports of cigars to New South Wales are but 5,000 out of 500,000 pounds imported per annum. Cigars there are generally of low grade and high price. An American house, the Waltham, supplies "nearly three-quarters of the watches used in Australasia." American clocks are mostly used, though of a cheap grade.

This record is of course from the reported direct importations from the United States, and it is more than probable that a measurable proportion of raw materials and manufactured articles credited to other foreign countries are indirect American importations.

It is suggested that the best way to introduce foreign goods into the Australian market is to send a sample consignment with an agent or representative of the house to bring the wares to the attention of the middleman or consumers abroad. In the event of this being impracticable, an illustrated catalogue and a resident American firm to introduce the goods are almost indispensable. A foreign house there will hardly sympathize with an American competitor to the exporters of his own country. It is added that with proper exertion arms, ammunition, bacon and hams, crackers, boots and shoes, butter, confectionery, glassware, rubber goods, oysters, railway stock, whisky, and several other and less important lines of American products and manufactured articles might well be introduced into New South Wales and adjoining colonies.

Tariff Prospects.

[From Bradstreet's]

It now seems probable, judging from such indications as are at hand, that no general legislation affecting the tariff will be adopted at the present session of Congress. This however, is no surprise to those who have attentively considered the political situation. The Democratic party has long played fast and loose with the tariff issue, and it is not to be wondered at that when it is at last brought face to face with the alternative of free trade or protection it should be found wanting in cohesion. Whether anything approaching a general unanimity of sentiment upon the tariff question exists in the party is a matter which the most recent utterances of Democratic opinion, as found in the resolutions of State conventions, leave in serious doubt. We took occasion during the convention season last year to point out the equivocal nature of the tariff resolutions adopted by the conventions in the leading middle States. The more important of these, with the exception of New York, declared in favor of "a tariff for revenue, so adjusted as to encourage productive interests at home." Among the States which thus declare in favor of combining the ends of revenue and protection are found the important States of Ohio, Indiana, Pennsylvania and Virginia. The pivotal State of New York has made no declaration either for or against protection. A very different condition of things prevails in the great agricultural States of the west, such as Texas, Kansas, Illinois, Iowa, Michigan, Minnesota and Nebraska. The general sentiment in these States is in favor of the reduction of the tariff to a strict revenue standard. It must not be forgotten, however, in any estimate as to the preponderance of free trade or protectionist opinion in the party, that the middle States mentioned are of much more importance to the party in a political way than are the others mentioned.

Speaker Carlisle's election then may be found to have less immediate significance than has been claimed for it in some quarters. In particular, the appointments made by him upon the Ways and Means Committee may turn out to be by no means an unfailing index as to the ultimate action of the House of Representatives. In truth, the Speaker is confronted with very serious obstacles. Even if the House could agree upon a bill, it is not altogether likely that it would meet with the concurrence of the Senate and the President, who are of the opposite political party especially in view of the fact that the presidential election is so near. But it is not entirely certain that the House will be able to agree upon a bill. Mr. Carlisle's chief competitor for the speakership—a man of much weight and influence among his associates—is a steady advocate of protection and may be counted upon to resist strenuously any very decided advance in the direct on of free trade. This he will be enabled to do on grounds of political expediency, owing to the fact of the approaching presidential election. A similar reason, on the other hand, may not inconceivably influence the free-traders to indavor to carry through a more extreme programme than they would otherwise attempt, and in this way the breach may be widened. It is understood that Mr. Morrison's plan contemplates a horizontal reduction of duties. This has the appearance of an attempt to secure the vote of the Western free trade States even at the risk of losing the delectable Eastern States. It is reasonably certain that this plan will be opposed by Mr. Randall, and it is difficult to see how it can be carried through if he is firmly supported by those in sympathy with him. On the whole, the immediate outlook appears to be, as has been suggested by our Washington correspondent, rather for a period of congressional discussion upon the tariff than for actual legislation of a general nature regarding it. The conditions referred to, however, are not such as to preclude combinations by which legislation affecting special interests may be carried through, and it is not improbable that special tariff legislation of this sort will be enacted in a number of instances.

Howell Mountain.

W. A. C. Smith, the St. Helena banker, is laying the foundation for a splendid vineyard at his Howell Mountain place. He intends to plant sixty acres to vines this season, nearly one-half of which has already been plowed. Among the varieties that he will set out will be 10,000 Riesling of different grades, 6,000 Burgundies, 4,000 Carignanes, 4,000 Mataros, and many others. He had about a half dozen acres in old vines when he bought the place some time ago. His entire tract comprises about 265 acres, and he has cleared nearly 70 acres since he came in possession. A large quantity of Hercules powder has been used on the place lately to blow out stumps and bring order out of chaos. There is no new vineyard anywhere in the country that reveals a greater amount of activity, and within five years the Professor expects to have the model vineyard of Napa county, if energy and persistency can achieve that distinction. He is putting almost every inch of his cultivated ground to thorough use. At the distance of every third vine he expects to plant a fruit tree, consisting of either Hungarian or French prunes, apricots, oranges, or some other desirable selections. He has already secured the most of his young trees from the Tuman nursery, and will commence setting them out in a few weeks. Howell Mountain is evidently looming up as a promising region for the growth of choice vines and fruits, and with its magnificent climate we may expect to see it a region of choice rural homes in a few years.—*St. Helena Times.*

We will mail free, to any person sending us the name of two new subscribers with their subscription in cash ($5 dollars) a handsome copy, bound in board and cloth, of

THE WINE PRESS AND THE CELLAR.

BY E. H. RIXFORD.

For press notices see advertisement in another column.

ANOTHER VITICULTURAL REPORT.

By the courtesy of the Hon. Geo. West and Secretary Wheeler, of the State Viticultural Commission, we are this week enabled to give our readers the former gentleman's report.

We have not yet received from Commissioner Blowers the conclusion of his report, of which we published the first portion last week.

COMMISSIONER WEST'S

REPORT FOR

SAN JOAQUIN DISTRICT.

STOCKTON, Jan. 15, 1884.

To the Board of State Viticultural Commissioners:

GENTLEMEN:—Of the six counties comprising my district, but one has, in the past two years, made any material advancement in viticulture. This one is Fresno.

In the immediate vicinity of Fresno City there are about 2,700 acres of wine grapes and at least an equal acreage of raisin grapes, although the raisin vineyards are planted in such small plats that it is almost impossible to obtain an accurate estimate.

The first planting was made by Mr. Eisen, in 1872, and more or less has been done each succeeding year, although most of the vineyards have been put out in the past four years.

The principal wine vineyards are those of Messrs. Barton, Eisen, Eggers, Kirby, Woodworth, Maltee & Denicke and the Fresno Vineyard Co.

The Barton vineyard contains 500 acres and is the largest in the district. The Eisen, Eggers, Maltee and Fresno Vineyard Co.'s vineyards each contain over 300 acres. These vineyards are planted chiefly in Zinfandel, Charbono, Malvoisie, Feher Zagos, Burger and Blau Elba, although a considerable acreage of Trousseau, Mataro, Grenache, Carignan, Folle Blanche and Sauvignon has been put out by Mr. Kirby, and Messrs. Maltee & Denicke. 300,000 gallons of wine were produced in 1882; 200,000 by F. T. Eisen and the remainder by the Eggers and Trochek wineries. In 1883 a considerably larger amount was produced, five wineries being in operation, those of Mr. Robert Barton (E. Nored, Superintendent) and the Fresno Vineyard Co. being added to those heretofore mentioned.

Of the raisin vineyards, the most important are those of Messrs. Butler, Goodman, Forsythe, Pew (Prof. Eisen, Supt.), Hinds & Rose, White, North and Miss Austio. In addition to these, there are many small vineyards situated in the various colonies surrounding Fresno, comprising in all, probably, 2,000 acres.

These vineyards are planted almost exclusively in the Muscatella Gordo Blanco, and from them a raisin has been produced by Miss Austin and Mr. T. C. White which will compare favorably with any produced in the State. The climate of Fresno, with its dry, warm nights, seems peculiarly adapted to the curing of grapes, and I believe she is destined to be one of the largest raisin producing counties in the State.

At Madera, 25 miles north of Fresno, 400 acres of wine grapes have been put out by Messrs. Doyle & Minturn, Stockton and the Madera Vineyard Co., the varieties planted being the Zinfandel, Folle Blanche, Grenache, Trousseau, Mataro, Verdal and Sauvignon. None of these vineyards have come into bearing.

At Minturn Station, near the northern boundary of the county, 300 acres were planted last season by West & Minturn and J. W. Minturn; the chief varieties being the Folle Blanche, Colombar, Prolific, Trousseau, Charbono, Mataro, Chauché Noir, Verdal, Crabb's Black Burgundy and Feher Zagos.

The productiveness of Fresno vineyards is something almost incredible to vine-growers in other sections of the State. On the Eisen vineyard, Zinfandel vines two years old have produced six and one-half tons per acre. The growth of these vines, however, was forced by seepage from the canal, and the average crop of a large vineyard would not be over two or three tons per acre for the third year.

It was formerly considered necessary to irrigate these vineyards in the summer; but now most of the growers irrigate only in winter and spring, believing the true principle of irrigation to be simply to supply the lack of a sufficient rainfall. Some vineyards have not been irrigated since planted. In the Butler vineyard can be seen what continued irrigation will do for a country, as it has never been irrigated, while the land adjacent to it has been flooded for years, and although this vineyard, as I said before, has not had a drop of water artificially, it is as thrifty as any in the county. In the vicinity of Fresno City it is considered necessary to level land before planting in order that the vines may be more readily irrigated in rows. At Madera and Minturn, however, where there is a more abundant supply of water in the winter, the land is flooded by a system of high checks, or levees. This system is also used around Fresno to a certain extent, but the land is generally levelled.

The Fresno vineyards have heretofore been grown without staking, but the Fresno Vineyard Co. staked 100 acres last summer, and Mr. Barton and others will follow them example next season, believing that the quantity and quality of the grapes will be improved thereby.

It is still considered advisable to grow Muscats near the ground.

I am sorry to say that pests of various kinds have appeared in Fresno this year, and have done considerable damage. The tobacco worm appeared in vast numbers in the Washington Colony and cleared many acres of vines of their leaves. The fruit being exposed to the hot sun was, of course, ruined.

Killing them by hand was the only means found for checking them, as many as 200 worms from one to four inches in length having been killed on a single vine. This pest will probably not appear often and is consequently not so much to be dreaded as the yellow mite, which has appeared in some of the vineyards east of Fresno and threatens to become a formidable enemy to the vigneron.

The common road beetle appeared at Madera in July of this year in the new role of a vineyard pest and destroyed nearly forty acres of young vines. Nothing was found to check their progress, the strongest insecticides proving entirely ineffectual. Whether or not this beetle will appear again is simply a matter of conjecture, but it is certainly a pest much to be dreaded in young vineyards, although older vines were left untouched.

The thripp, or vinehopper, did considerable damage, but no more than in other parts of the State.

NOW READY!

AMPELOGRAPHY.

Varieties of Vines Known in California and Choice of Localities.

WINE, RAISIN AND TABLE GRAPES.

BY C. A. WETMORE.

CHIEF EXECUTIVE VITICULTURAL OFFICER.

Reproduced and revised from the S. F MERCHANT, of Jan. 4th and 11th, 1884.

FOR SALE AT THIS OFFICE.

Single Copies . .. 25 cts

Clubs supplied at $15.00 per 100.

San Gabriel Wine Co.,
SAN GABRIEL, Cal.

In regard to the planting of [illegible] or cuttings. Fresno vinegrowers are of one mind—most of them having lost from thirty to fifty per cent of their last year's planting of cuttings.

The coming winter will see great activity in the work of planting in Fresno, and it is safe to say that by May 1st, 1884, the county will boast of 7,500 acres of vines.

Merced county has, perhaps, 1500 acres of vines, mostly scattered along the banks of the Merced river, but not much location is being paid to the business. The new canal being built by Messrs. Crocker and Huffman will bring a great deal of land under irrigation. This will give a new impetus to the vine and fruit growing industry and lead to the subdivision of some of the great grain ranches into small fruit farms. The largest vineyards in the county are those of Messrs. Peters & Miles, proprietors of the Babach Plantation. The chief varieties planted are the Folle Blanche, Sauvignon, Prohibe, Trousseau, Mataro, Verdal and Zinfandel.

These gentlemen will make large additions to their vineyards this year, and it is to be hoped their example will be followed by other of the great land owners of the county. Stanislaus county, like Merced, is doing little in the viticultural line. The county contains much fine grape land, and all that is needed is for some one to start the boom. The only vineyards of importance are those of A. Schell & Co., of Knight's Ferry. Concerning Tulare and Kern counties, I can say nothing, as I have received no answer either to letters or circulars sent there.

In San Joaquin county very little planting has been done in the past two years, not over 300 acres having been put out. Why our farmers take so little interest in the business is something inexplicable to me. We have hundreds of thousands of acres of land suitable for grape growing and less than a thousand acres of vineyard. I can safely say that there is not an acre of good vineyard in the county which, if properly cared for, would not produce $100 per acre annually, and the small vineyards of table grapes in the immediate vicinity of Stockton produce twice that amount. Notwithstanding these facts (which are easily proven to any one) our farmers continue to be satisfied with a profit in grain of from ten to twenty-five dollars per acre. What is considered the best grape land in this county is a clay loam and third with marl. On this land, from the Zinfandel and other similar varieties, 2,500 gallons per acre of deep colored red wine has been produced.

Some seem to fear that the wine business will be overdone. That the market for an inferior wine can be overstocked no one can doubt, but when such a time comes, I believe that the market can be materially relieved by the distillation of high proof neutral spirits from our muscadel wine. This could be exported, and would undoubtedly be superior to wheat spirit for the purpose for which it is used abroad.

The demand for a good light wine is unlimited, and hence it is of prime importance that the greatest care be exercised in the selection of varieties adapted to the soil and climate of the section in which the vineyard is to be planted. In many places there are no old vineyards to judge from, and the only thing to be done is to compare your climate with that of Europe, and, finding a section of country corresponding to yours, to plant the vines grown there.

There is, of course, risk even in this, but it is the plan I am following in my plantations in San Joaquin, Fresno and San Diego counties, and I believe it to be good. Many vineyards are being planted in the State which will prove failures, or rather will have to be grafted over into other varieties.

I would recommend the planting of resistant vines which can be grafted into other vines when it is proven beyond doubt what are the best varieties to grow.

What I have said regarding the planting of cuttings in Fresno county does not apply to San Joaquin, as I have obtained as good results from cuttings planted in this county as from vines.

When the grain farmers of this district gain more confidence in grape growing as a safe investment, there is no reason why this should not be the greatest raisin and wine producing district in the State, as we have countless acres of good land and splendid facilities for irrigation where irrigation is needed.

Respectfully submitted.

GEO. WEST,
Commissioner of the Viticultural District of San Joaquin.

AMERICAN GRAPE GROWING AND WINE MAKING.

We have received from the Orange-Judd Publishing Company, of New York, a copy of the second edition of Professor George Hussmann's work on American Grape Growing and Wine Making. The new and enlarged edition is a handsomely printed volume, bound in cloth, of 301 pages. There are some sixty pages of new matter, mainly referring to California grape growing and wine and brandy production, the writer having had excellent opportunities of enlarging his experience during his residence on this coast. The new portions also deals largely with California viticulture. The chapter on Gallizoning is retained, probably because it is so much practised in other States. In California, any wine maker or dealer who was known to have recourse to it would be severely condemned by the whole trade. We notice also that some errors and misstatements in the first edition have not been expunged; probably because the earlier chapters had been stereotyped. The book is, however, much more valuable to our California vignerons than its predecessor, owing to its dealing more fully with topics which interest them. The Professor has taken an active part in viticulture in this State for two or three years, and his views and recommendations will probably lead to a considerable demand for the book on this coast. The added chapters, of course, increase its value very much to grape growers and wine makers in other States who wish to gain reliable information on what we are doing on the Pacific Slope. There is nothing in the book to show at which of our San Francisco book houses it can be purchased, or at what price, but we presume that it can be found on the shelves of some of them. If not it can be obtained by addressing the author, Talcon Vineyard, Napa.

That there is no more sense in adopting the Eddaic diet than there would be in adopting Eddaic garments. The demands of civilization prevent a return to barbarism in feeding as much as in clothing.

That Brother Holt has adopted the quarto form for his valuable journal. He is making a splendid paper of the *Press and Horticulturist* and doing a noble work for the horticultural and viticultural interests of the southern counties.

THE WINE MARKET.

We learn from good authority that there is not a cellar of merchantable wine, except such as are already reserved for jobbing, for sale in California. The dealers have secured every thing that is in sound condition. If the crop had been 2,000,000 or 3,000,000 gallons more, it would have been taken at good prices. This shows that the outlet for California wine is steadily increasing.

For Exports and Imports, see Merchandise Markets.

THE LAND OF PROMISE.

(From San Diego Sun.)

THE EXPLORATIONS OF THE PENINSULA YESTERDAY—SUMMER BRILLIANT PROSPECTS—ETC., ETC.

Mr. Charles A. Wetmore chartered the yacht Restless, Captain Niles, on Sunday, and accompanied by Dr. T. C. Stockton, Mr. Lloyd C. Bancy, and Robert B. Campbell proceeded to make a scientific exploration of the Peninsula, with a view to its immediate colonization. The first landing was made on the northern "island," where samples of the soil were procured to be forwarded to the University of California for analysis.

The grant known as the Peninsula, and sometimes as "the Islands," lies immediately opposite the city of San Diego, forms the bay, and including nearly five thousand acres of land, extends from the head of the bay to the mouth, a distance of about twelve miles. At the former place is a body of about eight hundred acres of good arable land, and at the latter are two bodies of land, almost Islands, connected by a narrow sand dune. On the bay side and lying between the two islands is Spanish Bight, a body of shallow water one and a half miles long and one third wide. The grant from opposite the city to the entrance of the bay comprises the entire water front to ships channel. It is the only Spanish grant ever made and patented to ship's channel. Along the sides of the two islands opposite the city, the channel runs very close to the shore and wharves could be constructed with little cost, to accommodate the

SHIFTING OF THE PACIFIC COAST.

The northernmost of these so-called islands contains about one thousand, five hundred acres of good land, and the next, or southern, about one thousand. The altitude of the land above high water mark ranges from about eight to twenty-five feet, apparently. The soil throughout is uniformly of a reddish, sandy loam, which has growing on it all kinds of shrubs that are common to the coast and mesa land, but in greater luxuriance than on the main land, the vigor and density of vegetation and brush indicating, apparently, that the sandy loam contains sufficient food to sustain plant life. While the soil appears to be very sandy, yet it is found to be mixed everywhere with shells, which accounts for its great fertility. No wells have ever been sunk on the premises, except very near the edge of the bay, and the water was very brackish. It is probable that if a well was sunk further from the beach, better water might be obtained at a depth of from fifteen to twenty feet. If, however, the surface water should prove to be too brackish for domestic purposes, no one doubts the practicability of obtaining good fresh water by boring from one hundred to two hundred feet. Many believe that

FLOWING ARTESIAN WELLS

Could be easily obtained on these lands, and, to sustain their opinion, they point to the presence of two fresh water springs flowing from the sand on the ocean side, which, they think, indicates an artesian flow of water under the bay, which may be tapped by boring on the islands. Underlying the land there appears to be no gravel or cobble stones, so far as any present explorations can be made. In traveling a distance of five miles, we found only one small pebble, weighing half an ounce. The consistency of the soil, while very sandy, was still quite compact and firm, showing that it contains enough loam and vegetable matter. In examining the banks along the ocean and bay, the small roots of wild plants and bushes were seen to penetrate everywhere to a considerable depth; the small surface roots filled the soil from a depth of from three to four feet, while the larger roots, undoubtedly going deeper, were not apparent at the banks. The consistency of the soil is such, that where the banks were worn away by the sea and waves, the roots remained standing perpendicular. No hard pan was to be found anywhere, the same character of sandy soil continuing to the surface water, but being more mixed with loam and vegetable mold near the surface.

Several attempts have been made in past years to cultivate small portions of the land, with varying success. Only crops of barley and potatoes have been attempted, to our knowledge, both of which have sometimes given profitable results, but at other times, owing to dry seasons, failures have been recorded, as everywhere else.

MESSRS. WETMORE AND WEST,

who have repeatedly examined the islands, are of the opinion that grape vines would grow and bear luxuriantly, without irrigation, and that those varieties should be selected which are known to succeed best near the sea, such as Bordeaux claret grapes, which in the Medoc, near Bordeaux, are cultivated in the sandy loam, on a narrow peninsula having salt water on both sides, and where they are constantly subjected to a sea coast climate, far more harsh than is ever experienced in San Diego. Moreover, so far as climate is concerned, and the influence of sea breezes, we have only to look at the vines growing at the La Punta and in Tia Juana Valley, far more exposed to the sea breezes than they would be on the islands, where there is a certain protection caused by the elevation of Point Loma, toward the west and northwest. It seems, therefore, that varieties of vines, properly selected, could not fail to succeed well, on these lands, and every analogy of soil and climate points to this peninsula as the true

MEDOC OF CALIFORNIA.

If these predictions should prove correct, San Diego may look in future to this peninsula, to make the wine trade of Southern California famous, and to produce a revenue not less than half a million of dollars annually. Experience shows, also, that the lemon succeeds best near the sea, in this State and county, so also the guava. With these as staple products, the cultivation of these islands might be made to add largely to the wealth and population of San Diego. There is not the slightest reason to doubt the practicability of obtaining by boring all the water that may be needed to irrigate the lemon and guava, and to enable those who might reside there to surround themselves with tropical, as well as semi-tropical verdure. There would be found less frost than even on the mainland, where we now successfully grow and fruit the banana. Should these islands at some time become settled and cultivated, as we have suggested, the most attractive homes in America might be created there, surrounded with everything that would tend to prosperity and a life of true pleasure. With these islands well cultivated and populated lying, as they do immediately opposite this commercial port, it would require but a small flight of fancy to imagine the placid waters of our beautiful bay reveling in Venetian delights, the air glad with laughter, and the scenery emerald with the eternal

VERDURE OF THE TROPICS.

Again, added to those agricultural and home advantages, would be the facilities for transportation, which the location affords, the ocean steamers being enabled to lie peacefully at the very edge of the vineyard, and under the lee of a winery.

Dr. T. C. Stockton, who was one of the party, was the first to discover the immense advantage that might be realized by utilizing the tidal flow within the Spanish Bight, which divides the two islands. Here is a tidal flow of from three to five feet in depth, over an area almost land locked, one and a half miles in length and one-third mile in width. The entrance showing only five feet of water at low tide, facing upon the placid bay, free from all surf and protected from all storms, could therefore be easily dammed and its powerful waters thoroughly controlled. Situated as the Spanish Bight is, next to the ship's channel, the opportunities for successful manufacturing could not befound better or more economical anywhere in the world. Dr. Stockton is to be therefore credited with having suggested a plan, that as sure as the tides flow will pour fortunes into the lap of San Diego.

This property has long been controlled by capitalists, whose only thought was the immense value the land would realize if purchased by the government as a naval station and naval academy for the Pacific coast. It is certain that a portion of the northern island lying opposite Ballast Point will be needed by the government for the erection of fortifications and the establishment of barracks. Moreover, for the complete protection of this harbor, no doubt, there will be required also

SEVERAL BATTERIES

To be located along the ocean side of the peninsula. But notwithstanding these military advantages, only a small portion of land will be needed for government uses, and we hope sincerely that some capitalists will appreciate what we have said, purchase the property and devote it to the purposes it seems to have been made for.

After the exploration the party re-entered the Restless, and after indulging in a bountiful lunch, a trip to Ballast Point and back was indulged in, and thus ended a very pleasant day which those present will long remember.

Viticultural Reports.

There are now ready for distribution to the vine-growers of California, three appendices to the Second Annual Report of the Chief Executive Viticultural Officer, Mr. C. A. Wetmore, which appendices—being translations from the French—are printed in three separate pamphlets, as follows:

APPENDIX I—The Chaintre system of pruning and conducting the vine. APPENDIX II—Practical manual of pruning, as practiced near Bordeaux. APPENDIX III—Different methods of grafting the vine.

These appendices have been printed by the State and are profusely illustrated with wood cuts.

Any of these appendices may be had by applying to the Commissioner or Inspector of your district, or by addressing the Secretary of the Viticultural Commission, No. 111 Leadesdorff street or the MERCHANT Publishing Company, inclosing postage stamps to the amount of two cents for each Appendix required.

One mill alone, the Pacific Mills, in Massachusetts, has a floor area of over forty acres, giving employment to more than 5,000 persons, with a monthly pay roll of $160,000. Hence we believe that we will have proper protection.—*Idem.*

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. Whereas a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 made, which are heeled in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $4.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.
NAPA, CAL.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:— FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Scheffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in reapect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh California Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

VICTORIA—Per same—13 bdls skins, 238 bdls hides, 7 cs miscellaneous, $21,565 treasure.

Meat Market.

Beef is firm at quotations, with a light supply. Mutton is higher and in moderate supply. Hogs are a shade higher, owing to decreasing receipts Those arriving are freely purchased by packers. Following are rates for whole carcasses from slaughterers to dealers.

BEEF—First quality, 10@11c; second quality, 8½ to 9c; third quality, 8c@8½c ₱ lb.

VEAL—Large Calves, 9½@10c; small ones, 10@12½c ₱ lb.

MUTTON — Wethers are quotable at 5½@6c and Ewes at 4½@5c ₱ lb, according to quality.

LAMBS—Quotable at 6@6½c ₱ lb.

PORK—Live Hogs, 6@6¼c for hard grain hogs on foot, dressed do 8@8½c.

TOBACCO MARKETS.

SAN FRANCISCO. Cigar manufacturers and dealers complain of a slackness in orders from the country probably due to the anxiety about rain, but having confidence that all will come out right, are meanwhile turning their accustomed quantities.

The output of manufactured tobacco is also light probably from the same cause.

In leaf there is some activity, especially in good Havana and Sumatra. There is still a little business about binding, 1882 Pennsylvania, though its quality being good, it will come out all right a little later.

The stock of leaf in this city is good and fully equal to all requirements for the coming year.

We notice a change in the old established firm of Falkenstein & Co., of San Francisco. Mr. Moses Meyerfeld, its representative in California for the past thirty years, retires. Mr. Meyerfeld, established this firm in 1853, and has since that date enjoyed the confidence and good will of the trade of this entire coast. His relations both with customers and competitors have always been pleasant, and few men during so long a time can show a cleaner record. We join with all who know him personally and appreciate his sterling worth in good wishes for his future.

The Seal Rock Tobacco Company has levied an assessment of $100 a share, delinquent if not paid before February 15

(U. S. Tobacco Journal.)

NEW YORK, January 12.—Notwithstanding the undecided state of the tariff question, (since decided against the importer. Editor MERCHANT) and the prevailing dullness in cigar manufacturing circles, the business in the market was not a small one. It was by no means calculated to arouse enthusiasm and make prices take an upward flight, but in a trade wherein but a fortnight ago utter demoralization existed, even a business exhibit such as we give to-day is worthy of special mention and consideration.

Gradually the leaf trade solkers up in regard to the Sumatra question. The fuming and fussing about the Secretary's decision is giving way to calm reflection, and to-day an almost entire revulsion of feeling is exhibited on this question. A petty review of the situation by one of our leading leaf merchants forcibly and tangibly illustrates by what means Sumatra tobacco can be barred out from our markets without appealing to Secretaries or Congress. If growers will now follow the advice given and plant more of the but Havana seed, the leaf trade of this country will constitute itself the tobacco market of the world. There is no experiment necessary. Wholly grown from Havana seed sold rapidly at prices profitable both to growers and dealers.

The main sales of the week comprised '82 Pennsylvania and Connecticut Havana seed. There are hardly any other growths of Havana seed in the market, and as the next best thing available is '82 Pennsylvania, choice holdings command ready attention.

(New York Tobacco Leaf.)

NEW YORK, January 12th.—The effect on the scarcity of Kentucky and Virginia tobacco and consequent high prices is already shown by the French Regie, which for the original quantity of about 6,000 bbls this has substituted Hungarian tobacco. Moreover, now comes the news from Manheim, Dec. 12, that the Italian Regie has purchased 60,000 centals old crop Alsatian tobacco, no doubt as a substitute for Kentucky wrapper leaf.

The sales since January 1 have been 166 hhds, at prices from 7@11c.

(Western Tobacco Journal.)

CINCINNATI, January 12th.—To say that prospects are in every way favorable to good crops and an active trade in Leaf Tobacco during 1884 is indulging in no idle fancy, but is warranted by existing and prospective conditions.

In the first place, stocks, both at home and abroad, show up very meagerly, and, in comparison with last year, being a reduction in the markets of the United States (that is, those markets which usually report stocks) of fully 275,000 hhds, or about 30 per cent. Besides, much of the stock held January 1st was for manufacturers, and is therefore out of the market, and should not really be considered in the stock account. For instance, it is reported that five-sixths of the St. Louis stock is held for manufacturers. But, of course, in the other markets there is nothing like this proportion held by manufacturers. Probably in Cincinnati, Louisville, Richmond, New York and Baltimore, though, there is one-third to be held, either for manufacturers or exporters. We think it safe to say that there is not 500,000 hogsheads in the eight Western and four seaboard markets for sale. Undoubtedly there is a material reduction also in all the markets whose statistical condition can not be learned.

English cut stone brands, in round lots	3 15	3 00

COAL—

Imports, 4207 tons Pacific Coast, 9811 tons Foreign and Eastern.

Although there have been light arrivals of Coal this week, yet quotations remain unchanged, and will probably remain so for a few weeks more, until the stock on hand shows a decrease, which it never is early will, within sixty days, or ninety days at farthest. When 75 per cent of the present Coalers afloat will have arrived, and the quantity then en route will be merely nominal.

The Coast Collieries will reap a harvest this year, as our market will readily take their entire output without unsettling prices Large contracts have already been made for Sanaimo Coal at full figures.

Our light rain-fall this month has become a material fact in maintaining prices in all Foreign Coals the entire year.

Importers' prices of coal, Foreign and American, to arrive: Australian, $8 50 @ $8 75, Liverpool Lehigh, Best $8 25, West Hartley, $8 75 @ 9 00, Scotch Splint, $8 | $8 75; Scotch Steam, $7 75 @ 8 00, Lump Lehigh, $13 @ 13½; Egg Hard, $14 @ 14½; Cumberland, bulk $12½ @ 13. Retail prices are as follows: Australian, $8 25; Liverpool Steam, $8 00, West Hartley, $9 00, Scotch Splint, 9 50, Cardiff, $8 00; Lehigh Lump, $13, Cumberland, bulk, $11 50, Egg Hard $11 50

NAVAL STORES

Imports, 1,000 bbls rosin, 130 bbls pitch, 1051 bbls spirits turpentine, 100 bbls tar, 1000 cs turpentine. Exports, 45 cs turpentine

We quote, Carolina rosin, $13 @ 16 ₱ bbl for No 1, 50c for extra fine, Pitch, $2 @ 2 50, Tar, $6 @ 6 50, Spirits Turpentine, 58 @ 59c, Oakum, $4 00, for oakum, California, extra do, $4 50; and $4 50 for Eastern ₱ gale; Spirits Turpentine, 60c ₱ gal; Rosin, Resin B, $3 ₱ bbl, Chains, 5½ @ 10c ₱ lb, Wire Rope, heavy, 9½ @ 12c, light, 20 @ 30c, Yellow Metal, 21 @ 23c.

OILS—

Imports, 42 cs 118 bbls oil. Exports, 10050 gls naphtha, 35 cs oil, 40 cs spirit oil.

Business in oils may be said to be very good, sympathizing as they do with paints, which as elsewhere notes are moving well.

We quote, California Castor Oil, No 1, $1 25 ₱ gal, No 2, $1 00 The Pacific Oil Work's list for linseed, 65c ₱ gal for boiled; 62½c for raw in 100 bbl lots. We quote Eastern linseed oil, 61½c, winter strained oil, 95c, in bbls; Cocoanut Oil, in bbls, 57½; in kegs and cases, 60c ₱ gal; Coast Whale, 67½c; Arctic Whale, 60c; Cal Neatsfoot, 85c; Eastern do, 90; Naphtha, 20c; Red Oil, 55½; California olive Oil, $1 ₱ gal or $12 ₱ doz.

PAINTS—

Imports, 846 cs paints, 24 bbls varnish, 5 bbls whiting Exports, 1143 cs paints.

Bus ding being active, business has continued very good, indeed, it has been much better than was expected at the season. The question of rain in this, as in other trades, is all important.

We quote White Lead 6½ in ton lots; and 6¾ in 5 ton lots, Zinc Whites, 6, Ochre, Yellow, 6¼ in 5 ton lots; Ochre, ground, 5 to 6 cts; Venetian Red, 2 to 3c; do, in oil, 5 to 6c; Chrome, dry, 18 to 30c, do, in oil, 18c; Red Lead, 6 cents.

PETROLEUM—

Imports, 1200 cs coal oil. Exports, 360 cs coal oil.

Business remains very fair, without any marked improvement. There is no speculation whatever in Petroleum, and has not been for over a year. As the days lengthen the natural consequence is a decline in the consumption of Illuminating Oils. Still business is moving along, without change in prices.

We quote California, S. W., 110 deg, cased with bankers' barrels, 17c per gal; plain cases, 16c; bulk, in just bbls, 15c per gal.

PROVISIONS—

Imports, 132690 lbs bacon, 2 cs 48371 lbs hams, 1 bbl 32670 lbs lard, 6 kgs pork. Exports, 295 lbs bacon, 300 lbs hams, 3329 lbs lard, 1 kg pork.

There is little doing here and prices are steady, but as there is a much firmer tone East, and some advance, a corresponding action may be expected here

We quote, California hams, 13½; Eastern, 15½; Over Cheshire hams, 15½ @ 16c; California bacon, 11½ @ 13½c; California rotered bacon, 13½; extra clear sides, 13 @ 12½c; California

shoulders—mess pork, $20 per bbl; prime mess $18; clear pork, $21 per bbl; extra clear do, $22 per bbl; pig pork, $21 per bbl; mess beef, $13 50 per bbl; extra mess beef, $15 50 per bbl; family beef $16@2 per bbl; Eastern refined lard, in tes, 13¼c per lb; California refined lard, in tes, 11c per lb, 10s, 10½c; 5s, 10¾c, flanner lard, 10s, 12½c; 5s, 12¾c; 3s, 13c.

QUICKSILVER—

Quicksilver is in light demand at 31@31½.

RICE—

Imports, 3130 bgs. Exports, 38248 lbs.

There is little better demand for Mixed and No 1 Chica and no change in prices. Hawaiian Island has advanced to 5c on account of a large Eastern demand.

We quote Mixed $1 10@—; No 2 Chica $1 00 @1 70, good No 1 $5 25@5 50c; Extra No 1 $5 90 @6 10, Hawaiian $4 75@5 00

SALT—

Exports, 566 tbs.

Business continues dull, and no increase in the demand is expected for the next 30 days.

Liverpool fine we quote at $1 80@2 50@ton. California, $9@10 for Bay; do crystal, $10@15 Carmen Island, fine, $16@22, do coarse, $12, do 3 half ground, $9@14.

SOAP—

Imports, 174 lbs. Exports, 35 lbs

Trade has not improved. The continued dry weather is, unnecessarily, as we think, restricting business, and purchasers are slow, dealing sparingly, or filling up their stocks to the usual quantities.

We quote: California Castile, Mottled, 8¾@12c; White, 16, French Castile, Mottled, 11@12¾c; White, 17@20, California Pale and Chemical Olive 5¾@7c; Washing Powders, 8¾@12½ per gross.

SPICES—

There is nothing in this branch of business of interest to report. Trade remains fair with no decided improvement in volume or prices.

We quote: Black Pepper, 15@16c; White Pepper, 22@—c; Allspice, 12@15c; Cloves, —@22½c; Cassia, Sydney, 16@17c; Cinnamon, —@40@45c; Ginger, 8@15c; Nutmegs, 62½@65c, Mace, 60@62½c, Borneo Ginger, 16@18c

SPIRITS—

Imports, 98 cs spirits, 11 cs brandy, 1 cs gin, 5 cs rum, 1936 bbls whiskey, 34 cs liquor Exports, 10 cs brandy, 1 cs whiskey

STARCH—

Imports, 366 bags.

There is but little doing in Starch. There has been some slight demand at unchanged prices.

We quote: Kingsford's Pure Starches 8¾@— ₱ lb, Corn and Silver Gloss, 8¼@—; Pearl, 7¾@; Pure Starch, in barrels, 7¾c; ground and Wheat Starch, 8¼c, in barrels; Silver Gloss, in barrels, 9¼c.

SUGAR—

Imports, 21,445 bgs raw, 71 bbls, 36,060 lbs refined Exports, 74,700 lbs refined

The local demand is good. The New York market is firm, but unchanged. By telegraph we obtain the following quotations A Crushed, 8¾@8¾c; Granulated 7¾ Standard A, 7¾c

Grocery grades of hard sugars are selling freely at prices ranging from 5¾@6½c. The sales during the week have been 1500 bags at 6¾ to 6¾ and 694 kegs "Dutchmoon Mill" at 5¾ cents.

We quote local refinery rates, prices subject to change without notice.

(A) Pat Cube Sugar, in bbls, 10¾c; (A) Crushed Sugar, 10¼c; Extra Powdered sugar, in barrels, 10¼c; Fine Crushed sugar, in barrels, 10¼c; dry Granulated sugar, in barrels, 9¾c; Extra Granulated sugar, in barrels, 9¼c, Extra C, 8¾c; Golden Yellow sugar, in barrels, 8¼c; D sugar in barrels, 7¾c; Extra Fine Powdered, in bbls, 11¼c; Confectioners' (A), 10c; El Dorado C, in barrels, 9¼c; Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ¼c, and boxes, ¼c, more for all kinds.

TEA—

Imports, 6 pkgs. Exports, 72 lbs

WINES—

Imports, 697 cs foreign, 400 bskts champagne, Exports, 122 cs, 98 gallons native w ine, 10 cs champagne.

PRODUCE MARKET.

The Imports and Exports given below are compiled from last Thursday morning to Wednesday evening of the current week.

The Produce market is in a demoralized condition, so far as concerns Wheat and Barley Exporters of Wheat have, as a general thing met with such losses during the current season that they have almost entirely withdrawn from the market. Consumers of Barley take only sufficient to meet immediate requirements, knowing, as they do, that stocks are unusually large and that a moderate rainfall would cause a tumble in prices. The European and Eastern Wheat markets have shown a gradual decline since the turn of the year, and the present outlook is far from favorable for a change for the better.

FLOUR

Imports, 812 bbls. Exports, 22,430 bbls.

Receipts, of week, 127,403 qr sks.

Extra, $5 62½@5 90; Superfine, $4 00@4 75. Country ditto, $3 65@4 50. Interior Extra $5 00@5 50 per bbl for jobbing parcels to local consumers; yet parcels for export can be had for less than the figures above quoted

WHEAT—

Imports, 3,829 bgs. Exports, 46,723 ctls

Receipts for the week, 190,962 ctls

The weather, through lack of the needed rains, continues very unfavorable to the growers of wheat in this State, and the feeling appears to be very general that we are to record a specially dry winter, though liberal rains before the clo-e of the month would materially change the outlook, and greatly advance the business interests of both the city and interior points. At many important points, plowing and seeding have been entirely stopped, and the owners of wheat lands are despondent, the future giving little promise of even partial crop.

As noted elsewhere in these columns, shippers are purchasers of only sufficient quantities to meet immediate requirements, the local mills show no disposition to take more than their daily necessities compel In the sample market, $1 65 is the best bid for No 1. Shipping, while holders demand $1 70@1 75. For the Mills, $1 77½@1 80 are top figures obtainable, and only needed parcels are taken at these rates On t'all the speculative element is largely absent, dealers knowing that in case of immediate rains there would be a material decline, while on the other hand, continued dry weather would cause a material enhancement in values. Under these circumstances transactions are comparatively limited, and speculators take advantage of slight pecuniary gains Sales of future delivery yesterday were made at $1 83, buyer season, and $1 72½, seller season.

BARLEY

Exports, 53 ctls.

Receipts of week, 133,25 ctls

In the sample market there is little doing, most of the purchases being No 1 Feed for immediate use, at $1 05@1 07½c. Brewing is a little wanted at $1 10 or1 20 for fair No 2 to good No 1. Bay Chevalier is almost entirely nominal, the best bids being $1 45@1 50 for choice, while holders are not disposed to accept less than $1 50 Sales of No 1 Feed on call yesterday included seller season at $1 01@1 37½, and buyer season at $1 11@1 15¾ ₱ ctl.

BUCKWHEAT—

Receipts of the week, 15 ctls.

Quotations are entirely nominal at $3@3¼ ₱ ctl.

OATS—

Receipts of week, 6566 ctls.

Receipts are light, and stocks on hand are firmly held for full figures. Any attempt to further advance prices would, probably, result in liberal consignments from Oregon.

Market steady. Black, $1 50@1 60, White $1 50@1 90 for ordinary; $1 65@1 75 for fair to good and $1 80@1 87½ per ctl., for choice to extra quality

CORN—

Exports, 28 ctls

California sells at $1 37½@1 50 for White and $1 40@1 45 for Yellow, as to condition, Nebraska sells for $1 40@1 45 per ctl.

Receipts of week, 1125 sks.

RYE

Receipts of week, none

Though stocks in the State are large, the receipts are light, growers showing no disposition to market their crops at current obtainable prices—nominally quotable at $1 25@1 10 ₱ ctl.

MILLSTUFFS—Exports, 2340 ctls middlings. Exports, 137 ctls bran, 101 ctls midstuffs.

Receipts of week, 1280 sks Bran, 3550 sks Middlings, 2262 sks Ground Barley.

There is quite an active demand for Bran on speculative account and sales on Call yesterday aggregated 1100 tons at $14 00@15 20 per ton, seller 1884.

We quote: Ground Barley, $24 00@25 per ton Middlings are selling at $20@22 00 per ton, Wheat Bran, $15 50@16 00 per ton, Oil Cake Meal, $50, old process, and $26 50 new process, Rolled Oats Meal, $6 50@7 00 per bbl; Rye Meal, $5 50 per bbl; Buckwheat Flour, 5c per lb, Pearl Barley, 7c per lb; Eastern Oat Meal, $9 75 per bbl; Cracked Wheat, 4c per lb.

HAY—

Imports, 18 bls

Receipts of the week, 723 tons.

Receipts are fair and the market steady at about the same figures as were given one week since.

Wheat, choice, $13@14; Alfalfa, $7 00 Wheat, $15 00@16 50; Stable, $11 00@15 00, Wild Oat, $15 00@16 50, Cow, $12—14, Barley, $13 50@14 00 per ton.

STRAW—

Receipts of week, 75 bls.

Quotable at 50c@1lc per bale—as to condition.

SEEDS—

Imports, 48 bags Exports, 72 bags

Receipts of week, 16 sks alfalfa, 8 sks mustard

Business dull on account of lack of rain.

Flax quotable at 2c@2½ ₱ lb; Canary, 5c@5½c; Alfalfa, 9c@10c ₱ lb; Timothy, 7@7½c for native and 8c@9c for imported; Mustard, choice Brown, $3 00@3 25 ₱ ctl; White, $2 75@3 00; Hemp, 4c, Rape, 3@3½c

BEANS—

Imports, 50 ctls.

Receipts of the week, 1182 bags.

The boom in Colored continues; prices have advanced. There are but few offering and the stock on hand is small. Whites are stronger. Limas are more in demand because of the dry weather.

Our quotations are, for round lots from the wharf Small White and Pea, $4@4½, Bayos, $3 50@4, Pinks, $3 50@4, Reds, $3¼, Butters, $3 25, Limas, $3¾.

VEGETABLES—

The market is fairly steady. Cucumbers are in light demand We note several changes in quotations.

We quote: Carrots, 25@35c ₱sk, Turnips, 50@65c; Cauliflower, 65@75c ₱ doz; Cabbage, 60@75c ₱ ctl; Garlic, 2@2½c ₱ lb; Celery, 50c ₱ doz; Dried Okra, 25c ₱ lb, Dried Peppers, 15@15c ₱ lb, Green Peppers, 25@50c per lb, Artichokes, 40@50c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1@1 25 ₱ ctl; Marrow Fat Squash, $15@18 ₱ ton; Mushrooms, 8@10c ₱ lb, Cucumbers 50c@$2 00 per doz.

FRUITS—

Imports, 1,838 bnches bananas. Exports, 349 bxs dried fruit, 125 bxs apples.

California oranges, new crop, are arriving freely, though the market is not burdened with supplies, dealers being fully about out of the market. Lemons are a trifle more steady

We quote: Domestic—Apples, 50c@$2 00 ₱ box; Pears, 75c@2 00 per box; Cape Cod Cranberries, $18 00 ₱ bbl; Watermelons, $17 00@17 75 ₱ bbl.

Tropical—Lemons, $6@6 50 per box for Sicily; Limes, $6 00@6 50 per box for Mexican; Bananas, 12@13c per lb; Bananas, $1 50@4 00 per bunch; California Oranges, $2@3 for old and $3@5; for new, Loreto Oranges, $2@6 00@22 50 per ft.

NUTS—

Imports, 10 sks, 45 M cocoanuts Exports, 101 bgs nuts.

Almonds are a trifle lower, while other kinds remain unchanged; there is a fair doing.

We quote: Cocoanuts, $6@6 50 ₱ 100, California Walnuts, 9@9½c ₱ lb, Chili do, 8¾@10c; California Almonds, hard shell, 7@8c, soft shell, 13 @15c, Filberts, 12@16c, Pecan, 12@14c; Peanuts, 5@6½c, Brazil Nuts, 15@16c; Hickory Nuts, 7@8c, Italian Chestnuts, 15@16c.

HONEY—

Exports, 59 cs.

Trade is ruled steady, with an upward tendency. A shipment of 1,063 cases was made during the last week.

We quote: Extracted, 8½c; Extra White Comb 18@20c; White, 13@16c; Dark, 8@10c.

BEESWAX—

We quote 26@30 c per lb

DAIRY PRODUCE—

We quote Point Reyes, 35c; Choice, 31@32½c; Fair to Good, 27½@30, inferior lots from country stores, 17@20, firkin, 20@21c for old and 24@ 27½ for new; Eastern, 15@15c; Pickled Roll, out of market Cheese, California, 16@15c for choice, 14@ 12½c for Fair to Good; Gilroy, in drums, 16@18c, Eastern, 17@18c, Western, 10@15c.

BUTTER—Our continued dry and occasionally frosty weather has made itself felt. This week's quotations, it will be noted, show an advance of 2½c all along the line There is quite a demand for fresh roll of all grades, with but a limited supply to meet it.

CHEESE—The market continues bare, with no change in quotations.

POULTRY—

We quote. Turkeys, Live Gobblers, 24@25c per lb Turkey Hens, 24@25c; Dressed, 27@28c; Young Roosters, $6 00@7 00, old Roosters, $6 00@7 00, Hens, $7 00@7 50, Broilers, $6 00@6 50, according to size; Ducks, $10@12 00 ₱ doz, Geese, $2 25@ $2 50 per pair.

ONIONS—

Exports, 40 ctls.

Receipts of week, 1117 sks

A not very choice lot that arrived this morning fetched $1 75 on wharf. Good quality are very scarce

GAME—

Geese is in good supply with a dull trade, consequently we notice a shading in prices.

We quote: Quail, 1@1 25 ₱ dozen; Hare, $2 00@2 25; Rabbits, small, $1@1 25; cotton-tail $1 25@1 50 ₱ doz, Teal, 75c; Sprigs, $1 50@ $2 00; Widgeon, $1 25, Mallards, $2 50@3 50 ₱ doz, canvas-backs, $4 50@5 00 per doz; common snipe, 50c@ 75c ₱ doz; do, English, $2 50@3 00 ₱ doz; Grey Geese, $2 50@2 75 per doz; White Geese, $1 25@1 50; Honkers, $4 50@ $5 00 per doz.

HOPS—

Receipts of the week, 252 bls.

Market has been improving for the last five days, not only here in this market but the London and New York markets have shown a decided improvement To-day's advices are from 2 to 3c better than one week ago. Quotations, fair to medium, 17 to 19c; choice, 19½ to 21½c.

Imports, 220 bls Exports, 14400 lbs

We quote medium to good 15@17½c; choice, 18 @19c

WOOL—

Imports, 13 bls.

Receipts of week, 146 sks

For Wool market see Wool Department

HIDES, SKINS, ETC.

Imports, 2928 bells hides, 103 bells skins, 534 bags tallow. Exports, 240 lbs tallow.

Dry Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½c; Light Salted Cows and Steers, 30@50 lbs, 8c per lb Salted Kips, 10c per lb Salted Veal, 11c per lb. Salted Calf, 13c per lb.

Dry Hides, usual selections, 18@——c per lb; Dry Kips do, 18@—c per lb. Dry Calf, do, 18@20c per lb.

EGGS—

We quote: California Eggs, Choice Ranch, 27½c per doz, California Inned, 23@24c; Eastern fresh, 25@26

As we anticipated last week, we have now to chronicle a decline in price of eggs. Our supply of local product has been quite liberal and the demand light. Some small shipments of Eastern stock are at hand which sell slowly at this week's quotations which, of course, have to keep pace so much California stock out of market. We look for no immediate improvement in prices.

POTATOES—

Imports, 100 sks. Exports, 210 ctls.

Receipts of the week, 17,625 sks.

The market is in a peculiar position River Reds are actually scarce, and Petalumas are a drug Consumers prefer the Rivers, at prevailing rates, to Petalumas Table Reds and Rose are not to be had

We quote Early Rose 45@55c; River Reds, 35@ 45c; Tomales and Petalums, 85c; Cuffy's Cove, 90c; Humboldts, 90c, Sweets, $2@2 25.

Customs Duties.

Total	$86,904 58

That denying some children education in the primary schools on the ground of want of room while thousands of dollars are spent annually in educating the children of other tax-payers in the higher branches, is an abuse which ought to be reformed.

THE FRENCH PRUNE.

All indications point to a reversal of the mercantile business of San Francisco, or, perhaps more properly we might say an addition to it. Our merchants have hitherto depended large by on distributing on this coast goods purchased on the Atlantic coast or in Europe. Some are now doing so much business in the way of gathering up Californian and coast products and distributing them in the East as their older trade amounts to. In a few years our special productions will be so enormous and their variety so great, that there will be room for five houses in this line where there is now one. The capital will be forthcoming as wanted, and all our agricultural friends need trouble themselves about is to furnish a good article of the best variety of its kind. One of the many dried fruits we can grow in quantities that will supply every grocery in the United States is prunes, and any information that will help the producer is of value.

The Napa *Reporter*, on this subject, says:

"We mentioned the fact a short time ago that a number of our citizens, who had purchased lots in North Napa, would plant French prune trees in these lots, believing that it would prove a profitable investment. Here is what a Los Angeles paper has to say about this industry: "Dried fruits considered, a good prune orchard is bonanza to the fortunate owner who may possess one in the right locality for productive mess, assuming it is kept free from any pest or disease. It is a prolific bearer, and the fruit finds a ready market at highly remunerative prices. As it is marketed only in the dried state, it can readily be kept from one season to another, if necessary, when properly dried. We know one ten-acre prune orchard now eight years old that netted its lucky owner two years ago nearly $8,000, and reached nearly as much last year, and this is not exceptional. Another orchard in mind nets its owner from $250 to $350 per acre upon the trees every year. The above instances are not in this county. Whether such success could be obtained here remains to be determined. We confess that not yet have we seen such prunes here as are grown in some of the northern counties, yet we are young in deciduous fruit growing, but as many prune trees have been set within the past two or three years, the problem will doubtless soon be solved. As it is, a number of instances in this valley and other sections of Southern California have shown that this fruit can be grown with considerable success here. There really need be but one kind of prune mentioned as worth planting; that is the Petite d'Agen or French prune. This possesses all the requisites of a perfect fruit of the kind. The Hungarian prune was formerly largely planted, and the Oregon silver prune is now claiming consideration. The latter is certainly a fine fruit, but is rather large for drying and ought more reasonably be classed as a plum."

Baltimore Canned Goods Exchange.

The regular semi-monthly meeting of the B. C. G. Exchange was held on Monday, Dec. 19th. The report of the Committee on Standard Cans was called up; inquiry was made as to whether the diameters were to be taken as across the body of the can o across the top or cap, and the chairman of the committee said it was across the greatest diameter, which is at the cap or bottom of the can. The question on the adoption of the proposed standard being put, it was carried without a dissenting voice.

Size No. 1 cans—2¾ inches in diameter by 4 inches high.

Size No. 2 cans—3 7-16 inches in diameter by 4 9-16 inches high.

Size No. 3 cans—4 3-16 inches in diameter by 4¾ inches high.

Size No. 6 cans—twice the quantity of size No. 3 can.

Size No. 10, or gallon—6¼ inches in diameter by 7 inches high.

All outside measurements; and this standard shall go into effect on January 1, 1884, but it is understood that the stock of cans on hand at that date can be used after January 1st, although they may differ in size from the standard as adopted by your committee, but no cans made after January 1st shall be standard except for correction to the above sizes.

A. D. BLAIR, Editor.

FRIDAY ... JANUARY 25, 1884

A company is being formed in Honolulu for the cultivation and preparation of ramie.

A new bank has been established in Honolulu by Mr. Claus Spreckels, Ex Governor F. F. Low and Mr. W. G. Irwin. The latter gentleman assumes the management.

PERSONAL.—Mr. A. B. Spreckels and Governor Low returned from Honolulu by the Mariposa.

Mr. Claus Spreckels expects to remain another month.

AMPELOGRAPHY.—This word now coming into use is puzzling some of our viticulturists. It is derived from two Greek words: "Ampelos," a vine, and "graphe." The word was not in use in the United States when the latest edition of Webster was compiled.

The Sheriff of San Francisco kindly invited us to witness the execution of the strangler Wheeler, for which he will accept our thanks. The onerous duties of editing a commercial paper like the MERCHANT leaves us no time for even the most innocent and exhilarating social amusements.

This "partial free trade," "tariff for revenue only," "horizontal reduction of the tariff" discussion is one which vitally affects the future of California, and it is just as important to our welfare that Congress should maintain protection for our wool, wines, fruits and other products and for our infant manufactures as that we should have seasonable rains. An article from *Bradstreet's* in another column gives a very fair and instructive review of the present standing of parties in Congress and of the probabilities. It is worth perusal.

DECEASED.—George Chaffey, Sr., died at Arlington, Cal., on January 14. Geo. Chaffey, Sr., was the father of George Chaffey, Jr., and W. B. Chaffey, of Ontario, who form the firm of Chaffey Bros., which has taken such an active part in the development of the natural wealth of San Bernardino county. He also leaves three other children—two sons (Dr. Ellswood Chaffey, of Ontario, and Charles Chaffey) and one daughter, who lives at home in Arlington. Mrs. Chaffey also survives her late husband. Mr. Chaffey came to this coast about seven years ago, broken down in health, after retiring from a very active and successful business career as a shipbuilder in Canada. He was a man of sterling integrity, and leaves a large circle of friends and relatives to mourn his loss. His remains were interred in a new cemetery being laid off at Ontario, near the foot of the Sierra Madre mountains.

THAT NEILSON ARTICLE.

An article published in the MERCHANT on October 20th, 1882, is attracting a good deal of attention just now in Judge Ferral's court, in the hearing of the motion to quash the indictment against Sarah Althea Hill and Wm. M. Neilson. The article in question gave some scraps of Neilson's Australian record, including his conviction for raising money on a forged document, and also what the judge in whose court he was tried said of him to the writer. It also recounted his imposing on the writer, who was then joint editor of the *Evening Post* with Mr. Henry George, an article about an American line of steamships to run between San Francisco and Australia backed by a large subsidy. Every statement in that article and every inference was false. On the strength of its publication as an editorial in the *Post* and another which Neilson had imposed on the editor of the *Mail* on the same day, Neilson made an attempt to blackmail the firm of J. C. Merrill & Co. The demand was made on the late Mr. Hanks, then a partner in the firm, and it was unsuccessful. When this attempted crime became known to Mr. George and the writer, we naturally renounced Neilson's acquaintance and gave our reasons. Neilson in a card in another journal said that Mr George who was now speaking derogatively of him had given him a few months before a letter of introduction to an Eastern friend, speaking of Neilson in high terms. Mr. George answered over his own signature in the *Post* on the same day, saying he had written that letter of introduction believing that Neilson was a worthy man, but that he now desired to withdraw that and all similar letters, because he had since discovered that Neilson was unworthy of the friendship or acquaintance of any honest man, and was "a blackmailer of the worst description." Neilson talked of libel and was told through the *Post* to come along with his suit and we would prove all we had said, and more. The first step we took in anticipation of any action on his part was to send to Melbourne for a properly certified copy of his conviction for forgery. We received the required document on July 23d, 1874.

From time to time Neilson from revenge for his exposure sought to traduce Mr. George, and in the autumn of 1882 was lampooning him through the *News Letter* with all the venom his misdirected ability could furnish. At the same time he was slandering Paul Neumann, candidate for Congress, in the vilest manner. Between the writer and Henry George there has existed from 1868 a friendship almost brotherly, and we felt bound in his absence in England to take up his cause, as he would have taken up ours under similar circumstances.

The best answer to all that Neilson said of these gentlemen was to show up his record and character, to let the public know the source from which these articles came. It was a bitter article, but it was true, and the writer signed his name. Neilson winced and talked, but, beyond a few words in the *News Letter*, contented himself with sending a gentleman, now in this city, when the election was over, asking that an article, written by Neilson, should be published in the MERCHANT as an editorial. This offered article made us say that in the heat of the election we had said some things of Mr. Neilson that we regretted; that he was a man of great ability and an honorable gentleman and had performed great public services in Australia and in this country. We were also informed that if we did not publish Mr. Neilson's effusion, some great calamity would befall us. We rejected the article and returned the manuscript to the mutual friend, with these words: "The article of October 20th is true, and you, sir, know that the Australian portion is true, and we will not take back one word. But tell Neilson that he has more ability than ourselves and can earn his living honestly. If he will do so and will refrain from blackmailing and keep out of women cases, we will let him alone." That was the last we heard of Neilson for some time.

Mr. Merrill had nothing whatever to do with prompting the article of October 20, 1882, and some weeks after it was published came to us to see a copy and learn what it was about. When Mr. Neilson again comes before the public in a remarkable case, it is not surprising that enquiries should be made regarding his character and history among those who know him. As the article in question was published one year before Miss Hill claimed in public that she was Mrs. Sharon, it is clear that Mr. Sharon had nothing to do with it, and, probably, never heard of the article until after Neilson had interfered with his affairs. We know nothing of the merits of the contest between Miss Hill and Mr. Sharon, but what we have said about Neilson, years ago, to the best of our knowledge and belief being true, we do not now propose to take it back, even though it may have brought the MERCHANT into a controversy we did not know was coming, and a prominence in a criminal trial we very much dislike.

WHAT IT WILL COST

A World's Fair in San Francisco, in 1887, we have no doubt would be a great benefit to the commerce of this coast. It would make our productions better known and advertise our dormant wealth. But it will take an immense sum of money to insure success, and if sufficient money is not forthcoming it would be better to abandon the project. We should estimate, judging by the cost of similar expositions, that the managers would require a fund amounting to three or four million dollars, at the very least. We cannot expect to make such a show as the Centennial, Paris, Vienna, or either London in 1851 or '62. The Dublin exhibition, which was held about 1855, would be a better guide for us, and if we remember aright the fund placed at the Commissioners' disposal was £1,000,000. That sum was guaranteed by one patriotic Irishman, William Dargan, a railroad contractor who had risen from the shovel and pick. If we are to raise $4,000,000, it would probably be necessary for the C. P. and S. P. railroad companies to guarantee $1,000,000, the other transcontinental railroad, $500,000. This would leave $2,500,000 to private enterprise. Surely there are ten gentlemen who would guarantee $100,000 each, twenty who would guarantee $50,000 and fifty more who would guarantee $10,000. The banks of this city could safely make a pool and furnish the coin, and the guarantors would not be called upon, except in the case of a deficit on winding up affairs. This, at the worst, could not be over ten or twenty per cent, with any decent management. We apprehend that there would be some difficulty in selecting managers in whom the guarantors would have confidence, after the financial part was arranged. The necessary qualifications are more than integrity; administrative ability would be the great requisite, and the guarantors could not be sure the appointees had this rare quality in the highest degree, until they were tried. A World's Fair has no more resemblance to a State Fair or Mechanics' Fair than a minstrel show has to grand opera with ballet, in a metropolitan city.

RECIPROCITY TREATIES.

The *Chronicle's* announcement that the majority of the Senate Committee on Foreign Relations would report favorably on Senator Gibson's resolution that the President be requested to take early steps to annul the Hawaiian treaty, and that the resolution would be passed by the Senate at once, has not proved correct. It partakes of the general character of all the *Chronicle's* statements regarding the Islands. Senator Miller, Chairman for the majority, has reported adversely to the resolution; a minority report will be presented, and then will come the struggle.

The prospects of the ratification of the Mexican treaty, which was lost by one vote, are said to be improving. Should the Mexican treaty be ratified, the difficulties in its way will not be overcome. Before Collectors of Customs can take cognizance of its provisions, an enabling act must be passed by both Houses, and the opposing Representatives may prevent its passage in the lower branch. Obstructionists have always a better chance of winning in a close contest than advocates of a measure. The Mexican treaty is, therefore, in a far worse position than the Hawaiian.

Average Heat Required by Olives

The Livermore *Herald* quotes from the Los Angeles *Herald*, which, confused, like many others, by the thermometrical scale of old Fahrenheit, advised its readers to disbelieve in the feasibility of foreign varieties of olives being acclimated in California. By the calculation, as made by the *Herald*, a mean temperature of 91 degrees here would match that rather superfluous heat of 27.3 of Seville, according to Celsius.

Given	60 deg. for April	in California.
	65 " " May	" "
	70 " " June	" "
	75 " " July	" "
	80 " " August	" "
	75 " " September	" "
	70 " " October	" "
	495	

The above total, divided by 7, the number of months the olive tree is working, equals 70 degrees, or, if we add November, with 55 degrees, equals 550 degrees, divided by 8, equals an average of 69 degrees, which we can easily reach in California, generally. The latter estimate would be nearer the mark, and the readers of the *Herald* will take comfort. The calculations about Spain are those of Don José de Hidalgo Tablada, on whose authority persons well versed in agriculture and its scientific part have confidence, and will not be afraid of reforming our olive industry with what countries of conditions nearer to ours than the *Herald* seems to imagine can furnish us.

It has been corrected that the degrees of 2,490, spoken of by the *Herald*, were meant for 1,000 higher, 3,400 degrees Centigrade.

The Mexican treaty is not dead but sleepeth.

The mercantile failures still continue, with out any regard that it is 1884.

RETAILERS' CORNER.

There is a deep feeling of anxiety in this city and in many parts of the State over the absence of the usual rains, and some of the more timid are almost inclined to give up hope. We are of opinion that many exaggerate the situation. It is true that we have had two or three inches less of rain this season than we had up to the 23d of January, last season, but a large portion of the excess fell in October and early November, when it was of little use. Up to this time, little injury has been suffered by the want of rain, and our situation is practically as good as last year, and it must be remembered that but for the hot northers of early summer, California would have produced one of, if not the heaviest crop on record. In the year of the smallest rainfall in California, since it became a State, we had considerably less rain than has fallen this season, and while there is every probability we shall receive five or six inches more, it is possible we may have twenty, or more than is necessary.

Besides the caution induced from want of rain, our wholesale houses are keenly feeling the results of the loss of the greater portion of the Oregon trade. Some of our heaviest grocery houses are now pushing central California trade with redoubled energy, and other firms that never had an Oregon trade are suffering by this excessive competition as severely as those who did. The only remedy seems to be to increase the population of the central portion of the State.

A good demand has arisen for Coffee for Eastern account, but local buyers continue to hang back. We revise our quotations of last week.

For No. 1 and mixed Rio there is a good demand without change in prices. An advance has taken place in Island, consequent on a sale by Heyman & Co., of 10,000 bags for Eastern account. The price is said to be 4¾c. Holders are now asking and receiving 5 cents regular way, from local jobbers.

Refined Sugar is in good demand. The California is well stocked with raws, the French bark Auguste having arrived from Manila with 44,000 bags. There is a full supply of grocery grades in the market which are offering at prices ranging from 5⅛ to 6⅛ cents. The sales of the week foot up 2254 bags and kegs of number one grade ranging from 6⅛ to 6¼ cents.

Provisions are very dull and prices stationary, though an early advance in sympathy with that which has occurred in the Western markets is expected.

The trade in Spices is reported fair.

Canned Goods continue quiet.

The stock of Salmon is light and prices steady, with little business.

Salt, Soap and Starch are reported quiet, without change. Codfish, Pacific, has advanced a cent.

The Oil and Paint houses report an unexpectedly good business.

Business is barely fair in Borax, without change.

The Match trade is not in a very satisfactory condition for the large factories. The removal of revenue tax has thrown much of this trade out of its former channels.

Dried Fruits are dull, with no prospects of any immediate improvement.

The general condition of the jobbing trade is one of depression.

The retail grocers' associations of New England have formed a central association

PROTECTION FOR OUR QUICKSILVER.

Quicksilver is protected to the extent of ten per cent., but as Spain and Austria can put quicksilver into New York, duty paid, at 36¼ cents, there is not much opening for an advance of prices here unless the local use or demand for export to countries bordering on the Pacific ocean increases. Our California quicksilver miners are entitled to all the benefits of the Atlantic consumption of this mineral, but they cannot have them unless the duty is raised to at least 25 per cent. Miners' wages on this coast are fully treble what they are in Spain or Austria, and it is very clear that a protection of 3¼ cents a pound on quicksilver, when the cost of labor in production is, say, 15 to 20 cents against 5 or 6 cents in Austria and Spain, is entirely inadequate. Of course, the *Oil, Drug and Paint Reporter* of New York is opposed to such an advance, because it draws its views from the importers of the foreign article. Our Congressmen, neither on this subject nor any other in which home production has to compete with a foreign article, can afford to shape their policy by the wishes of foreigners or New York merchants, if they are desirous of reelection.

Ontario

The *Fruit Grower* says: "The writer has examined nearly all the water systems in Southern California, and is free to admit that there is nothing in the State that approaches the Ontario system for thorough and substantial work and complete system for distribution and saving of water."

Within three months the system will be approaching completion, as there is already water in the ditch, though a force are working night and day in extending the tunnel. The main tunnel will, when finished, be 4,000 feet long, besides lateral branches. Miles of distributing pipes are already completed and more are in progress.

A Proposed Grand Fruit Show.

There will be in New Orleans a World's Industrial Exposition to be opened on the first Monday in December, 1884, and continue for six months. This will be, it is hoped, in the largest sense a World's Exposition of Industry, and will in many essential features surpass any exposition heretofore held in this or any other country. The provisions being made for this great fair are of the most generous character. One plan of the managers is to secure "the most extensive and complete exhibition of fruits and other horticultural products that has ever been made in the world."

The Exposition managers will erect a building especially adapted to a display of plants and of fruits. This horticultural building will be about six hundred feet long by one hundred feet wide, and will be a handsome and convenient structure, which, with the landscape embellishments adjacent, will cost $100,000. They will, at an early day, issue a list of premiums for fruits, in medals and money, which will aggregate from $12,000 to $15,000.

Commissioner Blowers' report to the State Viticultural Board for his District, Sacramento, of which the first portion was published in our last issue, has caused a great deal of comment amongst southern raisin makers. Some gentlemen differ with him entirely regarding the necessity or advantage of summer irrigation of raisin vines. They hold, with Mr. Wetmore, that larger, more pulpy, thinner skinned, smaller seeded and fruitier raisins can be raised in the southern counties, though ripening later, than Sacramento can produce by the liberal use of water in summer.

Vineyard Planting and Fresno Zinfandel.

[By Gustav Eisen in the Fresno Republican.]

Another planting season is at hand. Many new vineyards are likely to be set out and many old ones enlarged. While our old vine-yardists have had experience enough to decide upon the varieties best suited to this climate, the choice of varieties is to many of the new settlers very difficult. It is first necessary to decide upon the object of the plantation, the guide being principally the amount of capital at ready command. Shall it be raisins or wine? Undoubtedly a raisin vineyard requires much less capital to start with, and the return is quicker. A wine vineyard requires you to bring a return much larger than the over sanguine planter suspects. If, then, we decide upon a raisin vineyard, our choice of varieties is not very great. Muscat of Alexandria gives the finest looking raisins, but the production is hardly as great as of Gordo Blanco. We believe by this time most people have succeeded in well digesting the difference between the two varieties. Muscat of Alexandria, loose bunch, pear-shaped berries and a somewhat lighter bearer than Gordo Blancos, vulgarly called Muscatel. This latter has round berries and a very compact bunch. We believe that these two varieties should always be planted together, as the Muscat of Alexandria is invaluable as covering layers. One acre of Alexandria to two of Gordo Blanco we consider about the right proportion. The Sultana is rapidly coming into favor. Its enormous crops, its fine skin, the absence of seeds, all tend to make it the favorite. The White Corinth is yet behind, not because it should be so, but because almost everybody is cautious, and hesitates to start with anything new until his neighbor has made a success of it. But when everybody starts in without thinking twice, the thing is overdone, a supply created long before the market is open. When the white Corinth has proved a reasonable success, as in Fresno, nobody should hesitate to plant it, provided he got proper soil. The Corinth wants moist ground, and should be staked like the Sultanas.

If a wine vineyard is decided upon, it is necessary at once to determine if it should be light or heavy wine. Fresno produces both to great perfection. It is, however, necessary to decide upon which, as a mixture of many varieties of grapes is never very profitable. If we wish to produce light wines, Zinfandel, Grenache, Carignan, Trousseau, Pinot, Cabernet and Malbec should be planted for red wine, while for white Chasselas, Sauvignon, Grey Pinot (Duchez), Orleans and Sultanas prove a success. For heavy dry or sweet wines we have several varieties—Pedro Ximines, Furmend, Feher Zagos, Temprano, Trimavis de Frontignan for white and sherries. For port, Trousseau and Zinfandel are at least the easiest to procure cuttings of.

But we advise all planters not to hurry. Rather plant Californias and Riparias the first year. Next year the finer varieties will be more plentiful than now, and by grafting on the former we are doubly safe.

HOME-MADE CLARET.

One of the very finest of clarets produced this season was made by our townsman, Mr. Duquesne. Light body, fine color, full flavor and aroma, and an abundance of tannin, were the points achieved. When we add that the grape used was our common Zinfandel, it is with sincere belief that if this grape, grown right here, can produce such a wine, thousands of acres must soon be planted with the same. We especially recommend visitors to our town, and any one else interested in the wine producing qualities of our soil, to visit Mr. Duquesne's establishment.

The Napa *Reporter* says: "At William Schoffler's 'Edge Hill' vineyard we found a large force of men at work pruning. Large sales of cuttings have been made from these nurseries the present season; we learn that Zinfandel cuttings, which were in great demand last year, are very little sought after at the present time. A complete cooper's establishment is in full blast here, turning out half-barrels, barrels and puncheons of superior quality. Forty acres of newly cleaned hill land is being plowed and a greater part of it will be set to vines this spring."

More Interested in Political than Material Success.

The San Bernardino *Times* says: The MERCHANT so modestly alleged that the horrors that would ensue to Southern California by a reduction of tariff for the fruit growers are not much in the air at all. Our orange industry has grown in spite of competition with the products of the Islands, and we are to-day shipping fruits to all parts of the world and ask no protection. Our dried fruits will stand upon their merits and we do not wish them to be mulcted a cloak to cover the robberies being perpetrated under the name of protection upon the people. It would not make a particle of difference to us if the tariff were abolished entirely, our fruits would sell as well and bring as good figures as they do to-day, while our producers would find that their money had vastly more purchasing power in other directions, and so far from losing the losers, they would be the gainers.

The *Times* is a member of the low tariff wing of the Democratic party and of course cannot agree with us in advocating "protection with incidental revenue," but we do not believe that many of its own subscribers who are engaged in raising citrus fruits or other fruits share its views on the tariff question. We have found the leading orange growers always opposed to any approach to free trade, because it would let Eastern oranges into the home market at prices with which they could not profitably compete—and regarding the dried fruit question, the article which called forth the *Times'* criticism was the result of a conversation with the largest and best known raisin maker in central California.

Planting for Profit

In San Diego county there are four things about whose profitable cultivation there is no doubt at all: the olive, the raisin grape, the guava and the lemon. There is no uncertainty about twenty other fruits (as our orchards show plainly enough), but to the new comer, desirous to begin right away, with anywhere from five to fifty acres of land, we should say, you cannot miss it in planting these four things chiefly. If we were to add a fifth, we should say the fig. As to the relative area of land best to be devoted to each in any given tract, that is a matter to be determined by each man's circumstances and purposes. The olive is the longest in reaching maturity, but it begins to bear in three years, and the trees you plant this season, if cared for, will be still fruitful long after your great-grandchildren pass off this stage of action. The day is coming, in our belief, when the olive crop of San Diego county will be worth millions. The market for first quality lemons is never going to be overstocked. Only the really fine grades should be selected, and then the fruit should be gathered at the proper time and properly prepared for market. A bushel of lemons, taken as they come, large and small, green, ripe, and shriveled with age, smutty and dusty, don't sell well and ought not. A box of bright yellow lemons, of a good average size, but not too large, each nicely wrapped in tissue paper, will always sell, and at a good price. It still pays the fruit dealers of San Francisco to import lemons from Sicily, paying long ocean freight and duty; they are not as good as our lemons, but they know how to put them up attractively in Sicily. If you don't want to cure raisins yourself you can always sell your crop. The process of curing is neither difficult nor expensive; it requires common sense and care, of course. So as to the guava, and the preparation of jelly. Over $500 has been cleared from less than an acre of guavas in a season. And so, too, with the fig: this country is its home; every choice foreign variety at once takes on a lusty growth here and produces perfect fruit in prolific crops. If our fig growers will just take the trouble to dry them and put them up as nicely as they do in Turkey, they will find there is money in figs. With reasonable outlay of capital and labor, and the exercise of ordinary sagacity a man can make himself rich in a few years on ten acres of land here.—*San Diego Union.*

Leon Chotteau, the self constituted representative of French manufacturers and producers interested in exports to the United States, is again in this country. Probably he thinks he can induce Congress to go to retaliation for the hog interdicts and advance his project for a conventional treaty with France. Monsieur Chotteau will be watching.

The *Journal of Commerce and Commercial News* announces that on the 28th it will publish a special edition with an elaborate and detailed report on marine underwriting for the crop year 1883-4, showing the losses on grain, and lumber shipments from California, Oregon and Washington Territory.

JOBBERS' PRICES.

JANUARY 25 1884

The following Prices are those at which city and country Retail Grocers can buy in lots to suit their trade and are corrected weekly.

The Merchant's Clerk

There is no coming back to correct the errors of youth; as Plato reports Heraclitus to have said that no man ever bathes twice in the same river; all things are in rapid flow, and what is to be done for characters should be done quickly. In this hurrying age boys to come men by a sort of start or explosive advance. Impressions upon society must, therefore, be made upon youth, and if we would have good merchants, we must first have good clerks.

In morals as in business, true prosperity comes from a fair start. The first steps in trade, the first hours in a situation, throw forward their influence. The ship is built on the model which is first laid down. The plans with which you put on your office coat, the day you enter your shop, store, counting room or bank, mark your direction. As the railway switch is turned, so your track will be. All of which is so well known by employers, that it commonly takes but a few days for them to rightly estimate the value of one who has entered their service. If it is the end that crowns the undertaking it is the beginning that gave it form.

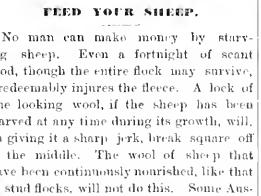
Among these apparently leesser matters that of Dress is deserving of notice. The garb, in some sort, expresses what is within. Sharpers, gamblers and adventurers carry most ostentatious jewelry, which is a mark not of wealth, and not even of fashion, but of vulgarity and upstart pretention. The most elegant dress is just that which no man can remember after you have left him. Everywhere a young man loses caste with such as know the world, by dressing beyond his means. The habit of extravagance in apparel leads to undue expense, and is a particularly bad sign in one whose salary is small, and whose means are narrow. A fop is a fool, as surely as a slovenly is a savage.

From dress as part of ornament, the transition is natural to manners and bearing. The same principle's govern both. Nothing but the examples of good society can insure genuine polish in a young man; but good sense and good taste influence him to choose and follow one example rather than another. A great fault with many young men in business houses is to mistake coarseness and pertness for smartness and the expression of ability. Forward, ill-bred youth take this for accomplished business manner, when it is only effrontery and impertinence. Rules, of course, cannot be laid down on a matter so impalpable; but two or three maxims will not be denied. Nothing is well-bred which smacks of vulgarity or coarseness. Quick, rude accost, and constant utterance of slang terms, always designate the pretender. All this glitter is not gold, but pinchbeck. Good manners are not indeed sheep's, but quick. Undue eagerness, even with in cautioner, is ungraceful, and misses the mark. When ever you see a man of accomplished manners, you find one who treats even the humblest person with respect. The truest armor against social obtrusion is courtesy to all around you. Cowper says:

"The man who hails you Tom or Jack,
And proves by thumping on your back
His sense of your great merit,
Is such a friend, that one had need
Be very much his friend indeed,
To pardon, or to bear it."

N. Y. Economist.

Now look out for rumors of the total destruction of the peach crop by the recent cold weather. It is rather early to start such a rumor, but the holders of canned peaches must have the benefit of the weather.



FEED YOUR SHEEP.

No man can make money by starving sheep. Even a fortnight of scant food, though the entire flock may survive, irredeemably injures the fleece. A lock of fine looking wool, if the sheep has been starved at any time during its growth, will, on giving it a sharp jerk, break square off in the middle. The wool of sheep that have been continuously nourished, like that of stud flocks, will not do this. Some Australian wool shows this defect, and it is not uncommon in wools raised on ranges on the Pacific Coast and other western States.

Miller Purvis, in the Kansas City *Price Current*, says of Kansas flock masters and their wool:

No matter in how good condition such wools are put on the market nor how fine they may be, an expert finds this weak spot and immediately down goes the price of that wool, and if any considerable part of the wool in that vicinity exhibits the same weakness, the price of the good wool falls with the bad. Ranchmen tell me that the conditions are such that it is impossible to build shelters for sheep in these sections. Granted, for the sake of argument, though I shall not change my mind until I see for myself. There is nothing to prevent them, however, from feeding their sheep in bad weather or when feed is short, except a penny-wise policy of trying to starve money out of live stock, which, much as it has been tried, has never succeeded. When our western sheep men keep these weak places out of their woods and get their flocks graded up as Ohio, Pennsylvania and West Virginia flocks are, they will get the same prices for their wool that we do. They have the climate, but lack enre.

Wool Report of George Abbot for the Year Ending 1883.

Active demand during January and February reduced the large stocks on hand, so that when spring wools began to arrive the amount of wool in warehouse was not much larger than usual. The history of the spring wool market would be simply a repetition of the reports of the last three years. Eastern manufacturers in person or through their agents opened the market at rates above the expectations of receivers, and until this consumptive demand was supplied sales were large, but at constantly lower rates. From the opening of the season to the present time, prices have steadily declined, and with the exception of short periods of activity the market has been quiet. Stocks have always been large, and will probably continue so as long as so much wool is secured here. The scourers make a continued demand, which on many classes of wool (especially fall clip) prevents prices reaching the point which would enable shippers in the grease to handle them. The market on fall wools has been more steady than on spring, as Eastern buyers pay less attention to fall clips. Eastern manufacturers, as formerly, have taken a large portion of the spring clip. Scourers here have

handled most of the fall wools and a large portion of the Oregon wool product.

Prices are to-day lower than have ruled for several years, but as shrinkage has increased, and burs and seeds become very general, the decline is apparently greater than it actually is,

SPRING CLIP.

The clip from the middle and southern counties was better than was expected, and was as good as that of the previous year. Northern wools were better in growth and condition; the production is larger than that of last year, and will probably show a further increase during the coming season. Owing to low prices ruling for fall wools, shearing has not been so general, and the proportion of wools of year's growth will be greater. These wools are less desirable than 6 to 8 months' clips, as they contain more dust, seed and bur.

QOTTATIONS.

Choice Northern (Humboldt and Mendocino)	23 to 24½
Good Northern (Red Bluff, Colusa, etc.)	20 to 23
Defective	17 to 20
Choice San Joaquin	19 to 21
Fair to good San Joaquin	16 to 18
Heavy "	11 to 12
Fair " 12 mos growth	13 to 16
Southern Coast, good stapled	16 to 17
" " average "	12 to 15

FALL CLIP.

This clip is about the same in condition as usual, but is growing more defective each year. Receipts of very heavy and defective wools are smaller, because growers sheared only lambs in the south and San Joaquin. Opening prices were the highest, but the variation has been small. Local scourers have been the chief buyers. Shipments in the grease are the smallest ever made in proportion to the product.

QUOTATIONS.

Choice Northern	16 to 18
Good Northern	14 to 15
San Joaquin	9 to 13
Southern Coast	8 to 9

OREGON.

The receipts from Oregon have been larger than in 1882, but as condition was better than for several years previously the wools have met with ready sale, and stocks are much smaller to-day than they were a year ago. Growers in Eastern Oregon are improving the quality of their fleeces, but Valley Oregons remain coarse and unbesirable. Prices on this latter class have touched the lowest points seen for many years.

QUOTATIONS.

Choice Valley (Roseburg)	23 to 25
Choice Valley	20 to 23
Ordinary Valley	18 to 22
Choice Eastern	20 to 23
Good Eastern	17 to 20
Fair to heavy Eastern	14 to 16

STOCKS.

The stock on hand comprised heavy Eastern Oregon, heavy or defective fall, and defective Northern, but are materially less than a year ago.

FREIGHTS

During the spring season overland were 2¾c. per lb. For the past four months on wools costing over 18c per lb., 2c. per lb.; costing between 12 and 18c. per lb., 1¾c. per lb.; under 12c., 1½c. per lb. By ship, from 1c. to 1¼c. per lb. As usual, manufacturers have been the largest shippers by sail.

THE WOOL MARKET.

The San Francisco Wool market is quiet, the only demand being by local scourers. Our California mills have not had a free sale for their fabrics for many months, owing partly to this market being swamped by eastern consignments, mostly sold at auction at ruinous prices. The stock of wool on hand is not excessive and prices remain at former quotations.

The following telegrams have been received from the East during the week

BOSTON, January 19.—A circular of James Lynch gives the production of Wool in the United States in 1883 as 320,100,000 pounds, an increase over 1882 of 20,100,000 pounds. This increase has been principally in Iowa, Missouri, Minnesota and the Territories west of the Missouri river. In Oregon there has been an increase of 2,500,000 pounds and in California an increase of 1,000,000 pounds. There is some disappointment that a large number of the samples of Australia had not been received from San Francisco and the Gulf of Suez, with 5500 bales, instead of arriving in January. The market for California Wool has been quiet. The sales of the week amount to 156,000 pounds, Fall and Spring, and include 25,000 pounds Spring at 28c; 37,000 pounds Spring at 25c; 47,000 pounds Spring at 23c; 7,000 pounds Spring at 20c; 32,000 pounds Spring on private terms; 10,000 pounds Fall at 15c and 45,000 pounds Fall at 12c. There were also sales 85,500 pounds California pulled at 20c, 19,300 pounds California pulled at private terms and several small sales at previous prices. Receipts of Oregon, 57,000 pounds; California, 117,000 pounds Spring and 5,000 pounds Fall.

NEW YORK, January 21st.—Views of holders have been pretty well sustained and the dominant feature in fine wools is one of steadiness. The supply received for addition from any source and samples of wool in store are in nearly all cases kept well in hand and under a full limit of salation. Business has not been quick, but there is a feeling that whatever the form of disposal it must take a fair balance against offering and maintaining prices. Medium and low grades are plenty enough and offered with some freedom, but no one wants them except in a moderate and uncertain form, and the movement is by no means satisfactory, while in values there is considerable irregularity. Foreign clothing wools are quiet at the moment and carpet grades slow. The consumption of the latter is running light and manufacturers are getting a great deal of stock on direct importation. Sales include 50,000 pounds spring California at 15@24 cents, 65,000 pounds fall at 19 cents, and 40,000 pounds scoured at 32@38 cents.

Short Staple.

Another item showing that corn will make wool. Last year a lamb disowned by its mother was given to a neighbor; the lamb had free access to the corn crib, and its fleece weighed 15 pounds. *Manhattan, Kan., Republic.*

Here is another sheep item. Five years ago Mr. Scott, of Westmoreland, had seven sheep and two lambs. To see what they would do in five years, he used no income from them during that time, but invested everything derived from the sale of wool, wethers, lambs and old ewes in other sheep, and at the end of the five years he had 1,700 she p, for which he has been offered $5,000.—*Idem.*

The relative values of different grades of wool for the year 1884 are said to be uncertain. Capricious fashion has the casting vote and the chances are in favor of medium wools.—*Texas Wool Grower.*

TRADE IMPROVING.

"Cotton, Wool and Iron" Takes a Favorable View of Manufacturing on the Atlantic Coast.

We have been slow to announce all the stoppages of mills and short-time notices, and the cutting down of wages that have been brought to our notice, for it is not our mission to unnecessarily depress and make matters worse than they really are. In close times even the manufacturer does not care to look on the dark side any more than he can help, for with him the matter is much more serious than it is with the help. With him it is a question between the pocket and humanity. The head often says, shut down; but the heart comes to the rescue and says run awhile longer; and so the evil day is often passed over, when the owner and not the help passed the sleepless nights.

The past few months have been serious ones for the owners of mills and mill stock, and every daily paper brought news of stoppages, curtailment in time and wages, brought about by the unsettled condition of the tariff question, coupled with the fact that the two political parties are more nearly evenly balanced than in many years last, making it possible for rash legislation, and not only possible, but very probable, that either party might do, for present policy, what, in the long run, might cripple our industries. However all this might be, there are now signs all around us that times are improving, not, by any means, rapidly, but a larger volume of business is being reported, and industrial works that have been stopped or running on short time are quietly starting up, and yet the tariff question remains unsettled. This better feeling evidently comes from the fact that the public mind is convinced that if either party should do much cutting down of the present tariff it would immediately be sent to the rear to recruit, so that it is not likely that our tariff laws will be very seriously tampered with the present winter, and good times may come sooner than was anticipated.—*Cotton, Wool and Iron.*

Shall I Advertise to the Public or the Trade?

This question does, or ought to, arise in the mind of every manufacturer who advertises his goods. To create a demand is to accomplish success. A demand may be made either through the trade or through the public. To familiarize the public with a new article involves great expense. The trade can, however, be made thoroughly familiar with new goods at a much smaller outlay.

"If I create a demand on the part of the public, the storekeeper must keep my goods," says the manufacturer. True; but cannot the same result be accomplished more quickly and cheaply through the dealer?

In ordering goods the retailer writes to the wholesaler, "Send me two cases of *Beefsteak* tomatoes, three boxes of *Dixon's* stove polish, and one caddy of *Lorillard's* plug tobacco." He almost invariably names definite brands. If the manufacturer has made him familiar with the brand and merits of his goods, and above all with any advantage of profit or convenience which they possess for him, then the dealer will order those brands, and the wholesaler, unable to argue the question on account of distance, will fill the order as written, even if he is obliged to buy or borrow a case of goods which he does not carry in stock.

With the consumer the case is different. It costs ten times as much to familiarize him with new goods. An advertisement of stove polish inserted in a daily paper may reach great numbers, but not one-tenth part of the number would touch or buy a stick of stove polish in a lifetime. Moreover, the great pressure on the part of many others to reach the same public, tends to bury the special article under a mass of other advertisements, and the advertising rate is very much higher.

The consumer enters the store of the retailer and says, "I want some stove polish." The prompt dealer slaps a stick on the counter, wraps it up without a mention of name or brand, and asks, "What else?" "I want some plug tobacco; whose brand do you keep?" "Lorillard's," replies the dealer, "the best in the market, can't be beat." and with profuse recommendations he presses on the customer (who has confidence in him or he would not deal at his store), the goods which he has an interest in, because they are now in his stock. He has become in a small way an interested partner in the manufacturer's business. He is the active salesman of the advertiser, who gained his attention directly through trade papers.

Another customer enters, a rare one, who knows what he wants beforehand. He asks for Rising Sun Stove Polish. The dealer quietly puts Dixon's in his basket, and lets the cook find out the difference if she can, or saying that he aims at keeping the best, he firmly and flatly asserts that Dixon's is the superior article, because, good fellow, he has Dixon's to sell, and is now the rival of the Rising Sun.

Few customers will go out of a store to shop after a small purchase, when the dealer offers to guarantee another brand as just as good or better. In short, the customer is easily turned by the retailer's argument, but the wholesaler generally fills the retailer's orders exactly. In the case of book accounts, the retailer virtually controls the ground, as the customer cannot go elsewhere without that unobtainable article, "ready money," in his hand, and, unfortunately, for both customer and dealer, the greater part of our city and country retail trade is transacted on pass books. Which course, then, is the simplest? Which the cheapest? Which the most direct for the advertiser? Let the advertiser prove to the storekeeper that his article is the best or the most profitable, and he will buy the goods first and make a market for them among his customers afterwards.

Is not the dealer also a consumer? Is he not the best consumer to secure? If he uses and approves of an article he chants its praises all day long over his counter. Frank Siddall, the greatest success of this advertising age, secured his success by recognizing this one fact—sat over his desk four years ago, discussing this very subject with the writer, when as yet not one clerk was needed to aid him, and having hit on the best mode of advertising, stands to-day in a splendid office, surrounded by over sixty clerks, the master of an enormous business. He advertised to grocers and their families first, and then to the great public.

The marked success of Hockers' goods has been made by paying equal attention to both branches—just as much money is spent in making friends of the dealers as in reaching the direct ear of the public—neither side is neglected.

Numerous like instances can be given, such as Blackwell's Durham tobacco, the Rumford yeast powder, Walter Wilson's biscuit, Dr. Sydopple's borax soap, Atmore's mince meat, Sapolio, Sea Foam, and many others, until it seems surprising that any new-comer in the trade should claim to have found all rules reversed in his own case, and then either stand still or go to the wall in support of his new theory, with the whole past of successful advertising staring him in the face.—*Philadelphia Grocer.*

...ufactions of Commerce.

The merchant of to-day has to deal with difficulties such as were unknown a few years ago; for the telegraph cables have revolutionized the commerce of the world to an extent which exceeds all expectations. It is as easy to buy or sell a cargo of any commodity in Calcutta or New South Wales as in Boston. Consequently the grain merchant in Chicago has competition not only in San Francisco and Baltimore, but also in Valparaiso and Bombay. This international competition was to be expected, and is welcome. What was not expected, but what happened nevertheless, is that one trade should influence every other far more than used to be the case. In England for instance, it is almost an axiom that stocks rise in price when merchants and manufacturers earn good profits. When English stocks fall, Wall street and the Paris bourse generally respond; accordingly, low profits in the Lancashire Cotton trade seem to have a certain influence upon Wall street quotations. But this influence reacts upon the Old World, and all the mighty empires of Europe take courage when business in the United States is reported brisk and profitable. The lesson to be drawn from this is obvious. The time has arrived when the knowledge and the intellectual resources of the American merchant must be of the highest order, lest business drift instead of being controlled by an iron hand, and best profits go into the wrong pocket. Our Government is to be congratulated upon its commercial statistics, its consular reports, and its agricultural accounts, for it is from these that the American merchant learns how commerce is going, and to what facts he must adapt himself in his particular branch, be it finance, importing, exporting, or even jobbing. For it makes a very great difference to the New York or Boston jobber to know whether a State like Minnesota has had a rich or a poor harvest. Within the early future, commercial statistics, commercial geography, and the commercial returns of absolutely all countries on earth, will have to be taken into account by the American merchant who has much to do with foreign commerce, or even with the interstate trade of his own country.—*N. Y. Shipping List.*

Tomatoes and Tomato Packing.

The tomato packing season is about over. We say about over, for the exact time when the tomato plant ceases to produce tomatoes is something no man can tell. This is especially true of the Harford County variety, and the belief is gaining ground that in that region the plant is perennial and tomatoes are gathered the year round. Thus we were assured, nearly six weeks ago, that the tomato packing season was virtually over, but the same story has been repeated week after week since then, so that the most believing of individuals are becoming sceptics on the great question of tomatoes.

We have even heard it asserted that tomatoes had ceased to be a natural product, and that an artificial substitute was being used the same as oleomargarine is being substituted for butter. Considering, the never-ending supply of canned tomatoes, and that the shorter the crop the greater the yield, this assertion should not be lightly thrown aside as unworthy of consideration. Chicago parties are supposed to be in the secret, and it will at once be seen that this will account for the actions of the Big Injun of Chicago, who snaps his fingers at all the sisters and the cousins and the aunts of those who predict high prices for tomatoes. Winter-grown tomatoes may not be such a myth as some might think.

If cotton-seed oil and hog's lard can be transmuted into prime butter, if cocoanut shells reappear as ground pepper, if herring can be revolutionized into French sardines, if swelled canned goods reappear as choice jam, if pure fruit jellies can be made from animal products, surely it is not too much to expect that the simple and blushing tomato can find an affinity substitute among all the vast vegetable productions that encumber the earth. The contents of some cans, labeled tomatoes, also bear out this supposition, for they seem to have been fearfully and wonderfully prepared, and as in the old game of "Beast, bird, or fish," it takes a wonderfully quick mind to classify the articles presented.—*St. Louis Grocer.*

Special Inducement.

As a Special Inducement to our Viticultural Friends to help us, and the general viticultural interest, we have ordered the journal which is their recognized organ, THE

SAN FRANCISCO MERCHANT

For particulars see advertisement in another column.

MR. WETMORE REPLIES TO MR. BLOWERS.

LOS ANGELES, January 26, 1884.

EDITOR MERCHANT: I did not see the MERCHANT of the 18th inst., containing the first installment of the annual report of the esteemed Viticultural Commissioner of the Sacramento District, Mr. R. B. Blowers, until yesterday, otherwise I should have written a few lines concerning it before this.

Mr. Blowers appears to have been irritated by my remark concerning the *Seedless Sultana*, where I said that the many stories of the extraordinary yields of that variety should be received *cum grano salis*. Certainly, I had no intention of intimating any doubt as to his statement of its enormous bearing qualities in his vineyard. I have always been astonished at the remarkable fertility of his vines, and recognize in him our greatest apostle of "big crops." There is nothing so very extraordinary in his statement of 17 tons first crop and 2 tons second crop per acre for this vine; I have seen 20 tons to the acre of *Burgers* and 17 tons to the acre of *Zinfandels*. The proprietors, however, in these cases are not proud of their results, for, in the case of the *Burgers*, they are to be grafted over, and, in the case of the *Zinfandel*, although the color was unexpectedly good in the wine, the quality was very poor until it was mixed with *Touissons* bearing six tons to the acre on the same land. What I do, however, insist on, by my *cum grano salis* allusion, is that these enormous yields are very exceptional and are not to be relied on as guides for the planter, and, moreover, that when they appear we do not record very fine crop of raisins made from them. Mr. Blowers says his great yield of *Seedless Sultana* weighed 23 per cent sugar for first crop and 22 per cent for second crop, and he claims that he could have dried them in his dryer. I have no doubt that he could have dried them; so he might also have dried them when they were absolutely green; but what about *curing* them as raisins? If I mistake not, there is a great difference between a dried grape and a thoroughly cured raisin; and I shall continue to insist that where there is not sufficient saccharine in the berry to permit it to be cured in the sun, the grapes are not thoroughly ripe for raisin purposes. The fact that Mr. Blowers finds it necessary to use an artificial dryer is sufficient proof of the distinctions that I sought to draw between properly dried fruit and that which is immature. I have not seen any necessity for such dryers in San Diego, San Bernardino or Fresno, nor in the Sierra foothills, nor even in the Sacramento valley. When never the first crop is sufficiently ripened, I am ready to accept the issue as between drying an unripe grape and curing a raisin; and I therefore am ready to repeat that stories of the enormous yield of the *Sultana* —*so far as practical raisin making* is concerned—must be taken *cum grano salis*. I am sorry that Mr Blowers should have thought that I doubted any report that he may have made as to his crops; I made no allusion to him in that respect and, indeed, was not thinking of him, but of the many careless statements that were going the rounds of the press. I do not even contend that the *Sultana* may not yield largely in some places, and still ripen sufficiently; I should expect it to do so in Fresno; but the fact that Mr. Blowers sold nineteen tons to the acre to a winery, at $25 per ton is no proof that under similar conditions as his own the *Sultana* is a valuable raisin grape; nor is it any proof that it is as valuable a wine grape for similar conditions as a *Burger* or *Folle Blanche*. I believe that the normal yield of the *Sultana* on warm soils, where excessive vegetation is not forced and where its highest quality is developed, will be found to be about six tons to the acre, when in full bearing. In exceptionally rich, warm lands, which, however, are only accidentally discovered, the yield may reach eight to ten tons. What may be done in a single exceptional season, on very rich, deep soil, with young vines, forced to the extreme by water, fertilizers and heat, is not to be counted as a correct estimate of the habits of the vine.

I am glad, however, that this discussion has commenced; the whole subject needs ventilation, and I shall be, with regard to raisins, occupying the same ground as with wines and brandies, viz: an advocate of quality with fair quantity, rather than quantity regardless of quality. Mr. Blowers is, of all men in the State, best qualified to demonstrate what can be done with grapes, as to quantity; but if he will compare products raised and dried according to the system he advocates, with those of other places, I am willing to test the practical value of our respective opinions.

I cannot permit Mr. Blowers to place me in a false position. He undertakes to make several statements, some true and some erroneous, which, he says, are "for the purpose of correcting some views put forth in Mr. Wetmore's annual report." These statements would make it appear that I had drawn certain comparisons incorrectly as to the period of ripening grapes in different parts of the State. I had not even touched on the subject, except perhaps in reference to Fresno, and in respect to the relative periods of ripening on low, damp or excessively irrigated lands, as compared with those warmer and better drained, or with respect to long or short pruning.

So far as his allusions to San Diego are concerned, which, had he not been needlessly irritated, he, no doubt, would not have made, I must make some reply. In the first place, Mr. Blowers is not acquainted with the industry in San Diego county, as he intimates; all that he ever saw of it was in my company, recently, after the vintage, during which time he saw some raisins being packed at two vineyards. Why he should state the facts erroneously, even with reference to those two vineyards, I do not understand, unless he imagines it may cause some doubts to be cast upon my own statements. He speaks in his report of one of these vineyards being irrigated and the other naturally sub-irrigated in some sense that should cause them to be considered as superior to other ordinary vineyards in that county. His remarks it allowed to go unchallenged would give a very wrong impression. He says "I saw very fine raisins at the irrigated vineyard of Mr. Clark, in that valley (the Cajon); also in the naturally sub-irrigated vineyard of Mr. Whitney, near Apex, same county." Mr. Blowers knows that Mr. Clark made better raisins in 1882 than in 1883, for he saw the products; he knows also that Mr. Clark's vines were not irrigated in any sense until 1883, and that this irrigation consisted only of a small amount of water forced through pipes, by means of an ordinary windmill,

This Company now offers to the market a large stock of wines and brandy of its own manufacture. Correspondence solicited. Address:

San Gabriel Wine Co.,
SAN GABRIEL, Cal.

which had to do service for all other purposes on Mr. Clark's estate. Had he reflected he would have admitted that in no practical sense could this be called an irrigated vineyard, and his judgment should be that irrigation had not improved the crop. Mr. Blowers writes as if I had condemned all irrigation, when I had only condemned such excessive irrigation as retarded ripening the fruit, through forcing excessive vegetation. If Mr. Blowers had made himself thoroughly acquainted with the subject matter, he would have known that on the tract adjoining Mr. Clark's, on similar soil, twenty feet to water, Mr Cowles made raisins during last vintage, without any form of irrigation, which were superior to those of Mr. Clark, and that at Mr. Marriam's, near San Marcos, on sage brush land, at least forty feet to water, with no irrigation, still finer berries were ripened and cured, samples of which may be seen at my office in San Francisco. As to Mr. Whitney's, the allusion is very disastrous to Mr. Blowers' theory. What he calls naturally sub-irrigated land is simply a bench of red granite soil at the base of high hills, with water about ten feet from the surface. If these are to be called irrigated lands, then there are thousands of acres of such lands in San Diego county; if, however, the raisins made on such soil are to be commended, then the San Francisco grocers and raisin dealers don't know their business, because they have refused to offer more than $1.50 per box for the best raisins from Mr. Whitney's, which can be seen at my office. The trouble with this lot is, that they were not sufficiently ripe when they were picked and have not cured well—they are simply dried grapes, with an acid taste, and would not keep well. They illustrate my point perfectly and were one of the things that caused our Escondido Company after the practical examination of all that could be studied in San Diego county by experienced men, such as Mr. Geo. West and Mr. Wm. B. West, not to plant raisin grapes in soil where surface water was so near. We are planting three hundred acres of Muscats in our Escondido Valley, selected for warmer exposure and where it is from fifteen to thirty feet to water; we have several thousand acres where the water is within ten feet of the surface which we desire to know more about before risking it for raisins. Mr. Blowers does not seem to remember that Mr. Whitney told him that his *Muscats* on red soil, where it was deeper to water, ripened two weeks earlier and were sweeter.

Again, I am sorry to have to correct his statement as to the temperature of the Cajon Valley in June. He says he was informed that it registered as high as 114 deg., and intimates, therefore, that some one has been lying about the climate at that time. Mr. Blowers may have been informed that the temperature was exceptionally high for a day or two in September, but he is very wrong as to June. Not knowing what the exact record was for June, I telegraphed yesterday to Douglass Gunn for the highest temperature recorded last June both in San Diego City and the Cajon Valley. The following answer was received:

"San Diego, January 25, 1884.

"*Chas. A. Wetmore, Los Angeles, Cal.*

"Hottest day in June: San Diego, eighty-four; Cajon, ninety-seven. Gunn."

As to the period of ripening grapes in San Diego county, I have no correct data; Mr. Blowers has less. In 1883 there was an unusual frost that struck the low places in open valleys; both Mr. Whitney's, and Mr. Clark's vineyards were frosted and their entire crop came from the dormant eyes, and, consequently, ripened later than usual. Mr. Blowers knew this, yet compares results with other places where this mishap did not occur. Outside the frost limits, I showed him *Zinfandel* vines at Capt. Sherman's, on the Cajon, planted in red granite, hillside soil, thirty feet to water, from cuttings in 1881, never irrigated in any manner, the fruit of which ripened, was picked, fermented out and made a dry wine of 12.4 degrees, before grapes of the same variety had been picked in Stockton. I drank of the wine in the middle of September. However, these were young vines, which ripen earlier than when older, and were hastened in ripening, no donbt, by the drought, although they attained their full development as to size of bunch and berry. Judging from these vines, I have nearly concluded that the ripening period on warm lands in San Diego county is about the same as that recorded on the warm lands about Stockton. I do not claim for San Diego county early ripening, but I do claim that on soil not too near water there is a more perfect ripening than where vegetation is forced, on alluvial lands. Mr. Blowers has mistaken my point altogether; I intended to draw comparisons only as to soils of different quality, and as to different methods of culture in the same districts and under similar climates, and I attempted to point out defects in some methods of cultivation without reference to locality, illustrated only by such examples as I could show. If Mr. Blowers is satisfied with the results of forcing methods of culture, after vines are in full bearing, on the rich Cache Creek bottom lands, so far as the curing of raisins is concerned, I must say that those interested in the general success of the industry, who believe that quality is the touchstone of prosperity, are not satisfied, and that they fear the disastrous consequences of flooding the eastern markets with inferior goods. Those who may be in doubt as to who is right on the question of quality, I shall respectfully refer to any first-class grocer or raisin dealer in San Francisco. They will soon find out, if they press their investigations, why it is that Malaga raisins are preferred to most of the goods made in this State. That we can do better than we are doing I am so firmly convinced that I am willing now, as I am doing with my associates, to plant a raisin vineyard without irrigation, in a valley where the rainfall is "less than 15 inches annually," and where we avoid low alluvial deposits. The fact that our market is now glutted with raisins does not deter us, because we believe that raisins of finer quality will readily sell, at good prices. In fact, we must not forget that the dealers claim that the unexpected larger importations of Malaga raisins in the East is more due to dissatisfaction with the kind of goods that have been forced on them in the past from irrigated and forced vineyards than to any change in the tariff; and that the main reason of the apparent ready sale of our products of recent years has been the short crops in Malaga, rather than the superiority of the great mass of California raisins.

This question—how to improve our raisins—is a vital one. I am willing to face the discussion which my statements may arouse, but, certainly, I have the right to ask that Mr. Blowers and all others shall not convert it into a personal matter, nor make it an excuse for local attacks. I shall still insist that Mr. Blowers can improve the quality of his raisins (though I had no intention of confining the remarks to his products, although he seems to desire it to be done) by planting closer, pruning closer and irrigating less. I shall also contend that with less irrigation on land not so alluvial, he will get riper grapes, even in his own county, and have less, or even no trouble from vine hoppers, caterpillars and *couture*. Mr. Blowers, like many others who have unnecessarily attacked me, charges me with inexperience, as compared with his veteran knowledge. If Mr. Blowers will consult his own experience, as I have, and compare it with that of others, he will, no doubt, discover that as he progresses in his methods of culture and increases the tonnage of his vineyard, his products will not gain in favor in the markets. It is useless to make comparisons of places, unless all circumstances and conditions are considered. With the amount of water that soaks into the Eisen vineyard in Fresno, Mr. Blowers' vines in Yolo, in his peculiar alluvials, would refuse to bring any *Muscat* to maturity. There are many alluvial soils in this State where it is impossible to properly nature a grape, notwithstanding in the immediate vicinity there is perfect success on other soils. Whether irrigated vines in Fresno ripen earlier than unirrigated vines in San Diego has nothing to do with the question; but if Mr. Blowers will compare vines treated differently, under similar conditions of soil and climate, he will be usefully discussing the topics which I treated upon and which he has attacked so hastily. I hope he will not choose to make a personal matter of it, or to indulge in local rivalry, neither of which forms of discussion could benefit the public.

[illegible]
[illegible] n artificial drier is
[illegible] ripes upon very
[illegible] n attain a proper
[illegible]
[illegible]
[illegible] s can soils vary the
[illegible] y and in some cases
[illegible] ady deposits near to
[illegible] e applied to obtain any
[illegible] ; nor how early are
[illegible] ed soils.
[illegible] Those vines in rotation, pro-
[illegible] longer for many years, retards
[illegible] ation of fruit and hinders the for-
[illegible] ard part of the vine.
[illegible] That pruning according to or-
[illegible] diminishes saccharine in
[illegible] and if not, absolutely in
[illegible] preventing maturity.

That planting vines far apart and pruning long to few buds will retard maturation of saccharine.

That increasing the distance between rows, fertilizing and excessively irrigating and long pruning should only be practiced where actual experience proves that the fruit may become perfectly matured, and when raisins may be cured with[illegible] artificial aid.

That where vines as they grow old show diminishing crops and less saccharine, the remedy should not be planting further apart, forcing with irrigation and fertilizers and long pruning, but on closer pruning with judicious use of [illegible] especially potash.

That other things being equal, vines planted closer together will ripen their fruit earlier and with more saccharine.

That vines on good, warm, well-drained land, not alluvial, where surface water in wells is found at not less than 15 to 20 feet, will ripen sweeter and better and earlier grapes than those on moist alluvials.

That the size of grapes should be controlled by proper pruning and fertilizing, and not by excessive watering.

That three tons to the acre of finely developed and ripened Muscatels will prove profitable to the planter, while ten tons to the acre of immature fruit, second and third crops, will glut the market with miserable products.

I hope that these statements may awaken a fair and candid discussion. There is certainly nothing of a personal nature in them and nothing that should cause unwarranted attacks on localities. If these principles are true, they are true in all districts, if not, they are fairly open for attack, as mistaken notions.

Yours, respectfully,

CHAS. A. WETMORE.

Russian and Caucasian Vines.

A most valuable accession to the experimental department of the Natoma Company's vine-plantations at Folsom, has been presented by Mr. F. Pohndorff from the Emperor of Russia's renowned establishment of acclimatization and viticulture of Nikita in the Southern Crimea. Six of the most precious varieties, two of Caucasian and four of Crimean vines, are those of which, by imperial privilege, cuttings have been sent to Odessa, to go by way of London and the mail steamer from Southampton to Panama and thence to our port. The varieties are: Saperavi, black Caucasian grape, white Gandjak, white Caucasian grape.

Crimean grapes: white Shabash, rose Alburiah, white Tashli, black Etchke Muscat.

Another batch of Caucasian vines is expected for the Natoma Company and Mr. Charles Krug, from Transcaucasia, likewise obtained through Mr. Pohndorff, namely th[illegible] Saperavi [illegible], of which French connoisseurs declare it as the equal at least of the best French varieties for red wine. The cuttings had to be obtained from a valley of mild temperature, and a competent man was sent to select them in a hundred kilometres away from Tiflis, the ground in the vineyards around that town being frozen two feet deep. Two white Caucasian varieties, the Mzivnam and Razitili will also arrive, said to be the finest of what Transcaucasia possesses. These different varieties, right from the regions that in times out of record furnished the wine to Europe, will be of great interest, and it is most fortunate that they will be cared for in the best way, for the nurseries and propagating establishment at the Natoma plantations have deservedly the reputation of being on a scale of magnitude compiled with the minutest and most scrupulous attention to details, and Mr. Charles Krug is equally dedicating his attention to the important matter of rearing varieties which will give great renown to his new plantations both on the hills near his valley ranch and on his Howell Mountain Vineyard.

The Scale Bug.

[Gustav Eisen in Fresno Republican.]

"We hear of much ill success with the common remedies for the extermination of scale on fruit trees. While, as a rule, scales are yet scarce in our county, still wherever it has made its appearance the horticulturists have failed to find themselves of the pest by the application of the official remedies—lye and whale-oil soap. There are more than a dozen remedies which have been considered infallible, all containing more or less lye, borax, soda, whale-oil soap, coal oil and sulphur. We know of several orchardists who, after several years of spraying and washing with the above remedies, find that to-day they are as badly off as ever. Many of the trees sprayed with strong caustics had died at the same time as the scale, and the real gain has only been in preventing the scale from further spreading. For some time there has been a calm in the tide of new remedies, and we suppose that there is yet a good supply of caustics and soaps on hand. To hope for the speedy destruction of the scale during the winter months with the old remedies seems rather preposterous, judging by past experience. Out of the two classes—caustics, and soap and sulphur, we believe the latter to be decidedly the better, the sulphur having a tendency to destroy fungoids and insect eggs, and the soap acting through its general nastiness. Taking it all in all, we believe that orchardists should be very cautious in regard to the lye spray, and in no case use more than one pound to a gallon and a half water but rather less. By spring, that is in April, May and June, according to the season of warm weather, the young scale will begin to hatch and crawl around. This is the time to attack them. If the orchardist cannot dispense with the soap and sulphur mixture, we advise the addition of one pound of buhach to every forty gallons of liquid at the moment it is to be used. But we would dispense with the soap altogether and use only buhach and water. One pound buhach and one-half gallon glycerine (crude), well stirred in a close vessel to the forty gallons of water, when used. The glycerine serves to bind the volatile oil in the buhach, and keeps it on the insects until they die. This mixture, by far the most effective remedy and the cleanest, goes a long way if sprayed with a force pump and the San Jose or, better yet, the Miles nozzle; the latter, especially to be used on grape vines for destroying the leaf hopper. At the proper time we will return to this subject. In the meantime we would like to hear from parties having used other remedies."

Guaranteeing Varieties.

There are some complaints, we hope not many, that vine-cuttings advertised and sold as particular and favorite varieties are not always what they are represented, or if they are in part, they are mixed. A vine yard owner who after examining carefully at the recent State Convention all the samples of wine made from new varieties of grapes, selected Cabernet Sauvignon, and contracted with a gentleman offering those cuttings for sale for several thousand, on examining the cuttings and the vines they were taken from, discovered that they were not what was represented. It is now admitted that they are mixed Cabernet Sauvignon and Cabernet Malbec. The cuttings are in the buyer's nursery and he wants the seller to send for them and take them out of the ground at his own expense. We mention this merely to show the necessity of accuracy in describing cuttings.

Remarkable Preservation of Howell Mountain Grapes.

Mr. Pohndorff writes as follows to the St. Helena *Star*: Herewith the remainder of a bunch of fully ripened white grapes in excellent state of preservation. The best grapes were taken off the bunch and tested by a number of surprised persons yesterday afternoon. This bunch was picked yesterday, the 17th of January, by a plowman in the course of his work, from a young rooted vine, planted last spring on a slope of northwesterly exposure in Mr. Krug's Howell Mountain vineyard, 1,500 feet above the sea level. Picked in my presence and handed me, I heard the plowman say it was not an isolated case, but that he finds grapes on other vines there. This remarkable fact of the preserving properties of that rarefied mountain air, when, as yesterday morning, the thermometer had been below freezing degree, speaks volumes for the success for grape growing on the Howell heights, and fertility there being already substantiated, probably, with other favorable results involved in the above fact, the theory advanced for safety in the trial stage to plant early maturing varieties may be upset.

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. Whereas a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 made, which are heeled in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $4.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.

NAPA, CAL.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:—FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schiffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $50 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

COLUMBIA RIVER Per schr Mary Buhne, Jan 24—240 M ft lumber.

COLUMBIA RIVER Per brig Courtney Ford, Jan 24—475 M ft lumber.

PORT GAMBLE—Per bktne Mary Winkelman, Jan 24—600 M ft lumber.

MANILA Per Fr bark Augusta, Jan 24—14648 mats raw sugar.

NEW TACOMA—Per str San Pedro, Jan 24—1000 tons coal.

NEWCASTLE, N S W Per Br ship Mount Lebanon, Jan 24—2536 tons coal.

NANAIMO Per str Empire, Jan 24—780 tons coal.

Freights and Charters.

On Saturday last two of our ships were offered to charterers at 27s 6d Cork, f. k., for orders. Before the rates set in on Thursday they could not have obtained this price. A number of vessels, probably five or six, have received orders this week to take in ballast, and sail seeking for other ports. Ships still in the harbor are lower in the market, but no actual business is doing in consequence of the rains. The main question is what the cargoes of the great majority of wheat vessels now afloat are unsold. Some, when "all round" of Great Britain, have been so relieved, and in two cases have gone into warehouse. There is little foundation for any hope that European prices will speedily improve.

The engagements for the past week include to German ship Industrie, 1549 tons, wheat to Cork, f. k., 27s. British ship Fannie Lee, 1199 tons, wheat and merchandise to Liverpool direct, owners' account. Ship Ella is Good speed, 1201 tons, lumber from Portland Inlet to Sydney; private. British bark Gitana, 1067 tons, lumber from the South American ports. Barkentine W. H. Dimond, 376 tons, merchandise to Honolulu. Schooner Rosario, 141 tons, merchandise to Kahului. Barkentine Ceylon, 396 tons, merchandise to Honolulu in the Hawaiian Line. British ship Peoplemil, 1708 tons, wheat to Cork, f. k. 27s 6d. British ship Theophanes, 1519 tons, wheat to Cork, f. k. 27s 6d. British ship Ella, 1201 tons, lumber from Puget Sound to Liverpool direct, owners' account. British ship Mount Lebanon, 1143 tons, wheat to Cork, U. K., owners account.

Trade Failures.

There were 221 failures in the United States reported to *Bradstreet's* during the week ending Jan 19th, 24 more than the preceding week, 1 less than the corresponding week of 1883 and 111 more than the same week of 1882. About 80 per cent. were those of small traders with capital each less than $5,000. Compared with the previous week the middle states had 70, an increase of 3; New England states 43, a decrease of 3; south of 1st 38, same as before; of the western states 19, a decrease of 7; Pacific states and territories 19, a decrease of 19; Canada and Provinces had 12, an increase of 12. The failures included 12 banks, 4 railroads, 3 coal companies, 4 iron, Fuller & Co., commission, grain, Wesley Cumming, clothing, and leaves & samuels, clothing, New York city. In the principal trades this week as follows. In boots and shoes 87, against 61; agents 20; liquors 18, clothing 15, hardware and agricultural implements 13, bakers and confectioners 12, fancy goods 11, drugs 10, jewelers 10, stationers, paper hgs, etc 9, manufacturers 7, millinery 7, stoves & furniture 6, grain, flour, etc 6, hotels and restaurants 4, produce and provisions 3, tobacco and cigars 3, men's furnishing goods 3, harness 2, crockery 2, banks and bankers 2, oil cloth 2, lamps 2.

THE WINE MARKET.

We are not aware of any cellar of good, desirable wine in first hands of vintage 1883 unsold. Some cellars are yet in makers' hands, where the fermentation is not completed, and in consequence remain unsold. It is hoped that the approaching warm weather will bring them through, if properly taken care of; but as there is always a great risk that such wines will turn sour, they are at present unsalable, excepting at very low figures. Brandy is moving very slowly at prices unsatisfactory to all dillers.

For Exports and Imports, see Merchandise Markets.

Total	$128,561 50

PRODUCE MARKET.

[illegible] ing reports given under are compiled from [illegible] ending to Wednesday evening [illegible]

[illegible] Saturday we have been favored with a [illegible] rainfall throughout the length and breadth of [illegible] ties. These showers came at a most opportune time, and the result is, that the prospects for a bountiful harvest are now good. Farmers have resumed [illegible] and seeding, and from the latest advices received it is probable that the acreage devoted to the [illegible] will be greater than ever before.

We append a comparative statement of the rainfall [illegible] ly up to Jan. 31st, midnight, for the past [illegible] seasons:

	inches		inches.
1881	8.56	1879	7.20
1882	11.06	1878	11.91
1882	8.26	1877	7.57
1881	21.10	1876	16.41
1880	11.50	1875	15.98

FLOUR—

Imports, 5041 bbls. Exports, 29804 bbls

Receipts of wool, 620,982 pr sks

Though the wheat market is weak at a decline, [illegible] prices in the valley of Flour is reported [illegible] extra, $6 25@6 50; Superfine, $4 00@4 75 [illegible] country dates, $5 65@4 50. Interior Extra $5 00@ [illegible] at prices for jobbing parcels to local consumers [illegible] supposed for export can be had for less than the figure [illegible] quoted.

WHEAT—

Exports, 261,621 ctls

Receipts for the week, 114,000 ctls.

The wheat crops have entirely changed the condition of the market. The outlook now is especially favorable for a large crop, and holders who were very [illegible] to operate in the early months for full prices are now ready to make concessions in buyers' favor. Owing to a further depression in the Liverpool and continental markets, shippers here are [illegible] to pay when immediate necessity compels. The [illegible] holders take only petty parcels, evidently believing that the future of the market will be to their advantage. The speculative market has been active [illegible] and transactions on Call are unusually large. In the simple market $1 70@$1 80 is the nominal range for good shipping to extra choice milling. On Call yesterday buyer the season opened at $1 77 and closed at $1 75, seller season was disposed of at $1 67½@$1 65, transactions footing up about 30000 tons.

BARLEY—

Exports, 5218 ctls.

Receipts of week, 13175 ctls.

Since Monday morning the market has been in a demoralized condition, the rains causing holders of those kinds of feed barley on the market to be anxious sellers at materially reduced rates. It would now seem that the prospect of an unusually large crop is particularly favorable, and it is an admitted fact that stocks on hand are large.

In the Simple market, Bay Brewing is quotable at $1 12½@1 20, Bay Chevalier, $1 27½@1 30; Bay Feed, 95c@$1 02½ per ctl. On Call, yesterday, No. 1 Feed sold as follows: Spot, 96c, buyer season, $1 05@1 05½; seller season, 96c@95c, the lower figures representing the closing figures.

BUCKWHEAT—

Quotations are entirely nominal at $3 00@3¼ per ctl.

OATS—

Imports, 270 sks. Exports, 273 ctls.

Receipts of week, 1900 ctls.

Stocks on hand are almost entirely in the hands of one dealer, who will make no concessions in buyers favor.

We quote Black at $1 50@1 60, White, $1 50@1 90 per ctl for common to extra choice milling.

CORN—

Exports, 13 ctls.

Receipts of week, 3635 sks.

California is dull at $1 37½@1 50 for White and large Yellow, as to condition; Nebraska sells for $1 10@$1 45 per ctl.

RYE—

Receipts of week, 300 sks.

Small lots nominal at $1 25@1 35 per ctl

MILLSTUFFS—

Exports, 170 ctls bran, 1425 ctls millstuffs

Receipts of week, 900 sks Middlings, 420 ctls Ground Barley.

We quote: Ground Barley, $21 00@25 per ton. Middlings are selling at $20@22 00 per ton; Wheat Bran, $16 50@17 50 per ton; Oil Cake Meal, $30, old process, and $26 50 new process; Feed Corn Meal, $35@36; Cracked Corn, $36 per ton, Rye Flour, 86 per bbl; Rye Meal, $5 50 per bbl; Buckwheat Flour, 5c per lb; Pearl Barley, 3½c per lb; Eastern Oat Meal, 2c 75 per bbl; Cracked Wheat, 4c per lb.

HAY—

BEANS—

Exports, 139 ctls.

Receipts of the week, 1182 bags.

Colored are still in demand at improved rates While we do not note any advance in Whites, there is not that anxiety among holders that prevailed some weeks ago Butters have made a strong movement forward, they are scarce. The rain insures a good crop of Limas, and the feeling in them is weaker.

Our quotations are, for round lots from the wharf. Small White and Pea, $3 65; Bayos, $3 90; Pinks, $3 25; Reds, $4¼; Butters, $3 50; Limas, $3¾.

VEGETABLES

We quote: Carrots, 25c@35c sk; Turnips, 50c@65c; Cauliflower, 65c@75c per doz, Cabbage, 60c@75c per ctl, Garlic, 2c@2½c per lb, Celery, 50c per doz; Dried Okra, 20c per lb; Dried Peppers, 15c@15c per lb, String Beans, 15c@20c per lb, Artichokes, 40c@50c per doz, Beets, 75c per ctl; Parsnips, $1 of 1 25 per ctl, Mirliton Squash, $1 50@1 8 per ton, Mushrooms, 50c@75c per lb. Cucumbers 50c@2 00 per doz.

FRUITS—

Imports, 63 bunches bananas Exports, 6869 bxs fruit, 73 bxs apples

Late to oranges are about out of the market and no fresh import, otherwise the market is steady with a light demand.

We quote Domestic—Apples, 50c@2 00 per box, Pears, 75c@2 00 per box; Wisconsin Cranberries, $18 00@20 00 per bbl; Westerads, $17 00@17 75 per bbl.

Tropical Lemons, 50c@75 per box for Sicily; Limes, 50c@60c 50 per box for Mexican; Tamarinds, 12½c per lb, Bananas, $1 75@$4 00 per bunch; California Oranges, $2@3 for old and $3@5, for new, Loretto Oranges, $30 per M.

NUTS

Imports, 10 sks.

Business dull, no change in quotations.

We quote: Cocoanuts, $5@6 50 per 100, California Walnuts, 9c@9½c per lb, Chili do, 8½@9c; Carolina Almonds, hard shell, 20c@25c, soft shell, 15 to 17c; Filberts, 15c@16c, Pecan, 15c@14c; Peanuts, 3c@5c; Brazil Nuts, 15c@16c; Hickory Nuts, 7c@8c. Italian Chestnuts, 15c@16c.

HONEY—

Exports, 5166 lbs

We quote: Extracted, 8½@9c. Extra White Comb 18c@20c, White, 13c@16c, Dark, 8c@10c.

DAIRY PRODUCE—

Imports, 7 bxs 5840 lbs butter, 17800 lbs cheese. Exports, 5393 lbs butter, 5225 lbs cheese.

The supply of butter has been restricted during the late storm and prices have been firmer The advance in the number, will be increased supplies and reduced rates.

We quote: Fount Reyes, 37½c; Choice, 32½@35c Fair to Good, 27½@30, inferior lots from country stores, 25@28c, Point, 29@31c for Gold and 24@ 27½ for new; Eastern, 15@17c, Pickled Roll, out of market. Cheese, California, 10@13c for choice; 11@ 12½c for Fair to Good; Giros, in drums, 10@18c; Eastern, 17@18c; Western, 10@15c.

EGGS—

The supply of eggs is now more plentiful and prices are declining

We quote: California Eggs, Choice Ranch, 26@ 27½ per doz; California Hued, 23@24c; Eastern fresh, 24@25.

POULTRY—

The market has declined considerably since last week, especially in turkeys and broilers. The demand has been light.

We quote: Turkeys, Live Gobblers, 18@20c per lb Turkey Hens, 18@20c, Dressed, 22@24c; Young Roosters, $7 00@8 00, old Roosters, $6 50@7 00, Hens, $6 50@7 50, Broilers, $4 50@6 00, according to size, Ducks, $10@12 00 per doz; Geese, $2 00@ 2 50 per pair.

GAME—

Game is generally lower. Receipts are large and the demand is very small

We quote: Quail, 1@$1 12½ per dozen; Hare, $1 12½@2 00; Rabbits, small, $1@1 25; cotton tail $1 25@$1 50 per doz; Teal, 75c@$1; Sprigs, $1 25@ $1 50, Widgeon, $1@1 25; Mallards, $2 50@3 00 per doz; canvas-backs, $4 00@5 00 per doz, common, 50c@75c per doz, do, English $1 75 per doz; Grey Geese, $2 00@2 50 per doz. White Geese, $1 00@1 25, Honkers, $3 50@$4 00 per doz.

POTATOES—

Imports, 72 sks. Exports, 205 ctls.

Receipts of the week, 10,100 sks.

The rain stopped trading. River Reds continue scarce and Petalumas plentiful The Chinese New Year has produced a want of Early Rose, of any quality.

We quote Early Rose 50@60c; River Reds, 35@ 45c; Tomales and Petalumas, 85c, Cuffy's Cove, 85c; Humboldts, 85c, Sweets, $2@2 25.

ONIONS—

Exports, 53 ctls

Receipts of week, 1802 sks

Still scarce; yet there is but little demand. A No. 1 lot, at which we have not seen lately, would fetch 1¼c readily.

BEESWAX—

We quote 26@30 c per lb

HOPS—

Imports, 528 bls Exports, 14100 lbs.

Receipts of the week, 2752 bls.

New York advices to-day report market strong and an advance. Choice Pacific Coast is quoted at 26c in New York. Demand here is good at from 18 to 21c. Holders are very firm and but few lots offering. All that are offering at market prices are quickly taken. London market is also quoted very strong.

We quote medium to good 15@17½c; choice, 18 @20c.

HIDES, SKINS, ETC

Imports, 555 bdls hides, 24 bdls skins.

Heavy Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½c; Light Salted Cows and Steers, 30@50 lbs, 8c per lb. Salted Kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18@——c per lb; Dry Kips, do, 18c——c per lb. Dry Calf, do, 18@20c per lb.

WOOL—

Imports, 7 sks 3 bls.

Receipts of week, 238 sks

For Wool market see Wool Department.

The New England Commercial travelers held their annual dinner, the seventh reunion, in New Year's week. Two hundred members were present. The Vermonters, numbering 90 members, had a banquet the same week at Burlington, Vt.

MERCHANDISE MARKETS

AGRICULTURAL IMPLEMENTS—

Imports, 48 pkgs. Exports, 93 pkgs.

W, 17c; Cincinnati, 12-oz, 10½c; Diamond, 10-oz, 10c; Thayer & Judd's Paraffine, 20½c; Calcium Light, mill weights and 14-oz in 20 and 40-lb box, the agency price is 17½c for full weights and 15c for 14-oz; Rope's, 10@14; United States, 10-oz, 8½; Schmidt's 12-oz, 9¼.

CEMENT—

Exports, 27 bbls cement, 630 bbls lime.

	Spot.	To arrive
Eastern-Rosendale, in round lots	$2 20	2 15
English choice brands, in round lots	3 25	3 10
English outside brands, in round lots	3 15	3 00

COAL—

Imports, 740 tons Pacific Coast, 6665 tons Foreign and Eastern Exports, 14 tons.

There were no new features in this article last week, except liberal shipments from Coast Collieries, all of which were placed prior to arrival at Call figures; the arrivals from Great Britain and Australia will become gradually less each succeeding month for the next five or six months, as the bulk of our Foreign Coal is already here

A number of vessels have already left for Australian ports, and several more are preparing to leave; the major portion of these do not propose returning with Coal, but will carry grain from Australian ports; the rates from there are ten shillings per ton better than from here, and the voyage to Great Britain a shorter one

Importers' prices of coal, Foreign and Eastern, to arrive Australian, $8 25@8 50; Liverpool Steam, $8@ $8 25; West Hartley, $8 75@9 00, Scotch Splint, $8½ coal, Cardiff Steam, $7 75@8, Lump Lehigh, $13@ 13½; Egg Hard, $11@11½; Cumberland, bulk $10½ @10½. Spot prices are as follows: Australian, $8 25@ Liverpool Steam, $8 00, West Hartley, $8 00@; Scotch Splint, $8 50, Cardiff, $8 00, Lehigh Lump, @$13; Cumberland, bulk, $11 50, Egg Hard $11 50.

COFFEE—

Exports, 2014 lbs.

The demand for Eastern Shipment continues good, and the local trade is somewhat improved. There is no change in quotations.

We quote: Prime Guatemala at 12½c, Costa Rica, 13½c; good, unwashed Salvador at 12½c.

CORDAGE—

Imports, 1 coil. Exports, 41 coils.

We quote: Manila, 1½ inch (7-16 dia) and upward, 15c; do, 12-thread (⅜ dia) 15½c do, 6 and 9-thread (½ and 5-16 dia. 16c; Manila Bale Rope, 2, 3 and 4-thread, 15c; Manila Cordage, tarred, 2-in (⅝dia) and upward, 15c; do Isathyarn, 15c. Discount to the trade. Sisal Rope 1¼ in (7-16 dia) and upward, 10½c; do, 12-thread (⅜ dia), 11c; do 6 and 9-thread (½ and 5/16 dia), 11½c. Sisal Bale Rope, 3 and 4-thread, 10½ c

DRIED FRUITS—

Imports, 62 csks prunes Exports, 241 lbs dried fruit, 5 bxs raisins.

DRUGS AND CHEMICALS—

Imports, 9513 lbs drugs, 2417 lbs ginseng. Exports, 31 cs drugs, 2 carboys acid, 6162 lbs ginsing, 152 lbs opium.

We quote Nitric Acid, 12c; Strong Sulphuric Acid 3½@3¾c, sulphuric Acid, 2½c; Muriatic Acid 1¼c; all lots of 20 carboys or more); Caustic Soda, 60 deg, 5c; 70 deg, 4½@5c; 76 deg, 6½@6¾c; Powdered Caustic Soda, 7c@7½; Caustic Potash, 9½@10½c; Chlorate of Potash, 16@17c; Soda Ash, 2½@3½c; Soda Crystals, 1¾c

We quote at ship's side; Soda Ash, 1 90@2¼c for 52 deg. Ash; Soda Crystals, 1¼c; Chloride Lime, 2½ @2¾c, Copperas, 1¼c on spot; Caustic Soda, 60 per cent, 5c.

DRY GOODS—

Imports, 2359 cs. Exports, 980 cs.

FISH—

Imports, 9 cs fish, 150 cs salmon. Exports, 764 cs fish, 60@60 cs salmon

Codfish is firm at quotations, but the outlook for their maintenance is not as well seen by my remarks in "Retailers' Corner," is anything but bright.

We quote: Columbia River, $1 25; Sacramento,, $1 17½, f. o. b.; barrels, $14 00; hf barrels, $7 50; California Cod, in 50-lb bundles, 5½c; selected, in cases, 6c; boneless, 7c.

G. & B. POWDER—

Imports, 725 kgs blasting. Exports, 196 kgs blasting.

California Blasting is quotable at $3 25 ₱ keg; Dupont Blasting, iron kegs, $3; Hazard do do, $3 25; Hazard R R P, in canisters, 5-lb lb do, 60c; do Eclipse, 1; do Americanit, Spc. 75c; Dupont's Sporting—Golden Pheasant, kegs F, FF and FFF, $5 50; ½ kgs, $3 00; ¼ kegs, $1 75; Superior Rifle, kegs, Fg, FFg, FFFg, $7 00; ½ kegs, 83 75; ¼ kegs, $2 25; Eagle Duck, kegs, Nos 12 and 13, $14; ½ kegs, $7 50; ¼ kegs, $4 00, Diamond Grain, 5 lb cans, Nos. 1, 2 and 3, $4 75; 1-lb canisters, $1 00. Winchester Metallic Cartridges, rim fire, according to brand on $2 50 to $16 00 ₱ 1000; centers fire, according to brand, from $8 50 to $35 ₱ 1000; U S Cartridges, $100 ₱ 1 000.

HARDWARE—

Imports, 453 pkgs Exports, 238 pkgs.

IRON—

Imports, 187 tons, 208 pcs 240 bars 470 bdls iron, 62 pcs iron pipe, 60 bars 33 pcs 20 cs steel. Exports, 234 pcs iron, 31 pcs iron pipe, 11 bdls steel.

Nothing of any interest took place in this article last week, the depression noted still continues. The managers of the Clipper Gap furnaces report offers for round lots of their iron for future delivery; the better grades they make should crowd out all Eastern importations of Salisbury, etc.

The consumption of old Rails and Scrap Iron has not diminished.

[Continued on page 270.]

RETAILERS' CORNER.

There is a broad change in the feeling of our merchants since last Thursday evening. Every one feels in good spirits, and, as a leading wholesale grocer said to us, this week, "Any customer from an agricultural district whose standing on our books is ordinarily fair, can buy all he needs, without question. A few days ago we would not ask a man to take two cases of merchandise if we could get rid of him by selling him one." This tells the whole tale.

The orchard men are all in good spirits and are preparing for very active operations, and labor is in demand. There was little encouragement to go ahead when, besides codling moth, scale and other pests, and the possibility of damaging June northers, they had staring them in the face the probability of a dry season. The rain has fallen plenteously and "sufficient for the day is the evil thereof." The vineyard men share with their horticultural brethren in the revival of expectations of large crops this season. The wheat farmers and holders feel confident of a good yield next year, but would feel better if there was a readier sale in Europe for cargoes now afloat. All things considered, there is every prospect of an excellent spring business, in all parts of the coast which are still tributary to San Francisco.

The Coffee market is firm, without much local business. We have about 8500 bags in first hands, but counting speculators we have 19,000 bags. There is some demand from the pool of good Guatemala. Eastern reports say that Rio cargoes are very firm at 12¾c., with every prospect of an advance.

Island Rice is very firm at the second advance in a fortnight. A week ago we reported an advance of ¾c. and to-day we have to report a further advance of ½ cent, with a strong tone in the market. Quotations to-day are 5¼ to 5¼c., regular.

Teas, which have been for some time on the down grade, are experiencing a reaction. The New York market has advanced 4 cents under advices from Japan. Our local importers have made no advance as yet in their asking rates, but are more independent, and to-day refuse offers below asking rates that they would have accepted a week ago.

Provisions and Hog Products are unchanged in this market, but there is a well-founded expectation of free advances in sympathy with the East.

The Codfish market is in a very uncertain condition at present, although prices to-day show no change from last week's quotations. We have a larger stock on hand than we had this time last year, but it will be remembered that in the spring the market was bare.

Eastern curers have been telegraphing very low quotations to this city and several of our jobbers have taken advantage of these offers. We fear that some of them will regret their rashness, owing to the liability of the fish reaching here in bad order.

We notice that a retail store on Market street has taken advantage of the deservedly high reputation of our Pacific Coast Codfish by placarding badly damaged Eastern Cod, *"Alaska Codfish, five cents per lb."* This is a deception and fraud which should be denounced by all consumers. Another fraud which should be exposed is the practice of packing and sending to this market hake, haddock and cusk under the name of Codfish. They are branded "Boneless Fish," only, but all are led to believe that they are *Codfish*. These inferior fish are a drug on the Eastern market, and cannot there be palmed off on an unsuspecting public.

Borax, "B" and "C," are respectively 25 and 10 cents lower.

Schneider's Candles, 10 ozs., are quoted at a reduction.

In Farinaceous Goods, we notice a reduction in Cut Oatmeal of 25 cents per barrel, and Hominy is also cheaper by $2 to $3.

TOBACCO MARKETS.

SAN FRANCISCO.—There have been a few transactions during the week in leaf, chiefly Sumatra some in '82 Pennsylvania and also in Havana. This market is so well stocked that manufacturers do not feel any necessity of loading themselves up.

Cigar manufacturers complain of a lack of orders, but now that seasonable rains have fallen, this condition of affairs may be expected to change.

We have never known a poorer week's business in manufactured tobaccos, even for this season of the year, than the past. Principals and salesmen in the largest houses have had little or nothing to do in the way of taking or filling orders.

The passage of the appropriation for paying the rebate to holders of tobacco bearing stamps of the old value gives great satisfaction to the claimants on this coast. California's interest on this coast is one fourth of the whole amount. It is hoped that the claims will be sufficiently advanced through the various departments of the treasury to admit of their being paid in May.

[U. S. Tobacco Journal.]

NEW YORK, Jan 19th.—While business was not exceedingly brisk, the market is gradually settling down to the fact that there is very little—too little—good seed leaf tobacco in the market, and that to secure the little there is is an imperative duty. In consequence there was a good deal of inspecting, a good many bids and a good many "strictly private" arrangements, but the curious public heard of very few *bona fide* transactions.

The supposed final decision of the Secretary also tended to make the feeling in the market an exceedingly exuberant one, every holder of trashy seed leaf imagining himself to be the possessor of a Nevada gold mine. We claim, as we have claimed before, that the decision of the Secretary never had and never will have any effect on the seed leaf market as long as the nature of the tobaccos offered in the market remains unchanged. Would a cigar manufacturer refuse to pay $2 a pound for Sumatra because sponged Ohio or wild '82 Connecticut wrappers could be bought for 25 cents? Sumatra never was a competitor to poor tobacco, though unfortunate holders of such tobacco are said to be the cause. If our market was overstocked with good and serviceable tobacco, Sumatra at a 35 cent rate of duty certainly would prove a powerful competitor. As it is, the insignificant amount of fine '82 seed leaf on hand will sell at good profit to present holders of such, whether Sumatra pays 35 or 75 cents duty. With the prospects of the incoming '83 crops before us, our manufacturers can not do without Sumatra, even should the duty be a dollar and a half a pound. What are they going to do? It becomes more apparent day after day that the '83 crop is, as a whole, a failure. The Havana seconds alone of the various States makes an at least promising appearance, but so little native seed seems better than cultivated cabbage, that if our markets were not supported largely by nations and settlers by the Sumatra should sell to-day at $2 to $2.50 per pound and fine '82 seed leaf at 50 cents to $1.00 a pound.

[New York Tobacco Leaf.]

NEW YORK, Jan 18th.—*Western Leaf.* The market has been quiet the past week, with only few sales at prices ranging from 7 to 11c. Below details are given.

Yarima Leaf—There has been a moderate demand for bright wrappers, and a few sales have been made for export.

Spanish—Havana fillers have been sold to the extent of 450 bales at from 82c to $1.15.

Sumatra—A better feeling prevails and holders are stiffer. Sales 150 bales at from $1.25 to $1.50.

Plug—There has been the usual weekly retail inquiry, but expectations are in advance of actual transactions. It is believed that increased activity will be soon perceptible.

Smoking—The demand continues fair for all popular grades of tobacco.

Cigars—Manufacturers have been busy the past week, and report a satisfactory trade.

OILS—

Imports, 330 cs oil. Exports, 10 cs oil:

We quote: California Castor Oil, No 1, $1 25 ■ gal; No 2, $1 00. The Pacific Oil Works list for Linseed, 65c ■ gal for boiled; 62½c for raw in 100 bbl lots. We quote: Eastern linseed oil, 81½c, winter strained lard oil, 85c, in bbls, Cocoanut Oil, in bbls, 57½; China Nut Oil, 80c ■ gal, Coast Whale, 37½c; Arctic Whale, 40c; Cal Neatsfoot, 85c; Eastern do, 90, Sapphin, 20c, Red Oil, 5½; California Olive Oil, $1 ■ gal or $12 ■ doz.

PAINTS—

Imports, 11 cs paint, 6 bbls varnish. Exports, 6 cs paints,

Business in this line is brisk, as it has been since the beginning of the year.

We quote White Lead 6½ in ton lots; and 6¾ in 5 ton lots, Litharge, 6; Ochre, Yellow, dry, 3 to 3½c; Ochre, ground, 5 to 6; Umbers, 6 to 7; Venetia Red, 2 to 3c, do, in oil, 5 to 6c, Chrome, dry, 15 to 50c, do, in oil, 18c; Red Lead, 6 cents

PETROLEUM—

Imports, 1 vs, 2 tanks coal oil, Exports, 355 ■ coal oil

We quote California, S W, 110 deg, and with tanker faucet, 17c per gal, plain cans, 16c, bulk, in pat. bbls, 12c per gal

PROVISIONS—

Imports, 21, 757 lbs bacon, 86,700 lbs hams, 342, 970 lbs, 1 bbl lard. Exports, 20,050 lbs bacon, 675 lbs beef, 338½ lbs ham, 11665 bbls lard, 34 kegs pork.

No change in prices, market firm, business dull but good prospects

We quote: California hams, 13; Eastern, 15½@16½c; Our Choice hams, 15½@16; California bacon, 11¾@13½c; California covered bacon, 14½; extra clear sides, 12@12¾c; California shoulders—mess pork, $20 per bbl; prime mess $18½, clear pork, $21 per bbl; extra clear do, $22 per bbl; pig pork, $24 per bbl; mess beef, $15 50 per bbl; family do $10½ per bbl; Eastern refined lard, in tes, 13¾ per lb, California refined lard, in tes, 11c per lb, 10s, 10½; 5s, 10¾c; Banner lard, 10s, 12½, 5s, 12¾c, 3s, 13c.

QUICKSILVER—

In no material demand for domestic trade, while that for export is almost nil. The price here is $48 per lb, and by latest mail advices £7 5s per flask in London.

According to the "London Board of Trade" returns for December, there were

	1881	1882	1883
Imptd in Dec, flsks	8,988	800	450
" 12 months	56,261	45,921	56,520
Exptd in Dec, flsks	2,935	4,382	3,165
" 12 months	24,842	49,431	48,907

RICE—

Imports, 800 bags. Exports, 12,107 lbs

On account of the Chinese New Year festivities, but little has been done in the China & Japan trade. Sandwich Island is in moderate demand at 5c.

We quote Mixed $4 10@—; No 2 China $4 60@4 70, good No 1 $5 25@5 50, Extra No 1 $5 90@6 10, Hawaiian $4 75@5 00

SALT—

Exports, 71,120 lbs

Nothing of interest to report in this line. Price remain unchanged and the demand is light

Liverpool fine we quote at $18@21 70 ton. California, $6@10 for Bay; do crsal, $8@15 Carmen Island, fine, $16@22, do coarse, $12, do do half ground, $9@14.

SOAP—

Imports, 30 bxs Exports, 2 bxs.

Trade has not improved as yet. As the weather settles there is a certainty of an increase in the country demand. The price of tallow remaining firm, there is no prospect of an immediate change.

We quote, California Castile, Mottled, 8¾@12c; White, 16, French Castile, Mottled, 11@12½c; White, 17@20, California Pale and Chemical Olive, 5@6½c; Washing Powders, 8¾@12½; per gross.

SPICES—

We note quite an increase in business, the improvement being marked since our last.

We quote Black Pepper, 15@16c; White Pepper, 22@— c; Allspice, 12@15c; Cloves, 22@25c, Cassia, 8@9 c; Ceylon Cinnamon, 40@45c; Ginger, 8@15c, Nutmegs, 62½@65c, Mace, 60@62½c; Borneo Ginger, 16@18c.

SPIRITS—

Imports, 58 bbls alcohol, 58 bbls spirits, 1 h ■ brandy, 112 bbls whiskey Exports, 22 cs spirits, 40 galls brandy, 42 cases whisky, 200 galls liquors.

STARCH—

The demand has improved, though it cannot be termed brisk. Prospects are good for a further improvement; prices remain unchanged.

We quote Kingsford's Pure Corn, 8¼@9¾, Corn and Silver Gloss, 10½c; Pearl, 7½c; Pure Starch, in barrels, 7¾c; Ground and Wheat Starch, 8½c, in barrels; Silver Gloss, in barrels, 9½c.

SUGAR—

Imports, 100,708 bags raw, 33,600 lbs refined. Exports, 26,700 lbs refined.

The local demand is exceedingly good. From New York, by telegram, we learn that Crushed is quoted at 8¾c, and granulated at 7¾c

Grocery grades of Island sugars are selling freely at prices ranging from 5½ to 6¼c. The sales during the week have been larger than last week, owing to arrivals of the steamer and two sailing vessels from sections amounted to 2,900 bags. No kegs received and therefore none sold

We quote local refinery rates, prices subject to change without notice.

(A) Fine Granulated, in bbls, 10¾c; (A) Crushed Sugar, 10½c; Extra Powdered sugar, in barrels, 10 ■ Fine Crushed sugar, in barrels, 10½c. Dry Granulated sugar, in barrels, 9¾c, Extra Granulated sugar, in barrels, 9½c, Extra C, 8¾c, Golden C sugar, in barrels, 8¼c; D sugar in barrels, 7¾c; Extra Fine Powdered, in bbls, 11¼c; Confectioners' (A), 10c; El Dorado C, in barrels, 9¼c; Manipora C, 8¾c; Nonpareil, 8½c; half barrels, ¼c, and boxes, ½c, more for all kinds.

A. D. BELL ..... Editor.

FRIDAY ... FEBRUARY 1, 1884

Twenty years more of hydraulic mining in this State and a vessel drawing 26 feet of water could not enter this harbor at ordinary high tide if there was a cap full of wind blowing. The bar in less than twenty years has grown from half a mile in width to two and a half miles.

A more careful reading of Professor Hussmann's charged work on American vine growing and wine making shows him to be the same inaccurate, spiteful, half-educated writer on these subjects which he was three years ago. His is a bad case of blighted development or congenital narrow-mindedness.

George J. Hood, of Sausalito, is curing herring for the market. The locality is an excellent one for the purpose, as the fish are caught in shoals during the season within half a mile of the curing house. He has succeeded in his first attempt in getting a brighter product than any that have attempted this business, and there is every reason for believing that he will succeed in making a merchantable article in such quantities as the market can take.

The rains that have fallen during the past seven days, though not yet so liberal as desired in some parts of the State, have given courage to our farmers, horticulturists, vineyardists and others to push operations with all their energy. The plow is at work, seed is being sowed, new orchards are being laid out, lands are being prepared for vines, acres upon acres are being cultivated in Alameda for sugar beets, and gloom and anxiety, in most parts of the State, have given way to cheerfulness and activity. Business in the city has also improved; our merchants, no longer reluctant to part with their goods, cheerfully execute the orders of their customers and invite them to increase their purchases.

A week ago, when so many were giving way to despondency over the lack of rain, the MERCHANT took a more cheerful view of affairs. We claimed that, all things considered, our situation was as good as last year and that there was every probability that we would receive five or six inches more rain and possibly twenty, or more than is necessary. Before the MERCHANT containing these lines reached the bulk of our subscribers, the rain had commenced to fall. The continuance of heavy showers has settled the question as far as it can be settled at this period of the year, that California will be blessed again with a bountiful crop. Providence may seem slack and forgetful at times, and murmurs are heard, but at the right moment the welcome showers come to rebuke our impatience.

SAVINGS.

In 1857 the total amount of deposits in public savings institutions in this State was $20,100. In 1861 it had suddenly jumped to $1,135,000. In 1867 the sum had reached $40,358,900, and in 1874, $36,556,000. In 1878 the savings on deposit in the State amounted to $74,655,109, the highest point reached. In that and the following year, four San Francisco banks went into liquidation, and five country banks suspended or retired from business. The sum on deposit had by January 1st, 1880, declined to $71,864,900. In 1881 it was more than $2,800,000 less; from that date it has grown again to $80,923,700, the gain in the past year having been $4,690,754, which sum represents a portion of the surplus profits of our wage and salaried population and smaller tradesmen in one twelvemonth. In 1866-7, a savings bank was first instituted in the interior, and at the beginning of 1868 the sum on deposit in such banks was only $200,000; it has since reached a little over $14,000,000, and has been about stationary for two years. Oakland, next to San Francisco, has the largest amount on deposit, and Stockton comes second. Sacramento ranks lower in the scale than Merced or Mendocino. There are nine of these interior banks, and one just organizing at Fresno.

TARIFF DANGERS.

The Los Angeles *Herald*, in an article under the heading "An Unfounded Panic," rebukes the MERCHANT as follows:

"Unless we are grossly misinformed, the editor of the San Francisco MERCHANT is ordinarily a staunch Democrat. He seems lately to have been stampeded, and by our friends of the Republican press, if we may judge from the following, which appeared in a recent issue of his journal, under the heading of 'Tariff Dangers.'"

The *Herald* then quotes our recent article on the effect that a horizontal reduction of the tariff would have on fruit and wine producing counties of the State, and winds up as follows.

"We adjure our friend to 'hold his horses.' He will find when the Democratic House of Representatives adjourns that his fears have been the chimeras dire of a nightmare imagination. While the current session of that body will be attended with great blessings and greater promise of blessings to the taxpayers of the United States, it will be found to have disturbed no values and no industries, but, rather, to have strengthened both through an inauguration of economy and responsibility to the people. Our productive industries are in no danger from a Democratic House of Representatives."

We do not think some of the political lawyers who claim to be the leaders of the Democratic party would hesitate to disturb values and industries if so doing would lift them into office; our safety is not so much in their statesmanship as in their fears of alienating the mass of their followers by putting their low tariff theories into practice.

THE WORLD'S FAIR.

A subscriber writes us that our estimate, given last week of the capital which would be required to hold a World's Fair in this city, was excessive, and that $1,000,000 to $1,500,000 would be ample. Our correspondent may be right, if the intention is to hold a Pacific Coast Fair and call it a World's Fair; but we are nearer the mark than he, if it is to be a Worlds' Fair in fact as well as in name.

When a publisher makes the interest of the community his first aim and money making secondary, it is some reward to find his efforts appreciated by the classes immediately interested. The more solid reward will come in good time. No proprietor ever published a first-class journal and maintained it for years without finding sooner or later that he had created a valuable property. The following from the *Pacific Sentinel*, Cloverdale, a paper published in a thriving viticultural district and edited by a live man, who himself is a close observer and student of all viticultural subjects, is a generous appreciation of our labors, and we know from oral and epistolary expressions, that there are hundreds of our subscribers who will endorse it.

We think we may with justice feel proud that California has so enterprising a viticultural journal as the MERCHANT. It spares neither space nor expense in presenting matter of general interest, and our grape growers should show their appreciation of its enterprise by adding their names to its subscription lists. That is the only practical way to show your appreciation, gentlemen, for it costs money to conduct a newspaper, and a publisher cannot pay his bills with kindly mentions, or your high opinion of his enterprise. A single hint received in perusing the MERCHANT may be worth a hundred dollars to you. With too many grape growers we fear it is the case that they are sublimely egotistical and think they can learn nothing. Such men are falling years behind the times.—*Pacific Sentinel.*

On the other hand there is at least one person in this State who follows viticulture, who is far from concurring in our Cloverdale brother's admiration for the MERCHANT. In his last note to us, this person, Professor Husmann, under date Oct. 4th, 1883, writes: "I do not care to have the MERCHANT any longer * * as I am no admirer of partiality, blackguardism and abuse, which find their place in its columns oftener than is agreeable to decent readers." If the above had been written by Neilson, alias McComm, we should not have been surprised, but we do not class the Australian ex-convict as one of our decent readers. We do not know that we can class Husmann as one, either. In his second and enlarged edition of his book on grape growing and wine making, he repeats the false and absurd statement, page 54, new edition, that wine made from the Cynthiana grape when exhibited at the Vienna exposition was awarded the first premium for "the best red wine of all nations," though we have pointed out that no such premium was offered and moreover published three years ago a letter from the exhibitors of that Cynthiana that though it was commended in its class, they had never been notified that such a first premium had been awarded. A man may make a mistake even in writing a book, but to reprint the blunder three years after in a second edition discredits every other statement in the book and in fact makes it worthless. Professor Husmann of course does not like the MERCHANT for pointing out his blunders and denouncing his advocacy of Gallizing, Petiotizing (he persists in spelling it Petiolizing,) and other frauds sanctioned by French chemists. We want in California to keep Satanic methods of swindling out of the wine cellar. Husmann wants to introduce them. There is some men's blame that we would rather have than their praise, and we felt pleased when we read in his new edition, as follows: "But can we wonder at this" (meaning bad handling of some of our Zinfandel grapes:—ED. MERCHANT) "when a paper (meaning the MERCHANT) which claims to be the leading organ of the grape grower, advocates ignorance in its columns, says that chemistry and science have nothing to do with wine-making and do more harm than good." The man who wrote the above is more than a blunder; he is a wilful falsifier, and such a statement about the MERCHANT simply injures the sale on this coast of his book, because it proves to the subscribers of the MERCHANT, amongst whom only could be found purchasers, that the author is a crank.

A BUSINESS CHANGE.

Jacob S. Taber announces his retirement from the firm of Taber, Harker & Co. Mr. Taber has for many years been a leading spirit in the wholesale grocery business. He was first known in connection with the house of Dodge, Phillips & Co. On the dissolution of this firm, fifteen years ago, Mr. Taber formed a partnership with Mr. Phillips, and eight years ago Mr. Asa Harker purchased Mr. Phillips' interest, and the style of the firm became Taber, Harker & Co. In these latter years the firm has been very prosperous. Mr. Taber is a man of great ability, but the remarkable feature in his character is his public spirit. He has always been ready to devote thought and time to public and philanthropic projects. He has been five times elected President of the Board of Trade and has made that institution the most influential commercial body on this coast. The suggestions he made in one of his annual addresses led to the establishment of the Immigrant Association of California. Had Mr. Taber done nothing else but start the immigration ball rolling, he would be entitled to the thanks of the community as a public benefactor. Mr. Taber is of too active a disposition to lead a life of leisure, and we expect shortly to hear of him in some new enterprise.

Mr. Asa Harker, the head of the new firm of Asa Harker & Co., is a gentleman of large means, and besides his grocery business, has considerable investments in some of our most prosperous manufacturing and financial institutions. Mr. Harker has given an interest in the business to two well known gentlemen who have been with the old firm many years. Mr. William Adams entered the house in 1874 when the firm was Phillips, Taber & Co., and has remained with it as chief salesman to this day. Thurlow McMullen became traveller for the house when Taber, Harker & Co. purchased the stock and good will of the late firm of George O. McMullen & Co. Both these gentlemen have hosts of friends amongst the interior merchants, and in identifying them more closely with the business, the new head of the firm has done what must tend to increase the business of a house which has already won popularity by many years of honorable dealing, under the firm names of Phillips, Taber & Co. and Taber, Harker & Co.

REMOVED.—Michelsson, Brown & Co., the well-known pork packers and provision dealers, have removed from their old stand on Front street to the more commodious premises on the southwest corner of California and Front, just vacated by Michaelitschke Bros. The building is the one occupied so many years by W. T. Coleman & Co.

The weather clerk is as fond of teasing as a mischievous but good-hearted girl and seldom carries things too far.

That life is a burden as well as a blessing.

That good advice is excellent; timely help is better.

That the world without women would be a dull place.

That the man who said it was going to be a dry year cannot now be found.

That a woman's heart, when it is full, is like the moon—there is always a man in it

That now is the time to plant out political clubs and other fruit bearing deciduous trees.

That stocks being dull, lotteries are doing a good business in a quiet way throughthe State.

That the Democratic party has got a good prospect; will the next election give them a paying mine?

That Oakland has joined the roll of California towns towns want new postoffice buildings.

That the rains of the week have had the effect of shortening the faces of our merchants.

That the administrator of the Skerrett estate has as good a thing as any one of the many heirs.

That when a new and original play runs one whole consecutive night, its author considers it a success.

That it is to be hoped that some more of the tenants of Murderers' Row will shortly be removed to Celestial lodgings.

That Jacob S. Taber in all private, commercial and public matters has shown himself plumb, level and square.

That would-be presidents are like the little boy who was told not to ask for cake, but he wanted a slice all the same.

That it looks as if Alaska was to have a local government at last and a government without taxation except customs dues.

That in some of our churches there was a prayer for rain, and the wind being in the right direction, they were answered.

That the slogger Sullivan can draw a bigger crowd than would gather to listen to the foremost statesman or literary man of the day.

That no sweeter music has been heard in California for many a day than the howling of the wind and splashing of the rain last Saturday night.

That the opponents of Civil Service having done their best to prevent it working well, are now seeking to strangle the infant before it grows too strong.

That if the Carlisle-Morrow gang will keep their hands off the tariff, California will double the extent of her manufactures within five years and perhaps less.

That Morrison of the Ways and Means Committee seems to have his finger on the public pulse and be watching the beats of opinion, that he may learn whether it is policy to administer a dose of tariff reform.

That Warren Dutton deserved some reward for the dirty work of wrecking the N. P. C. R. R., but the law does not recognize a man's right to collect money for such services.

That theological students eschew tobacco, but when, in after years, their brains refuse to furnish thoughts for a good sermon, they fly to tobacco as naturally as a worn-out B'homan, struggling with an editorial that won't compose itself.

That the administration of justice in San Francisco, temporarily, is obstructed. The United States District Court is flooded by Chinese cases and the State Courts by the Hill Sharon, Sharon-Hill suits in their many forms, but the business of the city survives.

That eleven Grand Jurymen under constructive arrest for refusing to disregard a solemn oath and reveal the secrets of the Grand Jury room, and the man and woman whom they indicted walking freely about their business, is one of the anomalies of law.

That if Nevada is to retain her position as a State, she must largely increase her agricultural population. There are valleys in Nevada with as rich a soil, as good a climate and equal in area with some of the New England States. Mining may continue for two or three generations, but will not do for a sole dependence.

That the relations between Neilson and the *Examiner* did not end pleasantly is well known, but the *Examiner* is so tied up that it cannot make any report of testimony given in Court that reflects on Neilson's character. Why? Was George Hearst indiscreet while Neilson was in his employ as a political writer on the *Examiner?* That is what is said.

That some who respect Henry George as an earnest and sincere man and clear thinker, suppose he leans toward Socialism. On the contrary, Henry George scouts the idea that property which has been created by self denial and industry should be divided amongst the community, many of whom have, of course, wasted their earnings in extravagance or their time in idleness.

That it is to be regretted that the Immigration Association have felt it necessary to withdraw for the present their European agent, though he was doing well, and confine their operations to the Atlantic States and Canada. The reason given is lack of funds. If every man who has grown fruit trees would contribute one cent a year, and every viticulturist a tenth of a cent for every growing vine, the association would have ample funds. Without something is done the labor question will in two years be the most prominent one in the State.

Wanted—A Gum.

EDITOR MERCHANT.—I would like to ask Messrs. Dr. Chapin, Cook, Dwinelle and Hilgard, through your columns, whether some kind of gum could be manufactured that would withstand the action of the sun in summer for a reasonable time, with which the trunks of trees and plants could be protected from insects, by painting a ring around the bark. The composition would have to have a sticky or gummy nature, and, at the same time, not be injurious to sap. This would be a simple and cheaper application than spraying, and particularly effective against the red mite and yellow spider. M. DENICKE.

FRESNO, Cal., January 20, 1884.

After a lull of a few hours, the rain again sets in, and at the hour of our going to press, there is every prospect of a continuance. It is welcome, and there is little danger of our having "too much of a good thing."

FRENCH WINE CROPS.

ST. HELENA, Jan. 28th, 1884.

EDITOR MERCHANT:—The official tables of the wine production of France in 1883 have just been published by the Ministry of Finance, showing the quantity to have been 36,029,182 hectolitres or 951,782,093 gallons, an advantage of 135,866,631 gallons over the output of 1882.

In its editorial remarks on the subject, the *Moniteur Vinicole* expresses doubts of the exactness of the estimate of the 1882 crop, considering the figure far too low, and bases these doubts on the opinion of unofficial persons conversant with the matter, who seem to be justified, inasmuch as the January table published officially last year of the 1882 crop, giving the amount of 30,886,352 hectolitres, was declared too low by the French Minister of Agriculture, who made the figure 40,162,715 hectolitres. Whatever the discrepancy may amount to, the quantity of wine made in France in 1883 is a vast improvement over that of 1882. Every well-wisher of France will not begrudge the vintners their contentment with the result, for their suffering has been and still will be great and their fight against phylloxera an arduous one.

The annexed table, in which I have converted the hectolitres into gallons and the hectares into acres, gives a clear insight into the state of French viticulture.

Wines of All Kinds	Years.	Number acres planted in vines	Product, gallons.	Imports, gallons.	Exports, gallons.
	1873	5,883,317	953,597,472	17,870,676	105,105,717
	1874	6,000,196	1,068,365,632	15,849,764	98,501,827
	1875	6,082,901	1,211,695,512	14,713,764	87,395,925
	1876	6,205,840	1,105,472,496	14,357,802	87,395,925
	1877	6,313,564	1,034,788,768	14,344,851	80,392,599
	1878	6,373,564	1,034,788,768	14,344,851	80,392,599
	1879	6,417,215	667,702,000	18,712,133	75,737,496
	1880	6,417,215	667,702,000	18,712,133	75,737,496
	1881	6,276,447	815,935,462	19,005,923	69,153,764
	1882	5,817,202	951,782,093	20,857,574	81,692,113
	Average of the 10 years from 1873 to 1882 inclusive	5,179,035	1,189,105,101	79,620,858	99,953,432
			951,782,093	208,773,551	

The decline of acreage from 1874, the heavy crop of 1875, 83,836,000 hectolitres (26,417-1000 gallons) a rise in acreage in 1881, its new declension in 1882 and 1883, the heavy influx of foreign wines, which reached its highest figure in the first eleven months of 1883, which will probably be mitigated in 1884 by the favorable result of the last French crop—the drop in quantities exported, which may be interrupted by that cause—all these are features of interest and cause for reflection. The magnitude of the wine industry of France is surprising, and when we consider that an error in calculating a year's crop as above by nine millions of hectolitres, or about twenty-four times our California crop of wine, is possible, really, we Californians must feel diminutive.

Spain supplied 145,000,000 of gallons of wine to France in 1883.

Wines made of pomace and of raisins amounted to 27,711,433 gallons of the former and 70,824,377 gallons of the latter.

The production in Algiers is rapidly increasing, 947,153 hectolitres, or 25,020,940 gallons, having been the crop in that colony.

The crop of cider in France was in 1883, 23,492,268 hectolitres, or 620,595,243 gallons, a most favorable result over the last two years, having been more than double the quantity of those crops.

F. POHNDORFF.

Fertilizing and Cultivation.

[Gustav Eisen in the Fresno Republican.]

Lately the Los Angeles *Times* and the Cloverdale *Sentinel* have endeavored to teach the horticulturists of California some remarkable novelties in horticulture. The Los Angeles *Times* advocated the great benefit that could be derived from allowing the olive trees to take care of themselves. The climate in Los Angeles is so well adapted to horticulture that no care whatever should be bestowed upon the culture of the olive. This Mexican idea of improving valuable fruit trees has been, as we hope, once for all set at rest by F. Pohndorff, who with clear arguments has shown what experienced olive growers in Europe had concluded upon years or centuries ago. To believe that any kind of fruit-bearing tree should produce better if left alone is absurd. The very fact that the different varieties of fruit have originated by human care, under careful selection and cultivation, contradicts the idea that these same fruits should further improve by being left alone among weeds, by suffering from want of moisture and, perhaps, used as pasture or hitching posts. Surely such theories cannot be accepted by any one who has been the least acquainted with practical horticulture, as our first experiences teach us how very gratefully trees and plants repay us for manuring and cultivation.

From the Cloverdale *Sentinel* we learn that young grape vines should not be manured, and from other sources we are informed that young vines should not be pruned for several years. If nothing else, this way of cultivating insures plenty of time to the horticulturist to attend to other business until his vineyard or orchard is in full bearing. If we then add that many advise not to plow the land at all, but let it remain weedy and hard, who will doubt that horticulture is an easy, agreeable and labor-saving occupation, a state of passive contemplation?

Our experience, however, does not warrant any such assertions. If the experience of vintners in Europe has proven anything, it is, that while the manuring of nature vineyards may cause a deterioration of the wine in its principal qualities, it still, to a certainty increases the production. The *Sentinel* thinks it a positive injury to fertilize young vines, because an immense top will be developed without a corresponding root. But, as the top is cut off every year to within a few buds, we cannot see the point in the argument. The fact is that if vineyards should be fertilized at all, the proper time to do it is while the vines are still young. The fertilizer will then have no influence upon its flavor, aroma or taste. While the vines are yet young their roots penetrate only a small distance in the ground, their searching space is limited, and their roots for searching nourishment very limited. If left to themselves, both roots and tops will develop slowly, and dwarfed plants will be the result. But, if, supplied with manure or fertilizers of such quality as will cause them to penetrate deeply into the soil, we will get strong and healthy plants, with power to penetrate their roots to deeper, moister strata of soil, where food and moisture will be found in sufficient quantity to produce good crops It is the constant endeavor of the nurseryman to produce strong and healthy plants of any kind, and experience has taught us that strong plants are much more prepared to care for themselves than stunted ones, and while it takes years for the latter to come into bearing, the former will soon repay the extra care bestowed upon them.

That denying some children education in the primary schools on the ground of want of room while thousands of dollars are spent annually in educating the children of other tax-payers in the higher branches, is an abuse which ought to be reformed.

We are in receipt of "Vennor's Almanac for 1884." It is full of prophecies of great importance. In January under date of 25th, we find Bishop Isonier than usual. On February 2nd, Candlemas Day, we read: Ward tallows his nose once more. On May 1st: Canned tomatoes will boom. June 3rd: total loss of coffee crop in Brazil by blight. August 1st. Salmon refuse to enter the Columbia River and failure of the pack. October 9th: Oyster epidemic in Chesapeake Bay. November 29th: Ice crop destroyed by frost. December 31st. Where is Wiggins?—*St. Louis Grocer.*

The well-established popularity of the MERCHANT among wine growers and those connected with the viticultural and raisin interests, is evinced by its steadily increasing subscription list and advertising patronage.

JOBBERS' PRICES.

WOOL WORKING.

We are beginning to find out that shipping wool with all the dirt and grease which comes from the sheep's back is not a very profitable business. Our scouring mills have done well the past season and have been the chief buyers in the market. Now, what we should do is, go a step farther and, instead of sending scoured wools East, ship yarn. It is as easy, and more profitable, to sell yarn in the other manufacturing States than to sell scoured wool, just as scoured wool finds a freer sale than wool in the grease. In time, some capitalists will open their eyes to this opportunity and yarn mills will become nearly as common in California as flouring mills.

Woolen Manufacturing.

Woolen manufacturing is far from being so prosperous in California just now as we could wish it. Indeed, there is just now no inducement to add more looms to those now in the State. This state of affairs has not arisen from manufacturing more blankets, cloths and flannels than the people on this coast can use, but because in the stagnation of the woolen trade and excess of production in the Atlantic States, manufacturers there are swamping this market with their fabrics and selling them at prices that will not pay cost of production of transportation and commissions. Add to this that nine-tenths of the woolen clothing worn in this State is slop stuff turned out by Eastern clothiers.

If we had more clothing manufacturers on this coast, our mills would have a market for their business and would not have stocks worth hundreds of thousands of dollars lying on their hands year after year. There is more wear in our California cloth than in Eastern, but the Eastern cloth is made up ready for use and sells rapidly, while ours lies, in piece form, in warehouses. Nine-tenths of our working and business men would prefer the home manufacture, but do not care to go to the trouble or expense of being measured for a suit. Some day our woolen mill owners will find themselves forced in self protection to turn their piece goods into clothing. When that is done, stocks will decrease and woolen manufacturing will revive.

Minneapolis, Minn., now claims a population of 100,000. Three years ago the population was 46,000. At this rate of increase Chicago will soon be nowhere and had better shut up shop and move to the new metropolis of the northwest.

THE WOOL MARKET.

There are two projects now on the tapis for new woolen mills. One is to establish a mill at Gridley; another seems to have no local habitation. At this moment we cannot honestly say either of these projects are very promising. Eventually, however, they may pay. Our line is spinning for the East not weaving, until we can stop the receipts of East ern made-up shoddy clothing.

The San Francisco Wool market is quiet, the only demand being by local scourers. The close of the season will probably see our warehouses bare of stock.

EASTERN MARKET.

NEW YORK, January 30.—Wool is steady, with a moderate demand. Domestic fleeces are quoted at from 32@35c; pulled, 18@40c; unwashed, 10@28c; Texas, 14@27c.

Meat Market.

Beef continues firm, while the best grades are quite scarce. Mutton is higher and firm at the advance. Pork is dearer, and not many good hogs arriving. Local packers continue free buyers at prices quoted.

Following are rates for whole carcases from slaughterers to dealers.

BEEF—First quality, 10@11c; second quality, 8½ to 9c; third quality, 8@8½c ₱ lb.

VEAL—Large Calves, 9½@10½c; small ones, 10@12c ₱ lb.

MUTTON—Wethers are quotable at 6½@7c and Ewes at 6@6½c ₱ lb, according to quality.

LAMB—Quotable at 6@6½c ₱ lb.

PORK—Live Hogs, 6@6¼c for hard grain hogs on foot; dressed do 8¼@8¾c.

17 and 19 Fremont Street,
SAN FRANCISCO.

Iron and Steel

It is presumed by many that the widespread improvement in the general iron and steel trade during the past week presages a gradual advance from the low levels which have been attained after the decline in prices in those lines for a year and more past. At the west, the demand has been strengthening, as noticed in these columns, for several weeks past. Within ten days this change for the better has become apparent in the New York market. The demand for American pig here has increased. There is more inquiry and there are more purchases noted. Firms who have heretofore, at a corresponding period of the year, contented themselves with 1,000 tons are now taking 1,200 and 1,500 tons. The Thomas Iron Company, alone, has disposed of 58,000 tons for season delivery since the opening of the new year. Prices are unchanged nominally, but much stronger, and it would be difficult to obtain much iron, except for far off delivery, at $20. Some companies, notably the Crane, deny taking at within $1 of that figure at all. Yet quotations have not yet been officially changed. Scotch pig iron warrants at Glasgow advanced to 44s., a gain of 1s. per ton within the week. They have since receded 6d. Scotch pig irons here are perhaps about 50c. per ton higher all round, but no such advance as has been printed in a technical journal of this city, viz., "$1,000 to 1.50 per ton," has taken place. The gain in prices of Scotch pig iron here is not attributed to the gain of 6d. on the other side, but to the increased strength of American irons. Manufactured iron at some points has shown some added strength, due to further inquiries, but no such advance has been made yet as will be required to move the mills to remunerative production. Prices are low.

Steel rails may be said to be at least $1 per ton higher. No order can be placed at present for $35, the existing nominal quotation, and for anything like a delivery of any quantity by June, it is probable that $37.50 would have to be paid. The cost of making anthracite pig iron to-day is said to be $3 per ton higher than it was in 1873 (when American No. 1 sold for $46.50@47 per ton), owing to the extra cost of coal. This will account for the difference between bottom prices now and then. The trade does not look for any reaction downward from the present level. On the contrary, they expect a continued, though moderate, gain.—*Bradstreet's, June 19.*

Fresno Vines

As soon as we can spare the time, we propose to devote four or five days to a visit to the vineyards, wine and raisin, of Fresno. This district is coming rapidly to the front and has a right to demand and receive more recognition from the MERCHANT than it has hitherto had, and yet we have always striven to give this district justice, but as Baron Tennyson says: "Things seen are mightier than things heard." On the wines of Fresno, the *Republican* says:

The fine claret made last year in Fresno is already sought for by several connoisseurs of fine wine. Mr. Robert Barton received a letter last by from one of our wealthiest San Francisco men, who just returned from a several years' stay in the European wine districts. This gentleman had tasted some of the superior Barton claret and requested the owner to reserve the balance of last year's crop for the use of himself and friends, expressing his intentions to lay it by in cellars for future use. A finer claret he had not met with anywhere in California. Another of our wealthy California connoisseurs tasted lately the fine Carignan made on the Malter vineyard. His enthusiastic remarks cannot be copied here. Some were to the effect that the claret in question equalled the famous clarets of France and were superior to the best grades so far produced in California. We earnestly hope that those of our northern friends who are now getting excited about San Diego, and all of a sudden have discovered the value of that county, will on their return trip stay over in Fresno and impartially judge for themselves.

Olive Culture.

The following letter on olive culture was written to the Los Angeles *Herald* by Frank A. Kimball, of National City, San Diego: "I have never seen the olive injured by frost in the slightest degree; nor have I seen the tenderest tree protected by cornstalks or any other material. I have not succeeded with cuttings two and a half feet long in any instance; nor have I had good results from planting cuttings twenty inches deep. I have had nothing but failure where the earth was filled in loosely around the cutting. I have planted olive cuttings every year since 1870. I began with cuttings three feet long, and finding no signs of growth at the proper time, dug, threw up and sawed about one-third of the length from the top end, which had become dry, and about the same from the bottom, which had rotted, and planted the balance, all under ground, and got good trees. I have tried all lengths for cuttings, from three feet down to ten inches, and would rather have them eight inches long than increased to twelve inches, but prefer ten inches. For starting in nursery I plant the cuttings with their tops an inch or two out of the ground, and about thirty inches between the rows. The earth thrown up in making the trenches for irrigation will cover the tops. For orchard planting, make a basin about two feet in diameter and say three inches deep, with the cutting in the center, and about level with the bottom of the basin, covering the top three or four inches with earth, and three or four irrigations during the summer, with the earth finely pulverized after each irrigation. There is no reason why at least 90 per cent. should not grow. Pack the earth very close by tramping it with the feet while being filled in around the cutting, beginning at the bottom and continue to the top. I think there is danger in planting cuttings in nursery by simply making a hole with an iron bar, as there is likely to be a vacant space at the bottom of the cutting. I have seen many failures by this practice. I plant with a spade, pressing the earth against the last one in making the opening for the next; by this method the earth is packed closely around the cuttings from top to bottom. Cuttings well planted and well taken care of should bear fruit enough the fourth year to pay for cultivation. Many trees will bear the third year, and I have never seen a well cared for tree that did not bear some fruit the fourth year. Trees transplanted from the nursery at two years old will seldom bear the following year, but should bear well the second year. I have helped pick eleven gallons of fruit from a four-year-old tree which had no extra pains taken with it. The most I have picked from a three-year-old tree was three gallons. I think there is no other tree so tenacious of life as the olive, or which will respond to good cultivation with so valuable a crop on a given area."

VOL XI, NO. 18. SAN FRANCISCO, FEBRUARY 8, 1884. PRICE TEN CENTS.

THE WORLD'S FUTURE WHEAT SUPPLY.

Though our wheat growers have no grounds for loud complaints of the prices they have obtained for such wheat as they have sold this cereal year, it has proved a disappointing one for our wheat shippers. The wheat shippers of California are not the only men in the business who have been unfortunate. The Colonial shippers to Europe have been equally sufferers. From a circular issued by the New Zealand Loan and Mercantile Agency, for which we are indebted to Hugh Craig, Esquire, manager of the California branch of that Company, of this city, we get a succinct idea causes which have led to low prices in Great Britain.

This circular says: "Amongst the forces at work in producing this result were the following, viz.:—(*a*) the abnormally heavy shipments reaching this country from all quarters. (The circular is dated London, and this reference is to the United Kingdom). (*b*) the brilliant weather prevailing at the height of the English harvest. (*c*) the faulty condition in which much of the wheat grown in New Zealand came to hand; (*d*) the accumulation of supplies in America, and (*e*) the conditions under which winter wheats have been sown both at home and on the continent of Europe. The weekly imports of foreign wheat into London during the year 1883 exceeded on several occasions the highest totals previously recorded; thus for the week ending June 9, they amounted to 146,200 quarters, or 1,169,600 bushels, and for the week ended September 1, 151,000 quarters, or 1,208,000 bushels." The circular then explains that "the most important factor amongst those above noted was the unexpectedly large arrivals from India and the Persian Gulf, these sources of supply having developed with startling rapidity within five years. Ten years ago the export from India did not exceed some 125,000 qrs. per annum, in 1876 it had reached 500,000 qrs., in 1877-8 1,500,000 qrs., in 1,880-81 nearly 2,000,000 qrs., in 1881-82 nearly 5,000,000 qrs., the total for 1882-3 being estimated at some 4,000,000 qrs. The cost of production there is considerably less than in any other part of the world, and the yield, though already much in excess of native requirements, can without difficulty be largely increased. The great drawback hitherto has been the cost of transport to the seaboard, but the authorities, having become alive to the desirability of fostering the growth of this industry, recently afforded increased railway transit facilities, which will certainly lead to a further rapid increase in shipments to Europe."

Nearly five years ago, the MERCHANT, in its editorial columns, pointed out that India would shortly become the most formidable rival in Europe that California and Australian wheat growers and shippers would have to contend with. Up to that time and for two years later, not a single journal in the United States had taken notice of the extent of wheat culture in India or the probability of the growth with unexampled rapidity of its wheat exports. Even our Bureau of Statistics, though generally well informed on such subjects, in giving the area of wheat cultivation in the several countries of the world, even including Sweden and Norway, which hardly produce as much wheat as the late Dr. Glenn, on his Colusa ranch, omitted all reference to India, though then the acreage in wheat was as large as that of the United States, and the surplus exported had reached 12,000,000 bushels. In 1882-3 the export of India wheat was estimated at 32,000,000 bushels, and in the year 1883-4 will be still larger, with every prospect by 1886-7 of reaching 50,000,000 to 60,000,000 bushels. The increased consumption of wheat in Europe is hardly keeping pace with the increase of production in India and Australia, alone. The extension of railway facilities in several wheat producing States and Territories of this country must tend, while India, Russia and Australia have average crops, to press down prices in the United Kingdom, and whenever Western Europe is favored with a full crop, prices may drop to abnormally low figures. If the above facts and estimates of the future are correct, it becomes important for us in this State to place more and more reliance every year on other agricultural crops than wheat.

Tthere are hardly a dozen Chinamen in the United States, outside of the educated merchants, who are handling capital in sums of from $50,000 to a quarter of a million dollars, whose word or oath can be relied upon when their truthfulness and interests do not coincide.

REDUCTION OF THE TARIFF.

The Bill Reported to the House by Representative Morrison.

A telegram from Washington, dated February 4, says Chairman of Ways and Means Committee Morrison completed the Tariff bill this morning, and, during the call of States, introduced it last. With the exception of placing a few articles on the free list, concerning which Morrison is undecided; a reduction of 20 per cent. is made in numerous articles. While in few cases the reduction is greater or less than this rate, a provision prevents a reduction to a rate lower than in the Morrill Act of 1861. The title of the bill is, "An Act to reduce import duties and war-tariff taxes."

Section 1 provides that on and after the 1st of July, 1884, in lieu of the duties and rates of duty imposed by taxation upon the importation of the goods, wares and merchandise mentioned in the several schedules of "An Act to reduce internal revenue taxes, and for other purposes," approved March 3, 1883, there shall be levied, collected and paid 80 per cent. of the several duties and rates of duty now imposed on said articles severally, that is to say:

On all articles mentioned in—

Schedule I—Cotton and cotton goods.

Schedule J—Hemp, jute and flax goods, other than jute butts.

Schedule K—Wool and woolens.

Schedule L—Metals, other than ores.

Schedule M—Books, papers, etc.

Schedule E—Sugar.

Schedule F—Tobacco.

Schedule D—Wood and wooden ware (except as hereinafter provided on all articles subject to ad valorem duty in Schedule B), earthenware and glassware.

Schedule G—Provisions, except as hereinafter provided.

Schedule N—Sundries, other than precious stones, salt, coal, bristles and lime.

Schedule A—Chemical products, except as hereinafter provided.

No duty or rates of duty shall after said 1st day of July, 1884, be levied, collected or paid in, except 40 per cent. ad valorem or its equivalent on cotton and cotton goods, 50 per cent. ad valorem or its equivalent on metal and 60 per cent. ad valorem on wool and woolen goods; provided, that nothing in this Act shall cp rate to reduce the duty above imposed on any article below the rate at which said articles were severally dutiable under the Morrill tariff.

On all unpolished cylinders, crown and common window glass or cast polished plate glass, unsilvered, exceeding 24 by 60 inches square; on salt in bags, sacks, barrels or other packages, or in bulk.

Sec. 2. The importation of the articles enumerated and described in this section shall be exempt from duty: Iron ore, including manganiferous iron ore; the dross or residuum from burnt pyrites and sulphur ore; copper imported in the form of ores; lead ore and lead dross; nickel in ore, matte, chromate of iron, or chrome ore, coal slack; timber, hewn and sawed and timbers used for spars and in building wharves; wool manufactures, not specially enumerated or provided for in this Act; hay chicory root, ground or unground, bunt or prepared, acorn and dandelion root, raw or prepared, and all other articles used or intended to be used as coffee or substitutes therefore, not specially enumerated or provided for in this Act; jute butts, bristles, beeswax, lime, glycerine; crude and fish glue or isinglass; sponges; dextrine; starch, gum substitute or British gum; extract of hemlock, and all other barks used for tanning, not otherwise provided for in this Act; Indigo extracts of and cream tartar, partly refined, including lees and crystals, Roman, Portland and all other cements, whiting and Paris white, dry wood tar coal tar, crude, and coal tar products, such as naphtha, benzine, benzole, dead oil and pitch and preparations of coal tar not colors or dyes not specially enumerated or provided for in this Act; logwood and other dyewood extracts and decoctions; ocher and ocher earths; umber and umber earths and sienna and sienna earths; all earths or clays unwrought or unmanufactured not specially enumerated or provided for in this Act; all barks, beans, berries, balsams, buds, bulbs and bulbous roots and excrescences, such as nutgalls, fruits, flowers, dye fibers, grams, gums and gum resins, herbs, leaves, lichen, moss s, roots and stems, spires, seeds, aromatic, not garden, seeds and seeds of morbid growth, weeds, wood used expressly for dyeing and dried insects; any of the foregoing which are edible, but which have been advanced in value or condition by refining or grinding or by other process of manufacture, and not specially enumerated or provided for in this Act.

From all that has been said by military men for and against Fitz John Porter, civilians may justly consider that it is at least a doubtful question, with a probability that this officer has been unjustly disgraced and deprived of his reputation and emoluments as a gallant officer. History would probably restore his character, but our descendants would have cause for regret, as has occurred in other nations, when posterity had to right wrongs done under the pressure of political partizanship. Restore General Fitz John Porter to his rank with all the benefits that ordinary promotion would give him, and pay him his back salary, say the majority of voters and taxpayers in the United States. To do less than this would be dishonesty.

DEMAND RECOGNITION FOR YOUR WINES.

Our wine men should see to it that not only all hotels in the State, claiming to be first class, should keep the leading varieties of California wines on their wine cards, and at reasonable prices, but that the sea-going steamers sailing from this port should do the same. We believe that this matter has only to be brought to the attention of such companies, and they would see the importance of it. Everything that benefits a great California production must indirectly benefit our transportation companies. These companies have no great interest in the prosperity of the wine districts of France or of Germany, their best regular patrons are chiefly Californians, or at least, Americans and even a foreigner cannot think much of our products when he finds them neglected or ignored at home.

A California subscriber to the MERCHANT, not engaged in the wine business, writes us:

"I was lately a passenger on the Dakota, sailing from Victoria, B. C. At the dinner table, the first day out, I asked for a bottle of Zinfandel wine, and was told after a short delay, that there was none of that brand on the ship. I then asked for a bottle of Californian wine of any kind, and was the response not received by another steward, who said with some emphasis that the ship did not keep any California wine in store, but that I could have the best brands of French wines. Of course, I declined to take my poison in that form, and went wineless during the voyage. It may be in place to mention that my neighbors at the table were a Canadian Dominion official and his Secretary, returning East, who had before them some bottles with French labels. The gentlemen were, no doubt, confirmed in their poor opinion of California wines by the contempt which this seeming California authority treated them.

"As a pendant to this experience, I give another incident that occurred to me here. An importer of French wines told me some time ago, that the captain of a French ship who had been in this port before, and was then taking in stores for his return voyage, declined to buy French claret, in cash, even out of bond, whereby he would save the duty of fifty cents per gallon, saying that he had tried the stuff exported from France to this market and preferred taking California wine for use on the voyage. The consignee urged on him the French wine, but he persisted in his preference for the pure product of California grapes, evidently knowing the ropes of the Bordeaux wine trade as well as those of his ship."

Our correspondent concludes; "I leave your readers to comment on this and your able pen to point the moral."

The writer of the above has been a member of the Union Club, of this city, for twenty years, and, as a consumer, knows something of wine, and does not pronounce on the quality only when he has read the label.

We think it would not be out of place for the State Viticultural Commission to address a communication to all our coast and foreign going steamship companies, asking them to order that at least three or four varieties of California wine, in pints and quarts, be placed on the wine cards of every steamer, at reasonable prices, and that their servants shall not speak contemptuously of one of the most important products of this great State. We know that on one of the Australian steamers an ordinary California red wine can be had, but that is the only kind. On the same ship there was to be had Australian Riesling, but the latter partook more of the character of a light sherry, and no one who knows our noble Riesling wine would have supposed it came from the same variety of grape. It would be only proper for the Australian vessels to carry the leading varieties of both countries, and neither would any reasonable person object to such vessels carrying some European wines, but Californians have a right to object most strenuously to our best varieties of wine being disguised under fraudulent labels and sold at exorbitant prices, on steamers hailing from this port and chiefly dependant on California patrons.

THE LATE EUGENE MOREL.

All our viticultural readers know personally or by reputation the late Eugene Morel, who died of consumption at San Jose on Tuesday, January 29th. In hope of a little relief, he had gone there but two days before, and died alone, away from all friends, except such attention as Mr. Lefranc and other viticulturists could show the sick man. Mr. Morel first became known in this State as cellar master for Colonel Wm. Scheffler, of Edge Hill vineyard, St. Helena. Here he showed himself a thoroughly capable vigneron and won much reputation for the excellence of the wines and brandies produced under his supervision. While with Mr. Scheffler, he contracted the disease which has cut short a life so valuable to this State. From St. Helena he went to Fresno in hope that the dryer climate of the San Joaquin would restore his health or at least check the progress of the disease. All our readers know how how successful he was in managing the cellar of Robert Barton, of the Barton vineyard, Fresno, and the superior quality of the wine, especially the Zinfandel which he produced from the vintage os 1883. Alas, poor fellow! that was his last work, and it shows the courage of the man that while suffering from the distractions of disease and with certain death staring him in the face, he performed his allotted task so ably. In future years we may perhaps count one hundred Morels; at present California can illspare this one.

From the *Courrier de San Francisco* of February 3d, with whose editor Eugene Morel was on terms of intimacy, we copy the following interesting particulars of his eventful life, written by himself in anticipation of early death:

A POSTHUMOUS LETTER.

[Translated from the Courrier de San Francisco.]

It will be remembered that in our number of the 31st of January, 1884, we announced according to a telegram received the evening before from San Jose the death of our lamented correspondent, Mr. Eugene Morel, who expired after a long and dangerous illness. What, therefore, was our surprise on receiving yesterday morning a letter written by the deceased, bearing a postage stamp of February 1st from San Jose. On opening it, we at once saw that the letter had been written by Mr. Morel on the 25th of January, 1883, with the evident intention that it should reach us after his death. We produce it textually, if only to show with what heroic courage this man regarded his approaching end:

EDGE HILL, 25th January, 1883.

To the Editor of the Courrier de San Francisco—DEAR SIR: When a man disappears from this world, his friends, those who have known him, say about him very often that of which they know nothing. In a country of immigrants more than in any other it is very difficult to know Peter from Paul. Therefore I adopt the idea, doubtless a serious one, of addressing you after my death the following lines:

I was born on the 15th of October, 1841, in the Canton de Vaud, Switzerland, of a French father and a mother of the same nationality. Up to the age of ten my time was divided between school and the paths of the vineyard; mixed up with the laborers of my father, the vintage found me at the wine press and in the cellars. At ten years of age I went to school, not an amusing but a necessary event. It was requisite to go through the five classes. At fifteen and a half I entered the normal school of Lausanne, the capital of the Canton de Vaud. I remained there two years, a troublesome pupil, although generally one of the first in my studies and one of the first in all the rows, tormenting my professors, making fun of them, and getting my name on the black list. One fine day, tired of this pedagogic routine, and finding myself about as suitable for becoming a professor as a Turk to be a Christian I let everything go to the devil. I went to see my father, and asked him for 300 francs with which to go to Africa, which, after very much hesitation, he gave me. I joined the Army of Africa in 1860 for three years. After the expiration of my term I bought a printing shop. After nine years' possession I sold it. I then married, and went to settle down at L'Oould Dheb and Setif, province of Constantine, an immense agricultural colony of 6,000 hectares, about 15,000 acres. After four years of great successes and crushing reverses, among which count 1866 and 1867, I collected the remnants of my fortune, total 2,250 francs, plus a wife and child. I arrived at New York on the 5th of October, 1868, about as rich as a church mouse, speaking my own and the Turkish language, but without knowing one word of that of John Bull. The climate of the North I found unbearable and I went to Missouri. To say what I suffered there is useless, but I do not wish my worst enemy to go through what I did. Disgusted with everything, I went to North Carolina. To that place I induced several people to come with 100,000 vine cuttings from the middle part of France. This was in 1870 to 1871. Mourvede, Grenache, Carignan, Cinseau, Mouraste and Clarette. I got into my head, against contrary advice, that the vines of the middle part of France would do wonders in these parts. Five years' experience showed me that it was foolish to cultivate the *vitis vinifera* beyond the Rocky Mountains, even by grafting them on the possible *vitis* of the United States. Defeated and disgusted, still carrying on my love and my labor for the vine and the wine, I arrived in California, from which I have not stirred, and where I died, after arriving with certainty at the proof that under her skies a good and beautiful wine country exists for those who understand their business.

You will do as you wish, my dear editor, with this letter, since when it reaches you I shall be dead.

Good bye! EUGENE MOREL.

WANTED.

A COMPETENT VITICULTURIST, WINE-MAKER and distiller who has had 16 years' experience in the State, chiefly in Sonoma, wishes to obtain a situation to lay out and cultivate a new vineyard or take charge of a growing one. Refers to S. Lachman and other gentlemen as to ability. Address J. T., care of S. L. & Lachman Market and Fremont streets S. F.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties: FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schedler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGAS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

"The Wine Press and the Cellar."

A MANUAL FOR THE WINE MAKER AND THE CELLARMAN.

Letter from Charles A. Wetmore, Esq.

STATE OF CALIFORNIA, BOARD OF STATE VITICULTURAL COMMISSIONERS. OFFICE OF THE CHIEF EXECUTIVE VITICULTURAL OFFICER.
SAN FRANCISCO, Dec. 24, 1883.

E. H. RIXFORD, Esq.—*Dear Sir*:—Though late in doing so, permit me to compliment you on the successful issue of your labor in compiling the European authorities on wine making. Yours is in the form of a digest, such as a lawyer only would know how to prepare carefully and reliably. It is exceedingly valuable as a means of developing thought and observation in each of the topics so digested. For those who desire to be directed into a course of study and to be led to appreciate the multitude of questions that arise in viticulture and the care of wines, this work of yours will be an invaluable assistance. Readers who have not extensively studied such matters should, however, be taught to hold all maxims drawn from varied European sources, in abeyance until local experience has verified the same in this country. So much depends on the varying conditions of climate, soil and the varieties of vines cultivated, that very few questions in wine making can have more than a local solution.

The vine growers of the State should add your book to their libraries without delay, and they all owe you many thanks for your painstaking industry in preparing for them a digest, such as can nowhere else be found in the language.

Yours respectfully,
CHAS. A. WETMORE.

A Few Press Notices.

[PACIFIC RURAL PRESS.]

"Mr Rixford has made a very careful study and comparison of all means and methods described in the many good French works on wine-making, and has prepared a book which is a model of concise statement, very comprehensive in its scope, and still so skillfully condensed that the book is compact and concentrated, which is the secret of success in a manual. Mr. Rixford's book will supply a lack which the recent extension of the grape interest has made very great and will do much service in the advancement of the industry in this State."

Letter to the author from E. J. Wickson, Esq., editor of the *Pacific Rural Press* and Secretary of the State Horticultural Society:

"CALIFORNIA STATE HORTICULTURAL SOCIETY,
Secretary's Office
SAN FRANCISCO, September 29, 1883.

E. H. RIXFORD, Esq.—*Dear Sir*. I have been much interested in a careful perusal of your manual, "The Wine Press and the Cellar," and am pleased to announce that I find it exceedingly valuable as a source of information on practical wine-making. It seems to me a model of explicit statement and intelligent condensation. Certainly there is nothing in the English language which can be at all compared with it as a guide to the most correct and successful practice with the juice of the grape, from the vat to the bottle. The publication will be of invaluable benefit to the wine interest of the State.

Very truly yours,
E. J. WICKSON, Secretary.

DAILY CALL, OCT. 18, 1883.

THE WINE PRESS AND THE CELLAR.—A manual for the Wine Maker and the Cellar Man, is the title of a work just published, from the pen of E. H. Rixford. The work, the author says in the preface, is the result of research by himself, chiefly for his own benefit, and in going over the literature of the subject of wine making, he failed to find a work in the English language which is adequate to the needs of the practical wine maker. The book is intended to supply the deficiency. Elaborate statistics of the California wine product are given. Besides the preface, the work contains twenty chapters, each embracing a distinct subject relating to the manufactures of the various wines and putting it up for market, defects and diseases of the liquor; mixing wines; analyses, etc., with forty-two illustrations in all. The processes begin with the gathering of the grape, following each step and the processes attending it, in the manufacture; treating of the various qualities, and the causes upon which these various differences depend. The book contains 240 pages, and is thoroughly indexed.

[S. F. DAILY EVENING BULLETIN.]

"The most timely California book of the season * * * It is safe to say that no work adapted to California wine-making and wine-keeping, which has yet been published is at all approachable to the volume under consideration. The arrangement, classification, and indexing shows a wonderful amount of care. The indexing is so thorough and the classification so perfect, that the person desiring to consult its pages for any particular information desired, pertaining to the special subjects of which it treats, can readily refer to it."

[ST. HELENA STAR.]

"A glance through it discloses a vast amount of interesting information about wine-making, both in this country and in Europe * * * * This is a subject on which our people should be especially informed, and we trust that the author's efforts in that direction may meet with liberal encouragement."

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Crazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality at $50 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $300 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

PORT DISCOVERY—Per bktne Makah, Feb 4—30 M ft lumber, 600 piles

PORT BLAKELEY—Per schr Courser, Feb 4—500 M ft lumber.

LONDON—Per Br bark Strathearn, Feb 4—5658 csks cement, 32 cs ink, 20 cs matches, 40 csks oil, 10 cs paint, 38 csks soda ash, 600 bales oakum, 100 bbls tar, 512 cs miscellaneous.

LIVERPOOL—Per ship Eureka, Feb 3—2450 tons coal.

KAHULUI—Per schr Ida Schnauer, Feb 3—3072 bags raw sugar

NANAIMO—Per Br str Wellington, Feb 3—227 tons coal

LONDON—Per Br ship Great Victoria, Feb 3—25 bbls alum, 350 cs brandy, 5140 cs canned goods, 14 M sks cement, 25 cs liquors, 3 cs soap, 176 cs foreign wines, 912 cs miscellaneous.

NORTH SHIELDS—Per ship Geo. F. Manson, Feb 3—220 tons coke, 1280 tons coal, 50 M firebricks, 50 tons fire brick, 84 csks soda ash, 333 csks soda crystals.

PORT TOWNSEND—Per str Mexico, Feb 3—323 tons coal, 3336 bills lnds, 34 M laths, 51 sks oats, 4 bills skins, 5 cs 31 tins tallow, 1 bbl whiskey, 7 bales wool

VICTORIA—Per same—5 cs fish, 29 cs miscellaneous.

GLASGOW—Per Br ship Co-hin, Feb 2—300 cs beer, 1244 tons coal, 25 tons 4430 bills 5615 bars iron, 5 bills whisky, 5173 pkgs miscellaneous.

NEW YORK—Per ship St. Nicolas, Feb 1—27 cs agricultural implements, 200 bills beer, 22 bills bricks, 2234 tons coal, 4440 coils cordage, 56 cs dry goods, 172 cs hardware, 200 bales hemp, 3242 bills 280 pcs iron, 1050 kegs nails, 250 cs naphtha, 1138 cs oil, 32 cs paints, 50 bbls rosin, 30 pcs steel, 76 bbls refined sugar, 39 bbls varnish, 306 bbls whiskey, 1 cs native wines, 2029 cs miscellaneous.

GLASGOW—Per Br bark Victoria Cross, Jan 31—500 cs beer, 804 tons coal, 26000 fire bricks, 798 cs miscellaneous.

NANAIMO—Per ship Edward O'Brien, Feb 1—2000 tons coal

SAN BLAS—Per Haw. bark Augusta, Feb 1—1157 pcs cedar logs, 3 cs cigarettes, 1 cs cigars, 405 bdls hides, 2 bdls skins, 2 cs miscellaneous

NEW YORK—Per str San Jose, Jan 31—33 bbls cement, 19 cs hardware, 1739 bars 8 pcs 29 cs iron, 1182 pcs 427 bills iron pipe, 3347 kegs nails, 66 bbls oil, 100 bbls rosin, 1 bbl refined sugar, 75 bbls whiskey, 172 pkgs miscellaneous.

ENGLAND—Per same 30 cs canned goods, 1 cs drugs, 98 cs dry goods, 38 cs hardware, 1 cs leather, 3 cs oil, 276 pcs steel, 341 cs miscellaneous.

FRANCE—Per same 51 cs drugs, 2 cs hardware, 10 cs oil, 27 cs miscellaneous.

SOUTH AMERICA—Per same—250 sks cocoanuts, 1 cs miscellaneous

CENTRAL AMERICA—Per same—1 csk beans, 2335 bags coffee, 259 bdls hides, 2 cs liquors, 1 bale skins, 90 bags raw sugar, 23 cs miscellaneous, $11,560 treasure.

MEXICO—Per same—1 bunch bananas, 2 cs cigars, 15 bags coffee, 1 cs fish, 404 cs limes, 50 cs oranges, 9 bags raw sugar, 4 cs miscellaneous, 874010 treasure.

Meat Market.

Beef is a shade weaker, especially for the best grades. Mutton is firm at quotations and the supply is light. Hogs are firm at quotations, with an advancing tendency. Following are rates for whole carcasses from slaughterers to dealers.

BEEF—First quality, 0@9½c; second quality, 8 to 8½c; third quality, 7½@7¾c per lb.

VEAL—Large Calves, 0@8c, small ones, 9c to 10c per lb.

MUTTON—Wethers are quotable at 7@7½c and Ewes at 6@7c per lb.

LAMB—Quotable at 7@8c per lb.

PORK—Live Hogs, 6½@6¾c for hard grain hogs on foot; dressed 9@9½c

IRRIGATION AND NAVIGATION IN INDIA.

We are indebted to Hugh Craig, Esq. manager in this city of the New Zealand Loan and Mercantile Agency, limited, for some information regarding what has been done in India and its dependencies in the past and what the government contemplates in the future to guard against droughts by providing irrigation on an imperial scale and cheapen transportation which may interest our San Joaquin and southern country readers. General Sir A. T. Cotton reported a few months ago to the Minister of Water Supply, in support of a memorial for the appointment of a government commissioner on water supply for the great plains of India as follows:

REPORT ON IRRIGATION.

Over by far the greater part of India the southwest monsoon prevails—that is, the rains come with the southwest winds which begin on the west coast about the 1st of June, and continue four months. The quantity falling in the year, including the few showers that fall in the other eight months, is generally from 40 to 50 inches, but on the west coast it is from 100 to 160 inches, and on the west mountains much more. On the west slopes of the Neilgherries it is about 400 inches, and on the mountains east of Calcutta 600 inches, and there has been known 800 inches, or 70 feet. On the other hand, in the desert east of the Indus there is scarcely any rain, and the same thing generally in the lower part of the basin of the Indus. Though 50 inches is an abundant quantity, yet this is not all that is required, for there may be such long intervals that in so hot a country the whole crop may be entirely destroyed between the falls, even when there is a full supply; and, moreover, there are never many years without a considerably deficient fall altogether over large tracts, when also the crops are lost.

The part of India called the Carnatic—that is, the country south and west of Madras—has only light rains during the southwest monsoon, but is chiefly dependent on the northeast monsoon for its supply, commencing about the 15th of October and ending about the end of the year, with scarcely any rain in the first five months of the year. And a great peculiarity of this monsoon is that it falls principally in heavy bursts of 5 or 10 inches, and mostly in the night; and as there are only about 10 inches altogether, there is perhaps hardly any other country in the world where there are so few rainy days. I have known a fall of 10 inches in one night, and a fortnight after 12 inches in another, thus half a year's supply in two showers. This state of things has led to the construction of thousands of tanks to store these bursts, to be drawn off to the fields in the intervals. There are about 40,000 of these in Madras alone, besides those in Bombay, and in the native states of Mysore and Hyderabad. Many of these are magnificent works, from 10 to 25 miles in circumference, and from 10 to 60 feet deep. One will contain 100,000,000 cubic yards, or twenty-five times as much as the reservoir at Sheffield, England, which burst some years ago. These great and suitable works show the energy and sound judgment of the native rulers of former times; some of them are of great antiquity. The largest is known to have been constructed in the second century by Veranum Rajah.

Besides the tanks, there are many old canals for irrigation led off from the rivers, and these are supplied by noble weirs of immense stones across the rivers. It was from these that we learnt the way of building such weirs across the beds of the sandy rivers, which we have since constructed on a much larger scale across some of the largest rivers of India.

About 4,000,000 of acres are irrigated in the Madras Presidency alone from these ancient works, and they are of inestimable value.

About 110 miles from the coast, the Agunda, or undivided Cauvery, parts into two branches, the Cauvery and Colleroon, the latter being the main branch and flowing on the lower level. About 16 miles from the division a branch from the Cauvery returned to the Colleroon, and across this the Grand Anicut, as it is called, was thrown. I believe, about one-third is well-constructed work of masonry some 600 yards long, and a third of sand without a particle of rock for foundation. This work was our grand lesson in the art of weir-building. By this a considerably increased quantity of water was thrown into the delta of the Cauvery, forming the district of Tanjore. Here some three or four hundred thousand acres were watered, but very imperfectly before our time. Some considerable improvements were made in this irrigation by us before 1830, but at that time the Cauvery the attempt to leave the Tanjore district entirely and find its way to the sea by the Colleroon. Our Government then took the matter up in earnest, and in that year began a series of works to bring the whole river fully under command, and in 1836 a weir was built across the head of the Colleroon, 1,100 yards long, which gave entire control of the water, so that any proportion could be turned into the Cauvery, and a second was thrown across the Colleroon, 70 miles lower down, from which canals were led off on both sides, the northern canal flowing into the district of South Arcot, and becoming the supply of the great Veranum tank, which is 25 miles in circumference. By these works, the delta has been wonderfully improved, so that about 1,200,000 acres are securely irrigated. This is now one of the most prosperous and fertile tracts in the world, containing about two and a quarter millions of population, and it has been entirely secured from famine ever since, and not only so, but as in the late famine, it has poured hundreds of thousands of tons of grain into the neighboring districts when they needed it. The returns also to Government have been enormous, the revenue having increased £350,000 a year, upon an expenditure of about £400,000. This system of river irrigation has since been carried out to a very considerable extent in various parts of India, from the rivers Pennaur, Palaur, Kistnah, and Godavery in Madras, the Mahanuddee and Sone in Bengal, the Ganges and Jumna in the northwest, and the Sutlej Ravee in the Punjaub, as well as from several rivers in Bombay, and from the Indus in Sind, though as yet no anicut has been thrown across the great river, so that the canals are only supplied when the river is high.

All these are vast works, and really such as become our immense advantages in extent of country, magnitude of resources, and mechanical knowledge. *They are calculated to water from half a million to two million acres each, or together about 12 million acres.* In a famine year the value of the crops is not less than £40 or £45, or from five to seven times the whole cost of the works. But when we speak of such irrigation as this, we mean the entire regulation of the water, that is embanking the rivers so as to preserve the lands from river floods cutting enormous drains, sufficient to carry off the tremendous floods of the tropical rains, and making all the principal canals navigable. An idea of these grand waterways may be formed by its being understood that to water a million acres requires a canal 200 yards broad and three yards deep, flowing 1½ miles an hour, so that such a highway is fit for large steamers, and is capable of conveying millions of tons per annum. From the weir across the Godavery are led three canals, each sixty yards broad. The locks for these canals are made 150 feet by 20, and will admit boats of 250 tons.

Water from the rivers led direct to the fields by canals only deposits the coarser parts of the silt it has brought down from the higher sands and forests, much of which is only fund, and it conveys a large quantity of its most fertilizing silt to the fields. So complete is the effect of this fertilization that lands so supplied continue to bear one or two grain crops for hundreds of years without other manure. Thus the District of Tanjore is believed to produce as large crops now as it did 2,000 years ago. The different rivers are more or less fertilizing, according as they pass the rough different rocky strata. Thus the Kistnah, which passes through a limestone country, has a delta which was found to produce crops about 50 per cent. larger than the delta of the Godavery, which passes chiefly through a granite country. In the case of the Godavery irrigation, for instance, the cost of the works has been £700,000.

When water is used for what we call dry grains, that is, crops that do not require to be constantly submerged, the quantity required is much less, viz. about 1,600 cubic yards. This is for wheat or for any of the Indian grains, such as ragy, cholum, chumbo, Indian corn, etc.

All the belts of land reached by the grand system of irrigation, which stretches between the Godavery, Kistnah and Cavery rivers, fertilizing the land wherever it reaches, and forcing even the haters of English rule to acknowledge that no other Raja ever bestowed such benefits on India, present a marvellous contrast to the immense tracts of arid waste that met the eye of the traveler a few years ago.

DISTRICT OF GODAVERY.

At the commencement of our rule it constituted a portion of a neglected province, and at one time it was brought into an extreme state of impoverishment; it was desolated by famine and misgoverned by the numerous landowners. Since the introduction, however, of the admirable system of irrigation, it has brightened and revived; famine is unknown, the people are prosperous and contented. It is the garden of the great Northern Province. The revenue, instead of being reduced to the verge of bankruptcy, is more elastic than it has ever been; the population is more than doubled, the material prosperity of the inhabitants is proved by their being better clothed, better fed and better educated than formerly; its commerce has flourished, and its trade has developed in a marvellous degree, and it may be confidently asserted that it is in as happy, peaceful and prosperous a condition as any province of Her Imperial Majesty's dominions.

And in an address to the ryots of Trichinopoly, in the delta of the Cauvery, lately presented to the Government of Madras, they say, speaking of the great river irrigation works there and throughout India: "All such works have converted the tracts affected into scenes of matchless fertility and wealth, and have forever protected them and neighboring provinces from the disaster of recurring droughts." They then suggest six or eight large projects for irrigation by tanks and river canals for their own district, and say: "All these are projects which, in the humble estimation of the ryots, will bring fertility and wealth to tracts now too frequently exposed to droughts, and which suffered but too severely during the present famine." And the Governor of Bengal said lately to a large assemblage of natives at the Sone irrigation works at Behar: "Now, the only way of averting famine is to make the greatest use which experience and science can suggest of the supply of water which, fortunately, nature has given us in Behar, in the shape of rivers, but which supply we have hitherto allowed to run to waste, while the fields through which these rivers pass have been parched and wasted for want of water." Again: "Shortly after the discussion, the periodical rains were suspended, and then we had practical proof whether or not the Sone water was considered injurious or beneficial. The people clamored for water, and to meet this demand we were forced to open our

UNFINISHED CANALS,

And we have irrigated 200,000 acres" (last month, January, 270,000) "which would otherwise have continued waste, but are now covered with luxuriant crops." Again: "I have seen what every one admitted to be the finest crops ever seen in Behar, while the unirrigated fields by their side had hardly a blade of vegetation in them. I drove sixty miles through the irrigated tracts and returned by one of the main canals. Nothing but this ocular demonstration could have convinced me of the enormous benefits which have been conferred upon the people by irrigation; throughout the only complaints which I received from the people were of the non-extension of the water supply to the villages."

There has also been talk about the failure of some irrigation works, and it is true that there are two out of the multude of irrigation works which are not yet making a fair return. But first, these are exceptions, but of thousands; and secondly, this is not owing to any failure of the works themselves; that is, they deliver the water at a cost per acre which would give as ample a return as the others, and it is solely in their management that the failure has occurred, that is, through the bad state of the districts, in respect to their management, difficulties have arisen which were never heard of before, about the ryots using the water, but this difficulty will, of course, be got over. In one case, that of the Madras Irrigation Company, on the Tombruda, in Madras, this has already been partly got over, and 100,000 acres were irrigated last year. The Sone works were only partially opened last year, and last year 270,000 acres have been irrigated, though the works are not half finished.

With respect to the extension of irrigation, there is not a district in India where irrigation cannot be carried out at a practicable cost, and thus the whole country can be supplied with a large extent of secure produce on the spot, but to this must be added the grand measure of carrying out a complete system of canal navigation, so as to admit every part being put in effective communication with every other part, that grain can be conveyed from any distance, in any quantity at a nominal price. And this is also absolutely essential to the general requirements of India, both to allow for its using its own productions, and to enable it to convey to the coast from any long distances such products as there is a market for in foreign countries, especially wheat, which, *but for the cost of internal carriage, would be brought to England at present to the extent of some*

2,5000,000 TONS PER ANNUM,

And the possibility of indefinite expansion. India has, for instance, abundance of coal, but, for want of a cheap transit, the whole country is supplied with fuel by burning the manure, instead of the same being applied to the land, an overwhelming evil. What is now wanted to provide against famine is, first, to put the tens of thousands of tanks in complete order, to enlarge them, and, wherever possible, to supply them from the great rivers, second, to connect the various patches of irrigation already executed in the different works of irrigation, and complete the lines of main canal throughout the country, for this is perfectly practicable throughout India, and thirdly, to extend irrigation to every district, according to its capabilities.

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. Whereas a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 made, which are heeled in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $4.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.

NAPA, CAL

PRODUCE MARKET.

[illegible] Exports given below are com[illegible] Thursday morning to We[illegible] evening.

[illegible] the week the rainfall throughout the State [illegible] as all that could be desired, and the pros[illegible] of an abundant harvest were never better. [illegible] sections which, from want of showers, had not [illegible] are now being plowed, and from their [illegible] condition give good promise of fully remu[illegible] yield. The croakers who have been for the [illegible] decrying the hitherto fine outlook, "a [illegible] inevitable," are far less numerous, and [illegible] difficult to find a party who does not be[illegible] rainfall would be sufficient to insure [illegible] crops.

[illegible] of the first two months ago are being ful[illegible] above our expectations, and we con[illegible] the farmer on his now brilliant prospects.

[illegible] change in the condition of agricultural [illegible] disastrous to very many of the mem[illegible] speculative element, who were "long" on [illegible] market, but the final result will be beneficial to [illegible] in the grain trade. Those who have [illegible] at recent date, large losers, will have ample op[illegible] portunity of recovering their losings in the future, [illegible] their judgment is sufficiently good to meet [illegible] the fluctuations which must necessarily occur in the [illegible] near future.

FLOUR—

Receipts of week, 30,320 qr sks.

The market is rather firmer, but round parcels for shipment can be had for rates considerably less than [illegible] quoted. The exports during the month of [illegible] amounted to nearly 115,000 barrels, and the [illegible] of trade is now active. Local consumers purchase sparingly, evidently under the belief that no material advance will be recorded in the near future.

Extra, $5 00@5 25; Superfine, $4 00@4 75.

Country ditto, $5 65@5 90; Interior Extra $5 00@5 50 per bbl for jobbing parcels to local consumers.

WHEAT—

Receipts for the week, 117,060 ctls.

The recent liberal rains throughout the wheat-growing districts of the state have greatly added to the probability of an abundant crop, and holders are now anxious sellers, but hesitate about accepting offered prices, so trade in the Sample market is light. On call, the figures are daily advanced or lowered as buyers or sellers are more numerous.

The European and Continental markets have remained fairly steady, but give no promise of an immediate advance. In Chicago and New York there has been a slight appreciation in values, owing entirely to speculative transactions.

In the Sample market here, No. 1 Shipping is quotable at $1 06, No. 2, $1 02½, extra choice Shipping could not be placed at over $1 [illegible]. On Call yesterday, No. 1 Shipping opened at $1 [illegible] and closed at $1 [illegible], buyer season, seller season sold for $1 04, and seller [illegible] for $1 [illegible] per ctl.

BARLEY—

Receipts of week, 31,132 ctls.

Owing to the rains and the almost positive assurance of an average crop, the market has been in a demoralized condition, and parties in search of feed have been [illegible] gather, some of them up into the tens of thousands. So far there has been no "especial" on the part of those who were on the bull side, differen es having, in all cases paid the differences against them. The Sample market has been dull, consumers taking only such parcels as immediate necessities require.

Local brewers are generally well supplied and are, consequently, far from really bidders.

In Feed, No. 1 Feed is nominally quotable at 92½c; those buy brewing is also nominal at $1 10@ $1 15, choice buy chevalier $1 25@$1 30. On Call yesterday No. 1 Feed opened at 89c and closed at $1 02, with advance of 10,000 tons, buyer season, seller season opened at 91c and closed at 94½ per ctl, and at the last bidding prices showed a further upward tendency.

OATS—

Receipts of week, 31,752 ctls

Market steady. Black, $1 50@$1 60; White, $1 50@$1 60 for ordinary; $1 62½@$1 70 for fair to good and $1 75@$1 80 per ctl, for choice to extra choice.

CORN—

Receipts of week, 1,531 sks

On recent date several carloads have been received from Nebraska, some of which have been placed at Sacramento, Stockton and Oakland. The market is weak and purchasers for forward delivery are likely to be losers.

We quote; Nebraska, $1 45@$1 47½; California $1 37½@$1 42½ for white, and $1 50@$1 60 per ctl for yellow.

RYE—

Receipts of week, 379 sks

Quotations are entirely nominal at $1 30@1 10 per ctl.

BUCKWHEAT—

Receipts of the week, 13 ctls.

No dations are nominal at $3@3½ per ctl.

MILLSTUFFS—

Receipts of week, 575 sks bran, 2517 sks middlings, 1005 ctls ground barley, 585 ctls ground feed.

We quote Ground Barley, $23 50@24 50 per ton Middlings are selling at $18@$22 00 per ton, Wheat Bran, $15 00@15 50 per ton; Oil Cake Meal, $30, oil cake, $34@$36 00 per ton; Feed Corn Meal, $25@26, Cracked Corn, $30 per ton; Rye Flour, $6 per bbl; Rye Meal, $5 50 per bbl; Buckwheat Flour, $6 per lb; Pearl Barley, 4½c per lb; Eastern oat Meal, $9 75 per bbl, Cracked Wheat, 4c per lb.

HAY—

Receipts of the week, 528 tons.

Receipts are light, and most parcels are more or less damaged by the rains

We quote: Alfalfa, $7@10; Wheat, $13 00@14 50; Stable, $12 00@14 00; Wild Oat, $13 00@14 25; Cow, $10@12, Barley, $10 00@12 00 per ton.

STRAW—

Receipts of week, 675 bls

Quotable at 55@60c per bale as to condition.

SEEDS—

Receipts of week, 95 sks Alfalfa, 524 sks Flax

Business continues good; the late rains have given an impetus to trade, and it is not likely to materially fall off until April.

Flax quotable at $2 50@2 75 ₱ ctl; Canary, 5½ 5¾c, Alfalfa, 9½@10 ₱ lb, Timothy, 7@7½c for native and 8c@9c for imported, Mustard, choice Brown, $3 00@3 25 ₱ ctl, White, $2 75@3 00; Hemp, 4c, Rape, 2½@3c

BEANS—

Receipts of the week, 789 bags.

The much improved prices for colored does not bring forward any lots of consequence and as the demand for these varieties is very limited, they are firm at our quotations with every likelihood in favor of a still further advance. Choice lots would to-day fetch our quotations readily.

Whites are still lagging, there is some shipping demand, but our large stocks will prevent any movement in prices until it becomes of greater volume than at present. We continue no round lots for sale and quote an active local demand; no large butters have appeared this season so far.

Bean are not attracting the attention they were before the rain, when it was thought we would not be able to raise a crop, and speaking of that particular, we are glad that by continued exertion we have been able to get feelers to our way of thinking—that a fact which we mentioned some two years ago, that no matter whether we got any rain or not we could always raise enough colored and white in California to supply all creation, because they can be raised in a hundred localities where there are irrigating facilities or where there is a low moist piece of land, but it is different with lamas; the only locality where they can be raised has no irrigating conveniences and so they must have rain to secure a crop. It is very gratifying to us to know that our efforts are so far appreciated, and that the street cannot be [illegible] from ourselves and so they are pretty.

Our quotations are, for round lots from the wharf, Small White and Pea, $3 05; Bayos, $4 ¼; Pinks, $4 ¼; Reds, $4 ¼; Butters, $3 60; Lamas $5 ¾.

VEGETABLES—

Trade is looking up. The first asparagus of the season made its appearance on Tuesday, being somewhat ahead of its usual time. Arrivals of pease are larger than previous to the rains.

We quote: Carrots, 25@35c ₱sk; Turnips, 50@65c; Cauliflower, 60@75c ₱ doz; Cabbage, 60@75c ₱ ctl; Garlic, 2@2½c ₱ lb; Celery, 50c ₱ doz; Dried Okra, 7½@8c; Dried Peppers, 15@15½c ₱ lb; String Peppers, 15@20c per lb, Artichokes, 40@50c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1@1 25 ₱ ctl; Sweet Potatoes, $1 50@1 75 ₱ ton; Mushrooms, 30@10c ₱ lb, Cucumbers 50c@$2 00 ₱ per doz; Tomatoes, 7@10c per lb; garen pease, 8@10c; string beans, 15@17c.

FRUITS—

The improvement in business is noticeable, though not to any great extent. Lemons have advanced and are likely to go still higher, while Sicily Lemons have fallen in price. Cranberries are nearly out of the market. Good Apples are scarce, and bring round prices.

We quote: Domestic Apples, 50@$2 00 ₱ box; Pears, 75c@$2 00 per box; Wisconsin Cranberries, $18 ₱ bbl; Western do, $17 00@17 75 ₱ bbl.

Tropical Lemons, $3 00@6 00 per box; Sicily, 5lmes, $8 00@9 00 per box for Mexican; Tamarinds, 12@13c per lb, Bananas, $1 75@$4 00 per bunch; California Oranges, 62½c for old and $3@5 for new.

NUTS—

Trade slightly better, with almost a certainty of still further improvement. Though California Almonds are weak, no change in prices can be noted, unless a slight advance.

We quote: Cocoanuts, $6@6 50 ₱ 100; California Walnuts, 9@10½c ₱ lb; Chili do, 8½@9c; California Almonds, hard shell, 7@8c, soft shell, 13 @14c; Filberts, 15@16c, Pecan, 15@14c; Peanuts, 5@6c; Brazil Nuts, 15@16c; Hickory Nuts, 7@9c. Italian Chestnuts, 15@16c.

HONEY—

We quote: Extracted, 8½c; Extra White Comb 18@20c, White, 13@16c, Dark, 8@10c.

DAIRY PRODUCE—

Butter is arriving freely and the market is easy. We look for a decline before the end of the week

We quote: Point Reyes, 31½c; Choice, 32½@35c Fair to Good, 27½@30, inferior lots from country stores, 17@20c, firkin, 20@21c for old and 24@ 27½ for new; Eastern, 15@17c; Pickled Roll, out of market; Cheese, California, 10@13c for choice; 11@ 12c for Fair to Good; Giltow, in drums, 16@18c; Eastern, 17@18c; Western, 10@15c.

EGGS—

The supply of eggs is now more plentiful and prices are declining

We quote: California Eggs, Choice Ranch, 25@ 26c per doz; California limed, 22½c; Eastern fresh, 21@25c

POULTRY—

As will be seen by our quotations, prices have advanced all along the line to an extent hitherto unknown in the business. Dealers of twenty-five years' standing have never seen anything like it. A gilt edged lot of Turkeys sold on Tuesday morning for 31c, enough to make the "oldest inhabitant open his eyes in amazement

The effect of the rains in consequent on the glut at the conclusion of the Chinese New Year is now followed by this unprecedented rise. This is the result of the recent heavy rains which have closed the country roads and prevented farmers from getting their stock to market.

We quote: Turkeys, Live Gobblers, 26@29c per l.; Turkey Hens, 26@29c; Dressed, 28@30c; Young Roosters, 16@17½c; Old Roosters, 8@10c; Old Hens, 8@10c; Broilers, 16@17½c according to size; Ducks, $10 50@12 50 ₱ doz; Geese, $2 00@ $2 50 per pair

GAME—

Game is coming in very slowly, and prices have advanced considerably; this is caused by the cold and stormy weather, and to a great extent by the big rise in poultry.

We quote: Quail, 1 25@1 50 ₱ dozen; Hare, $2 25; Rabbits, small, $1@$1 25; cotton-tail $1 25@$1 50 ₱ doz; Teal, $1 25; Sprigs, $1 75@ $2 00; Widgeon, $1@1 25, Mallards, $3 50@4 00 ₱ doz, canvas-backs, $5 00@5 50 per doz, common snipe, $1 00 ₱ doz; do, English, $1 50 ₱ doz; Wild Geese, $2 50@3 00 per doz; White Geese, $1 25; Honkers, $1 00@$4 50 per doz.

POTATOES—

Receipts of the week, 22,105 sks.

Choice Potatoes of any kind are scarce. A good Petaluma is about the best there is, yet some of them are not equal to good Rivers. Would not fetch so much if they were not in gunnies

We quote Early Rose, 75c; River Reds, 45c; Tomales and Petaluma, 80c; Cuffy's Cove, 80c; Humboldts, 80c, Sweets, $2@2 25.

ONIONS—

Receipts of week, 1758 sks

Demand and receipts are light. A good, choice lot would fetch 1¼c.

BEESWAX—

We quote 26@30 c per lb

HOPS—

Receipts of the week, 46 bls

Since our last issue, a good demand has existed for all desirable grades, and lots which were hitherto considered hardly have passed inspection as a higher grade The stocks on hand have been much reduced and choice parcels are very scarce Sales for export have been chiefly for England, at 19 to 21c, while 22½c is now generally demanded.

We quote medium to good 15@17½c; choice, 18 @19c

HIDES, SKINS, ETC—

Heavy Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½; Light Salted Cows and Steers, 30@50 lbs, 8c per lb. Salted kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 12½c per lb.

Dry Hides, usual selections, 18@——c per lb; Dry Kips, do, 18@——c per lb. Dry Calf, do, 18@20c per lb.

WOOL—

Receipts of week, 238 sks

For Wool market see Wool Department

MERCHANDISE MARKETS

AGRICULTURAL IMPLEMENTS—

Cast Iron Plows, $5@14; Star Moline Plows, $9 50 @50; Collins' Plows, C 0 to C 4, $27; Hill's Plows, $15 50@27; Gale's Plows, $7 50@17 00; Buckeye Gang Plows, $100@$150, Stockton Gang Plows, $35 @$100, Granger Gang Plows, $55@$100; Wood Frame Harrows, $13 75@$38, Hill's Iron Harrows, $14@$32; Cahoon Seed Sowers, $17 50; Gem Seed Sowers, $25@$35, Gorham Seeders, $100@$175, Triumph Grain Drill, $105@$205; Buckeye Force Feed Grain Drills, $190@200; Buckeye Broadcast Seeders, $120@$170, Buckeye Gang Plows, $100 to$110; Deere's Gang Plows, $100@$150; Deere's Moline Single Plows, $8 50@$20 00; South Bend Chilled Iron Plows, $8@$17; Hill's Iron Harrow Engines, $1,800@$2,250; Nordyke & Marmon Co's Plantation Corn and Feed Mills, $150@$450, Challenge Feed Mills, $85; Champion Mills, $55@ $100; Gilpin Mills and 16-in. Sulky Plows $75, Kalamazoo Spring Tooth Harrows, 24 teeth $45, 30 teeth, $50, Corbin Disc Harrow $80@$90 Corbin Disc Harrow Cultivators $75@110 Advance Cultivator, $35, Peerless tivator, $45; Keystone Corn Planters, 1-horse, $45; 2-horse, $90, Buckeye Cider Mills, 8-inch, $50, Junior, $30; Perkins' Windmills, $100@$165, Regulator Windmills, $90@$150, Schuttler Wagons, $85@$290; Schuttler Dump Carts, $35@$95

BAGS AND BAGGING—

Standard Calcutta wheat bags are quotable at 7¾ @7¾c for spot, and 7¾@7¾c for June-July delivery. Potato Gunnies sell for 14c@14½c, as to quantity and terms of payment.

BORAX—

Borax is 10c@11c, with little doing. Probably for export or for a large quantity a concession would be made. Business in the East is nominal, pending the action of Congress upon Morrison's Tariff bill, which is expected to seriously affect this interest should it become a law. It is not believed, however, that it can pass even the lower House. The whole matter was thoroughly agitated in the last Congress, and the opposition to the imposition of a duty, the article is lower to-day than it was one year ago, before the present duty was laid on; consequently there can be no reason for taking it off. But the producers may well apprehend if Congress think there should be less tinkering and more stability in our laws, and that neither they nor the trade shall be placed in jeopardy by unwise and unfriendly legislation.

BREAD—

We quote: Alphabet, 12c ₱ lb; Assorted, 10c; Assorted, 12c; Bananas, 14c; Boston, 8c; Butter, Sc; Charms, 12c; Coconut Cakes, 14c; Congress, 15c; Crackled, 12c; Cracker Meal, 8c, Cream, 8c; Egg Jumbles, 14c; Excelsiors, 12c; Fruit, Lady Fingers, 12c; Ginger Cakes, 10c; Ginger Nuts, 12c; Graham, 8c; Jenny Lind, 10c; LaGrande, 10c; Lemon, 10c; Lunch, 8c; Medalions, 12c; Milk, 8c; Milk fancy, 10c; Monitors, 8c; Nic Nacs, 12c; Novelties, 12c; Numerals, 12c; Oatmeal, 10c; Overland, 10c; Oysters, 8c; Palace Mixed, 10c; Pearl, 8c; Picnic, 6½c; Picnic Ex, 8c; Pretzels, 10c; Saloon Fillet, 8c; Santa Claus, 8c; Seed Cakes, 10c; Soda, 6c; Soda Ex, 7c; Spice Jumbles, 12c; Vanilla Bars, 14c; Sugar, 8c; Wafers, 8c; Waters, 8c; Wines, 8c; Ship, 4c; Pilot Bread 4c, Pilot Bread Ex, 4¾c.

BRICKS AND FIREBRICKS—

BROOMS—

We quote: "Common" Hurl—No. 4, $2 50; No. 3, $2 75; No 2, $3 00, No. 1, $3 50; "Extra" Hurl—No. 4, Parlor, (Little Beauty,) $3 00; No. 3, $3 50; No 2, $4 00; No. 1, $4 50. "Best" Hurl—No. 4, $4 00; No. 3, $4 50; No. 2, $5 00; No. 1, $5 50. Ship, Mill and Stable—No. 3, $4 50; No. 2, 5 00; No, 1, 5 50; Ship, twine bound, $3 00; without galvanized bands, 50c ₱ doz less. "Common" Stable No. 3, $2 25; No. 2, $2 50; No. 1, $3 00. Arnes' Star Extra No. 3, $3 50; No. 2, $4 00; No. 1, $4 50. Wisps and Toy Brooms—Toy Brooms, $2 00, Stalk Handled Whisks, $1 75; 1 String Wood Handled Whisks, $1 75; 2 String Wood Handled Whisks; $2 00; 2 String Velvet Top Whisks, $2 25, 3 do, $2 50; 4 do, 2 $75.

CANNED GOODS, ETC—

Tomatoes are rather scarce; prices are 2½c higher There is quite a brisk trade at present.

We quote California assorted Table fruits, 2½ lb cans, $2 25 ₱ doz, do pie fruit, 2½ lb cans, $1 50 doz; do gallons Table fruits, $6 50 ₱ doz. Pie Fruits, $4 25; Tomatoes, 2½ lb cans, $1 15 ₱ doz. Jellies, $2 25, Jams, $2 25 ₱ doz. Pickles in 5 gallon kegs, $14; California sauce, pints, $3 50; ½pts, $2 75 ₱ doz. Ketchup, $1 25@1 75 ₱ dozen. English Groceries—Crosse & Blackwell's Pickles, pts, $4; qts, $6 75; Olives, qts, $7; Lucca, qts, $5 50, Sauces, $9 00 ₱ case. Jams, $4 00; Jellies, $5 00 ₱ doz. Pr's Thought, Cake ₱ lb, Cocoa, 45c ₱ lb, Colman's Mustard, 60c ₱ lb.

CANDLES—

We quote: California Bay Improved Wax, 15½@ 17c; do Stearic Acid, 13c; do Solid, 10@9c. The following are current rates to the trade for car lots of 1,000 boxes or the equivalent, for leading brands of Eastern as well as of California production Werk's Stearic Acid, 14-oz, 15½c, Hard Wax, 14-oz, 16c; Harkness Patent Wax, 16c; Schaeffer's Stearic Acid, 14-oz, 15c; Star, 12-oz, 10c; A Gross & Co's Adamantine, 14-oz, 13½c; F Barr & Co's, 12-oz, 10c; Perfect & Gamble's Adamantine, 14-oz, 13c; 12-oz, 11c; P & G.'s Stearic Acid, 14-oz, 17c; 16-oz, 18c; Grant's Stearic Acid, 12-oz, 14c; do do Hotel, 15c; Mitchell's Adamantine, 14-oz, 17c; 16-oz, 19c; U S Candle Co's Adamantines, 14-oz, 16c; Woods & Co's Shield, 14-oz, 13c; do Solar Wax, 14-oz, 14½@15c; San Francisco Candle Co's Crystal Wax, 14-oz, 15½c; Stearic Acid, 14-oz, Star, 14-oz, 13½c; Eagle, 12-oz, 12c; 16 oz C. W. 17c; Cincinnati, 12-oz, 10½c; Diamond, 10-oz, 10c; Thayer & Judd's Paraffine, 20½c; Column Light, tall weights and 1 ₱ lb, 20c; Sperm, 45c. The grocery price is 17½c for full weights and 15c for 14-oz Ropes, 10½c, United States, 10-oz, 8½; Schmidt's 12-oz, 9½.

CEMENT—

Very little Eastern and Rosendale is sold at present. English Portland on account of its low price is taking the place of Eastern brands, also since a barrel of Eastern contains only 300 lbs, whereas one of Portland contains 400 lbs.

	Spot.	To arrive
Eastern-Rosendale, in round lots	$2 20	2 15
English choice brands, in round lots,	2 30	2 10
English outside brands, in round lots	3 15	3 00

COAL—

The copious rain-fall this week, combined with free arrivals of Coast Coal, has softened prices a little, hence offers for loading Foreign cargoes are now being made at a reduction; still shipowners show no disposition to meet the reduction, and but little business is being done.

The best evidence of this port being avoided is displayed by the last Au-tralian advices, showing only three departures from Newcastle for San Francisco in December—agents, take notice—and the single vessel listed to follow; this is peculiarly exceptional, and is only a parallel case for all other Foreign Ports.

With such a showing, the fact becomes indisputable that some parties on the decks of foreign Coal will be entirely out of the market a few months hence

Judging from the number of vessels engaged to load Lumber from Puget Sound, Tacoma, no scarcity of this article may be anticipated

Importers' prices of coal, foreign and American, to arrive, Australian, $7 25@7 50; Liverpool, Steam, $8@ $8 25; West Hartley, $8 75@9 00, Scotch spl nt, $8@ 9 25; Cardiff Steam, $7 75@8, Lump Lehigh, $13@ 13½; Egg Hard, $11@11½, Cumberland, bulk $10½ @10½, Spot prices are as follows: Australian, $8 25; Liverpool Steam, $8@8 50, West Hartley, Scotch Spl nt, 9 00, Cardiff, $8 00; Lehigh Lump, $13; Cumberland, bulk, $11 50; Egg Hard $11 50.

IRON—

Another week has passed with nothing of any interest to note A few contracts for building were on the market, and the avidity with which they were sought after, and the cutting of prices to secure them, demonstrates the scarcity of business among foundrymen

A number of large buildings are figured on being erected in the Spring, which will consume considerable iron.

Importers prices of Pig Iron, Foreign and American, to arrive: Shotts No 1, $27½@—;

Glengarnock, $26 50@—; Eglinton, $25 00, Clyde Lane ——, $23 00; American, Soft, $28 00; Hard, $28 00. Spot prices are as follows: Glengarnock, $25 00, Eglinton, $24 00, Clay Lane, white, $23; Shotts No 1, $28 50, American, Soft Eastern, $28 Copper pipe, ½ to 1 $32 50@35 00

SPICES—

We quote: Black Pepper, 15@16c; White Pepper, 22c; Allspice, 12@15c, Cloves, 22½c; Cassia, 20c; Ginger, Ceylon Cinnamon, 40c@45c; China 25c, Sc@15c; Nutmegs, 62½@65c; Mace, 60@62½c; Borneo Ginger, 10@18c.

SPIRITS—

STARCH—

We quote Kingsford's Pure Starches 8½c ₱ lb, Corn and Silver Gloss, 10½c; Pearl, 7½c, Pure Starch, 200 barrels, 7½c, Ground and Wheat Starch, 8½c, in barrels, Silver Gloss, in barrels, 9½c.

SUGAR—

The California demand is very, very good. The California cable from the new machinery which has reached our jobbers is very much appreciated. From New York, by telegram, we learn that granulated is quoted at 5½c, refinery price, against 6½c jobber's price here. The demand in the East for all refined sugars is firmer.

Grocery grades of Island sugars are selling freely at prices ranging from 5½c to 6½c. The sales during the week have been 2000 bags. There are no kegs in the market, but some are expected by the Alameda to-day.

We quote local refinery rates, prices subject to change without notice

Crushed sugar, in bbls, 10½c; (A) Crushed sugar, 10½c, Extra Powdered sugar, in barrels, 10c, Fine Crushed sugar, in barrels, 10½, Dry Granulated sugar, in barrels, 9½c; Extra 6½c; Island sugar, barrels, 9½c, Extra C, 8½c, Golden C sugar, in barrels, 8½c, D sugar in barrels, 7½c, Extra Fine Powdered, in bbls, 11½c, Confectioners' (A), 10c, Light Brown C, in barrels, 9½c, Maniposa C, 8½c, Nonpareil, 8½c, half barrels, ¼c, and boxes, ½c, more for all kinds.

It is a mistake to suppose, because the preacher always stops at your house that you are excusable for beating a stranger in a horse trade.

The French Wine Crop.

From an elaborate article, full of figures, in the last number of the *Saturday Review* on the French wine crop, we abridge enough to show the result arrived at. Instead of producing enough for their own consumption and having a surplus to sell, France has now to import foreign wine to satisfy her home consumption. For the ten years between 1871 and 1881, the imports of wine into France averaged annually only 2,312,000 hectolitres, whereas last year they rose to 6,541,000 hectolitres. Thus in the months last year were nearly three times as much as the average imports of the preceding ten years, while, compared with 1872, they are nearly three times greater. It was not in fact until 1878 that the imports became really large. On the other hand the exports for the ten years ending with 1881 averaged 3,173,000 hectolitres, while last year the exports amounted to no more than 2,398,000 hectolitres, or not more than two-thirds in quantity of the imports. This serious diminution in production of one of the chief staple articles exported by France and resulting poverty goes a long way to account for the uneasiness and desire for political change now manifested there.

At the recent annual meeting of the Committee appointed by the Minister of Agriculture to report upon the various remedies suggested for the destruction of the phylloxera, M. Tisserand, who occupies a post equivalent to that of permanent undersecretary in the Ministry, made a detailed statement of the present position. After mentioning that 1,900,000 acres of vineyard had been totally destroyed and that 1,600,000 acres more were gradually succumbing to the attacks of the vine-pest, he stated that in the course of the last two years about 80,000 acres of vineyard in which the phylloxera had made its appearance had been saved from complete destruction by having recourse either to submersion or sulphate or carbon. Some forty thousand acres more had been planted with American vines, which are thriving well; and though this represents but a small fraction of the total destroyed, he notes as an encouraging symptom that the associations of vine-growers formed with the view of eradicating the disease are rapidly increasing in number and now comprise over twelve thousand members. These associations received last year £43,000 in subsidies from the Government; but the Committee is not in a position to award the premium of £12,000 which is offered for an effectual remedy against the disease. Moreover, while the area which has been replanted with fresh vines shows an increase, it must upon the other hand be observed that the phylloxera made its appearance in seventeen fresh arrondissements during last year, and there are rumors of its having been seen in Algeria. These rumors are not yet confirmed; but in view of their being true, the Committee has drawn up a Bill, which will shortly be laid before the Chambers, conferring upon the Governor-General of the colony the power for taking the necessary precautions against its importation.

You may not be able to endow a professorship in some college and so gain reputation for generosity that you do not deserve, but you can keep your children in the district school during the winter, even if you have to chop the wood yourself.

Young Merchants.

No man can calculate the unavoidable disasters arising from the impossibilities which a young man, without experience, ability, connection or capital, to rush into business for the inexperienced. Wise delay in such cases is promotive of success. The number of principals is too great in proportion. It is not every man who is born to be a leader, and some are chiefly painted out for subordinate posts as long as they live. But as these are the very persons who will be slowest to recognize the truth, let it be the maxim of all to advertise no sudden changes; to wait for well-made indications of opportunity and discretion, and to advise all, to play the man in regard to the unavoidable annoyances of a subaltern place.

Let the young man with such aspirations understand well that it costs some time to be successful and honorable. He should firmly determine, at the hazard of much weariness and smart, to pass contentedly through the appointed stages and to become a thorough merchant. Consider how many a man, now foremost in the mercantile ranks, came to this city with all his personal effects in one bundle, and with but few dollars in his pocket. Write, then, as the motto of your business life, *Honest Perseverance*. Crush every disposition to make changes, except where they tend to moral benefit, or knowledge of business. "It is ill transplanting a tree which thrives well in the soil." Dismiss from your mind all belief in the divinity of luck in pagoda, called luck, and stake nothing on sudden windfalls. Under the general determination to *succeed*, beware of early disputes, whether toward persons or work. All severe trials are burdensome; all beginnings are hard and vexatious. He that ascends a ladder must take the lowest round. All who are above were once below. "Any two men ride of a horse, one must ride behind."

To consider anything menial, which belongs to the career of training, is to be a fool. The greatest merchants and the greatest financiers have passed through toils as humble and as galling. Hard rubs are an indispensable part of education, and it is best to have the worst first. Meet them cheerfully and contentedly, then, for the after hours, or days, or years of repose, when business is let up, will be none the less sweet, for you have taken a genuine satisfaction in your work as you went along. You will not make the journey better, if, like famous pilgrims to Loretto, you put pens in your shoes.—*N. Y. Commercial Bulletin.*

The Panama *Star and Herald* says: Aspinwall harbor is at present full of steamers, ships, barks, brigs, schooners and all imaginable craft, coming laden with the materials of ordinary commerce, or bringing iron, wood, coal, and materials in all conceivable shapes for the Canal Company.

This is all right; we should be more pleased however to learn from authentic sources, that the Ship Canal was in fact being built. From all we have been able to learn the canal is *in posse*, while the machinery is *in esse*.

Morrison has killed himself by his tariff bill. If the Democrats of the Honeycomb foolish enough to give this abortion a decent recognition, they will kill the prospects of that party winning the Presidency. The bill will die still born, however. It has no friends outside of Europe, except a few New York importers. Its passage would be injurious to every laboring man in the United States.

To be happy you must be virtuous.

You may not be able to pay cash for a new plow in the spring, but you can keep the old one from being eaten up with rust this winter.

The fact that you are a member of the Legislature doesn't give you any right to change the line fence between you and your neighbors.

A. D. BELL, Editor.

FRIDAY FEBRUARY 8, 1881

JUPITER PLUVIUS.

If ever there was a country which had reason to invoke a blessing on the memory of this old heathen deity, the god of rain, we think it is this State in which we live, for once again, just when men's hearts were failing and the cry began to be heard that a "dry season" and its concomitant evils was inevitable, the winds veered to the right quarter, the clouds began to lower and within a few short days the downpour of moisture has been such as to allay all fears for the present, at least, as to the outlook for the welfare of those interests which, financially, are the backbone of California.

How difficult it must be for those living in districts where rain is the rule and not the exception, to grasp the idea of what a few inches mean in a land like this, coming just when they were required. They not only mean millions of dollars in actual results as the return for products which would not have existed, but they mean more than that; they mean renewed confidence in the stability of the country and prepare fresh grounds of hope for the profitable employment of capital and labor, which, otherwise, might have sought different fields. Granted, however, that the accidents of climate, if we may use such a term, have favored the State to an extraordinary degree, it may be well to review the situation and see, if possible, how these advantages can be best utilized. For years past, the great surplus export has been "wheat," and a very good showing has been made, but "tempora mutantur"—things change—and so does the world's supply of that necessary article of food.

It would perhaps be too much to say that its production of wheat has been of little advantage to the State.

On the contrary, it has for some years been the most reliable factor in its material progress, but the time has come when wheat must occupy a secondary position.

Circumstances, beyond the control of all that California can do or say, point conclusively to the fact that the breadstuff consumers of the world can in future be supplied with more than they require on terms almost such as they choose to dictate, for the producing districts of the world are developing in a far greater ratio than the increase in consumers. It is, therefore, upon sound logical reasons that we urge upon the agricultural population of the State to give their serious attention to the utilization of the resources at their command, in channels of production which are less likely to meet with the immense competition referred to. Wine, wool, fruits, animal food of all kinds and numerous other productions can be made sources of wealth that will be much less liable to disturbance from extraneous causes, and to these and not to wheat chiefly must the growers of the State put their hope of prosperity. Nature, as we have before said, has again favored us beyond our most sanguine expectations, and if the present depression in the grain interest leads to positive conviction as to the absolute necessity for a general diversification of production, it may yet prove a benefit rather than otherwise.

THE SAN PABLO RANCH.

A Long-Delayed and Important Legal Decision.

After very many days—days enough to make more than twenty-two years—a final decision has been made in the State Supreme Court in the matter of the San Pablo Ranch, located in Contra Costa county, running along San Pablo Bay, and extending northerly from Berkeley, Alameda county, towards Martinez. It embraces nearly 18,000 acres of land, equal in fertility to any in the State and enhanced in value by its proximity to the metropolis of the Pacific Slope, which will ever afford a profitable market for all its productions, cereal, horticultural, and dairy. Heretofore, it has been mainly devoted to the raising of wheat, but experience has shown that fruit, of almost every variety, can be profitably raised thereon, including oranges and limes. It is a veritable garden spot, almost semi-tropical in character.

And yet, during all these years, this vast, rich and beautiful domain has been suffered to remain almost valueless, giving forth little of its vast abundance, because of litigation protracted without a parallel in the history of land titles, even in California, whose progress has been retarded by the legacy of Spanish grants, guaranteed by the treaty of Guadalupe Hidalgo.

The decision of the Supreme Court is one of the longhest ever given by that body, as well as one of the most important since the New Almaden suit. It virtually affirms the opinion rendered by District Judge Samuel H Dwinelle, years ago, pronouncing valid the Alvarado title, which gives to Emeric, Horton, Mulford and others the possession which they claimed, and which makes them all more or less wealthy, according to the amount of land conceded.

The land will now be divided among the declared owners. This will require time, but the fact that a final decision as to ownership, without appeal, has been made settles values, and its effect is already apparent in the increased worth obtained by the land in question, and also by that adjoining or near to it. Even Berkeley property has already advanced in value on this account, and a turnpike connecting that town with the San Pablo tract, and leading into the numerous valleys hidden among the Contra Costa foothills, so long contemplated, will now be pushed forward without delay, thus giving egress to farmers by an easy and shortened route to Oakland, and, therefore, to a market.

This decision is one of importance, not only to the residents of Contra Costa and Alameda counties, but also to San Francisco, of which San Pablo is a suburb, and to the State at large, whose resources will be increased by the development and filling up of a large tract of fertile country, heretofore almost neglected.

WHOLESOME READING FOR CONVICTS.

Mr. James Gauley, Moral Instructor of Folsom prison, when he entered upon his duties, found the penitentiary library without the Bible, and to-day there is only one copy for the convicts' use. There is a great dearth of other standard works, and there are many intelligent prisoners who would spend their leisure in wholesome reading, instead of worse than idle gossip, if they had the opportunity. Besides more solid literature, a copy of Shakespeare would be useful, and for light reading nothing would be better than Dickens' works. No man ever read any work of Dickens' without closing the book with a more humane feeling towards his fellow creatures and a desire to lead a better life. Many of our citizens have a cheap set of such works as those spoken of, which they do not need, as they have other and handsomer editions in their libraries. How can they be so well bestowed as in helping to reform the criminal classes?

More Appreciation of the "Merchant."

W. W. Stockton & Co., of San Jose, in ordering the MERCHANT sent to Mr. N. H. Stockton, of Zinfandel Vineyard, Madera, Fresno county, in addition to the copy which goes to San Jose, writes: "Your paper has been of great value to us, especially since our vineyard interests have been transferred from Santa Clara county to that part of the State (Fresno), long experience in the former proving of no very great advantage in the same business in this place."

Mr. Stockton's meaning, as we understand it, is not that Santa Clara county is in any way unsuitable for vines, but that the conditions are so widely different between these localities that even an experienced viticulturist from the coast valleys has much to learn or unlearn in planting and managing a vineyard in an inland valley county like Fresno. The MERCHANT as not the representative or advocate of any single district, but seeks to do all in its power to promote the interests of every county by publishing all the intelligence regarding their progress it can collect, and every suggestion that may seem to be valuable.

Curing Prunes.

A practical fruit-grower, speaking of the European method of drying prunes, tells us that most of the plums on that continent being raised by peasants in small orchards, each individual fruit is worked in the fingers until the stone is loosened from the pulp or meat, and partially turned around. The prune is then dried, and in this operation the stone being entirely separated from the pulp or meaty portions of the prune, the curing is perfected. In California, prunes are not so treated and the flesh adheres to the stone, and in drying a partial decay of the very richest parts of the fruit is inevitable.

That it appears that the amount of pork and bacon imported into Germany from the United States, prior to the prohibition, was about $12,800,000, all of which has been cut off as a protection to German agriculture, under the pretence that the products are unhealthful.

You can't own all the land that adjoins you, but you can be a good neighbor to those who do own it.

RETAILERS' CORNER.

Business was never so poor as regards distribution in the interior, with so hopeful a feeling regarding the future. We only need a few dry days, such as will give opportunities for transportation to make business lively with our merchants.

The low prices which have obtained for some years for Japan and China teas, it is said, have discouraged production, until there is an actual scarcity. Whether this is so or not, the asking rates in those countries have got beyond the views of cautious buyers, and they prefer to rest on their present stocks and wait for the outcome of the season.

Grocery Sugars continue to sell freely, and refined is in more than usual demand for the season. The Standard Sugar Company, of Alvarado, has contracted for 1,000 tons of Hawaiian raws, and will shortly have Refined Cane Sugar in the market.

Mixed Rice is a little softer, owing to advices from China. Other Asiatic Rices are unchanged. Hawaiian is firm at 5 cents cash, out of store and 5 cents, 60 days, ex ship.

There is a very fair demand for Coffee by local buyers, but we have no change to report in values.

Chicory is dearer. Black Pepper has also advanced.

In Provisions we notice Pork is from 50 cents to $1 higher and Beef has also advanced. The actual trade, however, is limited, though the prospects of the coming month are good.

Codfish has advanced one-half of one cent a pound this week. Ocean Spray Mackerel is also quoted at 50 cents a box higher.

The Talbot brands of Tobacco are quoted two to three cents higher.

Grain and Wool bags have advanced.

Painted Pails are lower and there are some other changes in Woodenware.

The *Post* of Saturday last said it had good authority for saying that the two colonies of South Australia and Victoria would have a surplus of wheat for England of 700,000 tons in the current year, and that the surplus of the New Zealand crop could supply the wants of New South Wales and Queensland. If this statement be correct, the former colonies must have made a most extraordinary jump in wheat production this year for the entire imports of Australian wheat into the United Kingdom in the past four years, have been, respectively: 1880, 984,863 quarters of 496 lbs. each, (not tons;) in 1881, 687,260 quarters; in 1882, 571,183 quarters, and in 1883, 630,000 quarters; that is, the imports have ranged from 250,000 in the earlier year, to 158,000 in the latter year. Has our friend of the *Post* made an error and written 700,000 tons when he meant 700,000 quarters? The lesser quantity would be 70,000 quarters over the receipts in Great Britain from all Australian colonies, including New Zealand, in the year 1883.

The Finance Minister of the Dominion has promised a deputation of members of the Ottowa Parliament that he will do all he can to procure reciprocity with the Hawaiian Islands; possibly the *Chronicle* has two strings to its bow—a slice of the Canadian secret service fund as well as that contingent fee from the New York refiners.

TOBACCO MARKETS.

SAN FRANCISCO.—The leaf trade in spite of the stormy weather or rather perhaps in consequence of the liberal rains, has been remarkably good during the past week. Old Havana has sold very freely and there is a confident feeling that the new Havana which will begin to arrive during the current month will move off rapidly. Sumatra continues in good demand, Pennsylvania '82 is also selling readily, being now fairly matured for use. All of the better grades of tobacco are in demand and we have an ample supply to meet all wants unless it be of fine Havana. Importers are hurrying up deliveries of the latter by free use of the telegraphic communication with Havana.

Manufacturers of cigars have compromised with cigar makers by consenting to a further advance of 50 cents per thousand all round. The Chinese have us to some extent in their power and the only relief is a larger proportion of white labor. When the strippers of Mayrisch Brothers struck the other day, the firm gathered up fourteen white girls. Bohemian and other tenement house cigar makers in the East could obtain better wages here than at home—that is provided they are up to the California standard in skill and workmanship.

weather prevents buyers either coming to town or sending orders, all heavy transportation in the interi-

Trade in manufactured is unusually dull; the or having been temporarily suspended. As soon as the weather clears up, we shall more than make up the deficit in sales, which the first few weeks of the year have entailed on jobbers.

It is gratifying to learn that the Oregon trade is not so entirely lost to this coast as we first thought.

The Internal Revenue Collector for this district reports sales of stamps in January.

Cigars	$40,580 18
Tobacco	192 55
Cigarettes	2,128 15

It will be noticed that the legal difficulties regarding the Seal Rock Tobacco affairs have reduced the sale of tobacco stamps to an unusually low figure. On the other hand those for cigarettes are unusually large

[U. S. Tobacco Journal.]

NEW YORK, Jan. 26th.—A somewhat dragging business was done this week. It is wholly incomprehensible why there is not an absolute rush of buyers to our market. The new crop is giving more evidence every day that, taken in its entirety, probably but one-third is of sufficient quality for fine grades of cigars. In Connecticut, about one half is fine; in Pennsylvania, it is figured at one-fourth; New York State and Wisconsin also possess but about one-half of fine grades; Ohio, though it sometimes yields a good proportion of wavy wrappers, is said to be bare of them this year. (This statement may prove premature, though.) All of the '82 tobaccos held in our market are figured to contain probably no more than 5,000 or 6,000 cases of fine leaf. It is, therefore, natural that prices will and must advance. They are quite low to-day when compared with the cost of Sumatra. The question which for several weeks past has influenced the seed leaf market may be regarded as definitely settled. The new Sumatra will not be offered at Amsterdam before April next. The failure of the "Pfeifenkopf" crop will force the manufacturers of Germany to invest in Sumatra to an increased extent. The indications altogether are that the new Sumatra crop will not be lower in price than the previous one. Therefore the advices on hand in this market, which is still figured at 5,000 bales, and of which brokers claim barely one-half, is suitable for our trade, is certainly not apt to sell at lower figures. Under these circumstances it is, as we said before, incomprehensible why our market is not in a turmoil of business.

The business of the week ran up to about 1,000 cases, comprising, outside of '82 Pennsylvania, 82 Havana seed from Connecticut and New York State and Ohio, at last week's prices, about 250 cases of '80 Pennsylvania, at 8½ cents.

Sumatra—Sold in small lots at $1.15 to $1.65.

Havana—Was quite active, with sales of about 800 bales, one-half of which consisted of new Remedios and Vueltas, at from 95 cents to $1.25.

[New York Tobacco Leaf.]

NEW YORK, Jan. 25th.—*Western Leaf*—Trade has been a little better the past week, and we note sales of 313 hogsheads, at from 7@11½c. Additional sales have been effected, but they will not be announced until the end of the month. Prices are, apparently, stiffening.

Virginia Leaf—The business of the week in this department has been limited mainly to sales of bright entiers at from 22½@25c.

Spanish—Havana fillers in fair demand, with sales of 1,000 bales, at 80@$1.15.

Plug—Nothing new to report in the situation. There is but a very small demand for tax paid goods, and no indications of any improvement. It is to be hoped that next month will bring a change for the better. Manufacturers are complaining of the high prices of leaf, and some have lately advanced prices on black goods for export. Some say that to get bright leaf, suitable, it will not be a question of price, but of whether you can get the stuff at all.

The exports for the week were 119,839 pounds.

Smoking—The inquiry for smoking tobacco has been steady, and fair sales of all popular brands announced.

Cigars—Manufacturers report a good inquiry and are busy on orders. Importers state that the demand for their goods is satisfactory.

Trade Failures.

There were 310 failures in the United States reported to *Bradstreet's* during the week ending Jan. 26th, 11 less than the preceding week, 21 more than the corresponding week of 1883, and 105 more than the same week of 1882. About 80 per cent were those of small traders whose capital was less than $5,000. Compared with the previous week the middle states had 6 a decrease of 17; New England states 11, an increase of 1, southern states 80, an increase of 2; western states 97, a decrease of 5. Pacific states and territories 27, an increase of 8. Classified the failures included 28, a decrease of 4. Among the failures reported were those of William H. Union, steamship agent, and Birmingham & Co., publishers, New York city; the First National and City Banks, Nashville, and Mayer Brothers & Co., wholesale dry goods, Vicksburg, Miss. In the principal trades they were as follows: General stores 67, grocers 46, saloons 19, liquors 19; dry goods 17, clothing 17; fancy goods 14, produce, provisions, etc., 12, manufacturers 11; hotels and restaurants 10; hardware and agricultural implements 9; furniture 8; millinery 8; drugs 6; grain, flour and millers 6; books, stationery and printers 5; bakers and confectioners 4; banks 3; hats 3; harness 3; lumber 3; jewelry 3, stock brokers 2; crockery and glassware 2, men's furnishing goods 2, tobacco and cigars 2.

The British Grain Market.

LONDON, February 4.—The *Mark Lane Express*, in its review of the British grain trade for the past week, says: The weather was mild, but rainy. Trade was inclined toward lower prices, and in some provincial Exchanges prices declined a shilling. In London prices continue yet lower. To-day only the choicest English and foreign maintained former prices. Flour is very quiet. Barley is very dull. Foreign Wheat is lower. The decline appears unfathomable. Over production seems likely to continue and increase. In the meantime, trade must suffer from this plethora of supply. Maize is weaker. Eight cargoes of Wheat arrived off coast, two were sold, four withdrawn and the remainder, including two No. 1 California. Cargoes on passage are inanimate. Sales of English Wheat for the week were 61,317 quarters at 37s 6d 9 quarter against 59,901 quarters at 40s 6d 9 quarter for the corresponding week of last year.

Freights and Charters.

There has been a very marked improvement in the demand for ships during the week and the charters made have been closed at higher figures by five shillings than last reported. More business would have been done but owners are very stiff in their views. The Bisker, 1,000 tons iron, has accepted 30s for Cork for U. K. orders and the Carnegie, 1020 tons, iron, is engaged at the same rate for the same orders.

The engagements for the past week have been; Ship Occidental, 1553 tons, coal from Nanaimo to this port; private. British ship Great Victoria 2278 tons, coal from Nanaimo to this port; private. Brig Courtney Ford, 381 tons, coal from Departure Bay to Kahului. Norwegian ship Herman Lehnkuhl, 1309 tons, wheat to Cork, U. K., or Continent; 25s. British ship Leicester Castle, 2099 tons, wheat to Cork, U. K., 25s. British ship Strathearn, 1410 tons, wheat to Cork, U. K.; private—chartered prior to arrival. Ship J. B. Walker, 2105 tons, coal from Nanaimo to this port. Schooner Ida Schnauer, 205 tons, returns to Kahului. Ship Alice B Cooper, 1392 tons coal from Departure Bay to this port—chartered by R. Dunsmuir & Son. British bark Casmat, 649 tons, now at Victoria, lumber to a direct port West Coast South America: 40s. Bark Henry Buck, 685 tons, merchandise to Seattle in Wells' Line. Italian bark Andrea, 1099 tons, lumber from Puget Sound to Sydney; private.

Spirit of the New York Markets.

NEW YORK, Jan. 30th.—There have been few fluctuations of any importance in the general merchandise markets. Trade has not as yet acquired sufficient momentum to cause a reaction in prices of staples that have fallen to an exceptionally low level, but the fact that the declining tendency has been arrested is a favorable indication. Conservative methods have led to a gradual reduction of stocks of goods in the interior markets, and the low prices of all articles included in the daily wants of consumers give promise of a liberal demand throughout the season, for though the wages of labor have been reduced by some manufacturing establishments, it has not been carried so far as to affect their purchasing power to any appreciable extent. The iron interest gives some indication of improvements in the near future, and as manufacturers have limited their productive considerably, there is a fair prospect of a more satisfactory distribution as the year advances. Cottons and Woolens are having a more ready sale, but prices remain extremely low. The Wheat and Corn markets closed a trifle easier, and Flour very irregular. Hog products closed weak at a slight advance. Butter is a shade easier and Cheese firm. Foreign Beans remain firm. Turkish Prunes are a fraction higher. Spot Cotton is firmer and futures easy. Refined Petroleum is nominally steady and Crude (certificates lower. Naval Stores are steady but inactive. Hides and Leather continue dull and barely steady. Tobacco is dull but firmly held. Wool is inactive. Hops are active for export and very firm. There is a good jobbing trade in Drugs, with Opium weak, quinine unsettled, Gums strong, and most of the other leading articles firm. Raw Sugar is quiet and steady. Refined is in moderate demand, with Softs a trifle easier. Molasses is dull. Coffee is held higher, but in the absence of sales, prices are nominal. Tea quiet but firmly held, in view of the active speculation in progress upon the Exchange, and the advance established in London and quiet. Rice is only in moderate demand. Pig Iron quiet but steady. Pig Tin is higher. Lead dull and weak. Copper is nominal. Spelter dull. Ocean freights are without improvement.—*Shipping List*

THE WINE MARKET.

There has not been much doing in wines from first hands this week. A few distillers of brandy are offering lots by sample, but we have not heard of any important sales.

For Exports and Imports, see Merchandise Markets.

Brandy—Original Government Gauge in Bond made from Wine—

THE WOOL MARKET.

Local scourers are busily employed, but their purchases have been light during the week. There have been no Eastern purchases of moment. The stock of the better grades is very light, but we have still a little stock of burry and defective.

The promoters of the Grubley Woolen Mills have been so successful that they propose to increase the capital from $80,000 to $100,000.

ANNUAL MEETING

OF THE

BOARD OF TRADE

OF SAN FRANCISCO.

ADDRESS OF PRESIDENT

JACOB S. TABER.

SUGGESTIONS BY

ATTORNEY SHANKLAND.

GRATIFYING REPORT BY THE

Secretary and Treasurer.

Sharp Debate on Land Grant of the California and Oregon Railroad — Hasty and Ill-considered Adverse Vote.

On Monday last the Board of Trade of San Francisco held their annual meeting in the Assembly Hall at the intersection of Pine and Market streets. A large number of members were present, far in excess of that which usually attends even important meetings of the Chamber of Commerce. We hardly know why the meetings of one institution so often seem cold and fail to interest members enough to induce them to attend, while the other can always draw a large proportion of the active mercantile capital of the city.

A few minuts after 2 P. M. President Jacob S. Taber called the meeting to order and delivered one of his instructive and suggestive addresees. Mr. Taber said:

PRESIDENT'S REPORT.

Gentlemen of the Board of Trade of San Francisco:—Six years of experience brings us to our seventh anniversary,—our retrospect is pleasant, our present situation satisfactory, and the future has promise of continued usefulness. In submitting this seventh annual report, we will first relate what has been done during the past year, other than what the reports of your Attorney, Secretary and Treasurer, which are to follow, will impart. On February 9th, by invitation of his honor the Mayor of San Francisco, a Committee consisting of C. J. Dempster, W. L. Merry, James R. Kelly, Moses Heller, and J. S. Taber, was appointed to act with a similar number of other citizens selected by the Mayor and President of the Chamber of Commerce, to act as Conference Committee, with the Finance and Judiciary Committee of the Board of Supervisors, to consider the condition of the city finances, which conference resulted in a plan that worked the problem out successfully.

On February 9th, Messrs. W. L. Merry, C. J. Dempster and James A. Folger, were appointed a committee to draft a memorial to Congress, with reference to the Australian mail via San Francisco, which, with a joint resolution of the State Legislature, was forwarded by R. J. Creighton, Esq., Postal Agent of the New Zealand Government.

On March 30th, a flag and flag staff were purchased for the Board for use on our building when occasion requires.

On April 27th, two volumes of decisions of the Supreme Court of the Hawaiian Islands were presented by H. W. Severance, Esq., Hawaiian Consul.

On June 29th, five hundred copies of the address of President Soto, of Honduras, before the Chamber of Commerce and this Board were printed and circulated.

On July 27th, an arrangement was entered into with the Los Angeles Board of Trade for reciprocal rights and obligations, co-extensive with the limits of Tulare, San Luis Obispo, Santa Barbara, Ventura, Kern, Los Angeles, San Bernardino and San Diego counties of California, also the whole of Texas, Arizona and New Mexico.

On August 31st, a reply to the American Chamber of Commerce on the subject of the trade dollar was prepared by Director W. L. Merry, adopted by the Board of Directors, and forwarded.

On September 28th, at request of merchants of Boise City, a committee waited upon the Convention of Railroad Agents, then in session in this city, asking that Kuna, Idaho, be made a station for freight and passengers, which was granted and so telegraphed to the Boise City merchants.

On October 26th, a communication was sent to the New York Chamber of Commerce on the subject of a national system of telegraphy.

On October 26th, C. J. Dempster, Moses Heller and M. Ehrman were appointed a committee to communicate with the University of Wisconsin on the subject of inter-State railway traffic.

On November 30th, a letter was addressed to our delegation in Congress, on the importance of an increase in the life-saving stations and service on the Pacific Coast.

On November 30th M. Ehrman Esq. was appointed a delegate to a convention to be held in Washington in January, on the National bankruptcy law, and instructed to present the views of your Board of Directors on this subject; which duty he has performed.

On December 14th a circular was sent to the members of this Board on the importance of collections, "other than in the ordinary course of business," being made through this office, so as to avoid violation of Section 7 of our By-Laws.

On December 14th a memorial was sent to the California delegation in Congress, on the subject of a new Postoffice building for San Francisco.

Your Board of Directors have held seventeen regular meetings during the year, and all interests of the Board of Trade, and of its membersmp, have had their faithful attention, and the utmost harmony has prevailed at every session. The few cases of arbitration submitted have all been amicably settled. Death has entered our ranks four times during the year, and the names of W. L. Bolte, Daniel Bigley, N. C. Lubrs and George H. Tay have been added to the list of those who have ceased from their labors. Thirteen firms have been admitted to membership, and twelve have resigned and retired from business. The present membership is 240 wholesale firms, whose capital and enterprise represents the commercial power of this city. Your treasury steadily gains in amount, there being now $12,235.87 on hand, out at interest—an increase of $2,114 61 during the year. after the unusual expenditures for a new safe, the renovating of the rooms—which are now so cheerful and pleasing to the eye—new flag and pole, additions to the law library and office furniture. Business in the Secretary's and Attorney's departments has been unusually large during the year, reaching the number of 356 failures, with liabilities aggregating $3,978,856, the recoveries, averaging 54.06 per cent.; time granted, three, six, nine and twelve months. Five hundred and fifty-five dividends, amounting to the sum of $761,587-93, have been paid through this office. &c

Sixty-four assessments have been collected, amounting to $44,233 40, for the prosecution of cases, which money is mostly returned when settlement is consummated. The number of creditors' meetings called during the year is 483. The failures reported by Jay Lugsdin, Esq., Manager of R. G. Dun & Co. for the Pacific Coast, are as follows:

	No.	Liabilities.	Assets
San Francisco	143	$2,832,399	$1,291,903
Balance of State	281	1,599,795	932,789
Arizona	36	582,595	289,936
Nevada	35	310,448	359,717
Oregon	93	954,924	495,165
Washington Terr.	50	645,620	328,227

The figures of both R. G. Dun & Co.'s office and of our own, show an increase in numbers and amount of liabilities over last year, but a minute comparison and a theory as to causes will not make it any better to contemplate. No one makes a bad debt purposely; they always have been and always will be the most serious drawback to mercantile business. It is a cause of congratulation that failures under the management of your committees pay larger dividends to creditors, at less cost, than in any other way. The general prosperity of our State is shown by the following statistics, kindly furnished by the proprietors of the *Commercial Herald*:

Wheat product, bushels	43,000,000
Wheat and flour, exports, centals	16,665,121
Barley crop, bushels	10,000,000
Sugar, imports, pounds	131,882,125
California beet sugar product, pounds	1,571,140
Coffee, imports, pounds	17,291,438
Tea, " "	5,986,797
Rice, " "	58,315,700
Lumber, receipts at this port, feet	276,772,000
Wool clip, pounds	19,818,680
Wine product, gallons	7,500,000
Quicksilver product, flasks	46,725
Gold and Silver yield of California	$16,500,000
Merchandise exports by rail	———
Treasure exports by rail	———
Merchandise exports by sea	———
Value of manufactures in San Fran'co	85,000,000
Sales of Real Estate in San Francisco	15,876,408
Federal Revenue, port of San Francisco	12,658,305
Increase of immigration in California, numbers	28,280

With these figures before you I can imagine your mental inquiry to be, what is the trade out-look for this year upon which we now enter? Well, the prospects of an increased and remunerative business are to say, at least, encouraging. From all parts of our State we hear that refreshing rains have fallen; stimulating the merchant, the farmer and the mechanic to renewed energy, and insuring to our people the substantial reward to which honest and intelligent labor is justly entitled. New industries are everywhere springing into existence, manufactories are steadily increasing and expanding, and we are every day becoming more and more independent of foreign markets, while the steady influx to our State of hardy and industrious laborers of both sexes, from the East and Europe, increases the consumption of all kinds of merchandise, and gives a ready market for the products of our farms and factories. Our exports to foreign countries promise to increase rapidly during the ensuing year, and I feel confident by pursuing a liberal policy, the merchants of San Francisco can secure the greater portion of the trade of the Western States of Mexico, and of those portions of the Republics of Central America situated on the shores of the Pacific. President Soto, of Honduras, when here, told us his people wanted to do more business with San Francisco. The completion of the Northern Pacific Railroad at one time threatened to take from us a large portion of the trade of Oregon and Washington Territory, and many of our merchants took a rather gloomy view of the situation; while it is true that some articles of merchandise heretofore supplied by San Francisco are now obtained from Eastern cities, nevertheless, experience shows that our exports to Oregon and Washington Territory have rather increased than diminished. I am besides credibly informed, that several Eastern merchants send their agents into these countries to solicit trade, expecting to find no difficulty in competing with San Francisco, but the result did not satisfy them; their agents complained that they could not sell merchandise enough to pay their travelling expenses, while the persons to whom they did sell complained of the harsh terms imposed on them by "acceptances" and "notes," and could not help contrasting it with the liberal treatment they had always received from San Francisco. We may lose the sale of some Eastern goods heretofore sent from here, but the increased sales of our Pacific Coast goods will more than make up the difference. I do not think it an exaggerated or over sanguine view of our surroundings to say that the prospects of a large and remunerative trade for our merchants and manufacturers were never better than during the coming year.

The matters of public interest, which naturally should have the earnest consideration of such a body as this, whose enterprises are directly in the line of mutual relations, are numerous, and each of you gives such personal attention to them, as your own business and public spirit prompt; but as the presentation of a few of the most important ones, on such an occasion as this, seems quite appropriate, and may result in some satisfaction, I invite your attention to the following subjects as worthy of your continued interest and influence. The increase of our population by a homogeneous people is a prime factor in our business welfare, so that immigration is of much importance to you, and a matter you have taken a practical interest in. On the 26th of November, the second annual meeting of the Immigration Association was held in this room, when many of you had an opportunity of hearing the reports of the officers of that organization. The Association is so intimat ly related to this Board, having originated here, that it is proper to regard it, in this review, as a feature of our own work, and I refer with pride to the fact that a very considerable increase in our population has been made through this source during the year. According to the report of President Briggs, who has, with his able corps of assistants, made this Association most beneficial and honorable, so that immigrants have confidence in the information imparted to them, about 3000 locations were made on Government land on directions received from the office of the Association; when is considered that this has been accomplished at an aggregate cost of $11,121.40 for the year, I submit the return for the expenditure is a most satisfactory one, particularly as the benefits will increase from year to year. To what extent the large increase of immigration from the States east of the Rocky Mountains and from Europe is due to the Immigration Association may be inferred from the printed reports already mentioned. The number of printed documents distributed during the year was 199,150, besides many thousand letters which have been written. These are silently, but surely, attracting attention to our fair State. Already the influence of this work is felt throughout our borders. What has been done is, in my opinion, but a small fraction of what may be accomplished, if the Association has the continued, careful and substantial cooperation of the business men and capitalists. It reflects credit on the merchant members of this Board that an office has been established through their foresight, and supported by them and the generous assistance of the Central Pacific Railroad Company, where reliable information is imparted to newcomers in reference to Government lands in the State. I believe in this regard California to-day is in advance of any other State in the Union, and that no work hitherto inaugurated anywhere has, in so short a time, achieved success, and gained public confidence to an extent which this association has done. I cannot commend this branch of our work too highly, and feel like urging on you the importance of continued contributions in aid of the work so wisely begun.

In connection with our commerce, I desire to direct your especial attention to an alleged threat-ned sand blockade of the entrance to the harbor, satisfied that this Board will promptly recognize the very grave importance, and be wise enough to adopt and carry into execution the necessary measures of relief. I am informed that a careful and unbiased re-snrvey of the "Golden Gate" of this harbor, and of the bays of "San Pablo" and "Suisun" by the Engineer Corps of the United States, is a pressing necessity and should no longer be delayed from any cause, and that the dredging of the Sacramento River is as necessary for our inland navigation. The Hon. Secretary of War, and our Members of Congress would, no doubt, carefully consider the subject if presented to them by this Board.

The transportation problem is an important one to you, and has been for some years, and its final solution will be found in the construction of an inter-oceanic canal, alike for the producer and merchant. As this Board has taken much interest in the Nicargua Canal project, I have obtained from Captain Merry, Chairman of the Committee, his views on the present situation; he says: "The recent action of the Republics of Central America on the Nicaragua Canal, whereby they assume financial guarantees to insure its construction, indicate both their preference for that route, and their belief in its financial success. Overt influences have delayed action upon this work, but we may rest assured that one government is alive to the fact that an American canal, under American control, is a necessity of the commercial and political condition, and the construction of the Nicaragua canal is an

assured certainty in the near future. It is impossible to give you at this time any reliable or satisfactory information on the progress of the Panama Canal. Engineering problems of great difficulty await a future solution there, and it is not within the scope of our ability to predict results." This Board of Trade, however, fully alive to the commercial necessity for an interoceanic canal, can consistently encourage the attempted solution of the great problem at Panama, and will welcome the day when it can be opened to the commerce of the world, and pay the honor due to its great projector. These are great projects, and we may have to wait years for their completion. Meanwhile, we must endeavor to develop our commercial possibilities in every manner, with the facilities that we may be able to grasp and shape in the direction favorable to the interests of our city, State and the Pacific Coast. The increase of the United States Navy is a subject attracting the attention of the commercial bodies of the country, and this Board will no doubt lend its influence to that most important matter, by resolution or committee. On other occasions I have referred to that class of commercial treaties known as reciprocity treaties, and advocated their adoption as a national policy in dealing with countries the products of whose soils we need, and in consideration of admitting such products free of duty, will receive our products and some of our manufactures on equal terms. The treaty between the United States and the Hawaiian Islands has been so satisfactory that similar ones with Central America, Australia, New Zealand and Mexico have been urgently considered. It is entirely unnecessary to argue the advantages of such treaties. The important growth of our business with the Hawaiian Islands, under this treaty, is sufficient proof to you of its value to our merchants and manufacturers, to say nothing of the marked increase in our commercial marine in this one trade alone. As to the present condition of the proposed treaty with Mexico, Mr. C. J. Dempster, Chairman of that Committee for this Board, has kindly furnished me the following paper, which I commend to your careful consideration, and in your name thank him for the great pains he has taken, and time he has devoted to this important proposition. He says:

"At the time of our last annual meeting the commercial treaty with Mexico was being considered by the United States Senate, and its details were unknown to the people of both countries. When the Senate ordered its publication, the friends of the policy of reciprocity were disappointed at finding that outside of those articles which had been previously enumerated in her free list, Mexico was only willing to admit a few of our products without duty, and these chiefly of such a character as could not be depended upon to largely increase our commerce. Our negotiators had exhibited a commendable liberality in offering free admission of Mexican sugar, hemp, tobacco and other prominent staples, the growth of which would probably be greatly stimulated by the opening of such a vast market as this country affords. But this had not elicited reciprocal action by the Mexican diplomats, who evidently feared serious lessening of their National revenue, and resulting disaster. The committee of this Board, which had been so long advocating the policy of reciprocity with neighboring countries, made persistent efforts to obtain an enlargement of the number of our products which, in exchange for our liberality, should be admitted free by Mexico; but without success. The treaty has recently undergone renewed and lengthy discussion by the Senate, and it is stated that adoption was lost by only a few votes; that the Mexican Government immediately extended the period for ratification, and that the subject was left in such a state that renewed consideration can be given, and, possibly, confirmatory action obtained from the Senate before this new date expires. It would not be kindly to urge a neighbor, who, by tradition and practice, is unprepared to raise much revenue except by taxing imports, to immediately give free entry to articles which have materially enlarged her income in order to stimulate her growth of articles for which a new market is offered, but the enlarged production of which would require some years of preparatory labor. Our factories, however, produce a great variety of articles which have heretofore been shut out from Mexico by prohibitory duties, and hence have not contributed to her revenue. Canned fruits, fish and vegetables may be mentioned as one class of these, the free admission of which would not perceptibly lessen her National income, while it would materially add to the comfort of her people, enlarge commerce, and tend to modify the opposition of those who feel that the treaty, as negotiated, did not provide a fair equivalent in exchanges. It is almost impossible to arrange reciprocity between a nation of ten millions and one of fifty millions that will bestow equal benefits upon each, but mutually sincere desire to do what is fair and liberal can satisfy both. Apart from the mere question of commercial exchange with mutual financial benefits and resulting cordiality, your committee earnestly advocate the policy of reciprocity, especially with Mexico, because of consequences which are vastly more important, as well as remote. It will only educate our people to a fuller realization of the fact that our commerce may be wielded as a more effective power than armies or navies; but, so far as human forecast may discern the future, it seems almost possible to demonstrate that one result of such a treaty would be the gradual and peaceful extinction of slavery in Cuba and Brazil. England seems about to penetrate the Dark Continent in a noble effort to strike at the foundations of this organized and bulwarked human misery. Perhapa blood and treasure will be poured out there as unstintingly as we spent them here. But peaceful commercial legislation promises to deal more deliberately, but with equal effectiveness, in removing its remnant from the New World; so that in distant ages, when all but one or two individual actors of this generation have passed from human memory, this century shall continue to shine as the point in history when slavery perished from the face of the earth."

On January 18th, the following gentlemen were appointed as a Nominating and Examining Committee: Alfred P. Elfelt, A. P. Williams, J. B. Stetson, Geo. H. Wheaton, Levi Strauss, Moses Greenebaum, Henry Payot, W. W. Montague, M. P. Jones, W. N. Hawley, S. M. Smith, P. Berwin, E. Raas, Edward Kruse, Wm. Steinhart. They have faithfully and carefully completed their labors, and merit your thanks. Their report will be read to you by the Secretary.

To the Directors, members, officers, attorney and employees I beg leave to return my sincere thanks for their uniform kindness and faithful attention to their respective duties during the five years we have been associated together in this work.

For those who retire from the Board of Directors, most pleasant memories are cherished, and those who are to succeed them we welcome to a most useful service.

To all of you I wish unbounded prosperity, as the just reward of your enterprise and public spirit.

JACOB S. TABER,
President Board of Trade of San Francisco.

LAW DEPARTMENT; ATTORNEY'S REPORT.

To J. S. Taber, Esq., President, and the Directors of the Board of Trade of San Francisco:

GENTLEMEN;—I have the honor to submit the following recapitulation of business transacted in the Law Department of the Board of Trade for the year ending February 3d, 1884:

Actions prosecuted by attachment	153
Actions otherwise than by attachment	18
Insolvency proceedings	29
Amount involved in attachments	$534,370 95
Average	3,492 62

Papers drawn:

Agreements for release, compromise and extension	66
Sworn statements of debtors	70
Deeds, leases, mortgages and miscellaneous instruments	259
Creditors' affidavits to claims with notarial execution and letters of attorney	1,011

The cash accounts of the Law Department for costs are balanced. No money undisbursed in any case for costs or otherwise is chargeable to me, and none is due me, except in one case on appeal to the Supreme Court, which will be mentioned in another part of this report.

The foregoing statement of legal business is designed to exhibit merely the amount of work performed, the history and result of each case being set forth particularly in the report of the Secretary, a repetition of which here will serve no useful purpose.

In all branches of duty in the Law Department, my able assistant, Mr. C. R. Hurlbut, is prominently identified. To him is greatly due whatever share of approval you may be pleased to bestow upon the year's work. Mr. U. G. Martin, general clerk, is uniformly zealous and capable.

In a former report, your attention was called to the embarrassments likely to arise from failure to comply with the law respecting partnership certificates. A recent examination of the records shows a default in this matter on the part of twenty-four members. Every firm, without exception, and every individual merchant doing business under a firm designation should comply with the partnership regulations of the Civil Code. Several instances have been reported of legal opinions to the effect that an individual who uses his full name with the addition "and Company" is under no obligations to file and publish the certificate. To this I think the majority of lawyers will not subscribe, but will advise the formality of a certificate in all cases where the words "and Company" are adopted, and in all other cases where the name or names are not stated in full.

The subject of bankruptcy legislation has of late excited attention in trade circles. This Board heretofore adopted a resolution disapproving the enactment of a national bankruptcy act. Since that resolution, the united sentiment of mercantile bodies in the East has to some extent modified, if not the views of the Board, at least the expression of them. In consequence of solicitations from kindred organizations in New York and elsewhere, and believing that opposition from this portion of the country would be useless, this Board and the Chamber of Commerce have recently responded that the Pacific Coast is not in great need of a bankruptcy law, but if it happens that Congress yields to the general demand, then their preference is for the bill termed "The Lowell Measure," which is the preference also of the eastern boards of trade. The bill proposes to administer an insolvency estate by an assignee and supervisory committee elected by the creditors. Fixed salaries are established for officers of court and a schedule of charges against each estate. You will observe how closely the main features of this bill resemble the form of administration in practice here by this Board. But after some calculation I think the Lowell Bill, notwithstanding its good intentions, will not materially reduce expenses below the standard of the old bankruptcy law. On the score of expense, creditors are not likely to gain much by federal legislation on bankruptcy, in any form that can be proposed. The friends of the Lowell Bill are active and within the past few days have procured a favorable report from the Senate Judiciary Committee. It is possible that it may become a law within the next ninety days, but the opinion of many is that the present session of Congress will be consumed in political measures, to the exclusion of business of this character.

Leaving that subject to the wisdom of the National Legislature there are matters equally important and nearer home which are worthy of your serious attention. There has arisen a question of law regarding the remedy afforded creditors against insurance in cases of fire-losses by debtors. If any, there are few Board members who have not at some time been compelled to garnishee the insurance of an insolvent debtor. It is claimed by many that all such garnishments are invalid unless deferred until after the proofs of loss are made, the adjustment completed, and the sixty days' grace usually stipulated in the policies expired. It is clear to all who have had experience that if a garnishment be postponed during the time mentioned no recovery will be had, because the debtor will ordinarily embrace the opportunity to collect or transfer the loss. All our Board garnishments are levied without delay immediately after the occurrence of fires, and hence all of them are subject to the alleged invalidity. Some decisions of the Supreme Court seem to sustain this theory, although the precise point has not been presented. It is to the interest of merchants that this uncertainty be dispelled, either by act of the legislature or by a test case in the Supreme Court.

Another question of importance to the Board at large grows out of the law of partnership. It frequently happens that one partner can be served with papers in an attachment suit but not his co-partners, owing, for instance, to concealment or departure from the State. To advertise summons consumes between three and four months and involves much expense. On the one hand, it is claimed that while no personal judgment can be rendered against the partner not served, yet service on the other hand is sufficient to justify a judgment which will bind the partnership property. On the other hand, it is contended that the partnership property cannot be subjected to any judgment whatever until all the partners are served. The point has arisen several times in our business. I think no harm could follow, and no violation of legal principles take place from a rule subjecting firm property by service of summons on one partner only. It would at least be a great saving of time and money. In a recent attachment I had great trouble on account of this question and resolved to carry it before the Supreme Court. This has been done, and so far at my own expense, as to which at the proper time, I may solicit reimbursement.

In the insolvency law of this State occurs a paragraph empowering the court to appoint a temporary receiver prior to the election of assignee. In the particular cases for which this provision was designed there can be no dispute over its propriety. But it has been largely the subject of abuse by some judges in their interpretation of insolvency practice. In probably the majority of cases in this city where there are assets a receiver is appointed, at a useless expense, costing the creditors a large per cent of the gross proceeds. The receiver clause can be eliminated from the insolvency act without materially impairing its efficiency. At the last Legislature there was introduced at my instance a bill for the repeal of that portion of the act. The repeal bill only had a feeble start; it was opposed by certain office holders in San Francisco, and its fate has never been revealed.

During the past year there have been no cases of conflict between creditors of sufficient importance to excite comment. Indeed it may be proper to assert entire harmony among the creditors in the prosecution of law cases. This is true not only as between members of the Board themselves, but also as between members and their mercantile colleagues outside the Board. The reason must rest in the principles of honor which actuate all the proceedings of this body. In the conduct of legal matters this fact is manifested by the increasing confidence and respect exhibited to the Board by members of the bar having business relations with it. In our endeavors to invalidate preferential attachments, judgments and transfers, we encounter day by day less resistance from opposing attorneys than formerly; a tendency the more interesting and gratifying when we consider how greatly to the pecuniary disadvantage of the lawyers are the compact and combined methods practiced by the Board. The prestige thus acquired is of incalculable value to your membership, individually and collectively. Your example finds imitation now at Sacramento, Los Angeles and Portland, each recognizing your successful achievements and adopting your plan of organization. Without a more intimate participation in the daily operations of the Board than many of your members have, the influence of your name cannot be understood. Consider the extraordinary number of legal proceedings, the multitudes of bonds, the important agreements and vast array of securities which have emanated from these rooms under Board auspices, and on what grounds can we predicate your extraordinary immunity from losses by litigation, suretyship and unavoidable errors, except the force and weight coming and augmenting continually from a reputation for just and successful management?

In conclusion, I am compelled to express gratefulness for your constant favor and indulgence during the busy year which has just closed.

Respectfully submitted,
J. H. SHANELAND,
Attorney.

TREASURER'S REPORT.

The Secretary by request then read the report of Moses Heller, Treasurer, as follows:

The undersigned begs to submit the following annual report for the term commencing February 1st, 1883, and ending February 1st, 1884.

Feb. 1st: Balance in my hands	$ 1,123 00
Receipts from Secretary	20,342 60
Interest from savings banks	390 99
	21,856 59
Balance in banks	8,998 26
	$30,854 85
Disbursements as per vouchers 1321 to 1501, inclusive	18,618 98
Feb. 1st: Balance on hand	12,235 87
	$30,854 85

Consisting of following:

Deposited S. F. Savings Union	$ 5,582 16
" Hibernia Savings and Loan	2,462 49
" German Savings and Loan	1,593 65
" French Bank	2,051 25
Balance in my hands	846 62
	$12,235 87

Respectfully submitted,
MOSES HELLER,
Treasurer.

REPORT OF THE SECRETARY.

Henry L. Smith, the Secretary, read his annual report, showing that on February 1, 1883, there was $10,121 26 on hand: received from dues, $14,530; from non-members' commissions, $3,889 30; from rents, $1,923 30; from interest on deposits, $390 99; total, $30,854 85. Disbursements, $18,618 08; cash on hand, $12,235 87. The total membership is 240; admitted during the year, 13; resigned or retired from business, 12; increase, 1. Number of failures from February, 1883, to February, 1884, 356; liabilities as reported, $3,078,856. Number of meetings of creditors called, 483; cases actually settled, 233; still pending, 123. Of the failures, 139 were compromised, 21 were settled by extension, 14 by attachment and execution, 31 by assignment or bill of sale, 9 by insolvency proceedings and 19 were a total loss. The manner of settlement was as follows: By cash, 111; by cash and notes, 30; by indorsed or secured notes, 63; by individual notes, 10; total loss, 19. Still pending: In probate, 1; in insolvency, 22; disposition not yet reported, 100. Average percentage of settlements, 54.06; average time granted in settlement, 3, 6, 9 and 12 months; number of dividends paid through the office, 555, amounting to $761,587 93; number of assessments collected, 64, amounting to $44,233 40. The failures were classified as follows: Bags and bagging material, 1; bakery, 1; boots and shoes, 13; cigars and tobacco, 6; cloths, 2; clothing, etc., 20; crockery, 3; commission, 1; dry goods, etc., 30; drugs, 8; fancy goods, 11; furnishing goods, 4; furniture, 2; general merchandise, 154; groceries, 29; hardware, 5; harness and saddlery, 1; hats and caps, 1; hotels, 2; iron works, 2; jewelry, etc., 3; liquors and cigars, 11; manufacturer of syrups, 1; millinery, 5; mining, 1; produce, 2; stationery, 5; stoves and tinware, 1; ship chandlery, 1; tailoring, 1; varieties, 29. The failures were distributed as follows: In California, 226; Colorado, 2; Oregon, 40; Nevada, 27; Texas, 1; Arizona, 13; Idaho, 9; Montana, 3; New Mexico, 3; Utah, 4; Washington Territory, 25; British Columbia, 1; Mexico, 1; Hawaiian Islands, 1. Those in California were apportioned among the counties as follows: Alameda, 12; Amador, 2; Butte, 2; Calaveras, 2; Colusa, 1; Contra Costa, 4; Del Norte, 1; El Dorado, 1; Fresno, 7; Humboldt, 5; Inyo, 2; Kern, 4; Lassen, 1; Los Angeles, 12; Marin, 1; Mariposa, 1; Mendocino, 6; Merced, 1; Modoc, 2; Mono, 1; Monterey, 3; Napa, 3; Nevada, 5; Placer, 2; Plumas, 2; Sacramento, 8; San Benito, 3; San Bernardino, 2; San Diego, 2; San Francisco, 40; San Joaquin, 4; San Luis Obispo, 6; San Mateo, 1; Santa Barbara, 6; Santa Clara, 10; Santa Cruz, 8; Shasta, 5; Sierra, 3; Solano, 3; Sonoma, 7; Stanislaus, 5; Tehama, 5; Tulare, 9; Tuolumne, 4; Ventura, 4; Yolo, 5; Yuba, 3.

The report of President Taber was received with hearty applause, at its conclusion, as also that of the Attorney, Secretary and Treasurer.

On motion of A. P. Williams, the reports were received and the usual number of copies ordered printed.

The report of the Nominating Committee was read by the Secretary and adopted. Messrs. Williams and Shaeffer were appointed tellers, and the result of balloting was an unanimous vote for the election of John Dean, J. B. Stetson, W. N. Hawley and Henry Cassanova.

A memorial to Congress, prepared by the Chamber of Commerce, was read by the Secretary, on the necessity of increasing the naval defenses of the country.

Captain W. L. Merry moved a resolution of concurrence. In support of his motion, Mr. Merry said that he had the honor of introducing this subject to the notice of the Chamber of Commerce. He read a private letter from an admiral who had grown old in the service, pointing out our defenseless condition. He then went on to say that with a foreign commerce, a naval force was indispensable. We have many important interests in constant danger abroad. The policy of other commercial nations was always defensive and often aggressive. He pointed out Schleswig-Holstein, India, Africa and Madagascar as examples. If war arises, we must do our part, and yet for years we have been defenseless. When trouble between the United States and Chile seemed likely to arise, every man on the street spoke of the possibility of the Huascar or some other powerful ironclad shelling this city; such a vessel could throw its shells even onto the roof of the building in which they then were. Congress does nothing; when you talk to its members, they say: "Oh, that is politics." Unfortunately for the country, it is politics, or the politicians have made it so. We do not need a standing army, we can call out 100,000 men, or more, in ten days. But it takes years to inaugurate a navy. If the United States gets into trouble, we will have to take a back seat, because we cannot enforce or defend our own rights.

The resolution was adopted unanimously.

Mr. A. P. Williams then touched on the suggestion in the report of the Nominating Committee, regarding employing an extra secretary, and the convenience of having all committee meetings held in the rooms of the Board and attended by the Secretary, who would keep a record of transactions for the inspection of those interested.

C. L. Dempster then offered a resolution regarding the necessity of improving the navigation of the Sacramento river, which was adopted.

Mr. Stetson offered a resolution on the importance of the work being done by the Immigration Association, and of the necessity of enlarging its revenues.

Mr. Williams urged getting large landholders, capitalists and others who were being benefited by its operations, to contribute. He wished it to go forth through the press that the main revenues of this Association, so far, had come from the personal subscriptions of the merchants of this city.

Mr. Steinhart said he had spoken to some men as wealthy as any in the world, and met with a prompt denial. In other cases, after arguing the point, he had gained subscribers. "We have discussed to-day in this Board many topics of national importance, but the affairs of this State are paramount with us, and none are so important as immigration." Mr. Steinhart then paid a handsome tribute to President A. R. Briggs for his able and assiduous services in organizing and managing this institution, and also to the Secretary and his assistants.

A RAILROAD LAND GRANT.

The President then handed to the Secretary a communication from W. H. Mills, Land Agent of the C. & O. R. R. Co., giving reasons why the Board should use its influence in the interest of San Francisco commerce, to prevent the forfeiture of this land grant.

Mr. Wheaton moved that the communication be laid on the table.

A. P. Williams remembered when they all favored land grants and subsidies to railroads, and was opposed to the resolution. He saw no reason for it when this road was nearly completed, and it was only a question of a few acres of land which would lie barren for generations unless the road was completed. It was important to the commerce of San Francisco.

[Here several members interrupted the speaker.]

Mr. Heller said the motion to lay on the table was not debatable.

Mr. Williams thought it more dignified to take some action and not to skulk from the question under a parliamentary ruling.

The President ruled the motion was not debatable by parliamentary proceedings but thought the discussion might proceed.

The temper of the Board was against concession and the ruling was enforced.

On the ayes and noes being taken, the motion was lost.

Mr. Williams resumed his argument that it was for the interest of them all that this road should be speedily completed. The government would not be injured by waiving forfeiture, the commerce of California would be benefitted and the land would be open to settlers, who could not go there or live there without railroad communication.

Mr. Steinhart moved to refer to a committee of five.

Mr. J. W. Shaeffer, while he was willing that the Board should discuss public matters, National, State or Municipal, and such topics as immigration, Sacramento river navigation, etc, thought we should draw the line there and not take up business belonging to a private corporation. He was not in favor of reference to a committee. He wanted the communication disposed of now and voted down.

Mr. Merry favored the Board expressing its opinion now, and said the latter spoke of competition with the sea going steamers, and added: 'Suppose when the time is completed we are asked to sign contracts not to ship by the ocean route?"

Mr. Schaffer's amendment to decide at once instead of going to committee was carried.

A motion to adjourn was voted down.

Mr. Schaeffer moved that the writer be informed that the Board cannot act on the communication of a private corporation.

Mr. Williams moved that the Board is opposed to the confiscation of this land grant.

Mr. Steinhart seconded the motion in favor of the grant. Lost by 15 ayes to 17 noes.

A motion of thanks to the President and officers was moved by Mr. Steinhart and seconded by Mr. Williams was unanimously carried.

The meeting then adjourned.

A good deal of warmth was developed during the discussion on this land grant business. The wiser ones, we think, held that there were more railroads into California than out, and that the early competition of the California & Oregon road would restore and retain to us much of that State.

LEARN HOW TO THINK.

The Colusa *Sun* says:

"This is the title of a seven-page pamphlet from the gifted pen of our old friend, James Gauley, Esq., Moral Instructor at the State Prison, Folsom. Mr. Gauley is a gentleman of refinement, education and independence—one who does his own thinking. In the publication alluded to, he gives some valuable hints as to independence of thought and the absurdity of drifting into grooves formed by the ignorant masses, as well as to the importance of reasoning, one with the other. The ideas advanced by the author are only such as would be nourished by a master mind, and are well worthy of attention."

We concur. We have read this little brochure of Mr. Gauley's, and, without exaggeration, can say that of many bright things this gentlemen has written, this is the best work we have ever seen from his pen. It is brief, that's a great point; it is pithy, that's another; it is sound, clear reasoning; it does not exhaust the subject by entering too closely into details, but stimulates thought in the reader and sets his mind at work. It sows the seed for a crop of thinking, and leaves the reader, whether he be convict or freeman, some wholesome work to do. Mr. Gauley, at Folsom prison, as Moral Instructor, is the right man in the right place; it is not one of those cases in which a round peg gets into a square hole.

Speaking of this Folsom prison we may add that we learn, from good authority, that this penitentiary is admirably managed. Two hundred prisoners are at work in the quarries. They work hard, and while the discipline is firm, are intelligently and humanely treated. Though it will take fifty years of "dead work" to fully open this magnificent quarry, these 200 men, largely inexperienced in the use of the necessary tools, are earning now $3,000 a month for the State. In two or three years more the prison, if its intelligent management is not disturbed by the howlings of discharged employees or the urgent demands of political pap-suckers, will be self-supporting. Of all the contemptible meannesses of which party politicians can be capable, (and the greed for office they show in a hundred ways is disgusting, to all right minded men) the most contemptible is sacrificing the sick in the hospital, the infirm in the almshouse, and the prisoners in the jail to their insatiable craving for a place at the public cost.

STREET CHAT.

That the *Chronicle's* "Undertones" wants the oratorical Supervisor, Strother, sat upon. No one will object, unless it's Strother.

That a legislative committee at Albany has reported a bill cutting down the fees of the New York pilots twenty-five per cent. The Pilots' Association labored hard with the committee, and the result is a compromise.

That Judge Hoffman being an American Judge, he should administer the law as it is in the Revised Statutes of the United States, and not what his philanthropic sentiment leads him to think it ought to be.

That Ways and Means Morrison's tariff bill is such an extraordinarily insane measure that even the staunchest Democratic papers cannot give it their support. Clearly this man Morrison knows no more about why and how the wealth of this country is obtained than a native of Persia who had never been outside his own village.

The Products of the California Sugar Refiner are guaranteed absolutely pure and free from all Chemicals and tions.

Our farmers will do well to study the Indian wheat production, if it is true that that empire exported 5,000,000 quarters in 1881-2, and 4,000,000 in 1883, with a probability of the export rising rapidly to 10,000,000 quarters from land now in cultivation, as transportation facilities increase, and of indefinite expansion in the further future. The entire wheat importations into the United Kingdom were only 15,400,000 quarters in 1883, and we see what the result was on prices, though the home harvest was only ordinarily fair.

Whittling shavings from a dry-goods box at the corner store won't help your wife to kindle a fire in the kitchen stove.

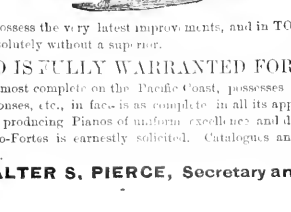
CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1880

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full descriptions mailed on application.

WALTER S. PIERCE, Secretary and Agent.

Attention, Sheep-Breeders!

MR. GERMAIN PELLISIER

Has a few of his unequaled Thoroughbred French Merino Yearling Rams for sale.

Breeders of fine stock will do well to call or write to the office of the

HUTTON BROS

9 & 10 Ducommun Block, Los Angeles,

who will take pleasure in exhibiting and giving information with regard to the stock.

Overstocking.

When stocks accumulate at the factories or in the hands of jobbers or other distributing agents, the tendency is to push sales with great persistency, and by means of such special inducements that buyers soon find their shelves overstocked. Overstocking is mainly the result of over-production. The means used to induce retailers to purchase more than their trade demands are various, and often exceedingly subtle and seductive. Frequently an extra discount of great magnitude is conceded for the purchase of a large stock, or a direct cut is made in the prices named in the transaction. These inducements seem, especially to the inexperienced in trade, so great as to cause them to commit that exceedingly great commercial blunder, to-wit: the buying of more stock than their trade will warrant.

If this class of inexperienced buyers did not exist, manufacturers and jobbers would find much more difficulty than they now do in disposing of their surplus stocks.

Dating bills ahead is an especially alluring custom of many sellers, and buyers catch at this thinly disguised bait with an avidity that is surprising. This scheme is especially employed in selling "ahead of the season," such goods as winter overcoats, sold in August.

Many dealers seem to think that by obtaining an extra 30 or 60 days credit on their purchases, they are getting great concessions, which will warrant them in buying what they cannot sell in triple that number of days, and too many times they come far short of turning their stock according to calculations. Here the seller again figures better than the buyer, for he thinks it better to make an absolute sale, even by delaying the time of payment, than to keep the goods on hand and make no sale.

Thus the buyer gambles on the chances of disposing of the goods in the additional time allowed, but he often finds that instead of having made a good investment he has crippled himself with an indebtedness which is both dangerous and annoying.

Job lots catch a good many in the retail trade. It is of course pursued by many jobbers to make up lots of certain kinds of goods, mixing poor styles with good ones, cheap goods with better ones and by this means offer an attractive combination, made more so by a very cheap price. Such sales are often a good investment in the hands of the right purchasers, whose trade will take that kind of goods, but it is otherwise with that merchant whose stock is already all that he is warranted in carrying, and whose trade does not demand such goods, even though his selling price be a low one.

What object is there for a grocer, who has already a good stock of canned goods on his shelves, to buy an extra line of these goods, even at an attractive price? If he buys and sells at a reduction, the new goods but take place of the old, which he must carry still farther into the future, and too often to his great loss.

If, however, this mistake is made, it will be well to remmember that it is a strong position for a grocery stock that is overbought, if the goods are of the best quality, for then they will not deteriorate in quality and price, like goods of inferior brands. Here, then, is a time when good goods are the best investment.

In the introduction of new specialities what is practically over-stocking often takes place. It is in taking in goods to be sold on commission, or, what is substantially the same, with the privilege of returning what is left unsold after a certain period. This is another subtle scheme adopted by drummers for new goods, and may seem a harmless transaction. The effect, however, is often disastrous for by taking in the new goods their sale interferes with the sale of the goods actually purchased by the dealer, thereby forcing him to stand by the loss incurred in carrying the latter over.

There is nothing radically wrong in offering special inducements to crowd sales into the hands of merchants able to dispose of the goods. Thus, an extra 30 days' time to a man who usually discounts his bills may enable him to purchase a large stock at one time, as he may know that his trade will absorb the goods with sufficient rapidity to enable him to take his usual discounts. Such a buyer might profitably accept of special rates, and all the extra discounts which the seller in his generosity may offer. The former may, out of abundant caution, buy with a privilege of returning unsold goods and do so with perfect propriety. His situation, however, is vastly different from the merchant whose stock is already too heavy, and whose indebtedness, perchance, is already enlarged beyond the point of safety.

There are times when the buyer should use great caution. He will be beset with urgent holders of goods, who will leave no stone unturned to make a sale. If he is in need of goods, and can afford to buy them, he may indeed consider himself most fortunate in having so many and such splendid inducements so freely offered to him; but if his stock is already replete, let him be most cautious, as the gilded bates extended on every hand may indeed prove a snare and a delusion. Now is the time to buy cautiously and wisely. Now is a good time to lay in a stock of many kinds of groceries—every merchant should know what his trade demands, and buy judiciously to meet it. Do not let assortments run down and get broken, for that is also unwise and short-sighted, but see to it that stocks are constantly replenished with articles actually needed.

Some of the producers, in the line of groceries, have learned in the past a wise lesson in regard to over-production; and this year, instead of glutting the market with their goods, they have found it better to reduce their output and are seeking to restore an equilibrium in the trade by limiting, for a time, the amount of their production. This is a heroic remedy, but it is nevertheless an effectual one; a remedy which in all cases must be resorted to first or last. This has been especially the case with the packers of canned goods, and the result has been most beneficial, for which they are deserving of great credit. The tendency is also towards a better quality, which less us, in this class of goods, the dangers of over-stocking.

We would not throw anything in the way of trade, nor would we willingly do anything to discourage producers in their efforts to dispose of their goods, but we do not believe that it is beneficial to the trade of the country to either over-sell or overbuy. The result of over-stocking is delayed payments, failures and no end of trouble to all concerned.—*Northwestern Grocer.*

Every farmer cannot keep the fastest team of horses in the neighborhood, but every one can keep his wife in dry stove wood summer and winter.

Children won't climb the hill of knowledge any faster during school hours for being forbidden to use their hand-sleds during recess.

VOL XI, NO. 19. SAN FRANCISCO, FEBRUARY 15, 1884. PRICE TEN CENTS.

A LAND GRANT THAT SHOULD NOT BE FORFEITED.

In our report of the annual meeting of the Board of Trade of San Francisco, held on the 4th inst., we gave a condensed account of the debate, *pro* and *con*, on a communication from Mr. W. H. Mills, Land Agent of the California and Oregon R. R., giving some reasons why the merchants of this city, in their own interest, should use their influence to prevent the passage of the bill for the forfeiture of the land grant of the California and Oregon Railroad, now under consideration by Congress. It was unfortunate that this matter came up at the close of a long session, after many other important questions had been disposed of, and members were anxious to get back to their offices. The essential differences in the equities of this and most other railroad grants had hardly been considered by the members before the reading of Mr. Mills' letter. The attempt to cut off debate and the refusal to allow so important a matter to take the usual course of reference to a committee showed that the popular prejudice against land grants and subsidies prevailed over more mercantile considerations. A little reflection will, we believe, show the opposing members that there is no projected railroad on this coast whose early completion would be half so beneficial to this city as this Oregon railroad. President Taber had just before spoken of the reaction taking place among Oregon merchants, and their tendency to continue or renew their business relations with San Francisco, in preference to eastern cities, because of the more liberal customs of our coast. This uncontrovertible statement, coupled with the argument of Mr. Mills regarding the facilities this road would give for reaching not only eastern Oregon and Idaho and Montana, but even Portland and Washington Territory by a short and direct railroad, ought to have made our friends pause. A subject which may have such an important bearing on the commerce of this city and the business of the members of the Board should not have been disposed of in an off-hand manner. As a rule it may be in the interest of the public to forfeit all unearned or partially unearned land grants, and yet there may be valid reasons why this particular land grant should be allowed to stand. While the completion of every competing transcontinental railroad has given us some new advantages, each so far has restricted the domain of supremacy of this city. On the other hand, this road would tend to restore some of what we have lost, and would open to us new fields. San Francisco today is suffering from a cause which might be defined as a railroad paradox: We have more roads into the State than roads out: that is, the facilities for our Eastern rivals to reach our customers are greater than the facilities of our San Francisco merchants for retaining their trade. This California and Oregon railroad would do much to place San Francisco on an equal, or superior, footing in regard to Oregon trade with New York. There is another consideration: All California, a broad, rich, timbered country, north of Redding, except immediately along the coast, is comparatively barred from development for want of railroads. Hence we see the southern end of the State growing faster than the north, though many immigrants would prefer to settle in a climate and follow avocations more nearly like those they have been accustomed to.

Below we give the text of Mr. Mills' communication to the Board of Trade, in the expectation that, after they have read it and considered the subject in all its bearings, the adverse majority will reconsider their action. This is the more probable, as the majority against favorable action was only two, in a meeting that represented at least one-half of the mercantile capital controlled by the Board, and as all the argument on that occasion was in favor of indorsing the communication, while on the other side there was only popular prejudice.

W. H. MILLS' COMMUNICATION.

SAN FRANCISCO, February 4th, 1884.

Hon. Jacob S. Taber, President of the Board of Trade, of the City of San Francisco, Cal.

MY DEAR SIR:—I have been informed that at a meeting of the Board of Trade to be held to-day the subject of the forfeiture of the land grant made to the California and Oregon road will be before your honorable body for consideration.

Should my information concerning this matter be correct, I beg leave to present to you and through you to the honorable body over which you preside, some considerations bearing upon the subject.

In 1866 Congress granted the alternate sections of land, within certain defined limits, in aid of the construction of a line of railroad from Roseville, on the Central Pacific, to Portland, in Oregon. The grant was made in two parts; to the California and Oregon Railroad Company and to the Oregon Central Railroad Company of Oregon. The California company entered at once upon the construction of its line, and has completed it to a point twenty miles north of Redding, a distance of 172 miles north of Roseville.

As is perhaps well known to you that Redding has been the northern terminus of the road, until within the past two months, a section of twenty miles of road having been completed during the summer of 1883.

The Acts granting lands in aid of the construction of this road contained a provision terminating the grant on the first day of June, 1880. The road was not completed within the time specified through no culpable want of diligence on the part of the California Company, but by reason of the suspension of the construction of the Oregon division southward. It was apparent to the California and Oregon Railroad Company that the completion of the road to the State line would not afford through connection, and as the work for over one hundred miles of the route is heavier than any encountered in the construction of the Central Pacific across the Sierra Nevada mountains, and as the road could not find profitable local supporting traffic, the suspension of work on that line was a proceeding enforced by every dictate of financial prudence.

The California and Oregon Railroad Company may therefore plead in extenuation of its default in the construction of the road the duress of circumstances beyond its control, and has not therefore been guilty of criminal or reprehensible neglect in point of time.

The forfeiture of the grant by the passage of the bills now before Congress to that purport will so far impair the value of the securities, which must be disposed of in order to obtain means for its completion, as to arrest the construction of the Oregon division southward, and leave the California and Oregon Company without either the means or inducements to complete its road to the State line. The forfeiture of the grant will therefore compass an inevitable suspension of the work upon that line for an indefinite period, and will delay for many years its ultimate completion.

Addressing those familiar with the commercial necessities and interests of San Francisco, I feel absolved from the duty of presenting in any extended form, the reasons which might be urged for the early completion of this road. Briefly, however, the leading considerations which arise relate to the value of this road as a connecting link between the terminus of the Northern Pacific and the terminus of the Central Pacific, Southern Pacific, and the Atlantic and Pacific railroads. Its completion is practically an extension of the Northern Pacific Railroad to San Francisco and will place this city in railroad communication with Oregon, Washington Territory, Montana and other commercial territory for which heretofore this city has been the distributing centre. It will also promote the settlement and the development of the agricultural and other resources of the northern portion of the State, a section which has heretofore and will continue to make the city of San Francisco, the basis of its commerce.

I also take the liberty of presenting the very obvious consideration that the lands granted lie in a very broken and mountainous portion of the State; that the lands retained by the government within the granted limits will receive such increment of value by reason of the construction of the road as to secure the Government completely as against any loss arising out of the concession of lands to encourage and promote its construction. In a true sense therefore the government loses nothing whatever by the concession of land, but is made the gainer by the settlement of the lands retained by it, and achieves a high object by promoting the prosperity and developing the resources of its territory. The retention of the grant by the railroad company also furnishes it with the highest incentive to promote the early occupation and settlement of northern California.

Since the line under consideration has its termini at Pacific Coast sea ports, to wit San Francisco and Portland, and parallels the ocean throughout its length, it becomes specially obvious that the influence of ocean competition will enforce reasonable and low rates of transportation. It is equally obvious that the failure to complete at an early day this connecting link between the terminus of the Northern Pacific Railroad and San Francisco will confer upon the sea ports northward a commercial independence highly injurious and menacing to the continued commercial supremacy of the city of San Francisco, as the chief metropolis of the American Pacific Coast.

Whatever may be said for or against the forfeiture of other land grants, the value to San Francisco of the line of communication under consideration, would seem to justify a protest on the part of the commercial and mercantile interests of San Francisco against any action tending to delay or defeat its completion.

With great respect,

I remain, Your obedient servant,

WM. H. MILLS,

Land Agent, C. & O. R. R. Co

The Foot-Hills for Vineyards.

[By Gustav Eisen in the *Fresno Republican.*]

So far only very few attempts have been made to utilize the foot hills in Fresno county for vineyard purposes. The impression has been that the hills are too dry, and the chief difficulty has been to start the cuttings or rooted vines the first year. As long as there was plenty of land on the plains which could be easily irrigated no earnest attempts were made to work the hills, where water under any circumstances is scarce. Add to this the fact that the vines in the foot-hills yield both a less crop and smaller fruit, and we can well understand the tardiness of the early settlers. The few vineyards, however, which were planted in the early days have done remarkably well in one respect the grapes produced are of excellent quality for wine. There are two different locations in the hills suitable for vines the bottom lands and the hillsides. The bottom lands can be used to better advantage but they are, of course, scarce. The hillsides themselves are capable of much more extended cultivation than most people are aware of.

The indiscriminate sale of good and bad wine (more of the latter) in "whole cellars" has seen its best days in California, and the chance from now on will be for higher grades, for finer varieties. Within the next five years an immense number of fine varieties are coming into bearing, and it is evident that the standard of the wine will be increased many fold. The vineyardist who now plants the poorer varieties of grapes, only because they yield the most fruit, will find himself sadly mistaken. The past has been the era for poor wine, the future will become that of the fine wines; and now our foot-hills will have a chance. All along our foot-hills grapes can be grown to perfection, especially in the region near the plains; not as a rule, it is true, on the south or southeast sides of the hills, because nothing will grow without irrigation; but the northern exposures are very different. The native vegetation proves that there is moisture in the ground, and the several small patches of vines planted by early settlers show undoubtedly that grapes can be grown here. It is only necessary to water them the first year, and this can be done either by windmills or other means, and the following years the vines will take care of themselves. No doubt many of our finer vineyards will in a few years be found in or nearer the foot-hills.

With the certainty of a good year ahead for our viticultural and agricultural readers, now is the time to subscribe or re-subscribe to the MERCHANT, and keep informed on matters pertaining to their peculiar interests

THAT IRRIGATION CONTROVERSY.

Mr. Blowers replies to Mr. Wetmore.

WOODLAND, February 5, 1884.

EDITOR MERCHANT: I desire again to extract a few, only, of the many assumed positions and misstatements in Mr. Wetmore's article of January 26th. After condemning large yields of grapes as highly injurious, and, in order to illustrate his "*ceau grand satis*" theory, he adds two tons per acre to my statement. As I feel liberal, I have the two tons with him. As to my Sultanas being too immature for good raisins, the crop of 1882 was shown at the Viticultural Convention, and highly approved. I have some of the crop of 1883 and would like to know of some one making better.

Mr. Wetmore intimates that my statement is incorrect in reference to my being acquainted with the raisin industry in San Diego county. On the contrary, I have had the best results of San Diego, both in grapes and raisins, sent to me, year after year, and I found, in most cases, that my second crop was nearly as ripe and saccharine as the first crop sent me from there.

If Mr. Clark's raisins in 1882 were better than in 1883, which I do not know, having seen only an isolated sample of 1882, it does not establish the contrary of my position, as I am informed by reliable authority that Mr. Clark has used his limited supply of water to the best advantage, from the time of planting his vines to the present time all loam to him for it, but it is begging the question to assume that he makes raisins without irrigation. My irrigation is summed as virtually sub-irrigation, as I do not, nor do I approve of, wetting the surface or tilled portion of the soil.

The Whitney vineyard we were shown is a sedimentary deposit, averaging not more than five to eight feet higher than the bed of the stream, which, I was informed, sometimes carries running water. It is a little valley, nicely situated between the hills, and probably can not be matched in the county. He certainly had as good raisins as I saw in that section. A few vines I saw growing on the red land were not promising, showing that that soil could not compare with the sedimentary loam. Mr. Whitney's son, the proprietor being absent from home, informed us that the older vines, not ripening as early, were not picked, the birds eating all of the fruit. They were at the time of our visit, Nov. 15th or 16th, dividing the profit on his raisins, which were yet exposed to the sun. It strikes me a good dryer would have helped him out.

Mr. Wetmore speaks highly of Mr. Williams' unirrigated vineyard, as referred to as raising still finer berries—infortunate reference. I have a letter from that gentleman, dated Nov. 8th, 1883, in which he says, "Muscats do not ripen before September 20th, suitable for raisins, and I did not finish laying down until the 28th. At that date the weather changed, and we have had several showers, dews, fogs, etc." Stating that they were damaged thereby, asking for a remedy—need of a dryer again shown. The fact is Mr. Wetmore is as for off on his dryer theory as on irrigation; as all practical raisin makers know. As to the temperature of the Cajon valley, I simply took the statements of San Diegans, exactly to a degree.

If I remember correctly, we did not visit Capt Sherman's vineyard, and certainly did not see his Zinfandel vines; however, we are now speaking of Muscats, not wine grapes.

Mr. Wetmore's reference to flooding the Eastern markets with inferior raisins does not hit me very hard, as not one per cent of my raisins ever went East. I did make one shipment to the Centennial Exposition. They sent back a medal and diploma. Now, I have marketed raisins in this State for seventeen years; have had two years that, from causes foreign to irrigation or culture, were not up to my standard. If anyone makes a better showing, it will not be arid land cultivators. I told Mr. Wetmore that for twenty years I had experimented by irrigating, sometimes, blocks of rows through my vineyard, and not irrigating the other part, without retarding the ripening or preventing the formation of sugar. Half of my neighbors do not irrigate, and their grapes do not ripen sooner.

Mr. Wetmore, after twenty-five personal allusions, deprecates personality. I have tried to and will be as impersonal as possible, but, unlike Mr. Wetmore and others, I am not booming San Diego or any other lands, but, being familiar with the raisin industry from Shasta to San Bernardino and San Diego, most state, as I did in a former article, the raisin grower who has not sufficient water for irrigation, or does not receive drainage water (as Mr. Whitney) from higher land and does not receive as much as fifteen inches annual rainfall, will make a financial failure; but this need not discourage any who desire to make raisins, as nearly half the counties of the State have lands, climate and water in proper proportions and quantities to more than flood the markets of the world, and with as good raisins as the world has yet seen.

I have said that I had no arid San Diego lands to boom, but it was not from want of opportunity. I was offered a share in the Escondido ranch, but, knowing what the Stockton Company had to pay and what the former owners really received, I did not take interest. I was also offered one thousand acres of the Cajon ranch without the payment of any money, simply for the use of my name as one of the directors of the company. This I did not and could not accept, believing that my name would be used to induce settlers to purchase who would certainly squander years of their lives and fail in the end. This I told Mr. Wetmore hence his resorting to personal allusions and anti-irrigation arguments. If I ever use official position and State funds to advertise my speculative undertakings, I hope some good friend will advise me to have it show less prominently.

COATES & TOOL;

NAPA, CAL.

SEASON OF 1884

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:— FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MENIER (same as the so-called Franc-Pinot of Mr. Scheffler—mismamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbec) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNANE, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those requiring, as circumstances vary them.

Also, All the Well Known Varieties such as ZINFANDEL, RIESLING, CHASELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria), FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGOS, CHARBONO, etc; varying prices, according to the demands of different producers.

Also a few thousand CALIFORNIA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths will furnish

10 to 15 inch cuttings at $3.50 per M
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

THE BLOWERS-WETMORE CONTROVERSY.

The letter from Mr. Blowers' which appears in another column, was received on the 6th inst., and but for the long report of the Annual Meeting of the Board of Trade and other important articles, would have appeared last week. As it was we had to add four pages to our usual number. Knowing that the storm was not forming with mail communication with the southern counties, and our friend Mr. Wetmore being some 600 or more miles from the city, we judged it proper to send him a manuscript copy in advance of what we were going to publish, knowing that it was almost impossible that Mr. Wetmore could receive Friday's paper in time for him to make a reply the following week. As circumstances ruled, Mr. Blowers' article did not appear and Mr. Wetmore has been able to put his reply before the public in the same issue as the attack upon his character. But even now this has only been done at the cost of wiring a long communication. One word more: Charles A. Wetmore has rendered services to this State which can hardly be counted in money, unless we run up into millions, and every leading viticulturist in the State freely acknowledges this. Moreover, he is the Editor's warm, personal friend and has been from the day he left college. We will not permit any man to impugn the character of Charles A. Wetmore by use of the MERCHANT'S type without giving him the earliest possible opportunity of defending himself. Mr. Blowers' has won considerable reputation as a raisin maker, but Mr. Wetmore simply did his duty in giving his opinion as the Chief Executive Viticultural Officer on the methods of growing and making raisins. Mr. Blowers took umbrage thereat and was the first to introduce personalities into what should have been a friendly discussion. We gave Mr. Blowers his opportunity of reply and he used it without scruple. In Mr. Wetmore's answer there was not one word implying anything but honorable motives to Mr. Blowers. To-day there are personalities on both sides and the controversy has gone beyond the power of the Editor to control it except by shutting out both, and that extreme course we have hesitated to take.—EDITOR S. F. MERCHANT.

MR. WETMORE ANSWERS MR. BLOWERS WITHOUT GLOVES.

[TELEGRAPHED BY WESTERN UNION WIRES.]

SAN DIEGO, Cal., February 13, 1884.

EDITOR MERCHANT:—YOUR courtesy in affording me opportunity to reply to a personal attack made this week by Mr. Blowers is duly appreciated. Mail communications, however, have been temporarily delayed, and I am forced to talk by telegraph; I hope no errors may occur in transmission.

I shall address myself first to the insinuations so cowardly made by Mr. Blowers, intimating that I have used official position and State funds to advertise personal interests. This is, however, a matter for the State Board to investigate. The attack is so wantonly malicious and false, that it can not be passed by quietly; therefore I intend to call for an investigation. If he had used his words as any honest and brave man would have done, I should have given him an opportunity to display his cunning in a court of justice. I shall not attempt to dispute details of fact regarding San Diego county with him. He is determined not to tell the truth, and appears to desire to injure me through my private business interests. Two weeks ago I was informed that he had threatened, in case I should continue to disagree with him as to the proper method of cultivating and curing raisin grapes, that he would publish my private business correspondence, in which I had offered him a share in the profits of managing the El Cajon Co.'s land, and also that he would publish that I had realized a profit in selling the Escondido ranch. He has evidently known me a long time without becoming well acquainted, as I wrote him recently authorizing him to publish my letters. I do not see what my private real-estate business has to do with the question of curing raisins in the sun or drying them artificially, but, nevertheless, Mr. Blowers has imagined that there was some connection, so I must, in justice to San Diego county, which he attacks over my head, make some reply.

In the first place, Mr. Blowers did not decline to take an interest in the Escondido ranch, as he states, but told me that if I could wait until he had sold a large tract of land in Yolo county in which he was interested, he would go to San Diego and see the land. He said that two of his friends, Mr. Brownell and Mr. Ladd, had just sold a large tract of land near El Paso Robles and that as soon as his Yolo lands were sold he would go with them to seek some large investment, which would probably be managed in his name. He said, also, that he had been negotiating with the railroad company for a large tract of cheap land in Shasta county. I informed him that I could not wait for him, that I was limited in time by my contract, but if I got any other favorable opportunity for him, I would let him know. As to my making a profit in selling the Escondido, there is no secret whatever; I did make a good commission. The owners of the ranch paid it willingly, and the purchasers are all satisfied that they bought their land for less than one-half its real value. I am anxious to make another transaction of the same kind as soon as possible, and I should do so without any fear of publication of the facts.

Mr. Blowers is, however, more malicious and ungentlemanly in his reference to the Cajon lands. The facts are these: The property of the Company, fully worth half a million dollars, was owned by a gentleman in ill health, who proposed to Mr. George West and myself that if we would share equally in expenses and manage the business, we should share equally in all profits over the contract price of one hundred and fifty thousand dollars. This gentleman desired, also, that we should secure the co-operation of Mr. Blowers, on account of his reputation as a raisin maker. I told him that for such purpose I preferred other parties, but that if he desired to have Mr. Blowers to act, he should offer him a share of the profits worthy of his reputation, and, to avoid any reasons for refusal, we should guarantee to carry his interest without expense to him. I therefore wrote to him, asking him to examine the property, and if he could, after careful inspection, conscientiously recommend it and act as president of the company, that we would give him, after all the debts were paid, an interest in the profits that would be equal, probably, to one thousand acres of land of average quality, valued at, at least, ten thousand dollars. He came to San Diego and spent three days with me, examining the Cajon and Escondido valleys, and Mr. Brownell accompanied us. We naturally differed in opinion as to the best location for raisin vineyards. Mr. Blowers preferred the alluvial bottom lands, of which he saw many

thousand acres of which [illegible] most enthusiastic opinion [illegible] such lands, and prefer [illegible] of Mr. Clark, who in Mr. B[illegible] his recent report, that he [illegible] raisins. We had three th[illegible] land like Mr Clark's. Mr C[illegible] cently been experimenting with [illegible] tion by means of a windmill [illegible] Mr Blowers calls irrigation. [illegible] of the saddle lands of the Capistrano [illegible] portunities exist as at Mr Clark's, and ample facilities exist for using the water of the river, if desired. We think that [illegible] suits can be obtained without [illegible] but I know of no law to prevent [illegible] in this county, if desired. Mr Blowers forgets, however, that he commended Mr Clark's raisins as better than his own; that he told me if he had seen the Escondido before, he would have taken an interest in it, and that he asked me to see him again, after he had returned home, about the Cajon. I assert, on my honor as a gentleman, that Mr Blowers never made to me any such statement of his reasons for refusing to join us as he now falsely publishes. He intimated to me, however, that he was afraid he might incur some responsibility by accepting the stock of the company, and that he was engaged in selling off a large tract of land in Yolo county, which embarrassed him, leaving me fairly to infer by what he said, that his connection with San Diego lands might injure his interests in other places. That his present words are an afterthought, intended to injure me personally, is proven by his own report, in which he commends Mr. Clark's vineyard, where a profit of one hundred dollars per acre has been realized in dry years. Mr Brownell, who was with us, bade me good bye; saying, "I hope you will succeed and I believe you will." Mr. Brownell is a gentleman and will not deny the truth. Mr. Blowers has however proved himself unworthy to speak to a gentleman, so coldly false and malicious. Better men than he is have carefully examined this county and approved it. Our Escondido Company, composed of experienced men, such as Messrs. George West, Wm. B. West, George Ladd and other San Joaquin farmers, have assessed themselves twenty thousand dollars this winter to plant a large vineyard not for sale on speculation, but as a permanent investment and intend to expend much more next year. We have samples of our raisin products to exhibit which Mr. Blowers can not match, and we do not fear his competition while I for one shall not fail to exhibit it. If the question of official reports is to be raised, I am willing any day for Mr. Blowers to compare his work with mine. If the question of personal interests is to be discussed, I have to tell him that I have the same right to attend to my property in San Diego and Alameda counties, that he has to do the same in Yolo and Shasta, only he will not find me so despicably mean as to attempt to advance my interests by making any false comparisons between my properties and those of other districts. I do not pretend to have an artificial dryer for sale, as he has. I do not pretend to sell Gordo Blanco cuttings which I have named myself, and I do not intend to advise any one to attempt to make raisins where they cannot be cured naturally, but where they need a dryer which I may have for sale. I do not comprehend Mr. Blowers' motives for these malicious attacks; perhaps it is because I have had the audacity to discuss raisin making instead of leaving the whole question to him, as we have done heretofore without profit to the State; perhaps it is because I did not wait for him to take his position in pouring in business comparisons; perhaps it is because my argument against growing green grapes may hurt the sale of his patent dryer; perhaps it is because my advice may prevent some one from buying the bottom lands in which he is interested. perhaps it is because I have said that his Gordo Blanco cuttings are the same as some other people's Muscat of Alexandria, though he charges twice the price, perhaps, indeed, it is because he is naturally a crank. At any rate, he has so treated me that he cannot complain if I do not hesitate to hamstring his previous hand log and invite him to kick again with it if he can. I will conclude by one reference which he cannot deny. At the last meeting of our State Board, I proposed to call a convention of raisin makers for the full discussion of all questions pertaining to the industry and for the exhibition of products. I did not the desire to lead in this matter, but did desire to give the State an opportunity to learn something from varied experience. I am now a raisin grape planter myself, and I desire to learn as well as to teach. There were only two objections to my plan. Mr. Blowers objected because he said the season was a bad one for raisins and growers would not like to exhibit; what the other objection was I leave Mr. Blowers to state if he desires to do so. I then very well that fine exhibits could be made by San Diego, Riverside, Orange, Fresno and the warm vineyards of the Sacramento valley and the Sierra foot-hills, but I knew also that Mr. Blowers did not care to offer his products in comparison with others, and out of courtesy to him I withdrew my motion. I am now heartily sorry that I did not insist on the convention. So far as my private interests are concerned, they would not have suffered by my competition with Mr. Blowers.

Yours, respectfully,

CHAS. A. WETMORE.

The St. Helena Wine Growers Meet Again

There was a good attendance at the meeting held here on Saturday of St Helena wine and grape men. Chas. Krug, Esq., President, occupied the chair, and dispatched business in his usual systematic and off-hand style. W. A. Mackind acted as Secretary.

The President stated that there was no old business on hand. The last meeting, held several weeks ago had been mainly occupied in discussing the merits of the new grape known now as "Lewelling's Prolific."

Mr. Krug called the attention of his fellow members of the Club to the necessity of making known the sentiments of our people here concerning the Tariff, and the great injustice that would be meted out to California if Congress should take any steps to reduce the duties on foreign wines. The Vineyardland Club here was the oldest in the State, and there was no impropriety in our sounding the alarm. The other Clubs throughout the State would doubtless, if necessary, take similar action in the matter.

Mr. Ewer thought that all that was necessary was to get up a remonstrance and protest against any reduction of duties on imported wines.

Mr. Castner was in favor of the passage of a simple resolution on the subject, embodying the sense of the Club and the community.

Mr. Lyman thought it was best not to agitate the subject now. He believed that nothing would be gained by doing so, as the sentiment of the majority of the new House was known to be in favor of free trade. If any action should be taken by the Club, he suggested that it would be a strong point to show that the grape and wine business represented a new and important industry, from which large numbers of the laboring population gained a livelihood.

The officers of the Club were authorized to prepare a resolution to be forwarded to our members of Congress, embodying the sense of our people in connection with this important interest.

A desultory discussion then took place as to the best varieties to plant. Mr. Castner expressed himself very favorably to the Black Pinot, and gave it a decided preference over the Zinfandel, having several objections to the latter from actual experience.

Mr. Krug said the Black Pinot was the toughest vine we had and showed a remarkable degree of resistance to the frost.

Mr Hughes read a letter from a friend in Los Angeles, inquiring about several varieties of cuttings that he wished to purchase, among them some Black Burgundies.

Mr. Krug said the Black Burgundy cuttings should not be more than $7.50 a thousand. He believed the Mataro (which he said should be pronounced by emphasizing the last syllable) was a good grape to raise. It was very prolific on good soil.

Some discussion occurred relative to the cause of "Black Measles," and the more prevalent infliction known as the "Black Knot" in vines. The surplus of sap being the main cause of the latter disease, Mr. Krug suggested that vines thus troubled should be suckered as early as December and January.

Mr. Krug called attention to the fact that in consequence of the failure to hold the Annual meeting in December, the Club was without a regularly elected Vice-President and Secretary. He suggested that the organization should be completed, and steps be taken to make different arrangements concerning the hall.

The meetings of the Club being held on the 2nd and 4th Saturdays of each month, it was decided to invite a full attendance at the next gathering, one week from Saturday next, for the purpose of transacting the unfinished business. Mr. Castner also suggested that many gentlemen were coming into the valley to engage in the vineyard business, and that they would gain much information by becoming members of the Club and attending the meetings.—*St. Helena Times.*

RIPARIA CUTTINGS.

The superiority of California grown Riparia Cuttings over those imported from the East can be proved, and demonstrated to the satisfaction of anyone who may call at our nurseries. We rear a 15 to 20 inch imported cutting will frequently have only two or three buds, those raised here, which we offer for sale, have from five to seven, and the wood is also better ripened. We do not hesitate to assert that

1000 of home raised Riparia Cuttings are worth 5000 of those imported,

and we can prove it from our own experience, and that of others.

We have now about 250,000 made, which are heeled in every day as they are cut, and have more to make. Our expenses in obtaining these cuttings (from the 3 year old vineyard of Judge John A. Stanly) are very great; but we offer them at the low rate of $1.50 to $7.50 per M., according to size.

References given if desired.

COATES & TOOL.

NAPA, CAL.

EL CAJON.

27,000 Acres of Choice Vine Fruit, Olive, Alfalfa and Crazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colon now growing up in the Cajon Valley, Sa Diego county, the El Cajon Land Compan will temporarily suspend the sale of i stock and will make most favorable offe ings to induce rapid settlement of th country. The 27,000 acres controlled by th Company will, until further notice, be o fered in tracts, as follows:

First—The 2500 acres of platted, lev land, in lots from 5 to 160 acres—unifor in quality—at $60 per acre, cash. The lands are most favorably situated for vin olive, citrus and fruit culture, or for ma ing pleasant homes, where the benefita climate only are sought. Adjacent lan of same quality cannot be purchased at le than $100 per acre. The Cajon Valley r ready has the nucleus of a fine settlemen a school-house, church, post-office, hot etc. About 500 acres in vines and trees a already planted.

Second—The so-called "T." tract, co taining 10,000 acres of land, comprising: 500 acres of valley land, 1,500 acres of rolli mesa, suitable for grain, and 6,000 acres hills suitable for grazing, will be sold e tire. This would make a first-class sto ranch, or could be cut up advantageous for a small colony; wood on this tract estimated at 20,000 cords. The price w be so low that an investor may subdivi and sell off 1,000 acres of the valley lan and clear all his expenditures.

Third—The so-called "Monte"—a tra of 1,000 acres of the richest alluvial s along the San Diego river; carries abo 20,000 cords of wood. This land in a upper county of the State would sell $150 to $500 per acre. It will be sold tire, together with adjacent hills.

Fourth—The grazing lands of the "S tract between the platted lands and "Monte," about 10,000 acres, partly su able for cultivation, will be sold eith together with the Monte, or separately.

PRODUCE MARKET.

The Imports and [illegible] piled from last [illegible] ing of the current [illegible]

At the time of our last [illegible] our conjectures to the [illegible] on the brilliant prospects [illegible] of plentiful showers throughout [illegible] of the State. Since then [illegible] carried on to the fullest [illegible] raising lands, and we still [illegible] or forage needed from [illegible] sand, and the outlook [illegible] the harvesting of all that could [illegible] is that parties who were doubting [illegible] futures, on the long sale, no [illegible] day to day are called upon to put [illegible] gains as are sure to the [illegible] they made a few weeks since. [illegible] consumed many of those who [illegible] may be largely depleted, in [illegible] accumulation of wealth is almost [illegible] unanimity of our residents.

FLOUR
Imports, 5811 qr sacks.—Exports 19815 [illegible]
Receipts of week, 7850 qr sks
The market is quiet and weak, and a further [illegible] to-day, with no [illegible]
EXTRA, $5 50@5 75.—Superfine, $4 00@4 75.
Country dairy, $3 50@4 50. Oregon, $4 75@5 00.
5 50 per bbl for jobbing parcels to be delivered.

WHEAT
Exports 2001 [illegible]
Receipts for the week, 16[illegible]
Without encouragement from [illegible] as [illegible] and the purchases [illegible] are [illegible] amount seen in the market is [illegible] and sales are effected only when [illegible] willing to make concessions. The [illegible] control of the market. In this [illegible] only small parcels and are very [illegible] to suit.
Sales of No 1 shipping [illegible] spot, season's extra prime, $1 [illegible] is the highest but is only $1 08½ [illegible] and nothing is doing here [illegible] per bbl for extra choice.

BARLEY
Exports, 6512 [illegible]
Receipts of week, 16776 [illegible]
The demand for [illegible] during the week, and [illegible] from one to three cents [illegible] sample. Market opened [illegible] and closed [illegible] Feed [illegible] the early brewers and [illegible] per base more than the [illegible] Choice [illegible] as follows: Seller season, 80c; buyer season, 92½c; seller May, 93c. In the Sample Market the [illegible] fair range for No 1 Feed to [illegible] choice Brewing at 1 10, fair Chevalier $1 25 [illegible] per ctl for choice.

OATS
Imports, 112 sks.—Exports 982 [illegible]
Receipts of week, 8028 [illegible]
Milled, $5 [illegible] Black, $1 50@1 60. White, $1 50@1 60 for ordinary, $1 62½@1 70 for fair to good and $1 75@1 80 per ctl, for choice [illegible] for choice.

CORN

CEMENT—
Imports, 25 bbls. Exports, 5500 bbls lime

	spot	To arrive
Eastern Rosendale, in round bbls	$2 20	2 15
Englesh dour brands, in round bbls	3 25	3 10
English stands brands, in round bbls	3 15	3 00

COAL—
Imports, 10181 tons Pacific Coast, 6192 tons Australian and Eastern. Exports, 32 tons coal.
For change of any moment to note, the full stock on hand is small, and large arrivals from the Coast of coal which keep spot prices depressed. The coal which can still be got here at two weeks is leading to orders being solicited for leading Foreign Coals, still, buyers are timid, fearing a large influx of coal, and move on only when forced by urgency. They think lower prices are coming, the difference in quotations between sellers and buyers of bars business for the moment.
Bulk coals and grain freights continue to show a downward tendency, so far as outer tonnage is head the way, it is safe to predict that no cheap Foreign coal will be included in this crop.
Anthracite and Connellsville grades are in full supply here, and the latter can be had in any small quantity to fit and very little actual sale and loading.
Imports in prices of coal foreign and American, to arrive: Wellington, $5 25@5 50; Liverpool Cream, spot and to arrive, $5 25@5 50; Liverpool Splint, $8@ 8 25; West Hartley, $8 75@9 00; Scotch Splint, $8@ 8 50; Cardiff Steam, $7 75@8; Lump Lehigh, $15@ 15½; Egg Hard, $14@14½; Cumberland, bulk, $10½ @11; Spot prices as follows: Australian, $8 25; Liverpool Steam, $8 00; West Hartley, $8½; Scotch Splint, $9 00; Cardiff, $8 00; Lehigh Lump, $13; Cumberland, bulk, $11 50; Egg Hard $14 50.

COFFEE—
Exports, 3868 lbs.
The demand for Coffee continues active, especially in low and choice grades, and the new importations being principally in good and prime standard, rich in color, with prices firm and steady, and a general feeling of a strong and active market with tendency upwards, owing to the short receipts of the Coffee crops in Brazil and other Eastern markets.

Salvador, fair to good	11½@12½
Good mala, fair to good	12½@13
Costa Rica, fair to good	12¾@13½

IRON—
Imports, 701 pcs 110 bills 155 pkgs iron, 73 bills 871 pcs iron pipe. Exports, 54 pcs iron, 103 pcs iron pipe, 238 pcs steel.
The demand here is not kept moderately busy this week, and considerable Pig Iron has been melted. The assemble charge at Sacramento favors promise a good spring trade, and we now safely calculate on a large consumption of Iron for building purposes this year.
The report from the Eastern markets indicate a slight improvement in the different branches of the Iron trade, and prices are representing some what.
Importers prices on Pig Iron, Foreign and American, to arrive: Shotts No 1, $27 ⅌ ton—
Glengarnock, $26 50@ ; Eglinton, $25 00, Clay Lane, white, $23 50; American, Eastern, Lane White, $23 50; American, Eastern, Soft, $28 00; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00, Clay Lane, white, $23; Shotts No 1, $28 50, American, Soft Eastern, $28, Clipper Gap Nos 1, to 4 $32 50@$35 00.

MATCHES—
We quote new price list: Block 32½c per gross, Telegraph, 55@70c per gross, according to size; Swift & Courtenee's Parlor, $1 75 per gross

MOLASSES AND SYRUPS—
Imports, 61 bbls syrup. Exports, 318 gls syrup

NAVAL STORES—
Exports, 23 bls oakum, 2 bbls rosin, 15 cs tar, pitch, oil.
We quote: N Carolina Rosin, $3¾@4¼ for No 1, and $5 00 for Extra Pale; Pitch, $3¾@4; Tar, $6 00@ 6 50; Spirits Turpentine, 48@50c ⅌ gal. Oakum, $4 00, for ordinary California, extra do, $4 50; and $4 50 for Eastern ⅌ bale; Spirits Turpentine, 48@50c ⅌ gal. Anchors, 7½@8c ⅌ lb; Chains, 5½@6c ⅌ lb; Rope, Manila, 9½@12c; Hemp, 8c; Bolts, 8c; Nails, 4@5c; Coppers, 1½c on spot, Caustic Soda, 60 per cent, 5c.

OILS—
Imports, 100 cs oil. Exports, 95 cs oil.
We quote: California Castor Oil, No 1, $1 25 ⅌ gal; No 2, $1 00. The Pacific Oil Works list for Linseed, 54c ⅌ gal for boiled; 62½c for raw in 100 bbl lots. We quote: Eastern linseed oil, 61½c; winter strained lard oil, 95c, in bbls; Cocoanut Oil, in bbls, 57½c, China Nut Oil, 80c ⅌ gal; Coast Whale, 45c; Arctic Whale, 60c; Cal Neatsfoot, 85c; Eastern do, 90; Naphtha, 20c; Red Oil, 5½; California olive Oil, $1 ⅌ cal or $12 ⅌ doz.

PAINTS—
Exports, 15 cs paints, 45 cs varnish, 30 kgs white lead.
We quote White Lead 6½ in ton lots; and 6¾ in 5 ton lots; Litharge, 6, Ochre, Yellow, 3 to 5c; Ochre, ground, 5 to 6 cts; Venetia Red, 2 to 3c; do, in oil, 5 to 6c; Chrome, dry, 18 to 30c, do, in oil, 18c; Red Lead, 6 cents

PETROLEUM—
Imports, 600 cs coal oil. Exports, 4 tnks petroleum, 1 tnk coal oil.

PROVISIONS—
Imports, 28097 lbs bacon, 50 bbls. beef, 135115 lbs. hams, 62310 lbs lard, 29 bbls pork, 90661 lbs. hams, 82 bbls beef, 8471 lbs. hams, 95566 lbs. lard, 111 bbls pork.
The prices of provisions have advanced slightly since our last. Business is active with a good trade.
We quote: California hams, 13½; Eastern, 15½@ 16½c; Cow hams, 15½; Lice; California bacon, 11½@13½c; California covered bacon, 11½c; extra clear sides, 12½@12½c. California shoulders—mess pork, $20 per bbl; prime mess $18½; clear pork, $21 pr bbl; extra clear do, $22 per bbl; pig pork, $21 per bbl; mess beef, $14 50 per bbl; pig pork, $21 per bbl; family beef $15 50 per bbl; Banner hard, 13½; 12½c; 5s, 13c; 3s, 13½c; Eastern refined lard, in tes, 13¼c per lb; California refined lard, in tes, 11c per lb; 10s, 10½c; 5s, 10½c; Banner lard, 10s, 12½c; 5s, 13c; 3s, 13½c; Fairbanks lard, 13¾c for 10s, 13¾c for 5s, and 14c for 3s.

QUICKSILVER—
Exports, 35 flasks.
Owing to decreased production and light spot supply the price here has been advanced to 35@36c per lb, with little or nothing doing for foreign markets The London price is £5 2s 6d per flask of 76½ lbs

RICE—
Imports, 1910 bgs. Exports 32525 lbs
In so far demand at unchanged prices, viz $4 05@4 10 for mixed $4½@4¾ for No 2 China, $5 2½@ 5 50 for fair No 1. Extra No 1 $5¾@6¼. A small lot of New Mixed has been received and sold at $4 65@4 70 Hawaiian rice is in light demand, with transactions amounting to 300 bags for the week at 4¾@4 90 days

Sugar in fair demand, at $4 05@$4 10 for mixed, $4 70 for No 2 China, $5 25 for fair No 1 and $5 75@6 25 for extra No 1.

SUGAR—
Imports, 29,287 bgs raw. Exports, 72,434 lbs refined.
The California demand is good. From New York, by telegram, we learn that Granulated is quoted at 7⅝c, or a shade lower than last week. The market for both raws and refined is reported dull
Grocery grades of Island Sugars are selling freely at prices ranging from 6¼ to 6¾c. The sales during the week have been 1144 bags at 6⅝c and 2500 bags at 6¾c.
We quote local refinery rates, prices subject to change without notice.
(A) Fat Cube Sugar, in bbls, 10½c: (A) Crushed Sugar, 10½c; Extra Powdered sugar, in barrels, 10¼c; Fine Crushed sugar, in barrels, 10¼; Dry Granulated sugar, in barrels, 9¾c; Extra Granulated sugar, in barrels, 9½c; Extra C, 8¾c; Golden C sugar, in barrels, 8½c; 5 sugars in barrels, 7¾c; Extra Fine Powdered, in bbls, 11¾c; Confectioners' (A), 10c; El Dorado C, in barrels, 9¼c; Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ¼c, and boxes, ½c, more for all kinds.

I. C. Charcoal, Alloway Grade		6 35
" Terne Plates (Roofing)		

We quote: Pig Tin, on spot, 22½c.

SALT—
Exports, 6780 lbs.
Liverpool fine we quote at $20@22 50 ⅌ ton. California, $6@10 for Bay; do crystal, $8@9; Golden Island, fine, $8@22 do coarse, $12; do do half Island, $8@14.

SOAP—
Imports, 79 bxs. Exports, 54 bxs.
We quote: California Castile, Mottled, 8¾@12c White, 17c@20; California Pale and Chemical Olive 5½@7c; Washing Powders, $8@$12½ per gross.

WHOLE SPICES—
We quote: Black Pepper, 15@16c; White Pepper, 22½c—; Allspice, 12@15c; Cloves, 22½c; Cassia, Sm@9c; Ceylon Cinnamon, 40@45c; Ginger, No 1 5c; Nutmegs, 125@65c; Mace, 60@62½c; Bonne Ginger, 16@18c.

SPIRITS—
Imports, 118 bbls spirits, 58 bbls alcohol, 230 bbls whiskey Exports, 5 cs whisky.

STARCH—
Imports, 930 bxs
We quote Kingsford's Pure Starches 8½c ⅌ lb; Corn and Silver Gloss, 10½c; Pearl, 7½c; Pure Starch, in barrels, 7½c; Ground and Wheat Starch, 8½c, in barrels; Silver Gloss, in barrels, 9½c.

TEA—
Exports, 4144 lbs

WINES—
Exports, 10 cs, 238 gls native.

PRODUCE MARKET.

[Continued from Page 305.]

POTATOES—
Imports, 210 sks. Exports, 770 ctls.
Receipts of the week, 17,400 sks.
The market is cleaner than they have been for some time, yet prices do not strengthen. We note a little flutter in Early Rose, but liberal arrivals keep them subdued.
We quote: Early Rose, 70c; River Reds, 40c; Tomales and Petaluma, 65c; Cuffy's Cove, 70c; Humboldts, 70c, Sweets, 82½@ 25.

ONIONS—
Exports, 121 ctls.
Receipts of week, 2451 sks
Arrivals and demand fit in very nicely. Choice seem more plentiful and sell readily at 1¼c.

BEESWAX—
We quote 26@30 c per lb

HOPS—
Imports, 22 bls Exports, 325 lbs.
Receipts of the week, 165 bls.
The demand continues fair and prices firm. Although to-day's advices from New York seem to be rather weak, at least there seems to be some uncertainty about the market. They are feeling that the tariff question will be settled, especially of choice. turn has come. Strebs refined, especially of choice. Quotations here, fair to good 17½ to 19c. Choice, 20 to 22½c.

HIDES, SKINS, ETC
Imports, 635 bdls Hides, 71 bdls Skins, 31 pkgs 38 cs Tallow. Exports, 1 bdl Skins, 1 bdl Skins 72295 lbs Tallow.
Heavy Salted Steers, over 55 lbs, 10c@10½c per lb Light Salted Cows and Steers, 50@55 lbs, 8½c Medium Salted Cows and Steers, 30@50 lbs, 8c per lb. Salted Kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.
Dry Hides, usual selections, 18@——c per lb; Dry Kips do, 18@——c per lb. Dry Calf, do, 18 @20c per lb.

WOOL—
Receipts of week, 1190 sks
For Wool market, see Wool Department.

A. D. BELL ... Editor.

FRIDAY FEBRUARY 15, 1884

Some of our editorial brethren with a school atlas opened at the map of Egypt are writing elaborately on the proper method of conducting the war against the followers of the false prophet.

The editor of the *Pacific Sentinel* wants the bamboo rod or leather strap to come into use; he thinks a whipping post too heavy an instrument of correction, as he says "that is going too far." We are inclined to listen with attention to anything that editor says, because he is young enough to have a vivid remembrance of his sufferings in the days of his tutelage.

The World's Fair Committee are right in their address to our capitalists. Before we can ask the aid of Congress or other States, we must evince our earnestness by a subscription of half a million. It might, perhaps, be well to publish an estimate of the full amount, from all sources, which will be necessary to insure success, and assure subscribers that they will not be called upon for their coin, unless a minimum sum, fixed now, shall be guaranteed.

There is a very marked change going on in the lines on which the heavy traffic on the other side of the "Rockies" is being carried. During the war years, when the lower waters of the Mississippi were blocked by armed forces, railroads running east and west earned immense revenues and multiplied rapidly; still there was business for all. For all, until peace was restored and by Captain Ead's ingenuity the mouth of the river at New Orleans was improved, and then the heavy products of the country began to follow the river and the railroads were deprived of millions of dollars of earnings which otherwise would have fallen to them. It is now cheaper to bring heavy freights from any manufacturing point on or near the Mississippi or its tributaries to this coast by way of New Orleans and the Southern Pacific than the older railroad route, and if the California and Oregon lines were completed, European and Atlantic merchandise could be distributed in Oregon and Washington at less cost via San Francisco or Sacramento than by the long railroad haul across the broadest portion of the continent. It may seem a risky assertion but we venture to make it, that the actual cost to the carrying companies (not what they may charge) five years hence with the California-Oregon line open, on a ton of freight from Liverpool to Portland, will be less by way of New Orleans and the Southern Pacific, than by the Northern Pacific Railroad.

THE OREGON TRADE.

The strongest money grounds on which we might hope to retain the greater portion of the Oregon trade, even though the Northern Pacific has such Portland direct communication with the Atlantic railroad system, it seems that our methods of doing business are more popular with Pacific coast merchants than those which prevail in the East. New York, Boston and Chicago are too distant from Oregon and the trips too costly and occupies too much time for it to be worth while for any ordinary merchant to visit them two or three times a year. No merchant wishes to be compelled to buy only from travelers or by letter orders. He wants to inspect the stocks of several houses and make the acquaintance of the principals. The retail merchants of Oregon and Washington Territory will therefore continue to buy most of their goods at some central point on this side of the mountains. At this time San Francisco is so far ahead, in extent, variety and value of stocks of merchandise, that any man who wants to make the best possible selections would naturally come to San Francisco. Moreover, there are secondary considerations which draw business men to metropolitan cities, besides the advantage of buying on better terms. Every man who spends most of his life in some small town or village hankers for the enjoyments that a metropolitan city offers to visitors. Tastes vary, and to the man of culture an opportunity of hearing a great lecturer or preacher is the inducement; to another visiting an art exhibition, or the opera; others want to go to a play, attend a horse race, or even a slugging match. The visiting grocer or dry goods man may devote himself steadily to the main object of his trip in the business hours of the day, but his evenings are as fully occupied in instruction or recreation. Between the inducements offered to a man who has been chained to the dull drudgery of a country store for half a year or more, and who is hungry for a taste of the bustle and excitements of city life, by Portland and San Francisco there can be no comparison. There is but one serious drawback to our not only retaining but increasing our business relations, as the country fills up, with Oregon and the adjacent Territories. The only practicable route is by steamer, and in foggy or tempestuous weather the voyage is not a pleasant nor a very safe one. Moreover, it takes time and money, including the delays and extra hotel expenses at one or both ends of the trip. This necessity of making a sea voyage to reach San Francisco is doing more to build up Portland as a commercial center with metropolitan separations than the Northern Pacific Railroad. If the California and Oregon Railroad was complete to-day, the very heart of the Oregon trade would be as near to us as Los Angeles. The time and fare would be about the same, and all Oregon and the Sound would be our territory. If that railroad is not completed for six or seven years Portland will in the meantime have made such progress that we cannot expect to make much inroad on her established trade. Time in the construction of this line is of the utmost importance to San Francisco, and it looks like blindness in our merchants to throw any obstacle in the way of its immediate construction.

THE SIXTH TERM.

The Directors of the Board of Trade differ from politicians, as regards rotation in office—when they have got the right man in the right place, they keep him there. Jacob S. Taber was elected President of the Board of Trade five years ago, and, including the election of last Friday, has been five times re-elected. This is an honor that has never been bestowed on the President of any Board of Trade or Chamber of Commerce in the United States or Great Britain, and, we believe, never anywhere. The cause of this action is not the want of material in the Board, from which an efficient President could be drawn, but the recognition of the great public spirit, the liberal reach of his views on all topics which affect the commerce of this city, and the singular aptitude for conducting the affairs of this important and prosperous Board, which President Taber has shown from the time he accepted the post. The Board of Trade, under the Presidency of the present incumbent, has increased in membership and influence until it wields more influence on this coast than all other Chambers of Commerce and commercial associations of a similar nature combined.

STREET CHAT.

That as the buffalo disappears from the plains, the Indian must be taught to earn his living by labor, or there will be trouble. A lot of well-fed, idle savages are as sure to get into mischief as a cat in a dairy to steal cream.

That one of the oddities of the foreign commerce of the Pacific Coast is that we bring coffee from Central America by steamer, past the Mexican ports, to this and then ship large quantities by another steamer to those same Mexican ports.

That one reason why, in the face of the rapid increase in the capacity and number of our flouring mills, bran is not produced in larger quantities, is that by the roller process less bran is made than from stones, and what bran is made is inferior in quality.

That the Trenton *Times* says that "the Republican party is like a chicken with its head cut off"—plenty of muscular force and a solution of continuity of the nerves that bring that force under the control of the directing power. The Democratic party might be likened to a split eagle or a "Swan with Two Necks," two complete brains neutralizing each other by exercising contradictory forces on the main body.

That Mexico would consume large quantities of our flour, if it was not for duties and vexatious customs regulations, which almost prohibit importations. Our wheat growers and leading millers should do all in their power to strengthen the hands of those Senators who favor the ratification of the Mexican treaty. One of the most important results of such a treaty would be teaching the Mexican government and its officials the advantage to themselves of simplifying their revenue laws, so as to facilitate and not repress commerce.

The cattle and sheep men who are too idle to provide food for their stock during the season in which natural grasses cannot be had, deserve no sympathy because the late protracted storm killed off thousands of their half-starved animals. They deserve to lose for their indolence and neglect to provide forage to carry them over the hard months of the year. The only innocent sufferers are the poor, who have to pay exorbitant prices for any beef or mutton that is fit for human food.

DEGRADATION OF LABOR.

Cotton, Wool and Iron, Boston, deplores the gradual reduction of the wages of factory laborers of New England, until they are approaching the condition of European wage earners. The editor seems to blame the manufacturers for making unnecessary reductions in the vain hope of increasing consumption by reducing cost. Take the woolen manufacturers, for instance: is it not the competition from the greater influx of European goods, induced by the reductions in the tariff, that is forcing the manufacturers to a course which the most intelligent of them must know is suicidal. A high protective tariff permits the manufacturers to pay full wages, and the recipient of these full wages becomes himself a purchaser, not only of such goods as he himself is engaged in making, but of all classes of manufactures. The only people who really suffer by a high tariff are those who have fixed incomes, such as annuities, which do not fluctuate with the prosperity or adversity that may prevail in the country.

We give below *Cotton, Wool and Iron*'s views in full:

"The present depression in trade, and the cutting down of wages among our cotton manufacturers, is a subject for very serious thought and consideration, not only to the operatives in our mills, but to the manufacturers who employ them. We are passing through a stage in business entirely novel, a state of things that never existed in any country on earth before. Here we have in the same establishment the employer and the employé, often of equal intelligence and education; and the reasoning faculties of the intelligent operative, in many cases, are more keenly developed, and largely from necessity, than they are in the employer. The operative knows as well as the manufacturer when money is being made or lost; he knows the daily quotations of cloth and the raw material; he knows when a cut down in wages is justifiable, and when it is not; he is no longer the headstrong, unthinking striker, regardless of consequences. Labor reasons deeply, and it seriously considers whether it is not a suicidal act, on the part of his employer, to still further reduce his wages, so that he is compelled to confine himself in food and clothes to the simple necessities of life, similar to the state of things existing in India, China, and the east, generally, where a weaver, clad in a few cents' worth of cotton cloth, and consuming two or three meals a day of rice, will work for years on one shawl, his earnings measured by cents, rarely, if ever, owning a dollar at a time. This state of things has produced a condition not desirable, and which must give way before western civilization. While this change for the better is going on in the east, is it desirable that our manufacturers should still further cut down the wages of the operatives in our cotton mills? If, after due consideration, it is found to be a necessity, we have nothing further to say. The laborer in the east can hardly be called a purchaser; he is a producer, but not much of a consumer, consequently of not much value to manufacturers. Every reduction that is made and not replaced brings our operatives nearer this state of things, and it becomes a pertinent question whether it is desirable, even from the manufacturer's standpoint. It is not a question too deep to solve, and probably manufacturers have settled the question to their own satisfaction, but we do not believe that, if the question of cutting down wages had been put to a vote of all the manufacturers of New England, it could have been carried. It is not a question of competition with another maker, necessitating a reduction in the cost of production; it is rather a case where a reduction in price would not stimulate sales, except, perhaps, to speculators. The present difficulties are admitted by all to be brought on by overproduction, hence the proper remedy should be applied, which is a reduction in the hours of labor until the present accumulation is worked off. There is not an operative that would object to this, for they realize the necessity of it in the present stagnation of business."

RETAILERS' CORNER.

The extreme cold and frosts which have prevailed in the central part of the State during the past week have not done much harm, except to check the growth of grass and make it harder for live stock. We hear from all parts of the State of cheerful views regarding all kinds of crops. We are indeed fortunate in this State, and when we read in the telegraphic reports of the Associated Press of the destruction of property and the sufferings of the people by storms and floods, in other States and countries, we are forced more strongly than ever to the conclusion that California is indeed a favored land.

General business continues dull, a few of our wholesale houses have had two or three good days' business during the past week, but buyers or jobbers orders are not coming forward very rapidly. When business for the spring season does open, it is expected that it will be more than brisk, and salesmen and clerks that have now hardly enough occupation to keep them employed, will have more work than they can conveniently get through in ordinary business hours.

Tea is still firm in the Atlantic market at the advance.

The reported shortness in the crop in Brazil, and consequently expected demand for Pacific coast Coffees is making prices firmer on this side and giving the market an upward tendency. The receipts so far, of new crop are chiefly of the better grades, while the demand for the moment is chiefly for the lower grades, which are temporarily scarce.

In Rice we notice a small lot of new mixed has arrived which has sold at handsome prices.

Refined Sugar in this market is reported to be in fair demand. In New York it is dull with a reduction of $\frac{1}{8}$ per pound in Granulated since our last. The sales of Hawaiian in both kegs and bags have been unusually large during the past week, especially so considering the prevailing dullness in the distributing trade.

In provisions we notice an advance in Bacon of $\frac{1}{2}$ a cent a pound and in Land of $\frac{3}{4}$ a cent a pound.

Cedar tubs are $2 to $2 $\frac{1}{2}$ higher.

For changes in produce, poultry, game and other agricultural products we refer our readers to our detailed report.

Competition, Legitimate and Excessive.

Competition has been declared to be "the life of trade," but an excess of competition is more often the death of it. Competition is legitimate and healthful when it busies itself with economical methods of doing business, with securing the best patterns, with reaching the most profitable markets, or with the employment of improved processes and machinery. But it becomes excessive and destructive when it disregards the cost of production and the necessity of leaving a decent margin for profit, and markets its products for whatever they can be made to bring. The result of this reckless sort of competition is to break down prices, and to inflict upon the market a demoralization from which it is slow to rally. One cause of this evil is the disposition among men to embark in enterprises for which they are not fitted either by experience or by the possession of adequate capital. There is an active demand for a certain kind of goods, and the manufacture of them is prospering accordingly, when straightway new factories spring up, run probably on borrowed capital, to compete for the market. These manufacturers, starting late, and handicapped by a heavy interest account, are in no condition to endure the hazards of trade. They have not the facilities for manufacture possessed by establishments which have been longer in the field, and they cannot make goods as cheaply; but they must sell them as cheaply, or more cheaply, if they are to sell them at all. As soon as the demand begins to slacken, the profits vanish, but the pressure of their interest account compels them to realize at some price, and the result is forced sales and a broken market. To the competition occasioned by these reckless and inconsiderate transactions, must be added, in many cases, another form of competition, distinctly dishonest, which springs from manufacturers or merchants who do not pay their debts. A man who does business on his creditors' money, with the expectation of paying twenty cents on the dollar, can very easily undersell a man whose practice it is to pay one hundred cents on the dollar.

It is easier to denounce the evils occasioned by dishonest or reckless competition, than it is to find a remedy for them. But they are serious enough to demand considerable from, and they must be taken into the account in any thoughtful and adequate survey of the business situation. Competition of the legitimate kind is sharp and severe enough, and when competition of the other kind to any large amount is added, the condition of things becomes much worse.—*New England Grocer.*

Yield of Italian Vines.

In the Italian Giornale Vinicolo comparisons are published between the product of vines planted in rows of 3 to 4 metres distance with no admixture of other plants, and of vines planted at 6 to 8 metres distance and with beans, corn, clover and other plants cultivated in between rows.

The yield of the clean vineyard is always much higher than that of mixed cultivation, and the grapes of the former are of infinitely higher quality than those of mixed vineyards. The quantity harvested in the latter does at an average not pass 25 hectolitres of wine per hectar, while 62 hectolitres seems to be the average yield of ordinary vineyards with the vines planted at from 3 to 4 metres distant rows.

From the hectar of vines growing, creeper-like on trees, Professor Ottavi found in the vintage of 1881 an average of 55 hectolitres of wine yielded.

Barbera vines yielded	114	hectolitres
Lhavina di Valenza	100	"
Alicante vines	108	"
San Giovese	95	"
Pinot Bianco vines	80	"
Fresia vines	77	"
Bonarda vines	80	"
Old Black Melevasia	75	"

Wine per hectar—

For quality the advice is given not to grow vines on trees—trellis shape.

A Move to Preserve Our Forests.

Senator Sherman has introduced a bill providing for the withdrawal of timbered lands, which are the property of the nation, adjacent to the sources of navigable rivers and their affluents. This is the first practical step toward the preservation of the forests, and their influence upon the rainfall and fertility of the country which has been taken in national legislature since the beginning of the agitation of the question, and is timely. The destruction of the country of its forests has already proceeded so far that its disastrous effects are visible in the climate and in the aggravation of floods and droughts, and the process is going on in continually multiplying ratio. We need not look abroad to countries that have suffered in the same way by the destruction of their trees, but can see in the desert plateaus of our own country what barrenness and other climatic disadvantages accompany the absence of forests. It is exceedingly difficult to regulate the authority and management of private property so as to prevent the destruction of trees, although it is done in France and may be ultimately necessary here, if wiser habits do not prevail. But the nation can reserve its timber lands, can rule the flow of streams, and show an example of systematized and regular cutting to correspond with the growth, how to utilize and yet preserve the necessary forest growth. As it is now, there is not the slightest attempt for the possible reward of forests, and the reckless unintelligent and wholesale annihilation of large tracts of land and barrenness threatens to follow waste, even where it has not actually done so. The Government should exert the example of wise and conservative forethought in the hope that it may influence individual action.—*N. Y. Shipping List.*

Freights and Charters.

In the freight market there has been a little improvement, as prices for wheat to Cork f. o. k. for orders and thence to Continental ports have advanced 2s 6d, and for options 5s. Wheat charters have been made at these prices. There is still indisposition, however, among shippers to engage ships, and orders have been received to cancel previously made contracts.

The engagements for the past week have been: Ships Yorkshire, 1,055 tons, wheat to Cork, for orders to Liverpool, Havre or Antwerp, 27s 6d. Liverpool, Havre or Antwerp direct 25s 6d. French bark Antoinette, 870 tons, Tacoma to Queenstown for orders, 30s; ship Jane Harris, 1,124 tons, wheat to Cork f. o. k., Havre or Antwerp 30s. Hawaiian bark Augusta, 676 tons, merchandise to Apia, Ship E. F. Sanford, 1,857 tons, wheat to Liverpool or Havre, 25s; ship State of Maine, 1,459 tons, wheat to Cork f. o. k., Havre or Antwerp, 30s. British bark Inchanga, 1,140 tons, wheat to Cork f. o. k., 25s. British bark Edgar Flint, 1,164 tons, lumber from Puget Sound to Sydney, £7.

Trade Failures.

There were 3355 failures in the United States reported to *Bradstreet's* during the week ending Feb. 2nd, 58 more than the preceding week, 59 more than the corresponding week of 1883, and 174 more than the large week of 1882. The largest previous report was 3181 during the week ending January 12, 1884. About 87 per cent were those of small traders whose capital was less than $5000. Compared with the previous week the middle States had 50, in increase; New England States 98, a decrease; Southern States 147, south Pacific 66, a decrease of 29; western states 125, an increase of 28. Pacific States and territories 19, an increase of 22. Canada and the Provinces had 30, a decrease of 1. Among those reported unharassed were Perrine & Co., wholesale woolens, New York city, and Henry W. Peabody, dry goods, Bath, N. Y., Daniel C. Beatty, organ manufacturer, Washington, N. J., Cleveland Rolling Mill Co., Cleveland, and N. W. Taylor, wholesale paper, Chicago. J. F. Warren & Co., wholesale grocers, Cincinnati, Union Market National Bank, Cincinnati, Mercantile Association, Mechanics and Traders' Bank, Louisville, and the American Lumber Company, Toronto. In the principal trades they were as follows, Boots and shoes 47, grocers 15, clothing and clothing 16, dry goods 16, hats, caps and furs 16, hardware and agricultural implements 16, liquors 14, manufacturers 14, grain, flour and millers 10, hotels and restaurants 8, machinery 8, tobacco and cigars 7, drugs 7, bakers and confectioners 6, carpenters and builders 6, lumber, etc. 6, jewelry 6, markets 6, men's furnishing goods 5, banks 5, carriages 5, coal 5, crockery 5, furniture 5, harness 5, plumbers 5.

THE WINE MARKET.

The only sale we hear of this week from first hands is that of some 1,500 gallons of '83, '84 brandy naked at Fresno, by a party by Mr. Robert Barton at $1 65 per gallon.

Meat Market.

Beef on Thursday firm and in light supply. Mutton is unchanged with fair stock. Considerable of poor quality is being offered at the moment. Pork is higher. Very few strictly good hogs are arriving. Following are rates for wholesale assortments from slaughterers to dealers.

BEEF. First quality, 9@9½; second quality, 8 to 8½; third quality, 7½@7¾ per lb.

VEAL. Large calves, dressed; small ones, 9c to 9½c.

MUTTON. Wethers are quotable at 7@7¼ and Ewes at 6@6½ c lb.

LAMB. Spring, 9@10c.

PORK. Live Hogs, 6¾@6¾c for hard grain hogs of 200 to 250 lbs; dressed do 9@9¾.

TOBACCO MARKETS.

SAN FRANCISCO. The market generally dull the Chinese cigar manufacturers being on a strike, Tennessee leaf in moderate demand, there is however a good inquiry for choice Connecticut Wrappers. Manufacturers of cigars report the market more than need be for the stocks have been forced on to it by packers near Sumatra and Pennsylvania being more plentiful, that is less demand for leaf tho, there is enough choice to supply demand.

Trade in manufactured tobacco is shaking in the depression which is temporarily affecting the grocery, provision and other branches in staples. This dullness, however does not seem to be the chief cause which prevails among, to a much greater extent as regards the prosperity of the trade.

Most of our gold coins are temporarily deserted by the Chinese. Their place is supplied for an advance, ranging from 50 cts to 1 dollar per M, is strongly resisted, though some manufacturers have conceded the increase in wages. The inconsistency of the Chinese is seen in that it is not a movement to equalize prices, but a rise on which never has been the rate in the past. While this movement is causing similar agitation in Portland, Oregon, where 8 cents per M and 1 dollar are now asked for the cheap, it is the man who was getting such as he will be asked to pay eleven, and the man who was paying eleven had been let alone, it would have seemed more just.

[U. S. Tobacco Journal.]

NEW YORK, Feb 2nd. Lively times reigned in our market this week. The buyers, manufacturers especially, have at last begun to see that the state of the market for the present is as tight as it possibly can, and that a total shutting out of such stock within a very short time is an absolute certainty. We pointed out the now prevailing situation many weeks ago, and urged our readers to act in accordance. A dull market became what few choice goods they could find. To-day the market is so stiff and holders have become so self-subsisted that sales of a quite a great extent are made from the stock. This may seem strong to have vanished from the market entirely, as 1882 Pennsylvania wrappers are now taking the lead. Fine running 1 to 1 on the bottom of wrapping 50 to 60 cases of wrappers, are quoted to-day at 22 to 24 cents. A good variety of fine binders can be, which sell at 15 to 17 cents. Very fine qualities 63 to 7 cents, 1000, respectfully. Such stock is found. But in stock of medium grades, running from 8 to 12 cents, there is a tight which no one has no end. Among these can be found very useful '82 Connecticut at prices of 15 to 20 cents. Under these circumstances, Sumatra is selling freely, at figures running from $1 10 to $1 70.

The sales of this week amounted to over 1,800 cases, besides a trifling to close out.

Havana. Had an active market. The sales run up to nearly 1,000 bales, at from 90 cents to $1.35. Of these goods Remedios sold the most freely.

[New York Tobacco Leaf.]

NEW YORK, Feb 1st. *Review Leaf.*—The business of the past week in this department is summed up in the record of month below given. All our monthly circulars are not out to-day.

Connecticut Leaf. There was nothing doing in Virginia last week. A fair lot of cuttings was sold at from 18 to 22½, and a few straight wrappers at from 45 to 55. Some inquiry for good export leaf was exhibited.

Seed Leaf. The demand for Seed leaf resulted in sales of 1000 cases.

Sumatra. Hvana fillers were taken to the extent of 400 bales at from 80c to $1 15.

Sumatra. From special advices from Holland, we are informed that the new crop of Sumatra, the first sale of which will take place on March 5th, will come during the latter part of March or the first of April next, although only coming inside line tobacco, is mostly brought in so that the wanting of early clear manufacturers in this country. As a result of this, the remainder of the old crop, being predominantly dark colored, is being bought for shipment to the United States. The supply of the dark tobaccos in the several markets of this country to-day is anything but large, and the demands that must shortly be made upon it, in view of the growing scarcity of fine Seed leaf wrappers, will soon place it in consumption.

Havana. The demand has been fair, but sales, have been restricted by the limit shown of manufacturers, who contend, at the present rates, that stock is dear, as their wants are necessarily restricted to many buyers. The exports were 941,150 pounds.

Sundries. We print to-day a list of tobaccos have been in good request.

Cigars. The cigar trade is in a good condition, as usual.

The Pacific Stallion, Cleveland, Ohio, says: "Our horses are coming through the winter in excellent condition. Among the visitors to our stables during the past week were Mr. C. V. Stuart, Mrs. Katie Garland Clapham Bush, Joseph Wilbur, Col. H. Drummond, Christian Weise, J. A. Shaw, I. P. Hamilton, John Bowen, ex-Congressman M. K. Luttrell, "Tommy" Nott, Bess Bros. the new tan yard of Isaac D. Tuck, Jas. Jacob Cook, Gatlin & Mc-Cathy and Judge Mc. Williams Hood. That he can't exercise about this district is not surprising, its attainments and prospects would excite old Heads than that of the editor of the *Pacific Stallion*.

An Important Enterprise.

It is well known that the petroleum deposits of the San Fernando mountains were known more than twenty-five years ago, but nothing successful or profitable was accomplished till a large capital was employed and enough land secured on which to carry on the great activity of the present company of Felton, Schofield, Tevis, Mc-Pherson and others.

All efforts before the advent of Messrs. Felton & Co. to success or in paying quantities were failures. No great capitalist or company would undertake to spend large sums on a small tract, and in that way raise the price of adjoining claims for the benefit of other owners. After securing sufficient oil-bearing territory, these gentlemen went actively to work and have made a great success of the business of producing and refining oil at Newhall. A similar plan is about to be adopted in developing the great oil territory east of this city in the Puente and Santa Ana hills north of Anaheim and about six miles from the line of the Southern Pacific Railroad.

The plan proposed is to put into a stock company of ample capital, about 1000 acres of oil bearing land, with wells, engine and machinery at a set valuation, taking pay for the property in stock of the proposed company. Additional stock will be issued to procure more engines and boring tools, tanks, pipes and castings, and pay for sinking more wells. Such a combination of capital is just what has been needed to open the vast stores of oil that lie in that great oil basin, and will double as prove a great success.

It is reported, and, we believe, admitted, that the prospects of the oil wells at Newhall made 82,000 mon last year. That is a very comfortable amount to earn in a year, and the prospect seems just as encouraging to get as much oil from the lands of the proposed company as from the Newhall wells. The wells that have been sunk in the proposed location for the operations of the company have all found oil, and the land and rocks are saturated with oil for several miles.

Owing to the mildness of the climate, operations can be conducted during all the year, and the oil is at the height of 600 feet above the railroad, so that it can be carried to the cars or to the ocean with no expense of hauling or lifting. No more favorable commercial opening seems before the people, and from the character of the gentlemen engaged in it, it is likely to become a great and prosperous company that will be a blessing to the State. The matter will soon take shape and name, and the good work be begun in earnest.—*Los Angeles Herald.*

A pair of knitted socks 2,000 years old have been discovered in an Egyptian tomb. They are loosely knit of fine sheep's wool, and the foot is finished in two parts to allow the sandal strap to pass between these.

A young man who sat upon a black piece of iron in a blacksmith shop and unceremoniously sprung seven feet in the air, with a wild shriek of despair, says he don't think much of hot springs as a health resort.

A Jersey man has asked for a divorce because a mustache is sprouting on his wife's lip. As a rule, it makes a man mad to have any mustache on his wife's lip but his own.

The Boy Was all Right.

A clothing dealer down on Jefferson Avenue was dancing around the door of his store in a great rage yesterday, when an acquaintance halted and asked him the cause of his excitement.

"Vhy, dot new poy of mine sells a man a hat for $1 dot vhas marked 12 shillings!"

"And you lose 50 cents?"

"Feefty cents! I discharge dot poy so queek his head doan' haf time to shwim!"

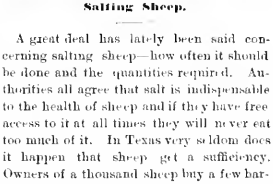
In the course of an hour the pedestrian was repassing the store, and seeing the man at the door with a smile on his face, he asked:

"Well, did you discharge the boy?"

"Dot poy vhas all right, sir! Vhen I comes to inquire into it I doan' let him go if I haf to pay him more wages. He makes a mistake on price, but when he gits back de change for a $10 bill he gets me rid of all my trade dollars und pieces mit holes in 'em!"—*Detroit Free Press.*

"When I die, my boy," said a rather festive Pittsburg father to his son, "I don't want any floral pillow with 'Father' or 'Rest' on it—simply the letters 'S. Y. L.' nothing more." "And what, dear father, are those letters to signify?" "They shall stand for the words, 'See You Later.'"

A young man of this town went home late the other night, and as he crep, into bed his feet encountered a warm flat-iron, placed there by a thoughtful mother. He is nursing a sore toe now. He says he thought some animal had crawled in there and he was going to kill it with the first kick, if he could.



Salting Sheep.

A great deal has lately been said concerning salting sheep—how often it should be done and the quantities required. Authorities all agree that salt is indispensable to the health of sheep and if they have free access to it at all times they will never eat too much of it. In Texas very seldom does it happen that sheep get a sufficiency. Owners of a thousand sheep buy a few barrels a year and give it when they think of it, because the sheep like it. The amount necessary to the good health of sheep is seldom taken into consideration. It will result in benefit to flockmasters if more attention is given to this important subject, if they will salt more often, see that the sheep get clean salt and see if they have enough of it. They will finally be surprised to see how much sheep will eat, how heartily they will feed afterwards, how much more readily they go to water, how strong they will become, how bright they will appear generally. What! may be said, is salt a cure for all diseases? No, it is not, but it is a certain prevention for some. It is a an appetizer, and of a kind it is feed. Without it sheep may live, with an insuffi-

ciency they may rub along, but with abundance they will eat heartily of the grasses and hay, that without it, lack taste and is neglected. Did you ever put up hay and salt it and notice how quickly it was consumed, how well stock did thrive on it? If you did and have had a stock of moulded, unsalted hay to waste on your hands, you will appreciate the difference. One is health giving, sustaining, sweet to the taste; the other a substitute, a filling, barely serving the purpose of feed. If sheep require salt, and require it as they certainly do, they require it every day. We cannot salt the grass as it is eaten, but we can do the next best, we can see that sheep have salt within reach at least once a day and allow nature to decide how much and how often they require it.—*Texas Wool Grower.*

THE WOOL MARKET.

A telegram from New York, received this week says: The great difficulty experienced in moving California comes from the fact of its having shrunk. It is understood here that all the light grades are selected at San Francisco for local scouring and the heavy wool is sent East. The stock here of both spring and fall is large.

There has been more activity in the market this week, chiefly in better classes of Oregon and Northern California, due to purchases by local buyers and for Eastern account. The stocks are cleaning up nicely, and if this activity should continue for a couple of weeks we shall see our warehouses bare and swept before the spring clip arrives.

We quote:

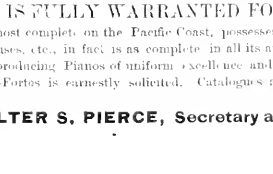
CALIFORNIA
Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1881

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Pianos-Fortes is earnestly solicited. Catalogues and full descriptive mailed on application.

WALTER S. PIERCE, Secretary and Agent.

VOL XI, NO. 20. SAN FRANCISCO, FEBRUARY 22, 1884. PRICE TEN CENTS.

A DEFENSE OF SAN DIEGO COUNTY.

The San Diegans Resent Commissioner Blowers' Slurs upon the Soil of their County

[From the San Diego Sun, February 13.]

The peculiar character of our red granitic soils, which are so little understood by people from other parts of the State who have never seen them, was beautifully illustrated on Saturday in several parts of the Cajon Valley. In many places plowing has been resumed, and the soil was turning over fine and mellow, twenty-four hours after the close of a two weeks' rain. Adobe and many other kinds of soils in other parts of the State could not be plowed safely after such a storm in less than ten days. Those who desire to understand why it is that these red granite soils resist drought and produce good crops with six inches of rain, can see in this peculiarity we have mentioned the reasons. The soil being porous, having very little clay, readily absorbs the rain that falls, and, being deep, retains the large body that may fall during wet seasons, as a reserve for periods of drought. These soils, when properly cultivated during the summer in vineyards and orchards, maintain a perfect state of tilth on the surface, avoiding by cultivation, the evaporation from the surface, and keeping up a capillary attraction—a constant flow of water, such as is found in the surface wells, towards the atmosphere.

In most counties of the State, large bodies of land where the soil is very rich dry out during the summer, notwithstanding there is a much larger rainfall than here. The reason of this is in the fact that between the soil on the surface and the water as procured in surface wells, there is generally found some form of hard pan, or subsoil, that resists this capillary attraction, and so prevents moisture from rising to the surface to take the place of the rainfall that has evaporated.

In this county our interior valleys, surrounded by granite hills, are deep pockets of a red, sandy loam, without any iron hard pan, or other obstacle which might prevent such flow of water towards the surface. In the Cajon Valley, for instance, as in other valleys of the county, the soil varies from ten to thirty feet deep, the subsoil is a little heavier, though richer, than the surface soil. This accounts for the fact that a small rainfall is sufficient to produce good crops. On the mesa land which surrounds the bay, and near the coast, there are many places where the surface soil is equal in quality to that of the interior valleys, but very often they are found underlaid with a hard pan or cemented gravel, which cuts off the supply of water from below. Such soils dry out quickly, and show very little growth of natural grasses, though in some cases there are instances of grape vines, whose roots have penetrated through the hard pan, and thereby protected themselves against drought. An instance of this latter kind can be seen at the vineyard of Mr. George Kimball, on the mesa, below San Diego.

These remarks will, no doubt, be instructive to many of the visitors who are among us, and, more particularly, to Mr. Blowers, of Yolo county, who has, for some unaccountable reason, taken occasion to doubt such facts as we have just stated and to assert that where there is not an average rainfall of fifteen inches, grape growing would be a failure without irrigation. Mr. Blowers should recollect that there is more country outside of his forty-acre vineyard than he appears to have dreamed of, and, if he would take the trouble to be accurate in his statements he might have said with justice that there are many soils in his own district where, by reason of an impervious hard pan, grapes could not be successfully cultivated without irrigation, notwithstanding the rainfall might be four times that of San Diego. Also, he should have lived long enough to have learned that alluvial soils, underlaid with coarse gravel, dry out much quicker than even the foothill lands of firmer character. Any statement naming any specific average rainfall as an amount necessary, or sufficient to maintain vines with out irrigation, is, therefore a statement of an thoroughly ignorant of the varying conditions of agriculture in this State. Mr. Blowers, although he has attained an undeserved reputation for ability and experience as a viticulturist, on very small capital, should not be permitted to pass unscathed when, to gratify his personal advantage, he undertakes to make false comparisons between different parts of the State. We can inform him that there are hundreds of acres of vines growing in this county, planted by cuttings, without irrigation, in our red granitic soils during the last two dry seasons, and that the experience of our planters is in favor of a cutting planted perpendicularly, not more than twelve inches deep. With such planting, during the last extremely dry season, in land newly planted, with water twenty feet below the surface, in an open valley of fifty thousand acres in extent, not receiving any apparent sub-drainage from surrounding hills, the stands of vines resulting from such planting have exhibited as large a percentage of growth as is shown in the average of the new vineyards of Napa, Sonoma and other county counties. Compare this fact with Mr. Blowers' own experience and advice in regard to the length of cuttings to be planted on sandy alluvial soils, such as he advocates for raisin vineyards and such as he cultivates himself. He has continually, for years past, stated that cuttings cannot be practically propagated on such land as his own, unless they are made from thirty to thirty-six inches in length, for the purpose of maintaining in such cuttings moisture sufficient to keep them alive while they are forming their roots. On land such as his, which requires a cutting to be made thirty-six inches in length, it may be that a rainfall less than fifteen inches would not be sufficient for successful viticulture. We shall still further call attention to the fact that Mr. Blowers now advocates the planting of rooted vines, rather than cuttings, while at the same time the planters in this county prefer cuttings to rooted vines. The proof of the pudding, however, is in the eating of it. Ever since Muscat grapes have been cultivated in this county, on such lands as Mr. Blowers foolishly calls arid, the products, small though they are in the aggregate, have invariably been successful, and at no time has Mr. Blowers produced anything in the shape of a raisin equal to the average products that our most experienced have shown. We challenge Mr. Blowers to an exhibition of products at any time that he may think best. This we believe to be the only possible way of silencing his wanton statements. It is however, a strange thing that a man whose vineyard contains only a few acres of raisin grapes, mixed with other varieties for table use, and whose raisin products have been enormously far below in quality those of San Diego, Riverside, Los Angeles, Fresno, El Dorado and other places, should arrogate to himself the authority to throw aside the practical judgment of men far more competent, in northern counties and also of a gentleman such as Dr. Joseph Jarvis, of Riverside, who has for many years of successful raisin grapes and makes much finer products than Mr. Blowers, and who also has invested a fortune in our San Diego grape land, after having fully satisfied himself by careful observation that his investments would prove successful.

Mr. Blowers, we know, is interested in selling a large tract of land in Yolo county, and has also been negotiating for a large tract in Shasta county. We hope, for the sake of the two counties that he may succeed, and we sincerely believe that these districts deserve a better champion.

It is, however, the first disgrace that has fallen upon the State Viticultural Commission that Mr. Blowers, who represents the great Sacramento district, should attempt, in his official capacity, to advance his own personal interests by wanton attacks, false commercial reports by another district, which, he imagines, may be in some way his competitor. We hope it may never be said of this district that any representative of ours shall attempt to champion our cause by publishing false statements regarding other portions of the State.

Agriculture and the Protective System.

Mr. William Walter Phelps, of New Jersey, delivered an address before the Board of Agriculture of that State a few days ago which is of interest as containing a presentation of the claims of the protective system on the American agriculturist. Heretofore, we need scarcely say, the view has been held that the farming interest of the country has been very little indebted to protection and that in fact there is a necessary conflict between the principle of protection and the interests of the farmers of the United States. Mr. Phelps, however, essays to show that this view is a mistaken one, and that the agricultural interest has derived important advantages from the protective system. The [illegible] this system has [illegible] branch of agriculture [illegible] the product of the [illegible] agricultural and [illegible] and this Mr. Phelps [illegible] that gain for the [illegible] his view he addu[illegible] the value of the land in [illegible] rises in proportion [illegible] agricultural work [illegible] duced crops. [illegible] argument to the [illegible] farmers as a class, [illegible] considerations of [illegible]

Mr. Phelps went on to [illegible] the beginning at [illegible] maintenance may be [illegible] than raised at [illegible] foreign manufacture [illegible] cotton and wool are [illegible] not take the eggs, the [illegible] ble, the hay or the [illegible] to build schools and [illegible] the taxes." He [illegible] work to cheapen the [illegible] in the manufacture [illegible] price of the [illegible] low, those of the [illegible] point Mr. Phelps [illegible] the United States [illegible] ago," when 90 per [illegible] as against less than [illegible] But it is not alone [illegible] ers be entitled by [illegible] Mr. Phelps gravely [illegible] partiality of the [illegible] agricultural interests [illegible] tection of the American [illegible] duty of 20 cents per [illegible] through a variety of [illegible] products. From this [illegible] that the advocates of protection [illegible] and the soil to find [illegible] tion of the two [illegible] been and still are [illegible] sions to the agricultural [illegible] principle.

Mr. Phelps concluded [illegible] an examination of the [illegible] of the home and foreign markets for American farm [illegible] home market we [illegible] per cent. of our whole [illegible] home markets the [illegible] able products [illegible] market is that [illegible] where, and that [illegible] the foreign market [illegible] less even than [illegible] same time, [illegible] stony foreign [illegible] the nut resists [illegible] ers are need [illegible] surplus in [illegible] our total [illegible] does not stand [illegible] and [illegible] number that [illegible] sheets.

RAISINS.

Mr. W. B. West, of Stockton, showed us, this week, a letter from Malaga, dated January 26th. The writer is the largest exporter of raisins to the United States. He says the Malaga crop has not been much diminished by the phylloxera, though there has been a good deal of talk and considerable anxiety for the future. The crop of "Layers" for 1883 was 1,850,000 to 1,900,000 boxes, of 22 lbs each; the average of the past few years has been 2,000,000 boxes. The Denia raisins, better known in the United States as "Valencia," yielded a crop in 1883 of 2,800,000 boxes, of 28 lbs each. These latter raisins, Mr. West says, are partially cured by dipping in lye, and are of a quality that our second-class raisins can easily be brought to compete with. Mr. West's Malaga correspondent says that the United States takes, annually, about 1,000,000 to 1,125,000 boxes each of Malaga and Denia raisins. Assuming our present California production to be 100,000 to 120,000 boxes, and the imports of the United States from these two places at 2,000,000 to 2,500,000 boxes, it will be seen that we produce only one box in twenty to twenty-five of what is now easily consumed in the country. This shows how wide a field there is here for raisin culture, if the political lawyers in Congress can be restrained from meddling with what they do not understand and sacrificing the material prosperity of the country to their worn out party doctrines. The choice of our raisins, Mr. West says, will fairly compete with the London Layers of Malaga, though it may be some years before we produce many of those choicer grades which go to England for consumption at the tables of the rich. Mr. West gave us another point: In Malaga, they never irrigate raisin vines, though they use irrigation in cultivating the orange and the lemon.

Before you plant a vineyard, determine in your own mind whether you want to sell table fruit, make raisins or wine. If the latter, come to some conclusion as to what kind and quality of wine you want to make.

No journal in this State is more closely read or more valued by its subscribers than the MERCHANT.

SAN DIEGO RAISINS.

Another Critic on Commissioner Blowers.

[From the San Diego Union, Feb. 14th.]

It has been a source of chagrin to all true friends of the State Viticultural Commission that it has done so little to advance the raisin interests of the State. In the first annual Report of the Commissioners, published in 1881, Mr. Blowers, who appears to have been until lately recognized by the Board as the sole person authorized to discuss raisin making, devoted two printed pages to the entire subject matter and the interest of the vast Sacramento Valley which he represents in the Commission. It it had not been for the instructive address on raisin making in Spain prepared by Mr. Wm. West, of Stockton, and appended to Mr. Blowers' report, there would have been nothing worthy of the State's funds published that year on this subject. To Wm. West the State is indebted for some most valuable information, which should have received greater attention. The next year Mr. Blowers strings together a lot of unimportant details and leaves out of consideration the most interesting developments not only of the State, but of his own district. At the Los Angeles Convention last Summer, notwithstanding the Board was otherwise well represented, he failed to appear, and had it not been for Dr. Conger, of Pasadena, and William McPherson, of Orange, the raisin interest would again have gone by default. At the second annual State Convention held later in San Francisco, we were again surprised to find that the day devoted to raisin and table grapes, the supervision of which had been assumed by Mr. Blowers, proved a dismal failure; on account of his neglect to prepare for the occasion. Since then it seems that the Chief Executive Officer of the Board, Mr. Wetmore, whose duty it is to visit all parts of the State and to assist everywhere that he can in the development of viticulture and to report on all branches of the work, has given mortal offense to Mr. Blowers by presuming to discuss the proper methods of cultivating and curing the raisin grape. Mr. Wetmore has at last opened a true discussion of principles interesting to all sections of the State, but in some instances he has expressed views that do not agree with Mr. Blowers. He has, as one instance of his unpardonable audacity, shown a clear distinction between a raisin and a dried grape: Mr. Blowers feels offended, because he dries his grapes by artificial heat, not being able to cure them in the sun. Mr. Wetmore says that in many cases in the State there is no difference between the so-called "Muscatel Gordo Blanco" and the commonly known Muscat of Alexandria, the names having been used without true applications. Mr. Blowers has been making a few thousand dollars annually by selling a "Gordo Blanco" cuttings to growers, who imagined that they were getting something superior to the Muscats of their neighbors. The explanations made by Mr. Wetmore seem to have hurt Mr. Blowers, where he is most sensitive, viz: in the region of his pocket. These and other similar sins of the Chief Executive Officer have brought down on him a peculiar attack from Mr. Blowers, who imagines that the true way to hurt an opponent is to strike at his pocket. For the first time this year there is really something new in one of the reports of the Commissioner for the great Sacramento district, and that consists in an attack on San Diego. The vine growers of that district must be proud of their valiant representative; it must make them smile with joy to find out that there is four times as much rainfall in Shasta as there is in San Diego, and similar instructions on grape growing.

Is it not time, however, that some more competent man should champion the raisin industry in the State Board? Mr. Blowers may be summed up as follows: He owns about forty acres of bearing vines in Yolo county, a large part of which are table and shipping varieties; he cannot always cure his grapes by sun drying, because his methods prevent perfect maturity of the fruit,—therefore he dries them artificially; he has a big pump, a big dryer, gets big grapes and a big head; he makes dried grapes that do not compare in the market with the or-

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:—FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schoffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGOS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " $5.00 " "
18 to 20 " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

San Francisco, Cal.

P. O. Address
111 Leidesdorff St, S. F

dinary crops of Fresno, San Bernardino, Los Angeles and San Diego; he has undertaken to boom a sale of a large tract of land in Yolo county, and has been stretching his arms out also to take in a slice of cheap lands in Shasta county. His "big head," however, contains so small a brain that he seems to imagine he can silence inquiry about the true principles of raisin culture and catch some of the people, who may desire to come to San Diego, for his Yolo and Shasta speculations by attacking this county, and especially the enterprises that Mr. Wetmore is engaged in. These attacks have been wholly unprovoked, and it is time that the long felt indignation of the raisin growers at the course that Mr. Blowers has been pursuing should receive some expression. It is something almost beyond endurance that the State funds should be used to print the oracular opinions of an "expert" who advocates curing raisins by artificial heat and whose experience is limited to a few acres of vines, a pump, an artificial dryer (the patent of which he claims the right to sell) and a poor reputation for his products among first-class grocers, against a county in which the fortunes of men, vastly more successful and important in the industry, are being freely invested with perfect confidence.

The proper way to settle Mr. Blowers' conceit is to hold a raisin growers' convention. San Diego will not, young as she is in this business, shrink from competition with Mr. Blowers, his big pump and his big dryer. The Chief Executive Officer is here now and has been made to bear the brunt of an insolent attack; why does he not arrange for holding a convention?

Vine and Wine Notes.

In a late number of the *Bulletin* we read an editorial on the appendices to the report of Mr. Wetmore, in which the translation from well known French authorities is belittled. Verily "the voice is Jacob's voice, but the hands are the hands of Esau." It is a fashion in this State to maintain that we have knowledge enough amongst ourselves; and sad to say opinion is against our learning anything from nations that have devoted hundreds of years to the study of the vine and the improvement of wine. It is to be hoped our younger people will be wiser in their generation and learn where ere they can.—*Pacific Sentinel.*

Mr. Krug, of St. Helena, has sold over 100,000 gallons of his wine to the new St. Helena Wine Company, and we hear that the Company has commenced operations in his cellar, which is rented to said Company at a moderate rental. All vineyard men wish this enterprise success.—*Idem.*

We hear the opinion advanced (and it contains more prose than poetry) that it is unwise to build a wine cellar adjoining a regularly travelled railroad, for the reason that the passage of trains causes a vibration which disturbs the wines. Think of this before selecting a site for your cellar.—*Idem.*

From Glen Ellen we hear that the largest extent of vineyard to be planted this year is on the de Turk and the Gauthri-Maguerney places. On other vineyards much attention will be paid to grafting Missions, and generally improving the stock.—*Idem.*

A friend informs us that when pruning a few days ago, he found among the dead leaves at the base of the vines numerous very lively members of the thrip family; so the recent hard frosts do not seem to have been fatal to this "never dying" insect.—*Idem.*

The Phylloxera in Malaga.

The *Wine and Fruit Grower*, New York, says: "In a consular report just published it is stated that the prevalence of phylloxera in the province of Malaga has assumed serious proportions; it would appear that, with the exception of the district of La Vega, or plain of Malaga, which has to some extent, thus far escaped, nearly every vineyard in the province is now more or ess affected by this disease of the grape vines, and it is believed that the local vines will, in most cases, have to be replaced by those from America, which are considered to be proof against the attacks of phylloxera. Two kinds of vines have hitherto been cultivated in this province, namely the Muscat and the Pedro Jimenez—the first reported to be indigenous, and the second said to be imported from the borders of the Rhine, 250 years ago. A minute study of this question was this year made by the members of a commission appointed for the purpose, and a careful report on the subject, drawn up by Señor Orueta, transmitted to Her Majesty's Government from the Consulate, was laid before Sir Joseph Hooker, who confirmed the opinion which had been formed as to the efficacy of the American vine. Sir Joseph Hooker stated that the experience of the South of France has shown that the vine industry may be eventually restored by the cultivation of American vines, and that these are preferably used as stocks for grafting the local vines rather than as direct producers, but he adds that before the transmission to the new conditions of cultivation can be effected, there will be necessarily much local distress and disturbance of trade. A piece of ground has lately been purchased by the local government as a nursery for the growth of American vines for future distribution in the province."

Irrigating Grape Vines.

The Pomona *Courier* seems rather to lean towards Mr. Wetmore's views than Mr. Blowers' on the vexed question of irrigating for grapes. From what we have seen of Pomona, we would have said it was one of those places where nothing could be done without water, but that is just where we, like Mr. Blowers and other casual observers from middle counties, would have been wrong. The *Courier* says:

"It is a well established fact that grapes do well in this valley without irrigation. We have often been told, too, that many larger fruits, apples, peaches, apricots, etc., can be cultivated with good results. There are a few individuals among the old settlers who laugh at the idea, but we have, nevertheless, in the valley a number of orchards which attest the truth of the statement. About four miles northeast of Pomona, on the place of Charles French, is a small apple orchard set out three years ago, which has never had even a bucket of water to start. Of the lot Mr. French lost one tree, which was killed by gophers; the balance are as healthy and thrifty a lot as one would wish to see. They are of good size and bearing. Mr. French also has ten acres of vineyard. Some of the vines were destroyed by the rabbits before the vineyard was fenced, but those that escaped show good growth and appear to be in a healthy condition. Mr. French has 160 acres, nearly half of which is under cultivation, and no water is used on the place for irrigating purposes."

Golden Rules.

Mayor Edson, of New York, has given the New York *Tribune* some account of his life and the methods by which he made his large fortune. He says, "I might have been much richer or much poorer if I had gone outside of what might be called the legitimate but slow way of making money." He attributes his success to his good parents, who taught him the precepts of "honesty, sobriety and integrity." The rules he laid down for his own guidance, in the early days of his business career, were:

"1. Close attention to details. And this means sometimes working nights and during hours usually devoted to recreation.

"2. Keeping out of debt. Regulating expenses so as to keep within your income, and at all times to know just where you are financially.

"3. The strictest integrity. It is rare that a dishonest man succeeds. He does sometimes, but not often.

"4. Being temperate in habits.

"5. Never getting into a lawsuit. Business ought to be conducted in such a way that there will be no need of lawsuits, and it is better, often, to suffer a little wrong than go into court about it."

GRAPE CUTTINGS.

Mataro, Charbono, Black Burgundy, Sauvignon Verte, Franken Riesling, and other leading varieties; also

ROOTED ZINFANDELS

Apply early to

H. W. CRABB,
OAKVILLE, Napa Co., Cal.

SAN GABRIEL
Los Angeles Co., Cal.

This Company now offers to the market a large stock of wines and brandy of its own manufacture. Correspondence solicited. Address:

San Gabriel Wine Co.,
San Gabriel, Cal.

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Crazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent land of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nuclei us of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper country of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

For further particulars apply to

NANAIMO—Per Br. str Wellington, Feb 17—2275 tons coal.

BALTIMORE—Per ship Wm. H. Macy, Feb 16—3102 tons coal

Trade Failures.

There were 257 failures in the United States reported to *Bradstreet's* during the week ending Feb. 16th, 108 less than the preceding week, 1 more than the corresponding week of 1883, and 98 more than the same week of 1882. The failures generally were not important, and about 83 per cent were those of small traders whose capital was less than $5,000. Compared with the previous week the middle states had 53, a decrease of 17; New England states 33, a decrease of 25; southern states 58, a decrease of 5; western states 80, a decrease of 53, and in the territories 23, a decrease of 26. Canada had 33, a decrease of 4. In the principal trades they were as follows: General stores 68; general clothing 15; liquors 13; hardware 12; shoes 12; dry goods 10; drugs 8, furniture 8, tobacco and cigars 7; fancy goods 5; grain and flour 5; jewelry 5, books, stationery, etc. 5; produce, provisions, etc. 5; hotels and restaurants 4; harness 4; manufacturers 4; bakers and confectioners 3, coal 3; hats 3; men's furnishing goods 3.

Spirit of the New York Markets.

The storms and floods of the past ten days have interrupted and deranged the domestic trade of the country, but though business men a e a little discouraged they are very far from being dismayed. There has been very little change in the prices of staple articles and the failures have been fewer and of less importance. The effort that has been made in nearly all manufactures to adopt the output to the demand is meeting with good results, but there is, as yet, not sufficient demand to impart a decided increase of strength to the markets. There is a strong probability that the start of Spring will very decidedly change the condition of business. Consumption is not far from the usual average, stocks of goods in the distributive centres are believed to be moderate, and settled weather and the resumption of navigation will compel a large increase in the expenditure of money, while the vast amount of capital lying idle will seek investment at low rates where there is a tolerable certainty of safety. A gradual adjustment of indebtedness which has been going on so long has brought values to a safe basis, and when it is pretty definitely determined what will be done by the pres nt session of Congress in relation to the tariff and the currency, the country will be likely to adapt itself to the circumstances and put forth its energies anew, in a revival of trade with then become a reasonable certainty. There has been an advance in Gram and Hog products, which, with no corresponding improvement abroad has checked the export trade. Spot Cotton is dull and nominal, and prices per lb. firm. Woolls is rather better demand, with a slight ly improved tone to the market. Butter is dull, and prices favor buyers. Cheese is steady. Eggs have advanced. Beans are dull, and prices are barely steady. Refined Petroleum is inactive but firm, while Crude Certificates are easier. Tobacco is inactive but steady. India Rubber is the turn cheaper. Hides are a little more active and steady, while Leather is dull, and prices are irregular. Hops are firm. Raw Sugar is quiet and steady. Refined is easier and dull. Molasses is quiet and nominal. Tea is fairly active and strongly held. Rice is in moderate jobbing request. Spices are quiet. Tin iron is quiet and steady. Tin is barely steady. Lead is higher. Copper is dull. Other Metals are unchanged. Drugs and Dyes are moderately active in a jobbing way and prices generally are steady. Valencia Raisins are a trifle cheaper, as are Currants and Turkish Prunes. Ocean freights continue dull and weak.—*Shipping List.*

Meat Market.

All kinds of good meats are scarce, consequently we note a rise in our quotations. Beef is very scarce.

BEEF—First quality, 9½@10½c; second quality, 8½ to 9c; third quality, 8c@8½c.

VEAL—Large Calves, 8c@8½c; small ones, 9c to 10½c ₱ lb.

MUTTON—Wethers are quotable at 7@7½, and Ewes at 6@7c ₱ lb.

LAMB—Quotable at 7@8c ₱ lb; spring do. 13@15c per lb.

PORK—Live Hogs, 6½c for hard grain hogs on foot; dressed do 10@10½c ₱ lb.

PRODUCE MARKET.

The Imports and Exports given below are compiled from last Thursday morning to Wednesday evening of the current week.

Since our last there have been very liberal rainfalls throughout the State, and in some of the southern counties disastrous floods have occurred, particularly in the immediate vicinity of Los Angeles has the unprecedented fall of water caused serious loss, many costly bridges, buildings and sections of the railroad having been entire'y carried away by the rush of waters from overflowing streams. Though the present loss is great in the locality noted, the result to the farmer will be that his crops will be far greater than ever before, and the tiller of the soil rejoices while the residents of Los Angeles and owners of railroads mourn the losses.

It would now seem that the California crop for 1884 will be by far greater than any previously harvested. The fruit crop gives promise of excessive yield, and the outlook was never more in favor of the husbandman.

FLOUR—
Receipts of week, 110,716 qr sks.
Imports, 5379 sks, Exports 20127 bbls
The export demand continues active, and though prices for the raw material have materially declined prices for Flour are not quoted lower.
Extra $5 50@5 75. Superfine, $4 00@4 75. Country Outs, $4 50@4 50. Interior Extra $5 00@5 50 per bbl for jobbing parcels to local consumers.

WHEAT—
Imports, 5253 sks. Exports 71685 ctls.
Receipts for the week, 141,631 ctls.
The almost positive assurance of excessive crops as the result of the coming harvest, and no favorable outlook in foreign consumptive markets, causes a very depressed feeling here and results in sellers being far more numerous than buyers. The consequence is that prices shade off daily, and buyers are very shy in their bidding.
In the sample market $1 60 is a top figure for No 1 White, and No. 2 can not be quoted above $1 57½ and for extra choice milling $1 67½ is an outside figure. On Call yesterday No. 1 White was sold for $1 60¾, buyer season, and $1 52 seller 1884, with more sellers than buyers.

BARLEY—
Exports, 425 ctls.
Receipts of week, 22514 ctls.
It is now assumed that the harvest of 1884 will show a greater yield than in any previous year, and with liberal stocks on hand, and no important export demand, dealers are in no quandary as to what to do. The daily sessions of the Call Board show important fluctuations, but the general tendency, from session to session, is towards a lower figure. Those who shorted the market some time since are reaping liberal rewards for their investments, while parties who are long on the market put up from day to day the additional "mud," punctually meeting their obligations, but, from all indications have no favorable outlook in the near future. Many who have filled their outstanding contracts are now bears instead of bulls, but a large number are evidently waiting a possible reaction in their favor.
By sample spot lots of No. 1 Feed can be obtained for 90c; No 1 brewing, $1@1 05; choice may therefore $1 25@1 30 normal. On Call yesterday No 1 feed closed at 94½c, buyer season and 87c seller season.

OATS—
Exports, 324 ctls.
Receipts of week, 5671 ctls.
More liberal arrivals, including an occasional consignment from Nebraska, together with the lessened figures for which other descriptions of feed can be obtained, cause a weaker feeling on the part of holders of oats.
Market steady. Black, $1 45@1 50. White, $1 50@1 55 for ordinary; $1 62½@1 70 for No 1; $1 50 for to good and $1 75@1 80 per ctl., for choice to extra choice.

CORN—
Exports, 129 ctls,
Receipts of week, 4740 sks.
Continued light receipts result in a better feeling in the market.
We quote; Nebraska, $1 45@$1 47½; California $1 45@1 50 for white, and $1 60@1 65 per ctl for yellow.

RYE—
Receipts of the week, 2208 sks.
Quotations are entirely nominal, at $1 20@1 30 per ctl

BUCKWHEAT—
Receipts of the week, 28 ctls.
Quotations are nominal at $3¼@3½ per ctl.

MILLSTUFFS—
Exports, 19749 ctls Bran, 572 ctls Millstuffs.
Receipts of week, 2230 sks bran, 4301 sks middlings, 1181 ctls Ground Barley, 74 ctls Ground Feed.
The British ship Lord Downshire, for Belfast, carries nearly 1,000 tons of Bran, taken on board at the Starr Mills, Vallejo, the largest quantity ever exported from this port on a single vessel. It is expected that further considerable shipments will be made in the same direction
We quote. Ground Barley, $21 00@22 00 per ton, Middlings are selling at $18@22 00 per ton Wheat Bran, $17 00@17 50 per ton; Oil Cake Meal, $30, old process, and $26 50 new process; Feed Corn Meal, $34@35, Cracked Corn, $36 per ton, Rye Flour, $6 per bbl; Rye Meal, $5 50 per bbl, Buckwheat Flour, 5c per lb; Feed Barley, 1½@2c per lb, Eastern Oat Meal, $9 75 per bbl; Cracked Wheat, 4c per lb.

HAY—
Exports, 43 tons.
Receipts of the week, 711 tons.
The rains have been the cause of light shipments, so receipts are unimportant; but quotable figures are about the same.
We quote: Alfalfa, $7@10; Wheat, $13 00@14 50; Stable, $12 00@14 00; Wild Oat, $13 00@14 25; Cow. $10@12; Barley, $10 00@12 00 per ton.

STRAW—
Receipts of week, 27 bls.
Quotable at 50@60c per bale—as to condition.

SEEDS—
Imports, 1570 bags. Exports, 7 bags.
Receipts of week, 1104 sks Alfalfa, 9 sks flax, 202 sks mustard.
Flax quotable at $2 50@2 75 ₱ ctl. Canary, 5c@5½c. Alfalfa, 8@9c. Hemp, 4½@5c. Timothy, 7@7½c for native and 8@8½c for imported; Mustard, choice Brown, $3 00@3 25 ₱ ctl; White, $2 75@3 00, Hemp, 4c, Rape, 2½@3c.

BEANS—
Exports, 173 ctls
Receipts of the week, 21820 bags.
Colored are still attracting most attention Bayos in particular, of which large lots are coming in daily. There is no doubt but that variety is scarce and there is and a live demand for them for export. Although there is not the same demand for Pinks, nor are they scarce, speculators pick up every sack in sight at much higher figures. There have been no Reds offered; the few left in dealers' hands are being jobbed at 5c. Several lots of Whites have been offered on Change for the past week; no one seems to want them. In view of the lack of any export demand, holders are getting anxious, and, to have any appreciable effect on prices, the anticipated demand must be heavy, as a great many will have to be moved to make much of a hole in our large stocks. Limas are not sought after as they were a week ago, the few orders that are coming being filled.
Our quotations are, for round lots from the wharf Small White and Pea, $3 05, Bayos, $4 85; Pinks, $4 60, Reds, 5c, Butters, $3 65, Limas, $3 15.

FRUITS—
Imports, 3355 bdls Bananas, 1 cs Oranges. Exports 832 lbs fruit, 280 lbs Apples.
We quote: Domestic Apples, $1 25@3 00 ₱ box; Pears, $2@2 50 per box; Wisconsin Cranberries, $8 00@9 00 ₱ bbl; Western do, $17 00@17 75 ₱ bbl.
Tropical Lemons, $5 00@6 00 per box for Sicily; Limes, $12 a 15 per box for Mexican, Tamarinds, 12@13c per lb; Bananas, $1 75@$4 00 per bunch; Oranges, California, $3@3 50, Choice Riverside, $4@4 50, Choice Navel, $4 50@5 50 per box.

HONEY—
Exports, 158 ctls.
We quote: Extracted, 8½@; Extra White Comb 18@20c, White, 15@16c; Dark, 8@10c.

DAIRY PRODUCE—
No change in quotations, market weak; a dec ine is to be very soon expected.
We quote: Point Reyes, 37½c; Choice, 32½@35, Fair to Good, 27½@30, inferior lots from country stores, 17@20c; firkin, 20@21c for old and 21@22½ for new; Eastern, 15@17c; Pickled Roll, out of market; Choice California, 16@18c for choice 11@12½ for Fair to Good; Gilroy, in drums, 16@18c, Eastern, 17@18c, Western, 10@15c.

EGGS—
Eggs have been sold at 34@35c for the past two days, now 32½c Will, with good weather, be cheaper very soon
We quote California Eggs, Choice Ranch, 32½c per doz; California hined, 22½c.

POTATOES—
Exports, 1665 ctls.
Receipts of the week, 19617 sks.
The receipts from Humboldt per last steamer were noticeable from their poor quality. They sold at all kinds of prices.
Sea Reds—no matter from what section they come—sell readily. This season is peculiar in that respect. It used to be when a buyer wanted some good potatoes, prices no object, he must have Cuffy's or Humboldts. The majority received from that section and from Humboldt (the hitherto next best) have been so poor this season, that the prejudice has died out and now good Reds are good Reds without consideration as to where they come from. River Reds are scarce and higher.
Early Rose sell readily at improved prices; a great many are wanted just now.
We quote: Early Rose, 80c; River Reds, 45c; Tomales and Petaluma, 75c; Cuffy's Cove, 80c; Humboldts, 80c; Sweets, $2@2 25.

ONIONS—
Exports, 372 ctls
Receipts of the week, 1937 sks
The demand is very slow Very light receipts fill all orders Choice fetch 1½c.

HOPS—
Imports, 163 bls. Exports, 17470 lbs.
Receipts of the week, 219 bls
Receipts from the interior of the State are naturally limited, most of the stock on hand having been already marked to warehouses here. The Australian steamer from Portland brought 206 bales which have been placed at about 21c for export. No material change has occurred in the Eastern or foreign demand.
Quotations may be put @ 19 to 22c for choice and 16c to 18c for fair.

WOOL—
Receipts of week, 67 sks.
For Wool market see Wool Department.

POULTRY—
Responde Turkeys, Live Gobblers, 25@26c per lb; Turkey Hens, 25@26c; Dressed, 26@28c. Young Roosters, $8 50@9 50; Old Roosters, $8 00@8 50 Hens, $8 00@9 00; Broilers, $6 00@7 50, accordingly as marked, $10 00@12 50 ₱ doz, Geese, $2 25@$2 50 per pair.

GAME—
The receipts of the week have been light and prices have consequently advanced.
We quote: Quail, 1 25@$1 50 ₱ dozen; Hare, $2 50@3 50, Rabbits, small, $1@$1 25, cotton tail $1 25@$1 50 ₱ doz. Teal, $1 50, Sprigs, $1 75@2 25@2 50, Widgeon, $1 50@1 75; Mallards, $4@4 25 ₱ doz; canvas backs, $5 00@6 00 per doz, common sorts, $1 00@1 50 ₱ doz; do, English, $2 50 ₱ 3 00 ₱ doz; Grey Geese, $2 75@3 25; White Geese, $1 25@1 50; Honkers, 4 00@5 00 per doz. Brant, $1 25@1 50

HIDES, SKINS, ETC.
Imports, 1012 bdls Hides. Exports, 1 bl Hides.
Heavy Salted Steers, over 55 lbs, 10@10½c per lb
Medium Salted Cows and Steers, 50@55 lbs, 8½c
Light Salted Cows and Steers, 30@50 lbs, 8c pr lb
Salted hides, 30c per lb. Salted Veal, 11c per lb
Salted Calf, 15c per lb
Dry Hides, usual selections, 18@——c per lb; Dry kips, do, 18@—c per lb. Dry Calf, do, 18@20c per lb.

THE WINE MARKET.

In wine and brandy we hear of no transactions from first hands this week.

For Exports and Imports, see Merchandise Markets

Brandy—Original Government Gauge in Bond made from Wine—

Bbls	'81— 95@$1 10	'82—85 @	95 cts

RETAILERS' CORNER.

The business of the week has been interfered with by the inclemency of the weather, but the rains, though for the moment excessive and, in some cases, disagreeable, hold out the promise of profit in the future. In another week or so we may naturally expect that the roads into the interior towns will be in condition for heavy hauling. At present, the wholesale business of this city is limited to those towns which are on the line of railroads with which through connection has been maintained.

The demand for Refined Sugars is good. The prices in New York for Granulated have not changed during the past week. The demand on that side is reported dull, both for Refined and for Raws.

Grocers would gladly stock themselves for a year to come with Raws, at the present abnormal prices, if the stocks on the market were available. Importers, however, are not willing to sell in advance of actual receipts. The market closes firm.

The *Chronicle* says the new California Sugar Refinery is a failure and a lot more nonsense. The facts are that the great demand here at present is for Granulated, Cube and Powdered Sugars, and of these the new refinery can and has turned out more in quantity and superior in quality to anything the old refinery could supply. The demand for Crushed being less than for the descriptions mentioned, the machinery for producing that kind will be the last to be put to use. What demand there is at present for Crushed is supplied by the American Refinery.

There has been a great change in the demand for Refined Sugars, of late years. Formerly the largest proportion of orders was for Crushed; now nearly sixty per cent of the orders are for Dry Granulated, and the balance is divided between Cube, Powdered, Extra Granulated and lower grades.

The estimates of the Beet Sugar crop of Europe are increasing—2,300,000 tons; the last estimate we saw was a little under 2,000,000 tons.

Hawaiian Rice is very firm at 4¾c, regular time. China is quiet at unchanged prices. The steamer Oceanic, which arrived on Wednesday, brought a large cargo of Rice.

The local demand for Coffee has been very light, the difficulties of transportation preventing business. The demand for overland shipment is good, but orders can not be filled at present for lack of suitable grades. These, however, may be expected on the next Panama steamer.

Jobbers inform us that the reason why so large a proportion of the last crop of California Raisins are lying unsold is not, as makers tell us, because of unusually large importations from the Mediterranean, but from the fault of the growers. The raisins delivered in this city a year ago were largely, and more generally this year, inferior. Even Riverside, which once claimed some superiority for its raisins and attempted to establish standard brands, has let the quality run down. In striving for quantity, quality has been sacrificed and consequently Eastern buyers are refusing to touch California raisins. This statement of leading wholesale grocers in this city seems to confirm Mr. Wetmore's remonstrance against over forcing raisin vines by excessive irrigation.

On the other hand, raisin makers say that the Riverside growers have not indulged in unusual irrigation, and that the failure in quality this last year is due to climatic causes, which affected the quality and yield of Muscatel grapes over the whole State. Again, Mr. W. B. West assures us that the importations of Deuia or Valencia raisins has doubled within the past three years and that our San Francisco jobbers hardly state the case fairly.

In Provisions, California Canvassed Bacon and "Our Choice" Hams are a shade higher. The market is still dull.

Liverpool Salt, owing to the advance in inward freights, has been marked up about $2 per ton.

We note some slight advances in Farinaceous Goods, Drugs and Illuminating Oils.

MERCHANDISE MARKETS

BAGS AND BAGGING—

Imports, 3583 bls gunnies. Exports, 2 bls bags.

The increased favorable prospect for a large crop yield has had the effect of causing more inquiry for standard Calcutta Wheat Bags, and the result is that considerable purchases have been made for forward delivery, at prices fractionally higher. The cause of no material advance being recorded is that stocks are large and holders are fearful that any positive increase in their asking price would cause free shipments to be made by steamer from supply ports.

It is well known that the last season's jute crop in Calcutta was inferior, and consignees and consumers here are afraid that incoming consignments of bags will be far below the quality of those received in previous years, and in connection with the matter we submit the following correspondence from a leading firm in Calcutta, they writing under date of December 4th 1883.

"We note your remarks regarding the quality of the goods, etc., and you may rely on our taking every precaution to ensure good delivery, but, as we have already warned you, you must not expect such uniform good deliveries as last season, especially as regards color. It is not to be expected in the face of such generally poor jute as there is this season that mills can turn out goods of such good appearance as last season, and it would be well if you prepared your friends according ly.

BORAX—

Exports, 60 lbs.

The market is flat, and sellers are disposed to meet buyers. The consumption here is restricted to a few tons monthly. Prices for trade, in round lots, nor for concentrated and refined respectively:

In New York, where the trade is large, 9c 10c is asked from first hands. English refined is held at £39@40 per ton of 2240 lbs, and a good trade at these figures is reported.

BRICKS AND FIREBRICKS—

A. G. Platt's circular says:

"There is at present quite a disparity between spot and future prices. The stocks in dealer's hands was all sold by importers at a low figure consequent on low freights ruling last year. For prompt shipment importers are loth to shade anything under following prices. As the trade are well supplied, business in this article is much restricted."

	Spot Ex. Wharf	To Arrive
ns Firebricks per M	35 00	32 50
ns	35 00	32 50
rrs	32 50	30 00
crag	32 50	30 00
thern Knowe	30 00	28 00

CANNED GOODS, ETC.—

Imports, 1705 cs. 2273 cs canned meats, 20 cs milk. Exports, 721 cs canned goods, 40 cs milk.

Business in canned goods is extremely dull, owing in great part to the interruption of travel in the country. Now that the railroad reopened a great movement may be looked for. While our quotations are approximately correct, they are subject to a slight shading in some instances.

We quote California assorted Table fruits, 2½-lb cans, $2 25@2 50 doz, do pie fruit, 2½-lb cans, $1 50 doz; do gallons Table fruits, $9 00 ₩ doz. Pie fruits, $1 25. Pineapples, 2½-lb cans, $1 15 ₩ doz. Jellies, $2 25; Jams, $2 25 ₩ doz. Pickles in 5 gallon kegs, $14; California Sauce, pints, $3 50; ½-pints, $1 75 ₩ doz. Ketchup, $1 25@1 75 ₩ dozen. English Groceries—Cross & Blackwell's Pickles, pts, $4; qts, $6 75. Olives, qts, $7; Lunch, qts, $9 50. Sauces, $9 00 ₩ case. Jams, $1 00. Jellies, $5 00 ₩ doz; Fry's Chocolate, 50c ₩ lb; Cocoa, 45c ₩ lb; Colman's Mustard, 60c ₩ lb.

CEMENT—

Imports, 25 bbls lime. Exports, 550 bbls lime.

A. G. Platt's Circular says: The market still remains in a dull condition and prices are not remunerative to importers. Only a few small parcels of Cement was imported than we needed for consumption, hence we have still large stocks on hand. As most of the low priced invoices have arrived, in the near future we look for a slight upward turn. A lately arrived shipment is yet offering at a shade under following quotations. For loading full prices are asked.

	Spot.	To arrive
Eastern-Rosendale, in round lots	$2 20	2 15
English choice brands, in round lots	3 12½	3 10
English outside brands, in round lots	3 00	3 00

COAL—

Imports, 11461 tons.

There were liberal arrivals again this week of Coast Coals, these combined with seasonable showers have caused somewhat softening in prices.

The dissatisfaction over "Umatilla" will not interfere with the Seattle Colliery getting their Coal to market, as sailing vessels here are procurable at low rates. A cargo of Scotch Splint (2570 tons) has also met with a disaster. The quality of this character of Coal here and "to arrive" within the next six months is extremely high, in fact there will be intervening periods when there will be neither West Hartley nor Scotch Splint here.

There are very few cargoes of Foreign Coals loading for this market compared with former years at this season; buyers fear large arrivals later, and ship owners will not haul on vessel's account, as the indications to seek this Port are not very enticing.

Importers' prices of coal from Europe and Australia, to arrive: Australian, $8 00@8 25, Liverpool Steam, $8 e; $8 25, West Hartley, $8 75@9 00, Scotch Splint, $8 e; Cardiff Steam, $7 75@8; Lump Lehigh, $13@13½, Egg Hard, $11@11½; Cumberland, bulk $10@10½. Spot prices are as follows: Australian, $8 00; Liverpool Steam, $8 00, West Hartley, $8 e, Scotch Splint, 9 00, Cardiff, $8 00; Lehigh Lump, $13, Cumberland, bulk, $11 50, Egg Hard $11 50.

COFFEE—

Imports, 15 bags. Exports, 3005 lbs.

The market has been quite inactive, the late storms having in a great measure interrupted transportation throughout the interior. There is a good demand for Eastern shipment, which could not be filled for lack of suitable qualities. Prices remain firm at previous quotations, viz:

Salvador, fair to good	11½@12c
Guatemala, fair to good	12½@13
Costa Rica, fair to good	12¾@13¾
Guatemala, prime	13¾@14
Mocha, prime	14 @15
Salvador, prime unwashed	@13

CORDAGE—

Imports, 6 coils. Exports, 7 coils.

We now quote as follows: Manila, 13½-inch (7-16 dia) and upward, 15c; do, 12-thread (⅜ dia) 15¾c; do, 9-thread (⅝ dia), 15-16c; Sisal Rope, 3 to 6 Bale Rope, 2, 3 and 4-thread, 15c; Manila Cordage, tarred, 2-in (⅝ dia) and upward, 15c; do Lathyarn, 15c. Discount to the trade. Sisal Rope, 9-in (7-16 dia) and upward, 10½c; do, 12-thread (¾ dia), 11c; do 6 and 9-thread (⅝ and 5/16 dia), 11½c. Sisal Bale Rope, 3 and 4 thread, 10½c.

DRIED FRUITS—

Imports, 5 cs's Prunes. Exports, 2148 lbs Dried Fruit, 118 bxs Raisins.

Trade is dull, and what little there is doing is of a retail character, no considerable lots being called for. Prices are unchanged.

We quote: Sun dried Apples, 8@8½c ₩ lb for sliced and 6½@7½c for quartered, Alden and Plummer, 11 @12½c; Blackberries, 12½@13c; Figs, 7c for pressed and 4@5c for unpressed. Smyrna (or c) Nectarines, 8½@9c; Peaches, 15@16c for peeled and 11@11½c for unpeeled, 5@5½c for choice and 7@8 for sliced; machine dried, 10@12½c; Plums, 12½@13c for pitted and 3½@4c for unpitted, German Prunes, 9@10c; French Prunes, 10½@11c for 40@50 for box, Moorcraft and Moore, 7½ @8 box for London Layers, with the usual advance for ractional boxes.

FISH—

Imports, 96 pkgs 2477 cs Fish, 100 cs Salmon. Exports 10846 cs Fish, 3423 cs Salmon.

Columbia River Salmon is very scarce; Sacramento River Salmon almost entirely out of market. Some little business doing, but almost entirely for small parcels.

We quote: Columbia River, $1 27½; Sacramento, $1 17½, 1 0 b; barrels, $8@9; ½ barrels, $4½@5½; California Cod, 4c ₩ lb; 50 lb bundles, 5½c; selected, in cases, 6c; boneless, 7c.

IRON—

Imports, 4067 pcs 568 bdls 466 bxs Iron, 425 bdls 393 pcs Iron Pipe, 50 bbls Steel. Exports 341 pcs Iron, 12 pcs Iron Pipe, 5 pcs Steel.

There is still but little business doing. The stocks on hand among the consumers are fully up to their requirements, hence there is no inquiry. There is an average quantity coming, melted, which will be naturally needed later in the season. Very little is being ordered, so that during 1884 our stock must become considerably diminished, and prices will relatively improve.

Importer's prices of Pig Iron, Foreign and American, to arrive: Shotts No. 1, $27½@—; Glengarnock, $26 50@—; Eglinton, $25 00, Clay-Lane White, $23 50; American, Eastern Soft, $28 00; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00, Clay Lane, white, $23; Shotts No. 1, $28 50; American, Eastern, $25. Clipper Gap No. 1, to 1 $32 50@$35 00.

Black Sheet Iron—Nos. 14 to 16, 5c ₩ lb; Nos 18 @20, 5½; Nos 22 to 24, 6; No. 26, 6½; No. 27, 6½; No 28, 6¾. Galvanized Corrugated Sheet Iron, Nos 10 to 20, 10c ₩ lb; Nos. 22 to 24, 11, No. 26, 12; No. 27, 12½; No. 28, 13¾; second quality 1c ₩ lb less than first.

We quote Iron Pipe, discount, 45@50, Manufacturers' list; per ft, Black—¼ inch, 42 lbs ₩ 100 ft, 8c 3/8, 60 lbs 9c; ½, 85 lbs 11c; ¾, 112 lbs, 13½c; 1 167 lbs, 18c; pipe, 220 lbs, 25c; 1¼, 290 lbs, 33½c; 1½, 367 lbs, 40c; 2, 570 lbs, 57c; 3, 755 lbs 95c; 3½, 905 lbs, $1 25; 4, 1072 lbs, $1 00. Galvanized—¼, 11c; ⅜, 12c; ½, 15c; ¾, 19c, 1, 22 1¼, 30c; 1½, 37c; 2, 46c; 2½, $1 e; 3, $1 30.

LEATHER—

We quote: Sole, for shipment, 18@18½c ₩ lb; Rough do, 18c; Best Sole Leather, for this market 23c; Medium do, 25c; Light do, 28c, Harness, 25@ 30c; Harness No 2 do, 24

MATCHES—

We quote new price list: Block 32½c per gross; Telegraph, 55@70c per gross, according to size; Swift & Courtenev's Parlor, $1 75 per gross.

OILS—

Imports, 177 cs oil. Exports, 50 cs Oil, 1 cs Sperm Oil, 2103 gals Whale Oil.

We quote: California Castor Oil, No 1, $1 25 ₩ gal.; No. 2, $1 00. The Pacific Oil Work's list for Linseed, 65c ₩ gal for boiled; 62½c for raw in 100 bbl lots. We quote: Eastern linseed oil, 61½c; winter strained fard oil, 95c, in bbls; Cocoanut Oil, in bbls, 5¾c; China Nut Oil, 80c ₩ gal, Coad Whale, 37½c; Arctic Whale, 60c; Cal Neatsfoot, 85c; Eastern do, 90, Naphtha, 20c; Red Oil, 5¾, California olive Oil, $1 ₩ gal or $12 ₩ doz.

PAINTS—

Exports, 265 cs paints, 17 cs varnish, 219 kgs white lead.

Business is quiet at present with good prospects of a lively spring trade.

We quote White Lead 6½c in ton lots; and 6¾ in 5 ton lots; Lithargе, 6, Ochre, Yellow, dry, 3 to 3½c; Ochre, ground, 5 to 6 cts; Venetia Red, 2 to 3c; do, in oil, 5 to 6c, Chrome, dry, 18 to 30c; do, in oil, 18c; Red Lead, 6 cents.

PROVISIONS—

Imports, 12153 lbs bacon, 50 bbls 25 cs beef, 1196.5 lbs hams. Exports, 5236 lbs bacon, 82 bbls beef, 7285 lbs hams, 7723 lbs lard, 13 bbls pork.

We quote: California hams, 13½; Eastern, 15½@16c; do, choice large hams, 15½@16c; California bacon, 11½@13½c; California covered bacon, 14c; extra clear sides, 12¾@12¾c; California shoulders mess pork, $20 per bbl; prime mess 18½, clear pork, $21 per bbl; extra clear do, $22 per bbl; pig pork, $24 per bbl; mess beef, $14 50 per bbl; extra mess beef, $15 50 per bbl; family beef $17½ per bbl; Eastern refined lard, in tes, 13¾c per lb; California refined lard, in tes, 11c per lb, 10s, 10c; 5s, 10¾c; Banner lard, 10s, 12¼c; 5s, 13c; 3s, 13¾; Fairbanks lard, 13¾c for 10s, 13¾c for 5s, and 14c for 3s.

QUICKSILVER—

Exports, 16 flasks.

There is some activity for domestic trade and sales have been made to the trade at 37½c. Holders are asking 37½@37½c. The price in London was advanced on the 19th to £5 7s 6d per flask, with an intimation that higher prices would rule shortly. Receipts in town continue light, about 800 flasks so far this month.

RICE—

Imports, 1983 lbs. Exports, 53 556 lbs.

Quiet at unchanged prices, viz: $4 45@4 10 for Mixed, $4 6@4¾ for No. 2 China, $5 25@5 50 for fair No 1. Extra No 1 $5¼@5¾. A small lot of New Mixed has been received and sold at $4 65@4 70. The steamer Oceanic has brought 61,882 mats from China. Hawaiian rice is in light demand with transactions amounting to 300 bags for the week at $4¾, 60 days.

SUGAR—

Imports, 24085 bags Raw, 21000 lbs Refined. Exports, 11650 lbs Refined.

The California demand is good. From New York, by telegram, we learn that Granulated is quoted at 7⅝. The market for both Raws and Refined is reported dull.

Grocery grades of Island Sugars are selling freely at prices ranging from 6⅜@6¾ and some extra choice at 6¾.

The sales during the week have been 1,095 kegs at 6¾ and 2,000 bags at quotations. The above sales were all made on Wednesday. Jobbers would buy more largely if the Sugars were here. The market closes very firm, though the steamer due to-morrow is expected to have on board large supplies.

We quote local refinery rates, prices subject to change without notice.

(A) Pat Cube Sugar, in bbls, 10¾c; (A) Crushed Sugar, 10¼c; Extra Powdered sugar, in barrels, 10¼c. Fine Powdered sugar, in barrels, 10⅜. Dry Granulated sugar, in barrels, 9¼c; Extra Granulated sugar, in barrels, 9¼c; Extra C, 8⅝c; Golden C sugar, in barrels, 8⅜c; D sugar in barrels, 7¾c, Extra Fine Powdered, in bbls, 11¾c; Confectioners' (A), 10c; El Dorado C, in barrels, 9¼c, Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ¼c, and boxes, ¾c, more for all kinds.

TIN, ETC—

Exports, 162 pigs.

A. G. Platt's Circular says: Although there is at present but little doing in tin plates prices are daily gaining strength. This is due to the fact that the demand from salmon canners for the year's requirements will soon begin. Importers who have held Tin in warehouse all winter are hopeful, that as the shipments on route are light compared with previous years, they will be able to sell at a fair figure.

A 1s Grades		
Tyspitz	$6 15	6 25
Good B. Y. "

THAT STREET-CLOSING AFFAIR.

The whole of this peninsula which we call the City and County of San Francisco has been divided upon the official map into small lots called blocks, and it is almost impossible to find a piece of ground large enough for a great manufacturing establishment which is not cut east and west by projected streets. If Krupp, with his 10,000 workmen, or even much smaller manufacturers, wanted to settle in San Francisco, they could not do so unless they could get the consent of the Supervisors to close some of these useless streets. The Union Iron Works has commenced an enterprise that will involve an outlay of not less than a million in new buildings and new machinery. Some of the largest and finest machine tools in the United States and equal to anything in the world are now being manufactured here. The company proposes to build all classes of machinery, from the smallest to the largest, to repair and build first-class iron ships and ocean steamers, to give employment to over one thousand laborers and mechanics and draftsmen, that is, to stand as Providence to five thousand men, women and children and insure them homes, comforts and plenty. But these foolish streets that start from nowhere and lead to nowhere and can never be traveled by any one except their own employees, for honest purposes stand in the way, and, unheard-of folly, the people who object are not neighboring property owners, but one of the very class of mechanics who would be most benefited by the enterprise. Mechanics are usually supposed to be men of more than ordinary intelligence. Do the seamen show any? They urge that their Union has had trouble with this company; the company deny that they are in fault; but, whether any wrong was done on either side, (and to us it seems that it is simply a misunderstanding promoted by over hasty tempers), what has that to do with the closing of the streets? The Supervisors of this county were not elected to fight the cause of the Blacksmiths' or any union, but to manage the affairs of this city for the best interests of the whole community. The Blacksmiths' Union is a very small part of that community, and the greatest good of the greatest number should prevail, even if they, the members of that union, were to be injured, whereas they would be largely benefited by the action they are opposing. The course of the officers of this Union before the Supervisors has been an impudent attempt at an act of tyranny and deserves the severest rebuke. If their wish was granted, it would be an atrocious precedent for other follies. As an instance, the *Bulletin* and *Call* newspapers have evoked the enmity of the Typographical Union. Suppose these proprietors were to erect a magnificent building for their newspapers on Market street and expend a quarter of a million in stone, brick, machinery and type, and when they came to the Board of Supervisors for a permit to erect the necessary steam boiler their application was refused at the instigation of the inimical Printers' Union. Unions of working men are very powerful organizations, and sometimes that power is exercised for good, and sometimes for evil. The unions of Sheffield, England, did more to build up some manufactures in the United States than our protective tariff. It should not be said of San Francisco mechanics as of the Bourbons: "they never forget; they never learn."

INTOLERANT PREACHERS OF TEMPERANCE.

Bonfort's Wine and Spirit Circular of the 10th, quoting the San Francisco *Report* on grapes and prohibition, takes Dr. McDonald to task for having made a fortune out of a bitters made from vile whisky and vinegar. A party, some of whose most honored members are confirmed drunkards, may well choose for a standard bearer a reformed dealer in a noted drunkard-making concoction. New converts are always more fanatical than those who have walked in the faith from their youth up. But there is something very absurd in preachers of the gospel of temperance directing their heaviest artillery against wine makers and wine drinkers. Wine drinking prevents drunkenness, by cultivating the palate until it revolts against more fiery compounds, and teaches the habit of controlling the appetite. Look at Europe: In those districts in which wine is made and is cheap and plentiful, the people are proverbially sober; the intemperate people are found only in those countries in which the grape will not ripen. If these prohibitionists desire to reform the habits of Californians as regards the use of stimulants, they would encourage grape growing for wine making purposes. They would use wine, with or without water, at their own tables. They would teach their children to drink wine in moderation, as the best preventive against hard drinking in their mature years. They would advocate the more general use of wine instead of whiskey. They would seek to pass laws forbidding the adulteration of wines and liquors. They would petition Congress to forbid the withdrawal of domestic spirits from bond until they were so matured by age, that they would be comparatively harmless, unless taken in great excess. They would lend a helping hand to every movement in favor of a gradual reform of the evil of intemperance. This would be a sensible and practical course and one that must result in some good, and in our turn. But, instead of this, they give all their energies to an impossible achievement, prohibition, meaning thereby the prevention by law of the use or manufacture of any stimulant. Every one, but themselves, knows that prohibition, as it is called, does not prohibit; every one but themselves knows that making the natural satisfaction of any of nature's cravings unlawful, leads to unnatural abuses. The truest temperance men in this State are the grape growers and wine makers, and perhaps that is the reason why the prohibitionists hate them. It is the old story of fanaticism in religion repeating itself in another form. John Knox hated a pious Catholic more than he hated an irreligious Protestant, and Catholic tribunals were more cruel toward those who, while leading holy lives, denied the infallibility of the Church than towards the wickedest of those who outwardly adhered to the tenets of Rome. If the prohibitionists were sincere, they would at least acknowledge that to a limited extent the wine maker was helping the cause of temperance, as the martyr makers of earlier days should have recognized that every man who believed in Christ was a Christian, though not a member of the church that happened to be dominant in his day. Intolerant preachers of temperance are enemies of morality, as intolerant Christians have always been the enemies of religion.

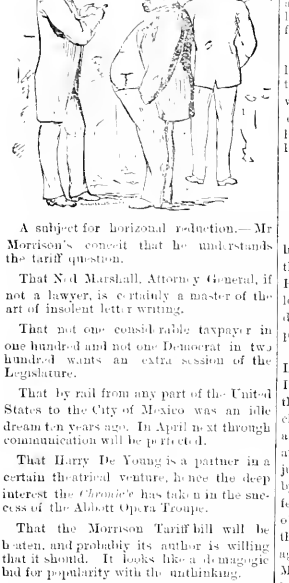
A prayer for all workers: "Protect us from the fruits of foreign pauper labor."

PERNICIOUS NEWSPAPERS.

The Chinese have, undoubtedly, been a great drawback to this State. The knowledge of their presence amongst us in hordes and the unfair competition they force on our white labor has kept thousands upon thousands of decent, industrious and respectable families of our own race out of our State. But, bad as the effect of Chinese labor has been on immigration, we honestly believe that pernicious newspapers have been the worst enemies of California. And now comes another of these poisonous sheets, the *Evening Star*; it starts out in its first number with a malicious slander: it says California is a slave State. It assails everybody and everything to curry favor with that unintelligent and dissatisfied class that is to be found, unfortunately, in every country. Every number that has been published so far has apparently been compiled with the deliberate intention of exciting class against class, labor against capital, and of reproducing the troubles of the Kearney agitation and the wild, vindictive spirit which made the adoption of the New Constitution possible. Every number of such a journal which goes abroad becomes an obstacle in the way of settling up this State by a desirable class of immigrants. Such a course may for a time bring dimes into the publisher's cash box, but they are obtained at the cost of all that our best citizens are working for. Large immigration does not only mean more laborers; it means more employers, more small capitalists, more small manufacturing enterprises, more business and more prosperity for all. Advertisers are supposed, as a rule, to be people who are willing to spend money to enlarge their business. Money spent on such papers as the *Star*—and it is only one of a bad class and only noticeable seeing it is the latest born—is spent in inciting turmoil at home, in breeding contempt for us abroad, and in injuring the future prospects of the State.

Attorney-General ("Ned") Marshall is a good example of the successful stump speaker. He can draw a vivid, though exaggerated, picture of the misdeeds of the administration he opposes; he can roll out the name of the "grand old party" and fire the heart of every man in his audience who has voted the straight ticket at every election; he can win any amount of applause from an unthinking crowd, and he can always be depended on to drive into his opponent's camp every intelligent citizen who belongs to what is known as "the floating vote." He can do all these things, and yet, beyond a slight acquaintance with the Practice Act, he knows little of law. And if he knows little of law, he knows less of the amenities of official life. He is a wonderful man in many ways, and it is unfortunate that he always contrives to do more injury to the cause he supports than to that which he opposes.

If some of our manufacturers that have goods suitable for the Australian and New Zealand markets would send small consignments every month or two, to some respectable house, with orders to sell, and however unsatisfactory the account sales might be at first, keep on consigning, they would soon find a profitable business. British manufacturers will work at a loss for months or years to get their merchandise known and appreciated in a foreign market.



A subject for horizonal reduction.—Mr Morrison's conceit that he understands the tariff question.

That Ned Marshall, Attorney General, if not a lawyer, is certainly a master of the art of insolent letter writing.

That not one considerable taxpayer in one hundred and not one Democrat in two hundred wants an extra session of the Legislature.

That by rail from any part of the United States to the City of Mexico was an idle dream ten years ago. In April next through communication will be perfected.

That Harry De Young is a partner in a certain theatrical venture, hence the deep interest the *Chronicle* has taken in the success of the Abbott Opera Troupe.

That the Morrison Tariff bill will be beaten, and probably its author is willing that it should. It looks like a demagogic bid for popularity with the unthinking.

That the radical element of England is poking fun at the Queen's Diary. Yet the exhaustion in a few days of the first edition of 10,000, looks as if it were being widely read.

That there was more truth than poetry in what Senator Miller is reported to have said about Bismarck getting as "drunk as a Lord," though it now appears that Senator Miller never said so.

That if the Nicaragua Canal project falls through, it will be a great misfortune for California, for we have no faith in the construction of the Panama Canal by D. Lesseps' present organization.

That the statesmanlike way to reduce the revenue would be to raise the duty on all foreign articles similar to those we manufacture at home. That would reduce importations and stimulate domestic manufactures.

That school books for the millions of children of the United States ought to be sold by the pound. N either authorship nor composition add one-hundredth of a cent to the cost of production, while an edition of any book suitable for use in a primary school runs into millions.

That the *Examiner* should be ashamed of its course. Every intelligent Democrat in this city knows that its clamor for an extra session is made in the hopes of dragging Governor Stoneman into trouble and advancing George Hearst in his place. That's very poor democracy.

That considering the number of members of the British House of Commons who share Mr. Bradlaugh's religious or want of religious views, though they are more careful about expressing them, it looks as if there was a good deal of hypocrisy lying around loose in St. Stephen's chapel.

That the fight of the Blacksmith's Union against the application of the Union Iron Works for the closing of a useless street, which, according to the map, runs between the shops of the immense establishment they are building at the Potrero, is a very foolish one.

That Morrison is clearly without the industry or ability to master the details of a good tariff bill. His political sagacity and knowledge of the art of managing men and conventions are of no value when he had to sit down to the patient labor of framing a tariff bill.

That tariff for revenue with incidental protection is political trickery, and any party that resorts to such a stale dodge to catch votes ought to be beaten. Protectionists ought to have the courage of their principles and stand squarely on "a tariff for protection with incidental revenue."

A QUESTION OF POLARIZATION.

Some months ago, a difference occurred between the American Sugar Refinery, of this city, and the expert of the Custom House on the amount of duty payable on a lot of sugar imported from Manila. The difference was paid by the company under protest.

The testimony in the case against Eugene L. Sullivan, Collector of Customs of the Port of San Francisco, which was tried in the United States Circuit Court, was concluded Friday, and at a late hour in the afternoon Judge Sabin charged the jury and they retired to deliberate. One of the jurors having been taken ill in the morning, by consent of both sides, the matter was referred to eleven jurors. At about ten o'clock Friday night the jurors reported to the court that they had been unable to agree, and Judge Sabin directed that the Marshal take charge of them for the night, but if they agreed they could write out a verdict, deposit it in a sealed envelope with the Marshal and then return to their respective homes until Saturday morning. At the time the disagreement was reported, the jurors stood eight for plaintiff and three for the defendant. Shortly after, the jury agreed upon a verdict in favor of plaintiff. At the opening of the Court, Saturday, the following verdict was rendered: "We, the jury, find for the plaintiff, and assess the damages at $2,857.35, and interest from October 13, 1883, at six per cent per annum, being $57.15; total, $2,914.50."

The action was to recover the difference between the duty charged by Government, at the rate of one and eighty-eight one-hundredths of a cent per pound, and plaintiff's estimate of the duty, viz: one and eighty hundredths of a cent per pound, or eight one-hundredths of a cent per pound. The jury found in favor of plaintiff for the full amount claimed.

On the trial, Professor Hanks testified that the polariscope used by the American Refinery to test sugar is the best in use.

E. L. G. Steele testified that the sugar is constantly tested during the process of preparation in the refinery with the best instrument known.

It came out in evidence that the instrument used by the Government to polarize sugar is decidedly behind the times, and it cannot be relied upon in comparison with the more modern and exact instruments used by refineries. The verdict, therefore, is no reflection upon the Collector or Government Chemist, the blame resting on the antiquated instruments which Government officials are compelled to use.

Tennyson wrote:

"Nor toil for title, place or touch
Of pension—neither count or praise;
It grows to guerdon after-days."

But he accepted a peerage and "a that."

The Sugar Refinery Canard.

The *Chronicle* of Tuesday had a long article about a new sugar refinery in this city. In this case the *Chronicle* we believe cannot be justly charged with having invented the canard, for such a rumor was in circulation on the street three or four days before it appeared in the *Chronicle*. No one as yet has been able to trace the source from which the report came, or information who are the capitalists who are to put up the coin. Even the guess as to the quarter from which these capitalists are to come are widely different: some say it is San Francisco, some New York, and some say it is the Bremen friends of Hackfield & Co., of Honolulu, who contemplate sugar refining in San Francisco. The assertions in the *Chronicle* that the crop of the Hawaiian planters has been secured is sheer nonsense. The reporter, with the usual ignorance and disregard of facts of his class, put those lines in at a venture. The *Chronicle* itself has already published the facts about the crop now being or to be harvested. Fifty thousand tons have been secured by the California Sugar Refinery and the remainder has been sold to the new St. Louis Refinery, with the exception of 1,000 tons taken by the Standard Sugar Company, of Alvarado, and a small quantity of grocery grades being placed in this market. Certainly no one has contracted with the Island planters for the sugar crop of 1885; even the *Chronicle* ought to have known that was an impossibility, because no one can tell what the duties on sugar will be when Congress adjourns and therefore what disturbance in the world's market will occur. We will say nothing of the folly of guessing at next autumn's European beet crop, or at the effect on the Islands if the repeated assertions of the *Chronicle* that the Hawaiian treaty will be abrogated should prove true.

But passing from the cost of raws and the nonsense about securing them before the foundation are laid for a new refinery or the plans for the machinery are drawn, let us look at the question from an investor's view. The California Sugar Refinery is at least the equal in capacity and a hand in efficiency in machinery, of anything in the United States, if not in Europe. It is controlled by a gentleman who fought his way up against the greatest odds. He pitted his moderate capital, backed by his born genius for administration and manufacturing, against the wealth which centered around the old Bank of California, and fairly won the fight by giving the public cheaper sugar, yet always making money while his competitors were losing. He finally rendered the San Francisco and Pacific Sugar Refineries as corporations practically bankrupt, their assets being two good sized lots encumbered by piles of old bricks and some machinery, worth a cent or two a pound as scrap iron. None but a lunatic would ever set that old-fashioned machinery running again. Even the buildings are not adapted for the modern processes of sugar refining and before a successful refinery could be established on that ground, they would have to be torn down and rebuilt. Who will do this, in face of the fact that there is first-class machinery for refining in this city which can produce more sugar than the market can take five years hence, even allowing for any reasonable growth of population in the interval. Under these circumstances, any serious attempt at competing in sugar refining would not only require a large outlay in buildings and machinery but, before the supremacy could be assured, it would almost contemplate the sacrifice of many millions of capital in the experiment. The project as was said as we would be on a par in dispensing the Pioneer Woolen Mill of this city in the present condition of the market for woolen goods.

TOBACCO MARKETS.

SAN FRANCISCO. The usual transactions in leaf during the week, [illegible] between large, owing, probably, [illegible] such as the weather and the [illegible] Chinese labor. There are, however, [illegible] in progress for sales of [illegible] Sumatra, of Pennsylvania [illegible] Havana intimates to be enquired [illegible] as soon as an active demand.

The [illegible] cigars of this city are passing [illegible] and have demanded higher [illegible] per cent. on the principle of [illegible] material raise, without regard to the [illegible] manufacturer might be paying [illegible] another was paying eight. The [illegible] during last Sunday to consider the [illegible] and we understand came to [illegible] that several [illegible] have actually [illegible] the demand of their employees. We [illegible] of the strippers and packers have demanded an [illegible] and more.

The [illegible] transacted [illegible] during the week has been very fair considering the condition of the roads in Lower [illegible].

The continuous [illegible] rain, warned by the floods in the valleys of the Sacramento and the inundations of the [illegible] streets of Sacramento, [illegible] to [illegible] to higher ground for the safety of many of the warehouses. How far the [illegible] have been damaged by not yet known, but the [illegible] of 1874, when according to the *San Francisco Chronicle* was 6 to 8 feet on the ground or sale floors. The tobacco [illegible] warehousemen, dealers and [illegible] all of the [illegible] on higher ground, or [illegible] to [illegible] the floods has been enormous, [illegible] of the [illegible] with the staff [illegible] of which we [illegible] Whatever [illegible] regret that suffering should be done, [illegible] quarters.

[U. S. Tobacco Journal.]

NEW YORK, Feb. 9th. Notwithstanding the presence of a [illegible] of buyers, finally [illegible] and larger [illegible] in the market the transactions [illegible] Most buyers were looking for [illegible] and would not buy what was there [illegible] and did do [illegible] when prices were [illegible] with sellers. As there is little or [illegible] to say, in job lots [illegible] to say, in job lots [illegible] was the subject of the general [illegible] report of leaves. Holders of [illegible] with 50@[illegible] assort wrappers in a lot of [illegible] and demand from 22 to 24 cents. The sales of [illegible] for the week [illegible] number about 400 cases [illegible] at 20 to 24 cents. There were also [illegible] of [illegible] 382 Pennsylvania [illegible] 24 cases Ohio.

The [illegible] sales that took place consisted to a [illegible] of [illegible] bought on [illegible] in the country [illegible] and [illegible] by country packers. Now that the [illegible] and specs of [illegible] are known to the wholesale [illegible] assortable, a great deal [illegible] will be done [illegible]. In many [illegible] will be [illegible] disappointed, they [illegible] and [illegible] the [illegible] term [illegible] the [illegible] buyers pronounce as being [illegible] the country.

The [illegible] of the [illegible] apathy exists, which [illegible] to [illegible] is imparted [illegible] is unabated.

Certain [illegible] that the manufacturers of cigars who require [illegible] must [illegible] over till the new [illegible] and [illegible] of [illegible] in Sumatra, at high [illegible]. Very few manufacturers believed that when [illegible] ago, we predicted a [illegible] for the present time, such as [illegible] and [illegible] And even to-day, with the most [illegible] [illegible] of seeing a market bare of [illegible] when [illegible] spring, a difference of a cent or two [illegible] prevents the consummation of a sale. While [illegible] difficulty [illegible] consumers [illegible] [illegible] [illegible] certainly is no complaint [illegible] to [illegible] consumer's ability.

Speculation [illegible] to the [illegible] very lively. The sales of the week are estimated [illegible] less than 500 bales, at [illegible] from $1.15 to $1.75.

The [illegible] of [illegible] the reported sales aggregating 1,000 bales, mostly new, at 85 cents to $1.30.

All journals like the S. F. MERCHANT, that are intended to be read, re-read and preserved for future reference, are abandoning the blanket style for the quarto form. Advertisers may draw an inference from this: one style of paper is glanced over on its day of publication and thrown aside, to be used to light a fire or wrap a parcel, the other is retained and valued for years. An advertisement twelve months after publication may be as effectious in the MERCHANT in bringing business, as on the first day of its appearance in our columns.

With the certainty of a good year ahead for our viticultural and agricultural readers, now is the time to subscribe or re-subscribe to the MERCHANT, and keep informed on matters pertaining to their peculiar industries.

JOBBERS' PRICES.

HOPS.

In Los Angeles county, the acreage last year was comparatively small, the yield averaged about seventeen hundred and fifty pounds to the acre; the average price obtained was seventy-five cents per pound. Last year was an exceptional one in regard to the hop crop the world over, and such prices may not be obtained for years to come, but the yield cannot only be equalled but will be surpassed in Los Angeles county, supposing the price in the future not to rise above twenty-five cents per pound. There will still be a large margin for profit sufficient to justify investment in this important industry.

We copy the following from the San Francisco *Merchant*, a newspaper devoted to the industrial interests of the Pacific Coast. As an exponent of the material interests of California the San Francisco *Merchant* has few equals and no superior:

Among the varied productions of the coast, the hop interest has, during the past season, attained a position of remarkable significance. When the railroad was completed some fourteen years ago, a dealer wrote to a prominent firm in New York and suggested the idea of good hops being grown on the Pacific Coast, and in reply was told that as the Pacific brewers would use only Eastern hops this could not be the case. Nothing daunted, he purchased from the "Coe" yard at San Jose, two hundred and forty bales and shipped them as an experiment. The result justified his judgment, for shortly came this telegram: "Hops first-class; have to serve impurchous on parties who are putting the "Coe" brand on Eastern Hops." Since then the export has been continuous, and though the shippers have had much to contend with, and sometimes heavy pecuniary losses have arisen, the fact has been established that hereafter the Pacific Coast must be regarded as an important factor in the world's supply, both as regards quantity and quality. As yet, none of the diseases, climatic or inherent, which often curtail the yield of older countries, have effected the production here, and the product is, and promises to be only limited by the acreage cultivated. To what extent it is prudent to extend that acreage is a problem yet to be solved, but in an article which is of limited consumption, and the demand for which is not expansive, it would be well for intending growers to "go slow," remembering that a year of prices like this seldom occurs, and that a reaction to non-remunerative rates is more than likely to follow.

For Vineyardists to Consider.

It is now being admitted (what we stated some months ago) that the vineyards of France are being rehabilitated, and that the prospects are favorable that in the near future the yield of wine in France will be larger than ever before. Accordingly our vineyardists had better bestir themselves and see to securing a home market for native wines. Let them endeavor to have California hotel keepers place good, sound, native wine upon the table, and include the best brands of home wine in the lists. Let them persuade California saloon keepers to carry in stock the best of natives wines, and to sell the same, under true names, at reasonable prices. Let them use good wine at home upon the table, and encourage their neighbors to do likewise. Let them or their agents, the State Viticultural Commissioners, follow the MERCHANT's excellent advice by petitioning the steamship companies to keep California wines on board their vessels, and give them the preference when possible. Let them strive to make wines of great excellence which will conquer a market in other States of the Union and those countries in which we can compete. Let them urge their representatives in Congress to turn their guns against the imitation, fabrication and adulteration of wine, and endeavor to secure the passage of laws prohibiting all such fraud.

There is a vast amount of work to be performed in securing a home market, and the sooner active measures are taken the better it will be for the viticultural interests of California. Gentlemen, you vineyardists are the most interested, and it behooves you to be up and doing. As the initiative to a vigorous campaign we advise organization and concentration of forces. One company of well disciplined soldiers acting on a preconcerted plan can do more actual work than a regiment of undisciplined men working without a mutually understood and supported plan of action. So, one hundred vineyardists working in concord can do more towards placing their business on a solid basis than a thousand working discordantly. In union is strength; so *organize!* ORGANIZE! Give us live local and county viticultural clubs with a State central association and much good may be accomplished.—*Pacific Sentinel.*

"This market will close Washington's Birthday," is the way a sign reads on the California Market. We are aware that the observance of Washington's Birthday has diminished of late years, but did not think it would come to this., that it would be closed ent by a market.—*Ex.*

PATENTS

MUNN & CO., of the SCIENTIFIC AMERICAN, continue to act as Solicitors for Patents, Caveats, Trade Marks, Copyrights, for the United States, Canada, England, France, Germany, etc. Hand Book about Patents sent free. Thirty-seven years' experience. Patents obtained through MUNN & CO. are noticed in the SCIENTIFIC AMERICAN, the largest, and most widely circulated scientific paper. $3.20 a year. Weekly. Splendid engravings and interesting information. Specimen copy of the Scientific American sent free. Address MUNN & CO., SCIENTIFIC AMERICAN Office, 261 Broadway, New York.
